NIHB data are limited to claims adjudicated under its purview, and include information related to claimant name, date of claim, date of approval/denial, and reason for denial. Like Jordan's Principle information, these data are structured according to requests, along with information about how the request was processed, which may aid in assessing compensation eligibility. However, communication with NIHB staff indicated several important limitations of using this data for the purposes of supporting compensation claimant eligibility. Despite these limitations, NIHB may be an important source of data to determine claimant eligibility. Other ISC data holdings and programs such as the Community Profiles Database may be of some utility in providing important contextual information.

Additional administrative data from provincial and territorial health and social services could be useful to identify First Nations children who experienced a delay or denial of services. Given the focus of the current project, the project team did not meet with key respondents with information about these data holdings. However, this could be an avenue to explore when implementing the compensation process. There is missing documentation of information related to service referrals or receipt (e.g., from a medical specialist), which could impact the ability to access eligibility for compensation under the Jordan's Principle category.

Overall data availability considerations

Data availability and accessibility varies across the eligibility period—with older data generally being less available. A requirement for all claimants to provide documentation may create inequities in access to compensation. There will be limitations to reliance on written documentation to support compensation eligibility. Accordingly, other mechanisms should be considered or eligible claimants will be left out of the process. Given Canada's decentralized child welfare system, simple concepts, such as the exact definition of out-of-home placement are not understood in the same way across different provinces (or agencies). **If these inequities in data availability translate to a lack of compensation for children who are eligible based on their experiences, this would itself be a manifestation of the discrimination the CHRT and class actions are aiming to redress**. Clear, easily operationalized explanations of these constructs should be developed to identify claimants. This includes concepts such as removal from "home, family, and community" if this were used to determine individual eligibility. Attention should be given to burden on First Nations agencies, both for resources required to access information and to avoid blame and anger being directed to agencies for placement decisions.

Considerations for the Compensation Process

Determining eligibility of claimants will require consistent communication and relationship building, a thorough and clear understanding of the administrative program and its constituent parts, and the operationalization of ethical privacy and confidentiality issues early in the process. This will ensure access to compensation and minimize potential risks to participants. **The compensation process should be developed with the expectation that even if minimal documentation about past experiences is required to prove eligibility, the process may be traumatizing and support needs to be in place for both claimants and communities**.

Based our reviews of process-related concerns expressed by respondents, lessons learned from past settlements, and a review of the retraumatization literature, we have identified key considerations for the compensation process.

Notice plan

Participatory approach to communications strategy. The Final Compensation Framework describes consultation with First Nations youth currently or formerly in child welfare placements, as well as the AFN and the Caring Society to develop some of the resources contained within the Notice Plan (p. 48). A similar participatory process could be applied to the upcoming settlement agreement in order to validate the communications strategy.

Development of Notice Plan materials to ensure accessibility in terms of language, format, and technology. It is important to develop and design materials that are appropriate for the diversity of potential claimants. For example, how will communications to children and youth be designed? How will different social media platforms be used to target different demographic groups? How will this process be determined?

Ensuring consistency and clarity in publicly disseminated materials (e.g., eligibility, process, compensation amount). Clear, public communications around eligibility, process, and compensation amount will be necessary. Clarity will reduce confusion and harm to individuals who ultimately are not eligible for compensation and streamline the process for those who are. Systematically updating the *Notice Plan* according to the settlement agreement (once finalized) will be necessary to ensure consistency and clarity, both for claimants and administrators.

Application design

Planning for inclusive access to the compensation process. The *Final Compensation Framework* and associated Notice Plan states that communication will be adapted based on cultural, historical, and geographical factors. The Notice Plan includes provisions for materials in English, French, First Nations languages, American Sign Language (ASL), and the Langue des signes du Québec (LSQ). To deepen the inclusiveness of the process, specification is needed for which First Nations languages will be included, and how other accessibility considerations will be accommodated (e.g., sight-challenged people).

Articulating what cultural sensitivity means for the process. Although there are multiple references to cultural safety, cultural relevance, cultural sensitivity, and cultural appropriateness in the compensation process (e.g., s. 5.1; Notice Plan, p 4) it is not operationally defined. A key consideration could be how phone lines are staffed to reduce or eliminate wait times and ensuring that staff respond to potential claimants using a trauma-informed framework.

Respecting data confidentiality/ownership. In the documents developed for *2019 CHRT 39*, there is clear attention to the importance of privacy rights of claimants (e.g., Final Compensation Framework, s. 2.4, s. 8.1; Notice Plan, p. 8). In the upcoming settlement agreement process, provisions for individual claimants to confidentially and securely obtain information held at ISC about their own placement history may be necessary for compensation. In addition,, a consent procedure will need to be developed for instances where information from child welfare agencies is needed. These procedures will need to take into consideration the protection of confidential information not just about individual claimants, but also about other family or community members.

Minimization of legalistic language. Inclusion of "simple" language is mentioned several times regarding the communications process (e.g., Notice Plan, p. 14). However, the claim package included in the Notice Plan is lengthy and administrative in nature – similar to forms from past settlements reviewed for this report (Notice Plan, Annex B). Overly complicated legalistic terminology in application materials could lead some eligible claimants to be rejected due to mistakes in application forms. There are likely ways in which the format and procedure for applying can be tailored to facilitate the process for claimants. Examples include a visually streamlined paper application for claimants who do not have access to internet; an online application questionnaire built using

skip logic; and an apply-by-phone option by which claimants are supported in answering the questions posed by trained staff who enter the claimant's information.

Minimization of strict timeframes. The *Final Compensation Framework* describes a Timeline for the Compensation Process, which entails an initial claims deadline of 24 months following the Implementation date, along with a First Extended claims deadline of 12 additional months for certain specific situations, and a Second extended claims deadline of 6 months after that (ss. 7.1-7.4). Given that previous Canadian compensation frameworks analyzed in this section ultimately provided claimants with five years to submit their claims, a longer timeframe might be considered as a way to process the large number of claims and make space for progressive disclosure.

Reduction of the potentially harmful burden of proof being placed on claimants. In the *Final Compensation Framework* there is attention to operational efforts to find existing information that could support claims that does not rely on claimants (e.g., ISC data, organizations' data). It also includes explicit recognition of the necessity for flexibility in documentation related to challenges that may be insurmountable, such as "the child's age or developmental status at the time of the events, the disappearance of records over time, retirement or death of professionals involved in a child's case, systemic barriers to accessing professionals, etc." (s. 2.5.1). **Strategies to accommodate claimants—who are not themselves responsible for the missing information—will lessen the potential burden on individuals.**

Provision of support

Providing support in advance of the application. The Final Compensation Framework describes the presence of a phone line that will be available beginning with phase 1 of the process, along with a phone line provided by the AFN (Notice Plan, pp. 5 6). The website **https://www.fnchildcompensation.ca**, which has functioned as a source of information as the CHRT process has evolved, should continually be updated to align exactly with the Sotos website so there are not multiple websites with conflicting information. In the Notice Plan, it is mentioned that there will be Canada-funded mental health supports provided through a variety of formats (p. 31). Further detail regarding how and when this will be available to all claimants will be required to ensure services may be accessed in a timely manner in order to function as preparatory support.

Consideration of the impact of the process on individuals and communities, with particular attention to how agencies will be impacted (both operationally and in terms of their role in the community). The need for operational support to child welfare agencies and health and social service providers is clearly acknowledged (e.g., Final Compensation Framework, s. 5.4). Given the potential availability of relevant data at the agency level, generous support for this work at agencies and a process that does not require onerous paperwork will expedite the process. Beyond this, individuals may blame agencies for removals, and this may be mitigated by clear, consistent communication regarding the responsibility of the federal government for the discrimination on which the compensation is based. Avoiding terms like "necessary" and "unnecessary" removal can also help support agencies during this process and minimize tensions.

Providing support to claimants during the application process.

Legal support. It is made clear in the *Notice Plan* that neither the administrator nor individuals trained to provide information and mental health supports should provide legal advice to claimants (e.g., p. 4, p 6). There is no mention of how claimants may be supported in seeking legal counsel during this process. Given documented exploitation of claimants by lawyers in past settlements, it would be helpful to develop a suite of resources to help claimants navigate this class action process. Clarification for claimants of the role of class counsel related to their application would be a helpful addition to compensation process materials, especially for individuals who expected to be compensated under a CHRT process.

Mental health support. There are several ways in which the *Final Compensation Framework* details provision of mental health support to claimants (e.g., through private counselling, at community events, in a family setting, group sessions, 24-hour tele-health or by way of a Compensation Process and Support Line). Prior success of hotlines including a chat function could be considered, particularly as this is often preferred by youth and individuals less comfortable speaking on the phone. While referrals to services are mentioned, there is less information regarding ensuring these resources are accessible to individuals. For instance, in past compensation schemes, the lack of access to Indigenous healing supports within communities was seen as a barrier for many claimants. Reimbursements to providers to whom individuals could self-refer could maximize choice in how claimants seek and receive mental health supports.

Administrative support. There are provisions for administrative support with the application process in which trained phone line operators and Navigators can answer questions (*Notice Plan*, p. 4) and the first-level reviewers of applications can help claimants ensure the application is complete (*Final Compensation Framework*, s. 9.3). The AFN will also provide an Information Line (*Notice Plan*, p. 6) that will provide information according to an agreed upon framework consistent across these informational resources. There is a potential for multiple areas of administrative support to lead to conflicting advice and direction.

Financial support. The *Final Compensation Framework* notes that the administrator will provide financial literacy information related to receipt of compensation, managing money, planning for the future, and prevention of exploitation (s. 10.6). There are also provisions in the *Notice Plan* for financial literacy to be offered to claimants before and after receiving compensation through the Aboriginal Financial Officers Association and the Royal Bank of Canada (p. 5). Ensuring that multiple streams of information regarding financial support are consolidated will minimize the risk of confusion and offer choice to claimants.

Providing follow up support for both accepted and rejected claims. Mental health supports should be ongoing and available to individuals after a decision has been made about their claim. It is stated in the *Final Compensation Framework* that claim denials will be stated in simple language (Final Compensation Framework, s. 9.5). Beyond the appeals process, there is no provision of support for denied applications. There is an opportunity to consider the nature and scope of mental health supports to individuals whose claims are denied.

Avoiding repetitive disclosure and triggers during appeals processes. The Final Compensation Framework describes a paper application form that would require basic disclosure of experiences relevant to proving eligibility. While the process for appeals is not yet articulated (s. 9.6), there are opportunities to consider mechanisms for appeal that minimize the need for repetitive disclosure. Further, allowing claimants to choose from multiple options for making an appeal (e.g., written statement, oral statement, supportive proxies) may create space for flexibility that empowers claimants in the process.

Processing claims

Adequate preparation before claims processing begins, including how technology will be used and how payment challenges will be overcome. The *Final Compensation Framework* describes a multi-level process for review of claims, reflecting preparation regarding the general operational framework for application processing (ss. 9.3-9.6). Given the shift in compensation scope, new preparation is warranted to update the framework and notice plan to reflect the settlement agreement details prior to claims being processed. While the Final Compensation Framework describes plans to facilitate payments tailored to specific needs of individuals (s. 2.6), detail is not provided on how this will be done. Given challenges in past settlements related to technology use in processing claims and distributing payments, preparation for application and compensation could anticipate the operational and technical tools that will be used and troubleshoot possible issues.

Accommodating gaps in resources and documentation to move claims forward. As previously noted, there is not a clear mechanism for accommodating gaps in information needed to undergird a claim. Preparation ahead of receipt of applications for how gaps in different types of needed information will be addressed (e.g., what may be accepted as a proxy) could considerably expedite claims, reducing delays in processing.

Planning ahead to avoid trauma-insensitive personnel & administrators. The training processes described in the Final Compensation Framework and the Notice Plan include mention of cultural appropriateness, avoiding revictimization, acknowledgement of the sensitivities of children and youth, and clear understanding of the compensation process itself (e.g., Final Compensation Framework, ss. 2.5, 9.3; Notice Plan, pp. 4–5). Based on discussions with respondents and our reviews of retraumatization literature and lessons learned from past settlements, personnel training and preparation will benefit from consideration of trauma-informed principles.

Limiting delays and waiting periods and planning how this will be addressed with claimants and communities when it happens. The provision of resources to agencies (mentioned above) is intended to limit delays in processing applications (s. 5.4). Functionally, while the Final Compensation Framework outlines an official three-and-a-half-year application period under the administrator, it provides for ongoing applications after this period. However,

while there is mention of expedited processing (s. 9.3), there is no mention of the standard timeframe for processing applications, or how delays will be managed. Given the potentially harmful impact of long waiting periods, especially when followed by a denial, efforts could be taken to specify the anticipated processing time, and plan for sensitive communication with individuals whose claims take longer than this.

Moving Forward

A fair, transparent, equitable, and decolonized compensation process that is designed for claimants who have been systematically discriminated against by the Government of Canada is no doubt challenging given the limitations and lack of availability of administrative data. **Claimants are not responsible for missing and incomplete information about the discrimination that they suffered, and it is this fundamental acknowledgment that must guide the continued development of the compensation process.** The administrative body responsible for assessing eligibility should be comprised of experts in First Nations data governance, trauma, community relations, data, and most importantly the connections among all these principles. Elders will be integral to the compensation process as they hold crucial roles in supporting communities by teaching, advising, and counselling. Quality assurance processes must be documented and transparent to ensure that there is accountability for children, families, and communities whose trauma is ongoing. Jurisdictional disputes; ongoing racism and the legacy of colonialism; and a westernized approach which excludes Indigenous knowledge, culture, and practices are the common foundation for the findings detailed in this report. For decades, the Canadian government has made decisions about the lives of First Nations children that it has failed to adequately document. This cannot be a deterrent to compensation.

Appendices

Appendix A. Taxonomy – Provincial and Territorial Definitions of Abuse and Neglect

Appendix F: Provincial and Territorial Age of Protection and Definitions of Child and/or Youth

Age of protection "refers to the age of the identified 'child' engaged in the child welfare process. Each province and territory has its own legislation in regards to mandated age of service. Consequently, the identified age depending on legislation is the maximum age that may be serviced by child welfare organizations. Ages range from anywhere between 16 to 19 years as the top age that may be serviced" (Sturtridge, 2013: 1-2). Table 16 identifies the age of protection for each province and territory along with corresponding definitions of child and/or youth. Please refer to ***Appendix N: Key Legislative Amendments and Non-Legislative Changes to the Provision of Child Welfare Services, 2006-2019*** for legislative amendments and/or regulatory changes that came into force from 2006 through 2019 (if applicable).

Unless otherwise indicated, all definitions are extracted from corresponding provincial or territorial primary child welfare legislation.

Appendix G: Provincial and Territorial Terminology for Neglect

The term 'neglect' is not consistently defined in all provincial and territorial statutes, but interchangeable concepts include 'failure to care and provide for or supervise and protect,' 'does not provide,' 'refuses or is unavailable or unable to consent to treatment.' Table 17 identifies terms and/or concepts for neglect according to the respective provincial and territorial jurisdictions. For detailed definitions of neglect according to province and territory, see ***Appendix H: Provincial and Territorial Definitions of Neglect.***

Table 17: Provincial and Territorial Terminology for Neglect

Province/ Territory	Provincial and Territorial Terminology for Neglect
Alberta	• abandoned • neglect • cruel and unusual treatment or punishment Source: Public Health Agency of Canada (2019, p. 18)
British Columbia	• deprivation • abandonment Source: Public Health Agency of Canada (2019, pp. 18-19)
Manitoba	• act or omission • lack of adequate care, supervision or control • failure or refusal to provide Source: Public Health Agency of Canada (2019, p. 18)
New Brunswick	• lack of adequate care, supervision or control • unfit or improper circumstances • failure or refusal to provide or obtain • neglects or refuses to ensure Source: Public Health Agency of Canada (2019, pp. 19-20).
Newfoundland and Labrador	• failure or refusal to obtain or permit • abandonment • left without adequate supervision Source: Public Health Agency of Canada (2019, pp. 19-20)
Northwest Territories	• failure to provide or consent to treatment • failure to obtain services or treatment • abandoned • failure to provide or consent to provision of services Source: Public Health Agency of Canada (2019, pp. 19-20).

Nova Scotia	• neglect • substantial risk of neglect Source: Public Health Agency of Canada (2019, p. 21)
Nunavut	• failure to provide or consent • failure to provide or consent to treatment • unavailable, unable or unwilling to properly care for the child • malnutrition • abandonment Source: Public Health Agency of Canada (2019, pp. 21-22)
Ontario	• failure to provide or consent to treatment • unable to care for child Source: Public Health Agency of Canada (2019, p. 21)
Prince Edward Island	• neglect • inadequate supervision or protection • failure to obtain or consent • abandonment • fails to obtain or consent to treatment Source: Public Health Agency of Canada (2019, pp. 23-24)
Quebec	• abandoned • neglected, • psychological ill-treatment • do not exercise stable supervision Source: Public Health Agency of Canada (2019, p. 23)
Saskatchewan	• need of protection • failure to provide • failure to remedy Source: Public Health Agency of Canada (2019, pp. 23-24)
Yukon	• protective intervention • deprivation • prevent imminent serious physical or mental harm • alleviate severe pain • abandonment • failure to provide or consent to services Source: Public Health Agency of Canada (2019, p. 24)

Appendix A. Taxonomy – Provincial and Territorial Definitions of Abuse and Neglect
(continued)

Appendix H: Provincial and Territorial Definitions of Neglect

Each province and territory has unique legislation defining and describing responses to neglect. Table 18 provides provincial and territorial definitions of neglect. Please refer to ***Appendix N: Key Legislative Amendments and Non-Legislative Changes to the Provision of Child Welfare Services, 2006-2019*** for legislative amendments and/or regulatory changes that came into force from 2006 through 2019 (if applicable).

Unless otherwise indicated, all definitions are extracted from primary provincial or territorial child welfare legislation.

Table 18: Provincial and Territorial Definitions of Neglect

Province/ Territory	Definition of Neglect
Alberta	"A child is neglected if the guardian (a) is unable or unwilling to provide the child with the necessities of life, (b) is unable or unwilling to obtain for the child, or to permit the child to receive, essential medical, surgical or other remedial treatment that is necessary for the health or well-being of the child, or (c) is unable or unwilling to provide the child with adequate care or supervision" Source: *Child, Youth and Family Enhancement Act*, RSA 2000, c C-12, s 2 (2.1)
British Columbia	"Neglect is failure to provide for a child's or youth's basic needs. It involves an act of omission by the parent or guardian, resulting in (or likely to result in) harm to the child or youth. Neglect may include failure to provide food, shelter, basic health care, supervision or protection from risks, to the extent that the child's or youth's physical health, development or safety is, or is likely to be, harmed" Source: Government of British Columbia (2017, p. 25) "Physical Indicators [of neglect include:] [i]Injuries where medical care has been unusually delayed or avoided; [i]njuries resulting from a lack of supervision; [m]edical or dental needs that are consistently unattended to; [f]ailure to thrive" in a child where no medical reason has been found; [c]lothing consistently inadequate for weather conditions; [p]ersistent hunger; [p]oor or inadequate nutrition; or [p]oor personal hygiene" Source: Government of British Columbia (2017, p. 28)

(Continued on Next Page)

Table 18: Provincial and Territorial Definitions of Neglect

Province/ Territory	Definition of Neglect

Appendix A. Taxonomy – Provincial and Territorial Definitions of Abuse and Neglect
(continued)

British Columbia	"Behavioural [i]ndicators [of neglect include:] [f]orages for, hoards or steals food; [d]evelopmental delay or setbacks related to a lack of stimulation; [p]oor school attendance; [i]nappropriately takes on a caregiver role for a parent or siblings; [t]ired or unable to concentrate at school; [a]ppears sad or has flat affect; [r]eluctant to go home; speaks of being or appears to be left alone at home a lot, unsupervised; [i]s involved in behaviours such as misuse of drugs or alcohol, stealing, fire-setting; or [d]oes not respond to affection or stimulation" Source: Government of British Columbia (2017, p. 29)
Manitoba	"a child is in need of protection where the life, health or emotional well-being of the child is endangered by the act or omission of a person" Source: *The Child and Family Services Act,* C.C.S.M. c. C8, s 71 (1)
New Brunswick	"*Physical [n]eglect* [occurs w]hen parents or caregivers fail to provide a child's basic needs. Physical neglect might include failing to provide children with proper food, clothing, or shelter. It may also involve lack of attention to, or refusal to provide, proper healthcare treatment. Neglect also happens when a person caring for a child does not, or cannot, control and supervise the child. This includes failing to make the child go to school, or stopping the child from harming himself or others" Source: Public Legal Education and Information Service of New Brunswick (2007, p. 2) "Emotional maltreatment [r]efers to both emotional abuse and *emotional neglect*. This might include repeated attacks on a child's sense of self-worth, insults, isolation, rejection, unrealistic expectations or constant criticism. It might also involve terrorizing a child such as threatening to kill the family pet" Source: Public Legal Education and Information Service of New Brunswick (2007, p. 2)

Table 18: Provincial and Territorial Definitions of Neglect

Province/ Territory	Definition of Neglect
Saskatchewan	"Neglect [refers to] failing to provide a child with enough food, proper clothing, shelter, health care, or supervision" (Government of Saskatchewan, n.d., p. 1). Physical indicators of neglect include: "abandonment; unattended medical or dental needs; lack of supervision; hunger; inappropriate dress; poor hygiene; persistent health conditions (e.g., scabies, head lice, diaper rash or other skin disorder); and developmental delays (e.g., language, weight)" (Government of Saskatchewan, n.d., p. 3). Child behavioural indicators of neglect include: "displays fatigue or listlessness, falls asleep in class; steals food; reports that no caregiver is at home; and frequently absent or late for school" (Government of Saskatchewan, n.d., p. 3). "A child is in need of protection if: (a) *as a result of action or omission by the child's parent:...(iv) medical, surgical or other recognized remedial care or treatment that is considered essential by a duly qualified medical practitioner has not been or is not likely to be provided to the child; (v) the child's development is likely to be seriously impaired by failure to remedy a mental, emotional or developmental condition; ... (b) there is no adult person who is able and willing to provide for the child's needs, and physical or emotional harm to the child has occurred or is likely to occur; or* (c) the child is less than 12 years of age and: ... (ii) the child's parent is unable or unwilling to provide for the child's needs" Source: *The Child and Family Services Act*, SS 1989-90, c C-7.2, s 11
Yukon	"Neglect [is defined as] failing to provide for a child's basic needs, including essential food, appropriate clothing, shelter, health care or supervision" Source: Yukon Health and Social Services (2017, p. i) Possible physical indicators of neglect include: "abandonment; unattended medical or dental needs; consistent lack of supervision; consistent hunger, inappropriate dress for weather conditions and poor hygiene; persistent and untreated conditions (e.g., scabies, head lice, diaper rash or other skin disorder); and developmental delays (e.g., language, weight)" Source: Yukon Health and Social Services (2017, p. 9) Possible behavioral indicators of neglect include: regularly displays fatigue or listlessness or falls asleep in class; steals food, begs from classmates; reports that no caretaker is at home; frequently absent or late; self-destructive; school drop-outs (adolescents); lack of parental participation; misuse of alcohol or drugs; [and/or] lack of trust in others" Source: Yukon Health and Social Services (2017, p. 9)

Appendix A. Taxonomy – Provincial and Territorial Definitions of Abuse and Neglect
(continued)

Appendix I: Provincial and Territorial Definitions of Physical Abuse

Each province and territory has unique legislation defining and describing responses to physical abuse. Table 19 provides provincial and territorial definitions of physical abuse. Please refer to ***Appendix N: Key Legislative Amendments and Non-Legislative Changes to the Provision of Child Welfare Services, 2006-2019*** for legislative amendments and/or regulatory changes that came into force from 2006 through 2019 (if applicable).

Unless otherwise indicated, all definitions are extracted from primary provincial or territorial child welfare legislation.

Table 19: Provincial and Territorial Definitions of Physical Abuse

Province/Territory	Definition of Physical Abuse
Alberta	"[A] a child is *physically injured* if there is substantial and observable injury to any part of the child's body as a result of the non-accidental application of force or an agent to the child's body that is evidenced by a laceration, a contusion, an abrasion, a scar, a fracture or other bony injury, a dislocation, a sprain, hemorrhaging, the rupture of viscus, a burn, a scald, frostbite, the loss or alteration of consciousness or physiological functioning or the loss of hair or teeth" Source: *Child, Youth and Family Enhancement Act*, RSA 2000, c C-12, s 3 (b)
British Columbia	"Physical abuse is a deliberate physical assault or action by a person that results in, or is likely to result in, physical harm to a child or youth. It includes the use of unreasonable force to discipline a child or youth or prevent a child or youth from harming him/herself or others. The injuries sustained by the child or youth may vary in severity and range from minor bruising, burns, welts or bite marks to major fractures of the bones or skull to, in the most extreme situations, death. The likelihood of physical harm to a child or youth increases when the child or youth is living in a situation where there is domestic violence by or towards a person with whom the child or youth resides. Domestic violence is a pattern of intentionally coercive and violent behaviour toward an individual with whom there is or has been an intimate relationship. It includes physical abuse such as hitting, slapping, pushing, choking, assault with a weapon, locking out of the house or the threat of physical abuse" Source: Government of British Columbia (2017, p. 23)

(Continued on Next Page)

Table 19: Provincial and Territorial Definitions of Physical Abuse

Province/Territory	Definition of Physical Abuse

Appendix A. Taxonomy – Provincial and Territorial Definitions of Abuse and Neglect *(continued)*

Manitoba	"Physical abuse can be a single incident or repeated pattern including: the intentional use of force or pain on any part of a child's body; [and/or] any contact or action that causes physical injuries. Some *behavioural signs of physical abuse* could include but are not limited to: inconsistent explanation for injuries or cannot remember; wary of adults; flinch if touched unexpectedly; extremely aggressive or extremely withdrawn; feels deserving of punishment; apprehensive when others cry; frightened of parents afraid to go home. Some *physical signs of physical abuse* could include but are not limited to: injuries not consistent with explanation; numerous injuries in varying stages of recovery or healing; presence of injuries over an extended period of time; facial injuries; and injuries inconsistent with the child's age and developmental phase" Source: Manitoba Child and Family Services (n.d., *Physical Abuse*)
New Brunswick	"Physical abuse [refers to t]he use of unreasonable force against a child. What is considered reasonable will depend on the age of the child, the severity of the actions and its lack of healthy corrective purpose regarding the child's behaviour. This might include, for example, hitting, slapping, shaking, choking, kicking or burning a child. It also includes any conduct by a caregiver that might put the child's life, health or well-being at risk" Source: Public Legal Education and Information Service of New Brunswick (2007, p. 2) "Signs of [p]hysical [a]buse [include the following:] child has welts, bite marks, unexplained bruises, scars, burns, fractures or head injuries; child runs away from home or will not go home; [and/or] child has repetitive injuries or unattended injuries" Source: Public Legal Education and Information Service of New Brunswick (2007, p. 3)
Newfoundland and Labrador	"action on the part of the parent in which a child/youth sustained or is likely to sustain a physical injury. Injury to the child/youth may be current or may have occurred in the past" Source: Newfoundland and Labrador, Department of Children, Seniors and Social Development (n.d., *How Do You Define*)

Province/Territory	Definition of Physical Abuse
Yukon	"Physical abuse [refers to] any deliberate, non-accidental assault or use of force against a child that results in physical harm. This can include excessive or inappropriate discipline that causes injury to the child's body" Source: Yukon Health and Social Services (2017, p. i) Possible *physical indicators of physical abuse* include: "injuries (bruises, cuts, burns, bite marks, fractures, etc.) that are not consistent with explanation offered (e.g., extensive bruising to one area); the presence of several injuries over a period of time; any bruising on an infant; facial injuries in preschool children (e.g., cuts, bruises, sores, etc.); injuries inconsistent with the child's age and development; [and/or] injuries that form a shape or pattern that resemble the object used to make the injury (e.g., buckle, hand, teeth, cigarette burns)" Source: Yukon Health and Social Services (2017, p. 6) Possible child *behavioural indicators of physical abuse* include: "cannot recall how injuries occurred, or offers an inconsistent explanation; wary of adults or reluctant to go home, absences from school; may cringe or flinch if touched unexpectedly; may display a vacant stare or frozen watchfulness; extremely aggressive or extremely withdrawn; wears long sleeves to hide injury; extremely compliant and/or eager to please; sad, cries frequently; and describes self as bad and deserving to be punished" Source: Yukon Health and Social Services (2017, p. 6)

Appendix J: Provincial and Territorial Definitions of Sexual Abuse

Each province and territory has unique legislation defining and describing responses to sexual abuse. Table 20 provides provincial and territorial definitions of sexual abuse. Please refer to ***Appendix N: Key Legislative Amendments and Non-Legislative Changes to the Provision of Child Welfare Services, 2006-2019*** for legislative amendments and/or regulatory changes that came into force from 2006 through 2019 (if applicable).

Unless otherwise indicated, all definitions are extracted from primary provincial or territorial child welfare legislation.

Table 20: Provincial and Territorial Definitions of Sexual Abuse

Province/Territory	Definition of Sexual Abuse
Alberta	"[A] child is sexually abused if the child is inappropriately exposed or subjected to sexual contact, activity or behaviour including prostitution related activities." Source*: Child, Youth and Family Enhancement Act*, RSA 2000, c C-12, s 1(3) (c)
British Columbia	"Sexual abuse is when a child or youth is used (or likely to be used) for the sexual gratification of another person. It includes: [t]ouching or invitation to touch for sexual purposes; [i]ntercourse (vaginal, oral or anal); [m]enacing or threatening sexual acts, obscene gestures, obscene communications or stalking; [s]exual references to the child's or youth's body/behaviour by words/gestures; [r]equests that the child or youth expose their body for sexual purposes; [d]eliberate exposure of the child or youth to sexual activity or material; and [s]exual aspects of organized or ritual abuse" Source: Government of British Columbia (2017, p. 24) "Sexual exploitation is a form of sexual abuse that occurs when a child or youth engages in a sexual activity, usually through manipulation or coercion, in exchange for money, drugs, food, shelter or other considerations. Sexual activity includes: [p]erforming sexual acts; [s]exually explicit activity for entertainment; [i]nvolvement with escort or massage parlour services; and [a]ppearing in pornographic images. Children and youth living on the street are particularly vulnerable to exploitation" Source: Government of British Columbia (2017, pp. 24-25).

Appendix L: Provincial and Territorial Definitions for Emotional Maltreatment

Each province and territory has unique legislation defining and describing emotional maltreatment. Table 22 provides provincial and territorial definitions of emotional maltreatment. Please refer to ***Appendix N: Key Legislative Amendments and Non-Legislative Changes to the Provision of Child Welfare Services, 2006-2019*** for legislative amendments and/or regulatory changes that came into force from 2006 through 2019 (if applicable).

Unless otherwise indicated, all definitions are extracted from primary provincial or territorial child welfare legislation.

Table 22: Provincial and Territorial Definitions for Emotional Maltreatment or Psychological Abuse

Province/ Territory	Definitions of Emotional Maltreatment or Psychological Abuse
Alberta	"[A] child is emotionally injured (i) if there is impairment of the child's mental or emotional functioning or development, and (ii) if there are reasonable and probable grounds to believe that the emotional injury is the result of (A) rejection, (A.1) emotional, social, cognitive or physiological neglect, (B) deprivation of affection or cognitive stimulation, (C) exposure to family violence or severe domestic disharmony, (D) inappropriate criticism, threats, humiliation, accusations or expectations of or toward the child, (E) the mental or emotional condition of the guardian of the child or of anyone living in the same residence as the child; (F) chronic alcohol or drug abuse by the guardian or by anyone living in the same residence as the child" Source*: Child, Youth and Family Enhancement Act*, RSA 2000, c C-12, s 1(1) (3a)
British Columbia	"[A] child is emotionally harmed if the child demonstrates severe (a) anxiety, (b) depression, (c) withdrawal, or (d) self-destructive or aggressive behaviour." Source: *Child, Family and Community Service Act* [RSBC 1996] Chapter 46, s 13 (2) "Reason to believe that a child or youth needs protection from being emotionally harmed may arise due to emotional abuse from a parent. This may range from the parent ignoring to habitually humiliating the child or youth to withholding life-sustaining nurturing. Emotional abuse may occur separately from, or along with, other forms of abuse and neglect. Emotional abuse can include a pattern of: [s]capegoating; [r]ejection; [v]erbal attacks on the child; [t]hreats; [i]nsults; or humiliation. Emotional harm may also be caused by the child or youth living in a situation where there is domestic violence by or towards a person with whom the child or youth resides. Domestic violence may involve physical abuse, threats, verbal insults or psychological abuse such as stalking" Source: Government of British Columbia (2017, p. 4)

Appendix B. Summary of Process-Related Components of the Final Compensation Framework

Guiding Principles	• The Compensation process will be managed by a **Central Administrator** • The process will follow the principles of best interests of the child, procedural fairness, natural justice, cultural safety and the privacy of beneficiaries • The administrative burden will be minimized for beneficiaries • Standards for implementation and distribution will be set forth by a ***Guide*** (to be developed by the Parties) • Beneficiaries can opt out of the Compensation Process
Location of beneficiaries	• Location of beneficiaries guided by a *Notice Plan* that was developed by the Parties and is included in the Compensation Framework. It is divided into 2 phases: o Preparation phase: ▪ Development of a **claim form** that is clear and adapted for children/youth, people with disabilities, and remote communities ▪ **Training** provided to employees involved with processing applications and locating beneficiaries (e.g. phone line-operators and Navigators) on: 1) cultural safety/diversity, 2) working with children/youth, and 3) in-depth review of Claim Form and Notice Plan ▪ Provision of **mental health supports** and training to mental health support workers who will provide services within communities ▪ Preparation of **financial literacy materials** to support recipients who receive compensation ▪ Development and management of an **Information Line** by the AFN o Distribution Phase: ▪ **Phase 1 - Multi-media campaign:** Notice Plan distribution via print, social media, television, radio that accommodates the different needs of beneficiaries; launch of dedicated website by ISC and the Central Administrator; launch of support and information phone line ▪ **Phase 2 – Distribution of posters and information packages:** Distribution of information packages and posters to First Nations communities and organizations ▪ **Phase 3 – Community notices:** Distribution of notices on local radios, newspapers, and online ▪ **Phase 4 – Ongoing information for the duration of the claim period:** Maintenance of website and phone line • Collaboration with service providers to help identify beneifciaries: o Additional resources will be provided by ISC to service providers who will help identify beneficiaries (i.e. FNCFS agencies; health,early childhood, and social services providers in First Nations communities) o Other service providers will be asked to collaborate to identify beneficiaries, such as: nurses employed by ISC; service providers under the NIHB program; provincial/ territorial government ministries/organizations; Correctional Services Canada o The *Taxonomy of Compensation Categories* will be used to assist identification of compensation categories by service providers[1] • Collaboration with Ministers responsible for child and family services, and health and education, as well as self-governing First Nations governments will be required
Support to beneficiaries	• To reduce the risk of retraumatization, following supports funded by Canada:

[1] Given the evolving interpretation of eligibility since the Taxonomy was drafted, we caution against using it to inform compensation eligibility.

Appendix B. Summary of process-related components of the Final Compensation Framework

throughout the compensation process	○ **Toll-free support line** to provide information on Compensation Process and available supports ○ **Navigators** to support beneficiaries and make referrals to mental health, cultural, and other supports ○ **Mental health and cultural supports** provided through First Nations organizations where possible at no charge to the beneficiaries ○ **"Reasonable financial or other supports"** to First Nations
Timeline for the claims process	• **Implementation Date**: Once the order is no longer under judicial review or appeal, the Parties meet to determine the date of implementation within 15 business days • **Initial Claim Deadline**: Claims received up to 24 months after the Notice Plan is posted on the compensation website, social media, and at least 4 national media sources • **First Extended Claims Deadline**: Claims may be received 12 months after the Initial Claims Deadline if: ○ Community where: 1) implementation of Notice Plan or navigators is delayed; 2) consensus is that there needs to be more time to locate beneficiaries; 3) delay in child and family services' response to request; 4) disruptions in Compensation Process due to unforeseen circumstances; 5) and/or other reasons agreed upon by the Parties ○ Beneficiaries who: 1) are unable to complete process because of medical or mental health reasons; 2) was a minor and no claim was made in their behalf; 3) did not receive a response to a request for information necessary to make a claim; 4) and/or other reasons agreed upon by the Parties • **Second Extended Claims Deadline**: Claims may be received 6 months after the First Extended Claims Deadline if situations pursuant to the First Extended Claims Deadline are not resolved • **Post Claim Period**: Guide will be developed before the Central Administrator finishes its work for claims that were unable to be made during the claim period
Validation of compensation claims	• ISC needs to make any data relevant to identifying beneficiaries available to the Central Administrator for a period of at least 20 years • Records produced by the beneficiary will be destroyed 5 years after payment • Individuals identified by ISC, and FNCFS agencies, First Nations, provincial/ territorial governments/agencies, and professionals/service providers as meeting the requirements for compensation will be part of a **Compensation List** provided to the Central Admnistrator ○ Names on Compensation List will be deemed valid by the Central Administrator ○ If the name does not appear on the Compensation List, the Central Administrator will use the *Guide* (see Guiding Principles) to determine if the beneficiary is eligible ▪ For Jordan's Principle compensation categories, the Claims Admnistrator will take into consideration cultural, linguistic, historical, and geographic factors that could impact eligibility ▪ "individual claims are required in all cases, even where more than one child in a community faced similar unmet needs due to the lack of access to the same or similar essential services" • Caregiving parents and grandparents that sexually, physically, or psychologically abused their children will be identified and put on an **Exclusion List.** ○ Generally, both parents/grandparents would be denied compensation, unless: 1) a non-offending parent/grandparent was also victim of abuse by the other parent; 2) a non-offending parent/grandparent was absent from the home for extended periods for unavoidable reasons; or 3) a non-offending parent/grandparent suffers from a disability that prevented them from intervening or being aware of abuse

Appendix B. Summary of Process-Related Components of the Final Compensation Framework *(continued)*

	○ The Central Administrator can refer parents/grandparents on the Exclusion list to services concerning trauma or behaviours related to child maltreatment
Processing of compensation claims	• Two-level claims process: ○ First-level review of claims by trained first level reviewer that: 1) verifies the completeness of the information; 2) screens claims; and 3) approves them ▪ First level reviewer cannot reject claims ▪ Urgent requests (e.g. beneficiaries in palliative care or in educational or training programs) will be treated more quickly ○ Second-level review of completed claims that are not approved by the first-level reviewer by a second-level committee composed of at least 3 non-political and independent First Nations experts approved by the Parties with knowledge of First Nations child and family services and Jordan's Principle ▪ The committee can work with other independent experts as needed ▪ If the committee denies a claim, a written and clear justification will need to be provided • Potential beneficiaries can ask the committee to reconsider if new information is available, or appeal to an appeals body
Supports for beneficiaries relating to the payment of compensation	• Method of receipt of compensation depends on the situation of the beneficiary: ○ If beneficiary is legally capable of managing their own finances: compensation paid directly to beneficiary ○ If beneficiary deceased or represented by someone who is responsible for their Estate: compensation paid directly to beneficiary's Estate ○ If beneficiary not legally capable of managing their own finances: compensation held in a trust selected by the Parties (i.e. "Appointed Trustees") pursuant to a Trust Agreement agreed upon by the Parties • Financial literacy information will be offered to the beneficiary by the Central Administrator at no cost to the beneficiary and under no obligation to use them • Compensation will not be treated as "income" by the CRA and will not impact the receipt of provincial/federal benefits/assistance/services
Monitoring of the Framework	• Parties will meet with the Central Administrator every 3 months to monitor the implementation the the Compensation Process • Additional needs not already identified that may arise during the compensation process will be addressed • Parties will work to try to facilitate the processing of more complex claims

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations

Four cycles of the Canadian Incidence Study of Reported Child Abuse and Neglect have been conducted: 1998, 2003, 2008 & 2019. In 2019, the study was renamed to the First Nations Canadian Incidence Study of Reported Child Abuse & Neglect (FN/CIS) and was a project of the Assembly of First Nations with core funding from a contribution agreement between the Assembly of First Nations and the Public Health Agency of Canada.

The FN/CIS-2019 Major Findings Report is available at https://cwrp.ca/publications/denouncing-continued-overrepresentation-first-nations-children-canadian-child-welfare. This report provides information on the degree of overrepresentation of First Nations children in the child welfare system. Métis and Inuit children are excluded from this analysis as per Ownership of, Control over, Access to, and Possession of research (OCAP) principles. To date, the research team has not been given instruction around analyses for Métis and Inuit children.

This Appendix provides a description of the rationale for the study, the sampling approach and the limitations to the study design. **It also provides an estimate of the number of investigations that took place on reserve in 2019 and an analysis of select child, family and characteristics associated with these investigations**.

Access to Data

The dataset used for these analyses was constructed using data from the Ontario Incidence Study of Reported Child Abuse and Neglect-2018; administrative data extracted directly from the Québec information system for the year 2019; and data collected directly from investigating workers in the rest of Canada in 2019.

The dataset resides at the University of Toronto under the governance of the First Nations Incidence Advisory Committee. It contains 403 variables. Datasets from prior cycles are also held at the University of Toronto. If you are interested in a secondary analysis of these data using this governance structure, please contact Barbara Fallon barbara.fallon@utoronto.ca. Only national estimates of child abuse and neglect investigations and their associated characteristics can be produced with the data set. **No participating agency/office, worker, office family or child can be identified using these data.**

Rationale

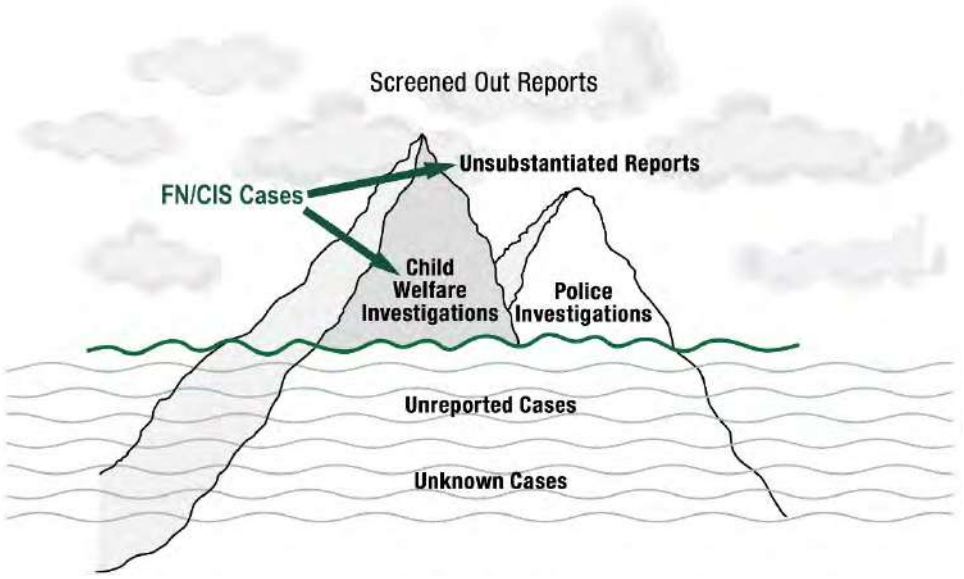
Responsibility for protecting and supporting children at risk of abuse and neglect falls under the jurisdiction of the 13 Canadian provinces and territories and a system of Indigenous child welfare agencies, which have increasing responsibility for protecting and supporting Indigenous children. Because of variations in the types of situations that each jurisdiction includes under its child welfare mandate, as well as differences in the way service statistics are kept, it is difficult to obtain a nation-wide profile of the children and families receiving child welfare services. The FN/CIS is designed to provide such a profile by collecting information on a periodic basis from every jurisdiction using a standardized set of definitions. With core funding from a contribution agreement between the Assembly of First Nations and the Public Health Agency of Canada, and additional funding provided by provincial governments in Ontario and Québec to allow for provincial estimates, the FN/CIS-2019 is the fourth nation-wide study of the incidence and characteristics of investigated child abuse and neglect across Canada.

The FN/CIS collected information directly from a national sample of child welfare workers at the point when they completed their initial investigation of a report of possible child abuse or neglect. The scope of the study is therefore limited to the type of information available to them at that point. As shown in the FN/CIS Iceberg

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

Model (Figure 1), the study only documented situations that were reported to and investigated by child welfare sites. The study **did not include** information about **unreported maltreatment** or information about cases that are **only investigated by the police**[1]**.** Similarly, the FN/CIS did not include screened out cases (referrals that were not open for investigation). While the study reports on short-term outcomes of child welfare investigations, including substantiation status, initial placements in out-of-home care, and court applications, the study **did not track** longer-term **service events that occur beyond the initial investigation.**

*Figure 1 - FN/CIS Iceberg Model**



*Adapted from (1) Trocmé, N., McPhee, D. et al. (1994). Ontario incidence study of reported child abuse and neglect. Toronto, ON: Institute for the Prevention of Child Abuse. and (2) Sedlak, A., J., & Broadhurst, D.D. (1996). Executive summary of the third national incidence study of child abuse and neglect. Washington, DC: U.S. Department of Health and Human Services.

Changes in investigation mandates and practices over the last twenty years have further complicated what types of cases fall within the scope of the FN/CIS. In particular, child welfare authorities are receiving many more reports about situations where the primary concern is that a child may be at risk of future maltreatment but where there are no specific concerns about a possible incident of maltreatment. Because the FN/CIS was designed to track investigations of alleged incidents of maltreatment, it is important to maintain a clear distinction between risk of future maltreatment, and investigations of maltreatment. The FN/CIS-2019 is the second study cycle to separately track both types of cases; however this has complicated comparisons with past cycles of the study.

In addition to variations in mandates and standards between jurisdictions, it is important to consider that these mandates and standards have been changing over time. From 1998 to 2003 the CIS found that rates of investigated maltreatment had nearly doubled (Trocmé, Fallon, MacLaurin et al., 2005)[2]. Most of the available data point to changes in detection, reporting and investigation practices rather than an increase in the number of children being abused or neglected as the reasons for this doubling. Using the analogy of the

[1] In some jurisdictions cases of physical or sexual abuse involving extra-familial perpetrators, for example a babysitter are only investigated by police.
[2] Trocmé, N, Fallon, B., MacLaurin, B., Daciuk, J., Felstiner, C., Black, T., et al. (2005). Canadian Incidence Study of Reported Child Abuse & Neglect - 2003: Major Findings. Ottawa, ON Public Health Agency of Canada, 148 pages.

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

iceberg (Figure 1), there is no indication that the iceberg increased between 1998 and 2003, rather, it would appear that the detection line (water line on the iceberg model) dropped, thus leading to an increase in the number of reported and substantiated cases in 2003. The CIS-2003 report points in particular to four important changes: (1) an increase in reports made by professionals, (2) an increase in reports of emotional maltreatment and exposure to intimate partner violence, (3) a larger number of children investigated in each family, and (4) an increase in substantiation rates[3]. These changes are consistent with modifications to legislation and investigation standards in many provinces and territories where statutes and regulations were broadened to include more forms of maltreatment and investigation standards in some jurisdictions required that siblings of reported children be systematically investigated.

A fifth factor that may have also led to an increase in the number of reports was the unintentional inclusion of investigations conducted solely because of concerns about possible risk of future maltreatment. A file review of a sample of CIS-2003 cases conducted in preparation for the CIS-2008 identified a number of cases that actually involved risk-only investigations which had been included in the CIS-2003 because workers identified them as investigations involving incidents of alleged maltreatment. Unfortunately, because the CIS-2003 was not designed to track risk of future maltreatment cases, we cannot estimate the extent to which risk assessments may have contributed to the increase in cases between 1998 and 2003. The CIS-2008 and FN/CIS-2019 cycles of the study were designed to separately track risk of future maltreatment cases separately.

Investigating Maltreatment vs. Assessing Future Risk of Maltreatment

The primary objective of the FN/CIS is to document investigations of situations where there are concerns that a child may have already been abused or neglected. While investigating maltreatment is central to the mandate of child protection authorities, their mandates can also apply to situations where there is no specific concern about past maltreatment but where the risk of future maltreatment is being assessed.

The FN/CIS-2019 tracked risk of future maltreatment investigations and maltreatment investigations separately. Investigating workers were asked to complete a data collection instrument for both types of cases with slight variability in the types of questions asked. For cases involving alleged maltreatment, workers described the specific forms of maltreatment that were investigated and whether the maltreatment was substantiated. In cases that were only opened to assess future risk of maltreatment investigating workers were asked to indicate whether there was a significant risk of future maltreatment, but not to specify the forms of future maltreatment about which they may have had concerns. Specifying the form of future maltreatment being assessed was not feasible given that risk assessments are based on a range of factors including child strengths and vulnerabilities, caregiver addictions, caregiver mental health concerns, and sources of familial support and stress.

Forms of Maltreatment included in the FN/CIS-2019

The FN/CIS-2019 definition of child maltreatment includes 33 forms of maltreatment, subsumed under five categories of maltreatment: physical abuse, sexual abuse, neglect, emotional maltreatment, and exposure to intimate partner violence (see Appendix A: FN/CIS-2019 Guidebook). This classification reflects a fairly broad definition of child maltreatment and includes forms of maltreatment that are not specifically indicated in some provincial and territorial child welfare statutes (e.g., exposure to intimate partner violence). The FN/CIS-2019 tracked up to three forms of maltreatment for each investigation.

[3] In addition to Chapter 9 from the CIS-2003 report, see Trocmé, N., MacLaurin, B., Fallon, B., Black, T., & Lajoie, J. (2005). Child Abuse and Neglect Investigations in Canada: Comparing 1998 and 2003 Data. CECW Information Sheet #26E. Montreal, QC: McGill University, School of Social Work.

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

A source of potential confusion in interpreting child maltreatment statistics lies in inconsistencies in the categories of maltreatment included in different statistics. Most child maltreatment statistics refer to both physical and sexual abuse, but other categories of maltreatment, such as neglect, emotional maltreatment, and exposure to intimate partner violence are not systematically included. There is even less consensus with respect to subtypes or forms of maltreatment.

Investigated Maltreatment vs. Substantiated Maltreatment

Child welfare statutes in most jurisdictions require that professionals working with children and the general public report all situations where they have concerns that a child may have been maltreated or where there is a risk of maltreatment. The investigation phase is designed to determine whether the child was in fact maltreated or not. Some jurisdictions use a two-tiered substantiation classification system that distinguishes between substantiated and unfounded cases, or verified and not verified cases. The FN/CIS uses a three-tiered classification system for investigated incidents of maltreatment, in which a "suspected" level provides an important clinical distinction in certain cases: those in which there is not enough evidence to substantiate maltreatment, but maltreatment cannot be ruled out[4].

In reporting and interpreting maltreatment statistics, it is important to clearly distinguish between risk of future maltreatment investigations, maltreatment investigations, and substantiated cases of maltreatment.

Risk of Harm vs. Harm

Cases of maltreatment that draw public attention usually involve children who have been severely injured or, in the most tragic cases, have died as a result of maltreatment. In practice, child welfare workers investigate and intervene in many situations in which children have not yet been harmed but are at risk of harm. For instance, a toddler who has been repeatedly left unsupervised in a potentially dangerous setting may be considered to have been neglected, even if the child has not yet been harmed.

Provincial and territorial statutes cover children who have suffered demonstrable harm due to abuse or neglect, and children at risk of harm. Substantiation standards in all jurisdictions across Canada include situations where children have been harmed as a result of maltreatment as well as situations where there is no evidence of harm but where children are at substantial risk of harm as a result of maltreatment. The FN/CIS-2019 includes both types of situations in its definition of maltreatment. The study also gathers information about physical and emotional harm attributed to substantiated or suspected maltreatment.

There can be confusion around the difference between risk of harm and risk of maltreatment. A child who has been placed at risk of harm has experienced an event that endangered their physical or emotional health. Placing a child at risk of harm is considered a form of maltreatment. For example, neglect can be substantiated for an unsupervised toddler, regardless of whether or not harm occurs, because the parent is placing the child at substantial risk of harm. In contrast, risk of maltreatment refers to situations where a specific incident of maltreatment has not yet occurred, but circumstances, for instance parental substance abuse, indicate that there is a significant risk that maltreatment could occur in the future.

Study Limitations

Although every effort was made to make the forthcoming FN/CIS-2019 estimates precise and reliable, several limits inherent in the nature of the data collected must be taken into consideration:

- The weights used to derive annual estimates include counts of children investigated more than once during the year; therefore, the unit of analysis for the weighted estimates is a child investigation;

[4] For more information on the distinction between these three levels of substantiation, please see: Trocme, N., Knoke, D., Fallon, B., & MacLaurin, B. (2009). Differentiating between substantiated, suspected, and unsubstantiated maltreatment in Canada. Child Maltreatment, 14(1), 4 – 16.

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

- The national counts that will be presented in FN/CIS-2019 reports are weighted estimates. In some instances, sample sizes are too small to derive publishable estimates;
- The FN/CIS tracks information during approximately the first 45 days of case activity, however there are slight provincial and territorial differences in this length of time; service outcomes such as out-of-home placements and applications to court included only events that occurred during those first approximately 45 days;
- The FN/CIS only tracks reports investigated by child welfare sites and does not include reports that were screened out, cases that were investigated only by the police and cases that were never reported;
- The study is based on the assessments provided by the investigating child welfare workers and could not be independently verified.

Analyses of On Reserve Investigations involving First Nations children 0-17 years of age in Canada in 2019

Workers were asked to endorse the ethno-racial category that best describes the caregiver and to select "Other" if they wished to identify multiple ethno-racial groups and specify in the space provided.

If Indigenous, workers were asked to identify the following:

a) **On/off reserve:** Identify if the caregiver is residing "on" or "off" reserve.
b) **Indigenous status: First Nations status** (caregiver has formal Indian or treaty status, that is registered with Crown-Indigenous Relations and Northern Affairs Canada [formerly INAC]), **First Nations non-status**, **Métis**, **Inuit**, or **Other** (specify and use the *Comments* section if necessary).

Table 1 shows the proportion of investigations involving First Nations children that were conducted on and off reserve. Approximately one quarter of investigations involving First Nations children were conducted on reserve (24 percent).

Table 1 - Estimated Child Maltreatment-related Investigations involving First Nations Children conducted On and Off Reserve in 2019

	n	%
Investigations On Reserve	11,710	24
Investigations Off Reserve	36,745	76
Total Investigations involving First Nations children	48,455	100

Percentages are column percentages.

Child characteristics Associated with On Reserve Investigations in Canada in 2019

8 to 11 years	2,711	23
12 to 15 years	2,792	24
16 to 17 years	586	5
Total Investigations On Reserve	11,710	100

Percentages are column percentages.

Workers were asked to consider 18 child functioning concerns and to endorse whether the concern was confirmed, suspected, no or unknown. Table 3 presents the frequency of these concerns where 'noted' means either suspected or confirmed.

The child functioning concerns noted most often by the investigating worker note were academic learning difficulties (18 percent), depression, anxiety or withdrawal (17 percent), and attachment issues (12 percent).

Table 3 - Estimated Child Maltreatment-related Investigations On Reserve: Child Functioning Concerns Noted

	n	%
Positive toxicology at birth	705	6
FASD	655	6
Failure to meet developmental milestones	819	7
Intellectual/developmental disability	939	8
Attachment issues	1,434	12
ADHD	805	7
Aggression/conduct issues	1,260	11
Physical disability	163	1
Academic/learning difficulties	2,046	18
Depression/anxiety/withdrawal	1,967	17
Self-harming behaviour	914	8
Suicidal thoughts	777	7
Suicide Attempts	316	3
Inappropriate sexual behaviour	568	5
Running (multiple incidents)	475	4
Alcohol abuse	551	5
Drug/solvent abuse	421	4
At least one child functioning issue	4,542	39

Total Investigations On Reserve	11,710	100

Percentages are column percentages. Columns do not add up to 100% because an investigating worker could note more than one child functioning concern.

Primary Caregiver Risk Factors Associated with On Reserve Investigations in Canada in 2019

Workers were asked to consider 9 caregiver functioning concerns and to endorse whether the concern was confirmed, suspected, no or unknown. Table 4 presents the frequency of these concerns and 'noted' means either suspected or confirmed.

The three most frequent risk factors noted for the primary caregiver for investigations involving First Nations children on reserve were alcohol abuse (35 percent), mental health issues (31 percent) and few social supports (29 percent).

Table 4 - Estimated Child Maltreatment-related Investigations On Reserve: Noted Primary Caregiver Risk Factors

	n	%
Alcohol Abuse	4,077	35
Drug/Solvent Misuse	3,295	28
Cognitive Impairment	654	6
Mental Health Issues	3,622	31
Physical Health Issues	969	8
Few Social Supports	3,425	29
Victim of Intimate Partner Violence	2,601	22
Perpetrator of Intimate Partner Violence	943	8
History of Foster Care or Group Home	1,867	16
Total Investigations On Reserve	11,710	100

Percentages are column percentages. Columns do not add up to 100% because an investigating worker could note more than one primary caregiver risk factor.

Household Risk Factors Associated with On Reserve Investigations in Canada in 2019

Several questions asked about the context for the investigation. Table 5 shows the proportion of investigations involving moves, home overcrowding, unsafe housing conditions and running out of money for necessities in the past six months.

One in five investigations on reserve indicated that the household had experienced a move in the past year (13 percent one move; 7 percent two or more moves). In 17 percent of on reserve investigations the worker

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

noted that the home was overcrowded. In 10 percent of investigations the worker noted that the household had run out of money in the past six months for food necessities.

Table 5 - Estimated Child Maltreatment-related Investigations On Reserve: Household Characteristics

	n	%
Number of Moves in the Past Year		
One	1,483	13
Two or more	772	7
Home Overcrowded	2,008	17
Unsafe Housing Conditions	577	5
Run out of Money in the past six months for:		
Food	1,139	10
Housing	310	3
Utilities	410	4
Cell Phone	961	8
Transportation	691	6
Health/Medical Expenses	165	2
Total Investigations On Reserve	11,710	100

Percentages are column percentages. Columns do not add up to 100% because an investigating worker could note more than one household characteristic.

Maltreatment Characteristics for On Reserve Investigations in Canada in 2019

Workers were asked to indicate what the overriding concern was for the investigation at its conclusion and whether the allegation or suspicion of maltreatment was substantiated. In the case of a risk-only investigation, workers were asked to indicate whether there was a confirmed risk of future maltreatment.

As shown in Table 6, neglect was the overriding concern for investigations that were conducted on reserve; 34 percent of investigations were focused on neglect followed by a concern of future risk of maltreatment (31 percent).

Forty-eight percent of investigations were either substantiated or had a finding of confirmed risk (not shown in table). Almost half the substantiated/confirmed investigations involved neglect (48 percent).

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

Table 6 - Estimated Child Maltreatment-related Investigations On Reserve: Primary Concern of Investigation and Substantiation

Primary Type of Investigation	Investigated		Substantiated/ Confirmed Risk	
	n	%	n	%
Physical Abuse	1,037	11	575	10
Sexual Abuse	898	8	325	6
Neglect	3,966	34	2,487	45
Emotional Maltreatment	740	6	512	9
Intimate Partner Violence	1,447	12	1,025	18
Risk Only	3,623	31	644	12
Total Investigations On Reserve	11,710	100	5,568	100

Percentages are column percentages.

Select Service Disposition Outcomes Associated with On Reserve Investigations in Canada in 2019

Workers were asked to indicate whether the child was placed in out of home care and if so, the type of placement.

As shown in Table 7, 22 percent of investigations conducted on reserve resulted in an out of home placement. In eleven percent of investigations, the child was either placed in Kinship out of care (8 percent) or customary care (3 percent). Placement was being considered at the conclusion of the investigation in another 5 percent of on reserve investigations.

Table 7 - Estimated Child Maltreatment-related Investigations On Reserve involving Out-of-Home Placement

Type of Placement	n	%
Kinship Out of care	980	8
Customary care	303	3
Kinship in care	858	7
Foster care (non-kinship)	403	3
Group home/other	--	--
Subtotal: Placement in Out-of-Home Care during Investigation	2,586	22
Placement in Out-of-Home Care Considered	528	5
No Placement	8,596	73

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

Total Investigations On Reserve	11,710	100

'--' Estimate is < 100 investigations. Percentages are column percentages.

Workers were asked to indicate whether a referral(s) was made for any family member to an internal (provided by the agency/office) or external (other agencies/services) service(s).

As shown in Table 8, workers made a service referral in 50 percent of on reserve investigations.

Table 8 - Estimated Child Maltreatment-related Investigations On Reserve: External Service Referrals

	n	%
External Service Referral made for Any Family Member		
Yes	5,882	50
No	5,829	50
Total Investigations On Reserve	11,710	100

Percentages are column percentages.

Methodological Notes

Estimation Procedures

Design

The study design was implemented for the purpose of point estimation and the estimation of variance. The population of agencies was stratified by size. Agencies were selected from each stratum using systematic random sampling in order to take agency size into consideration. The three months (corresponding to October, November, and December) were assumed to be a random sample of the 12 months comprising the calendar year for each agency selected. In each selected month, cases at large agencies were selected using simple random sampling. Please see the FNCIS-2019 for data extraction procedures for data included from the province of Quebec.

Weighting

The data collected from investigating workers for the FN/CIS-2019 are weighted to derive national, annual incidence estimates. Design weights are applied to each case selected in each sampled agency during the three-month case selection period. In order to increase the precision and accuracy of estimates for the overall agency volume for 2019, calibration factors based on known numbers of investigations were applied. This section provides a detailed description of the weighting procedures utilized for the FN/CIS-2019. Please note Table 3 below for notation used.

Table 1 – Weighting Notation

h	stratum
i	agency

j	month
k	case
N_h	number of agencies in stratum h
n_h	number of selected agencies in stratum h
M_{hi}	number of months in the calendar year ($M_{hi}=12$)
m_{hi}	number of selected months in the calendar year ($m_{hi}=3$)
R_{hij}	number of cases in month j of agency I of stratum h
r_{hij}	number of selected cases in month j of agency I of stratum h
s_h	the sample of agencies in stratum h
s_{hi}	the sample of months for agency I in stratum h
s_{hij}	the sample of cases for month j of agency I in stratum h
y_{hijk}	the value of the variable of interest for case k of month j of agency I of stratum h

Design Weights

A design weight will be assigned to each selected case of each sampled agency for the three months.

The design weight for case *k* in month *j* of agency *I* of stratum *h* is given by $d_{hijk}=\frac{N_h}{n_h}\frac{M_{hi}}{m_{hi}}\frac{R_{hij}}{r_{hij}}$.

Note that $\frac{M_{hi}}{m_{hi}}=4$ for all strata *h* and selected agencies $i\in s_h$.

The Design-Based Estimator

The design-based estimator of the total $Y=\sum_h\sum_{i\in U_h}\sum_{j\in U_{hi}}\sum_{k\in U_{hij}}y_{hijk}$ is given by the following expression:

$$\hat{Y}=\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}}d_{hijk}y_{hijk}$$

The design-based variance of this estimator can be shown to be the following:

$$Var\left(\sum_h\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}}d_{hijk}y_{hijk}\right)$$

$$=\sum_h N_h(N_h-n_h)\frac{S_h^2}{n_h}+\sum_h\frac{N_h}{n_h}\sum_{i\in U_h}M_{hi}(M_{hi}-m_{hi})\frac{S_{hi}^2}{m_{hi}}+\sum_h\frac{N_h}{n_h}\sum_{i\in U_h}\frac{M_{hi}}{m_{hi}}\sum_{j\in U_{hi}}R_{hij}(R_{hij}-r_{hij})\frac{S_{hij}^2}{r_{hij}}$$

where $S_{hij}^2=\frac{1}{R_{hij}-1}\sum_{k\in U_{hij}}(y_{hijk}-\bar{Y}_{hij})^2$ with $\bar{Y}_{hij}=\frac{1}{R_{hij}}\sum_{k\in U_{hij}}y_{hijk}=\frac{Y_{hij}}{R_{hij}}$

$$S_{hi}^2=\frac{1}{M_{hi}-1}\sum_{j\in U_{hi}}(Y_{hij}-\bar{Y}_{hi})^2 \quad \text{with } \bar{Y}_{hi}=\frac{1}{M_{hi}}\sum_{j\in U_{hi}}Y_{hij}=\frac{Y_{hi}}{M_{hi}}$$

$$S_h^2=\frac{1}{N_h-1}\sum_{i\in U_h}(Y_{hi}-\bar{Y}_h)^2 \quad \text{with } \bar{Y}_h=\frac{1}{N_h}\sum_{i\in U_h}Y_{hi}$$

There are three terms in the variance formula that are important to consider for variance estimation:

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

S_{hij}^2 is the variance of the case values y_{hijk} within month *j* of agency *I* since $\bar{Y}_{hij}$ is their population mean.

S_{hi}^2 is the variance of the monthly totals Y_{hij} in the calendar year of agency *I* if these totals were known for every month in the calendar year. Note that $\bar{Y}_{hi}$ is simply the calendar year mean of these totals for agency *i*.

S_h^2 is the variance of the totals Y_{hi} over all agencies in stratum *h* if these totals were known for every agency *I* in the population. Note that $\bar{Y}_h$ is simply the mean of these totals over all agencies in stratum *h*.

To obtain an estimate of this variance, each of the terms S_{hij}^2, S_{hi}^2 and S_h^2 are replaced by their corresponding design-based estimates.

$$\hat{S}_{hij}^2 = \frac{1}{r_{hij}-1}\sum_{k\in s_{hij}}(y_{hijk}-\hat{\bar{Y}}_{hij})^2 \quad \text{with} \quad \hat{\bar{Y}}_{hij} = \frac{1}{r_{hij}}\sum_{k\in s_{hij}} y_{hijk}$$

$$\hat{S}_{hi}^2 = \frac{1}{m_{hi}-1}\sum_{j\in s_{hi}}(\hat{Y}_{hij}-\hat{\bar{Y}}_{hi})^2 \quad \text{with} \quad \hat{Y}_{hij} = R_{hij}\hat{\bar{Y}}_{hij} \quad \text{and} \quad \hat{\bar{Y}}_{hi} = \frac{1}{m_{hi}}\sum_{j\in s_{hi}}\hat{Y}_{hij}$$

$$\hat{S}_h^2 = \frac{1}{n_h-1}\sum_{i\in s_h}(\hat{Y}_{hi}-\hat{\bar{Y}}_h)^2 \quad \text{with} \quad \hat{Y}_{hi} = M_{hi}\hat{\bar{Y}}_{hi} \quad \text{and} \quad \hat{\bar{Y}}_h = \frac{1}{n_h}\sum_{i\in s_h}\hat{Y}_{hi}$$

Estimated design-based totals $\hat{Y}_{hij}$ and $\hat{Y}_{hi}$ are produced before calculating their respective means $\hat{\bar{Y}}_{hi}$ and $\hat{\bar{Y}}_h$ in the two terms $\hat{S}_{hi}^2$ and $\hat{S}_h^2$. The resulting design-based formula for the estimated variance is the following:

$$\hat{Var}\left(\hat{Y}\right) = \sum_h N_h(N_h-n_h)\frac{\hat{S}_h^2}{n_h} + \sum_h \frac{N_h}{n_h}\sum_{i\in U_h} M_{hi}(M_{hi}-m_{hi})\frac{\hat{S}_{hi}^2}{m_{hi}} + \sum_h \frac{N_h}{n_h}\sum_{i\in U_h}\frac{M_{hi}}{m_{hi}}\sum_{j\in U_{hi}} R_{hij}(R_{hij}-r_{hij})\frac{\hat{S}_{hij}^2}{r_{hij}}$$

where

$$\hat{S}_{hij}^2 = \frac{1}{r_{hij}-1}\sum_{k\in s_{hij}}(y_{hijk}-\hat{\bar{Y}}_{hij})^2 \quad \text{with} \quad \hat{\bar{Y}}_{hij} = \frac{1}{r_{hij}}\sum_{k\in s_{hij}} y_{hijk}$$

$$\hat{S}_{hi}^2 = \frac{1}{m_{hi}-1}\sum_{j\in s_{hi}}(\hat{Y}_{hij}-\hat{\bar{Y}}_{hi})^2 \quad \text{with} \quad \hat{Y}_{hij} = R_{hij}\hat{\bar{Y}}_{hij} \quad \text{and} \quad \hat{\bar{Y}}_{hi} = \frac{1}{m_{hi}}\sum_{j\in s_{hi}}\hat{Y}_{hij}$$

$$\hat{S}_h^2 = \frac{1}{n_h-1}\sum_{i\in s_h}(\hat{Y}_{hi}-\hat{\bar{Y}}_h)^2 \quad \text{with} \quad \hat{Y}_{hi} = M_{hi}\hat{\bar{Y}}_{hi} \quad \text{and} \quad \hat{\bar{Y}}_h = \frac{1}{n_h}\sum_{i\in s_h}\hat{Y}_{hi}$$

Calibration Weights

Given that the total number of cases R_h for the entire year across all agencies in stratum *h* is known, this number can be calibrated. The design-based estimate of R_h is given by the following expression:

$$\hat{R}_h = \sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} d_{hijk} = \sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} \frac{N_h}{n_h}\frac{M_{hi}}{m_{hi}}\frac{R_{hij}}{r_{hij}}$$

In general, $\hat{R}_h$ will not equal R_h, this calibration equation is determined to obtain calibration weights $w_{hijk} = d_{hijk}\, g_{hijk}$ that satisfy the following:

$$\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} w_{hijk} = R_h$$

The terms g_{hijk} are the adjustment factors or g-weights. It is shown below that these are all the same and equal to $R_h/\hat{R}_h$. It is clear from the general form of the calibration equation that the auxiliary variable in this case is simply $x_{hijk}=1$. From the general form of the calibration weights, for each selected case $k \in s_{hij}$, the following is obtained:

$$
\begin{aligned}
w_{hijk} &= d_{hijk}\, g_{hijk} \\
&= d_{hijk}\left\{ 1+(R_h-\hat{R}_h)\left(\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} \frac{N_h}{n_h}\frac{M_{hi}}{m_{hi}}\frac{R_{hij}}{r_{hij}} x_{hijk}x_{hijk} \right)^{-1} x_{hijk} \right\} \\
&= d_{hijk}\left\{ 1+(R_h-\hat{R}_h)\left(\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} \frac{N_h}{n_h}\frac{M_{hi}}{m_{hi}}\frac{R_{hij}}{r_{hij}} \right)^{-1} \right\} \text{ since } x_{hijk}=1 \\
&= d_{hijk}\left\{ 1+(R_h-\hat{R}_h)\left(\hat{R}_h\right)^{-1} \right\} \text{ by definition of } \hat{R}_h \\
&= d_{hijk}\left\{ \frac{R_h}{\hat{R}_h} \right\}
\end{aligned}
$$

This means $g_{hijk}=R_h/\hat{R}_h$ for each selected case $k \in s_{hij}$. The adjustment factor is the same for every selected case in every month of every selected agency of stratum *h*.

The Calibration Estimator

The calibration equation is used in the derivation of the properties of the calibration estimator. A linear relationship is assumed between the variable of interest and the auxiliary variable.

$y_{hijk}=x_{hijk}B_h+e_{hijk}$ for each *j* and *k* within a given *h*

This linear relationship is not necessarily a model. Even though B_h is unknown, it can be regarded as a constant within each stratum *h*. Therefore, the residuals e_{hijk} are implicitly defined by the above representation through the difference $e_{hijk}=y_{hijk}-x_{hijk}B_h$. We do not need to know these residuals. We just need to know how to estimate them later when we consider the estimated variance of our calibration estimator.

The calibration estimator of the total $Y=\sum_h\sum_{i\in U_h}\sum_{j\in U_{hi}}\sum_{k\in U_{hij}} y_{hijk}$ is given by the following expression.

$$
\begin{aligned}
\hat{Y}_C &= \sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} w_{hijk}y_{hijk} \\
&= \sum_h\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} w_{hijk}y_{hijk} \\
&= \sum_h\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} w_{hijk}(x_{hijk}B_h+e_{hijk}) \\
&= \sum_h\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} w_{hijk}(B_h+e_{hijk}) \\
&= \sum_h B_h\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} w_{hijk} + \sum_h\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} w_{hijk}e_{hijk} \\
&= \sum_h B_h\, R_h + \sum_h\sum_{i\in s_h}\sum_{j\in s_{hi}}\sum_{k\in s_{hij}} w_{hijk}e_{hijk}
\end{aligned}
$$

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

The calibration equation in the above derivation is utilized for the estimator to reflect the calibration property. At this point, $\sum_h B_h R_h$ is a constant since each B_h is constant (although unknown) and R_h is constant and known. The variability in the estimator comes from the second term. This term can be further expanded to examine its properties:

$$\sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} w_{hijk} e_{hijk}$$

$$= \sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} \left(1 + \left(\frac{R_h - \hat{R}_h}{\hat{R}_h}\right)\right) e_{hijk} \quad \text{since } w_{hijk} = d_{hijk} g_{hijk} = d_{hijk} \frac{\hat{R}_h}{\hat{R}_h}$$

$$= \sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} e_{hijk} + \sum_h \left(\frac{R_h - \hat{R}_h}{\hat{R}_h}\right) \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} e_{hijk}$$

$$= \sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} e_{hijk} + \sum_h \left(\frac{R_h - \hat{R}_h}{\hat{R}_h}\right) \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} (y_{hijk} - x_{hijk} B_h) \quad \text{since } e_{hijk} = y_{hijk} - x_{hijk} B_h$$

$$= \sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} e_{hijk} + \sum_h \left(\frac{R_h - \hat{R}_h}{\hat{R}_h}\right) \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} (y_{hijk} - B_h) \quad \text{since } x_{hijk} = 1$$

$$= \sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} e_{hijk}$$

$$+ \sum_h \left(R_h - \hat{R}_h\right) \left(\frac{1}{\hat{R}_h} \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} y_{hijk} - \frac{1}{\hat{R}_h} \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} B_h\right)$$

$$= \sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} e_{hijk} + \sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)$$

$$\text{since } \hat{R}_h = \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk}$$

$$\text{and } \hat{B}_h = \left(\sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} x_{hijk}\right)^{-1} \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} y_{hijk} = \frac{1}{\hat{R}_h} \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} y_{hijk}$$

Using this last expression, the estimator $\hat{Y}$ is as follows:

$$\hat{Y}_C = \sum_h B_h R_h + \sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} w_{hijk} e_{hijk}$$

$$= \sum_h B_h R_h + \sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} e_{hijk} + \sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)$$

The following observations can be made:

The first term $\sum_h B_h R_h$ is constant, so it has no variability due to sampling.

The middle term, $\sum_h \sum_{i\in s_h} \sum_{j\in s_{hi}} \sum_{k\in s_{hij}} d_{hijk} e_{hijk}$, has a form similar to the design-based estimator with e_{hijk} replacing y_{hijk}.

The last term, $\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)$, is a sum over the strata of the product of two random variables $\left(R_h - \hat{R}_h\right)$ and $\left(\hat{B}_h - B_h\right)$. Notably, $\hat{R}_h$ is unbiased for R_h while $\hat{B}_h$ is approximately unbiased for B_h.

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

Therefore, the random variable $\left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)$ will have an expected value close to 0 and the sum $\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)$ will also be close to 0. Furthermore, the random variable $\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)$ will be of lower order (or relatively smaller) than the middle term $\sum_h \sum_{i \in s_h} \sum_{j \in s_{hi}} \sum_{k \in s_{hij}} d_{hijk} e_{hijk}$ when the sample sizes are sufficiently large.

An approximation to the expected value of the variance is examined.

$$
\begin{aligned}
E\left(\hat{Y}_C\right) &= E\left(\sum_h B_h R_h + \sum_h \sum_{i \in s_h} \sum_{j \in s_{hi}} \sum_{k \in s_{hij}} d_{hijk} e_{hijk} + \sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right) \\
&= \sum_h B_h R_h + E\left(\sum_h \sum_{i \in s_h} \sum_{j \in s_{hi}} \sum_{k \in s_{hij}} d_{hijk} e_{hijk}\right) + E\left(\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right) \\
&= \sum_h B_h R_h + \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} e_{hijk} + E\left(\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right) \\
&= \sum_h B_h R_h + \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} (y_{hijk} - B_h) + E\left(\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right) \\
&= \sum_h B_h R_h + \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} (y_{hijk} - B_h) + E\left(\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right) \\
&= \sum_h B_h R_h + \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} y_{hijk} - \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} B_h + E\left(\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right) \\
&= \sum_h B_h R_h + \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} y_{hijk} - \sum_h B_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} 1 + E\left(\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right) \\
&= \sum_h B_h R_h + \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} y_{hijk} - \sum_h B_h R_h + E\left(\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right) \\
&= \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} y_{hijk} + E\left(\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right)
\end{aligned}
$$

This shows that $\hat{Y}_C$ is approximately unbiased for the population total $Y = \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} y_{hijk}$, where the bias is given by the expression $E\left(\sum_h \left(R_h - \hat{R}_h\right)\left(\hat{B}_h - B_h\right)\right)$. It is expected that this bias is close to 0 or relatively small in large samples. Therefore, this last term can be in the estimator $\hat{Y}_C$ and work with its linearized form $\hat{Y}_{Clin}$ given by the following expression.

$$\hat{Y}_{Clin} = \sum_h B_h R_h + \sum_h \sum_{i \in s_h} \sum_{j \in s_{hi}} \sum_{k \in s_{hij}} d_{hijk} e_{hijk}$$

The properties of estimator $\hat{Y}_{Clin}$ should be similar to the properties of estimator $\hat{Y}_C$. $\hat{Y}_{Clin}$ is unbiased for $Y = \sum_h \sum_{i \in U_h} \sum_{j \in U_{hi}} \sum_{k \in U_{hij}} y_{hijk}$ while $\hat{Y}_C$ has a bias close to 0. It is expected that the variance of $\hat{Y}_{Clin}$ is close to the variance of $\hat{Y}_C$. Since the first term is constant, the variance of $\hat{Y}_{Clin}$ is simply the variance of

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

$\sum_h \sum_{i \in s_h} \sum_{j \in s_{hi}} \sum_{k \in s_{hij}} d_{hijk} e_{hijk}$. Thus overall: $Var(\hat{Y}_C) \cong Var(\hat{Y}_{Clin}) = Var\left(\sum_h \sum_{i \in s_h} \sum_{j \in s_{hi}} \sum_{k \in s_{hij}} d_{hijk} e_{hijk} \right)$. The variance of $\hat{Y}_{Clin}$ has a familiar design-based look since the formula has the design weights instead of the calibration weights. We simply use e_{hijk} instead of y_{hijk} in the formula shown earlier for the variance of a 3-stage design under simple random sampling at each stage. The terms e_{hijk} are unknown but can be estimated from the sample.

To obtain the variance estimation, the following approach was applied.

In each stratum *h*, estimate B_h by $\hat{B}_h$ was given by the following expression.

$$\hat{B}_h = \left(\sum_{i \in s_h} \sum_{j \in s_{hi}} \sum_{k \in s_{hij}} d_{hijk} x_{hijk} \right)^{-1} \sum_{i \in s_h} \sum_{j \in s_{hi}} \sum_{k \in s_{hij}} d_{hijk} y_{hijk} = \frac{1}{\hat{R}_h} \sum_{i \in s_h} \sum_{j \in s_{hi}} \sum_{k \in s_{hij}} d_{hijk} y_{hijk}$$

In each stratum *h*, the following estimates of e_{hijk} for all units (cases) *k* were calculated:

$$\hat{e}_{hijk} = y_{hijk} - x_{hijk} \hat{B}_h$$

In each stratum *h*, product u_{hijk} for all units (cases) *k* was calculated:

$$u_{hijk} = g_{hijk} \hat{e}_{hijk} = \frac{R_h}{\hat{R}_h} \hat{e}_{hijk}$$

Now replace y_{hijk} by u_{hijk} in the design-based formula for the estimated variance. Calculate the corresponding components keeping in mind the ideas described earlier on their interpretation. At the end, you will get the required estimate for the variance of the calibration estimator.

To obtain the domain estimation of a total, first, y_{hijk} is replaced by a new domain dependent variable $y_{(d)hijk}$ with the following definition over all units (cases) in the sample.

$$y_{(d)hijk} = \begin{cases} y_{hijk} & \text{if } k \in U_d \\ 0 & \text{if } k \notin U_d \end{cases}$$

Then continue as before to produce the point estimate and the variance estimate.

Sample Error Estimation

Sampling error estimates were produced for annual investigation estimates. The error estimates do not account for any errors in determining the design and calibration weights, nor do they account for any other non-sampling errors that may occur, such as inconsistency or inadequacies in administrative procedures from agency to agency. The error estimates also cannot account for any variations due to seasonal effects. The accuracy of the annual estimates depends on the extent to which the sampling period is representative of the whole year.

Case Duplication

Although cases reported more than once during the three-month case sampling period were unduplicated, the weights used for FN/CIS-2019 annual estimates include an unknown number of "duplicate" cases, i.e.

Appendix C – FNCIS-2019 – Analysis of On Reserve Investigations Involving First Nations *(continued)*

children or families reported and opened for investigation two or more times during the year. Although each investigation represents a new incident of maltreatment, confusion arises if these investigations are taken to represent an unduplicated count of children. To avoid such confusion, the FN/CIS-2019 uses the term "child investigations" rather than "investigated children".

An estimate of how often maltreated children will be counted more than once can be derived from those jurisdictions that maintain separate investigation-based and child- based counts. The U.S. National Child Abuse and Neglect Data System (NCANDS), reports that for substantiated cases of child maltreatment, the six-month recurrence rate during 2016 was 5.1 per cent[5]. In a 12 month follow-up with 30 Ontario agencies, there was a 15.40% recurrence rate after an investigation closed[6].

Appendix F. FNCFS IMS – Data Field Descriptions

Source: Unmodified information from ISC staff

Field	Definition
Province or Territory for Reporting	Identifies in which province the recipient operates.
Agency Name	Name of the agency responsible for the delivery of child and family services.
Funding Recipient Number	4 digit number assigned to the First Nation, Agency, Tribal Council or Province.
Submission Type	This identifies if the Data Collection Instrument submitted is an Original, Supplemental, Amendment, or Resubmission.
Reporting Period	Identifies the reporting period of the report.
Fiscal Year	Identifies the fiscal year of the report.
IRS Number/Temporary Non Registered Number	The Indian Registry System (IRS) number of the child placed in protective care. A valid Indian Registry System number is comprised of 10 digits and in the format ##########. If the child is not registered, leave blank and a temporary number for First Nations Child and Family Services purposes (for agencies in regions where available) will be generated. Notification of this temporary number will be provided to the recipient. Temporary Non-Registered Number: This is 13 characters long, assigned to all children in care who are not yet registered as a Status Indian as defined by the *Indian Act*. For further information on the temporary non-registered number, refer to the Child Information Section in the Data Collection Instruments User Guide.
Child's Family Name	The last name of the child who has been placed in care.
Child's Given Name	The first name of the child who has been placed in care.
Date of Birth (YYYY-MM-DD)	The child's date of birth in the format 'Year Month Day'.
Gender (M/F/X/NR)	The gender of the child who has been placed in care.
Child Welfare/Legal Status	Status assigned to the child as per provincial/territorial legislation (e.g. temporary care, voluntary care, permanent care).
Provider Name	This refers to the name of the care provider as identified by the Province/Territory where the child was placed into care (i.e. foster home or group home, etc.). For placement expenses only. Not a mandatory field.
Number of Days in Care (Billable)	The total number of billable days as defined by the pay period of the expense.
Placement Type	Refers to the placement of a child (e.g. group home, foster home, institutional care, kinship care).
Start Pay Date (YYYY-MM-DD)	The first day when the expense incurred, in the format 'Year Month Day'.
End Pay Date (YYYY-MM-DD)	The last day when the expense incurred, in the format 'Year Month Day'.

Appendix F. FNCFS IMS – Data Field Descriptions *(continued)*

Field	Definition
Care Cost	The total placement type cost based on the start pay date, end pay date and the placement type rate.
Additional Child Cost Type	This refers to any additional costs over and above the basic/regular maintenance rate associated with the provision of services for a child in care. Eligible expenditures are set out in the First Nations Child and Family Services Program National Guidelines and must be within Indigenous Services Canada authorities, reasonably comparable to those provided by the Province/Territory and not fundable through other sources. The Categories are: - Child Care Support - Therapy/Assessment Not Covered by Non-insured health benefits for First Nations and Inuit - Family Connection - Health and Well Being Not Covered by Non-insured health benefits for First Nations and Inuit - Education Related Expenses Not Covered by First Nations Education - Legal - Placement Costs - Recreation Allowance - Vacation Allowance - Transportation - Clothing - Other - Not Applicable
Additional Child Cost	This field is to provide the amount paid for the additional child cost that is outside of the basic/regular maintenance rate.
Additional Child Cost Description	This field is to provide additional description of the additional child costs associated with the provision of services for a child in care. Not a mandatory field for all additional child costs.
Post Adoption Subsidy Expense(s)	Post-adoption subsidies and supports are to the adoptive parents and/or supports including counseling services and support for children with special needs to facilitate permanent placement. Not a mandatory field.
Expense Cost	This field is to provide the amount paid for the post adoption subsidy expense.
Expense Description	This field is to provide a description of the post adoption subsidy expense.

Appendix I. Overview of the Availability and Quality of Child Maintenance Data Held by the FNCFS Program at ISC From FY 2013-2014 to Present

The data dictionary for the FNCFS IMS is available in Appendix F and the associated drop-down response options can be found in Appendix G. The project team created a template requesting information regarding the availability, completeness, and accuracy of the specified data fields. This template was shared with ISC staff familiar with the administrative data system currently in use (from fiscal year 2013-2014 onwards). Responses to this template are available in Appendix H. Using these documents, the project team has provided an overview of the availability of data held in the IMS as they relate to the CHRT compensation categories in the table below.

Data quality was assessed using three considerations:

- **Data availability** is an assessment of whether a data field is available and whether it can be retrieved.
- **Data completeness** is an assessment of the comprehensiveness and wholeness of data. Low completeness means that there is missing, or the "unknown" category is widely endorsed data.
- **Data accuracy** is an assessment of whether the data value is consistently interpreted as intended

In addition to an evaluation of data quality, we also determined the **applicability** of data – the ability of the variable to determine or assist with operationalizing the compensation classes.

Table I.1 Availability in FNCFS IMS data (FY 2013-2014 to present) to help identify eligible claimants under the child welfare compensation categories

First Nations Child and Family Services Program at ISC – Review of data availability from FY 2013-2014 to present
Data system used: Information Management System (IMS)

Type of information needed	Information of interest	Availability Is the information available as a data field?	Completeness	Accuracy	Summary Issues identified
Can the child in out-of-home placement be identified?	Child Name (Family Name, Given Name)	Yes	Mandatory field	Some inconsistencies noted for a small % of non-registered children when they become registered[1]	Minor **accuracy** issue
	Child Date of Birth	Yes	Mandatory field	Some inconsistencies noted for a small % of non-registered children when they become registered[1]	Minor **accuracy** issue
	Child Indian Registration Number	Yes	Mandatory field	No	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

1 When a non-registered child is assigned an IRS number, all of the child details (e.g. name, DOB, gender) from IRS are assigned to the child. At this point in time, if there were errors in the name or DOB, they are noted and corrected by syncing with the government registration file.

Appendix I. Overview of the Availability and Quality of Child Maintenance Data Held by the FNCFS Program at ISC from FY 2013-2014 to Present *(continued)*

Table I.1 Availability in FNCFS IMS data (FY 2013-2014 to present) to help identify eligible claimants under the child welfare compensation categories *(continued)*

Type of information needed	Information of interest	Availability Is the information available as a data field?	Completeness	Accuracy	Summary Issues identified
Is the child First Nations?	Child's First Nations identity	Yes: all children in IMS are First Nations (with status or eligible for status)[2]	N/A	Some practice differences[3]	Minor **accuracy** and **applicability** issue
Child lives on-reserve?	Child residence on/off reserve	Yes: all children in IMS should be "ordinarily resident on reserve"[4]	N/A	Some regional and practice differences[5]	Minor **accuracy** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	No	N/A	N/A	✖ Info. not available
	Caregiver Indian Registration Number	No	N/A	N/A	✖ Info. not available
Is the caregiver First Nations?	Caregiver's First Nations identity	No	N/A	N/A	✖ Info. not available
When was the child placed?	Dates of Start/End placement	Yes, through Start pay date and End pay date[6]	Mandatory field	Accuracy cannot be determined unless case files reviewed	Potential **accuracy** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | ✖ No information available | ? Information not provided | Applicability issue

(continued on following page)

2 The definition of **First Nations child** used by the FNCFS program at ISC is the following: "First Nation Child" refers to an Indian Child that is registered or eligible to be registered (under the *Indian Act*). The Social Programs National Manual also makes reference to specific communities of First Nations that may not (at the time) have a recognized reserve and to whom services were provided none the less. As such, this definition ***does not include*** "individuals who have been recognized as citizens by their First Nations" but are not eligible for status

3 There are times when the experiences of children and families do not neatly 'fit' into pre defined categories. Regions/agencies, in these cases, may make decisions on a case-by-case basis.

4 The residence of a child who comes into the care of a mandated child welfare authority is derived from the residency of the child's parent or guardian at the time the child is taken into care. Individuals who are off reserve for the purpose of obtaining educational, medical or social services not available on reserve because there is no reasonably comparable service available are considered ordinarily resident on-reserve. Definition of **Ordinarily Resident on Reserve** from the Social Programs National Manual (Sec 2.1.16): "For the purpose of providing child and family services, "ordinarily resident on reserve" means that an individual: 1) lives at a civic address on reserve; or 2) in the case of children in joint custody, lives more than 50% of the time on reserve; or 3) stays on the reserve and has no usual home elsewhere."

5 Regions, in concert with the agency, determine eligibility according to program guidelines. For example, in Manitoba it is where the child is taken into care that determines who funds services.
Furthermore, ISC recognizes that the circumstances of children and families are diverse and this requires flexibility. That is, there have been special circumstances for supporting individuals living in some non-reserve communities or who are members of land-less Indian Bands as being "ordinarily resident on reserve" for the purpose of being eligible to receive programs and services.

6 It is important to note that this information is tied to expenses, it therefore cannot be used to determine if a child moved between different placements during one "spell in care."

Appendix I. Overview of the Availability and Quality of Child Maintenance Data Held by the FNCFS Program at ISC from FY 2013-2014 to Present *(continued)*

Table I.1 Availability in FNCFS IMS data (FY 2013-2014 to present) to help identify eligible claimants under the child welfare compensation categories *(continued)*

Type of information needed	Information of interest	Availability Is the information available as a data field?	Completeness	Accuracy	Summary Issues identified
Child placed outside of their home and community?	Caregiver's address at time of removal	No	N/A	N/A	✖ Info. not available
	Address of placement	No	N/A	N/A	✖ Info. not available
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Partial: for all ISC regions, except for MB, info. is provided on whether child placed in kinship care	Mandatory field	Accuracy cannot be determined unless case files reviewed	○ Potential **accuracy** issue and minor **applicability** issue
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	No	N/A	N/A	✖ Info. not available
	Substantiation or verification level (maltreatment and risk)	No	N/A	N/A	✖ Info. not available
	Alleged perpetrator	No	N/A	N/A	✖ Info. not available
	Reason for placement	No	N/A	N/A	✖ Info. not available
Child placed in order to receive essential services?	Child placed to receive essential services	No	N/A	N/A	✖ Info. not available

Level of issue: ● None identified | ● None identified; some info not provided | ● Minor | ○ Potential | ● Medium | ● Significant | ✖ No information available | ? Information not provided | ▭ Applicability issue

Appendix J. Overview of Data Fields Available in Sample FNCFS Child Maintenance Reports (FY 2005-2006 to FY 2012-2013)

In order to determine the availability of data fields collected prior to FY 2013-2014, **sample child maintenance reporting forms** used by the different ISC regions' FNCFS staff between fiscal year 2005-2006 and fiscal year 2012-2013 were provided to the project team for their assessment and documentation. We have summarized the data fields available in reporting forms that relate to the CHRT compensation categories in the Tables below. It is important to note that these tables only provide information on the availability of certain data fields. They do not provide any information on the *completeness* (i.e., the percentage of missing child maintenance reports and missing data values), nor the accuracy of the information (i.e., the extent to which the information is correctly reports the information). The project team has asked for more details regarding the completeness and accuracy of data prior to fiscal year 2013-2014, which was not provided to us in time for this report. Furthermore, no information was provided to the project team regarding child maintenance forms prior to FY 2005-2006.

Alberta ISC Region

Table J.1 Data fields available in sample FNCFS child maintenance reports provided by Alberta ISC region (FY2005-2006 to FY2012-2013)

Fiscal Year	Child's Name	Child Indian Registration Number	Child Date of Birth	Child or Parent Residence on Reserve	Parent/ Guardian Name	Type of Care	Placement Start Date	Placement End Date	Cost Description	Other Support Costs
2005-2006	**Form not located by Region**

Appendix K. FNCFS – Child Maintenance Data Overview – Prior to FY 2013-2014

Source: Unmodified information from ISC staff

Overview:

- Prior to 2013-14, there was no national information management system for child maintenance data. As such, there are significant limits regarding the child maintenance data available from 1991 to 2012-2013 and the availability of data varies across the regions.
- Limits on information collected prior to the implementation of a national information management system includes:
  - Legacy systems have been decommissioned and the data they stored may be difficult to retrieve.
  - Precise information may not have been captured in early years, making it difficult to determine items such as the number of placements and time in care. Manual counts may be required.
  - Reports have been archived and are now stored off-site.
  - Older records or closed files would be subjected to Treasury Board and Departmental policies regarding physical records retention, and therefore may have been disposed of in accordance with those policies.

Region	Description	Data Source (e.g., existing data base, case file review, etc.)
SK Region	• Historical child maintenance data is available from the decommissioned SK regional system. • Approximate start date of data is 1995. • Data is based on FNCFS agencies that were operational and delegated at that time. • The Province of Saskatchewan has access to data through their own database for FN children in care not serviced by a delegated agency.	• SK region decommissioned database (accessible to NCR in an electronic format – MS Excel spreadsheets). o Regional consultation needed for details of the data • Province of SK database • Archived reports offsite
BC Region	• BC FNCFS data (from delegated agencies) is available from 2011-2012 in an electronic format. • BC data (from the Province - MCFD) is available from 2012-2013 in an electronic format. • BC FNCFS data (from delegated agencies) from 1996-1997 to 2010-2011 was collected in a regional dBase system. • BC data (from the Province - MCFD) from 2011-2012 was collected in a regional dBase system. • Records prior to 2010-2011 may not be accessible in an electronic format.	• BC regional system • BC regional dBase system (decommissioned) • GCDocs (as scanned documents) • Archived paper records (TBD by Information Management (IM) team)
ON Region	• Historical data are available from fiscal year 2000-2001 and forward. • Prior to 1998, the Ontario Region did not have a centralized approach to capturing and maintaining data.	• ON region database • MS Excel spreadsheets in GCDOCS

Appendix L. Data Expungement in the Field of Child Welfare *(continued)*

Executive Summary

Issue: The impact of data expungement in the field of child welfare.

Background: Child welfare agencies maintain records of all reports of child maltreatment and their outcomes in their information systems for the purposes of investigation, treatment, and prevention of child abuse and neglect. In some Canadian provinces and in most US states, case information on alleged child abuse is also added to a registry that may be accessible to other groups or agencies, including employers. While these systems are essential for protecting children from harm, the potential consequences faced by families and individuals after being added to a child welfare information system or registry have resulted in calls for reform. One proposed policy option to strengthen protections for individuals accused of child abuse is to enhance procedures for the expungement or removal of case records from the registry or from the local agency's information system entirely, if the case is determined to be either unfounded or false. This issue is of importance because any changes to data expungement laws would have implications not only for children and adults involved in child welfare investigations, but also for research and evaluation of child welfare services.

Methods: A scan of existing peer reviewed and grey literature was carried out to identify, collect and synthesize research evidence exploring the issue of data expungement for child abuse cases. The process involved a series of steps including the identification of key words/search terms and relevant data sources; the development of search strategies; an extensive search of the literature; screening and data extraction; and a synthesis of the literature. Search terms included: expungement; child welfare; child abuse/maltreatment; and registry. Search strategies were developed to meet the parameters of each database and were refined throughout the process as results were reviewed. Pertinent information was extracted from the literature and summarized throughout the report.

Findings: The results of the literature scan revealed a limited number of published articles that addressed the issue of data expungement from child welfare databases, and none from Canada; the majority of research was exploratory and has largely focused on the topic of child abuse registries in the US. Findings showed that there is currently wide variation in legislation across jurisdictions in terms of when cases of reported child abuse are added to an information system or registry, and circumstances or timeframes under which they can be expunged. As a result, there remains a lack of agreement among researchers and courts as to what procedures and systems for maintaining child abuse records would best serve to balance the rights and needs of both children and adults. For example, while child abuse information systems serve an important function of identifying and protecting children from the risk of abuse or maltreatment, they may also have serious negative consequences for the individual accused of child abuse, including barriers to employment and other opportunities - with a disproportionate burden on certain groups (e.g. people of lower income, minorities, and women). There is a need for more research to compare and evaluate data expungement policies and their outcomes (e.g. rates of rereports, and any harms suffered by children and families) in order to gain a better understanding of the impact of such policies for both child welfare services and the families that require these services, and to help to inform future policies in Canada.

Expungement of Data in the Field of Child Welfare
Literature Scan

1.0 Introduction

In the United States (US) and Canada, reports of alleged child abuse and neglect are maintained in an administrative database and/or registry[1] following an investigation by child welfare services. In general, the main purpose of these systems is to provide information to assist child welfare workers and agencies in the investigation, treatment, and prevention of child abuse and maltreatment (Child Welfare Information Gateway, 2018a). However, the process of investigating and assessing the risk of child abuse may be inherently imprecise and subjective, leading to potential bias and penalization against individuals and families. Therefore, it is important for child welfare workers to have access to as much accurate information as possible in making assessments of harm or the need for protection.

While child abuse registries are one important resource for child welfare agencies to consult when investigating a report of alleged child abuse, the information in registries may also be accessible to other individuals or groups, such as potential employers in health or child care fields or potential foster parents, as part of a screening process to ensure the safety of any children who would be in contact with the individual in question. Due to the potential negative impact on the alleged perpetrator of being listed on a child abuse registry, there is considerable debate on the standards and procedures used to maintain case records, and the rights of an individual to correct or remove their record from a child abuse registry.

[1] All child protective services use a record-keeping system or informational database to track reports of alleged child abuse and investigation and their outcomes. This system may be used for internal purposes only, or the information may also be entered into a state or province-wide registry, which may be accessible to other agencies or groups.

Appendix L. Data Expungement in the Field of Child Welfare *(continued)*

Expungement of Data in the Field of Child Welfare

Data expungement refers to the removal of old, inaccurate, or false records from a child abuse registry or database.[2] Expungement law can vary by jurisdiction and can also depend on case status. In most cases, if the alleged abuse has been confirmed or "substantiated"[3] (whether by a court of law or by a child protective service worker or agency), the record is included in the database or registry and can only be expunged once the child who was the subject of the abuse is over a certain age[4] (Child Welfare Information Gateway, 2018b). If the case is determined to be unsubstantiated or unfounded, the record may not be added to the system at all, or it may be automatically expunged from the database after a certain time period according to local regulations, or if the accused individual successfully requests the removal of their name. However, procedures for expunction of records are typically complicated and lengthy, and there have been several court cases in the US to determine the legal rights of alleged abusers who wish to have their record expunged.

In Ontario, current regulations require child welfare agencies to follow established guidelines and procedures when an allegation of child abuse is received. This includes consulting the provincial information system for any previous reports or referrals that may indicate the child is at risk of maltreatment and in need of protection. If a report of child abuse is determined to be 'verified', it is also added to the province's Child Abuse Register

[2] This report considers the issue of expungement of information from both registries (i.e. removal of an individual's name from a child abuse registry so that it is not accessible to anyone outside of the state child protective services agency) and from databases entirely (i.e. the destruction of all information about a case record from the system so that it is not even accessible to child protective service workers).
[3] States and provinces vary in the terms used to classify results of child abuse investigations. The classification of "substantiated" is usually given to a report when a determination has been made that abuse or neglect likely did occur. Other common terms for substantiated may include "founded," "indicated," "verified", or "confirmed". Similarly, when abuse has not been confirmed, a classification of "unsubstantiated", "unfounded", "not indicated", "not verified", or "unconfirmed" may be given. If no determination or decision can be made, the case may be considered "inconclusive".
[4] Typically, the age of adulthood is 18 years, but the specific age may vary by jurisdiction.

(CAR).[5] New privacy regulations implemented in January 2020 allow individuals the right to access their records of personal information and to request corrections.[6]

This literature scan will provide an overview of child abuse registries and the procedures for adding and removing reports to information systems across the US and Canada. Any research evidence on data expungement will be reviewed to help inform future policy and practice.

1.1 Why does the issue warrant attention?

There is currently a wealth of administrative data in Ontario and across Canada that could help to advance knowledge of child welfare services and their impact and provide valuable information to guide policymakers and practitioners. Any changes to data expungement laws for child abuse cases would thus have widespread consequences both for child welfare services and child maltreatment research and should only be done with great care. Understanding the potential risks and benefits that these changes may pose to both adults and children and youth is important before they are enacted.

2.0 Background

2.1 Overview of the process for reporting and tracking child abuse

In Canada and the US, all members of the public, including professionals and officials, have a duty to report suspected child abuse or neglect in order to protect the welfare of

[5] Cases must meet the criteria for abuse established by the *Child and Family Services Act (CYSFA)* in order to be added to the registry; this is, the child has suffered physical, sexual, or emotional harm. Therefore, cases of child neglect are not added unless they also meet these criteria.

[6] An amendment to Ontario's *CYFSA*, entitled "Part X", governs the collection, use, and disclosure of personal information by the Ministry and service providers (i.e. children's aid societies). The legislation allows individuals to access their records subject to certain exceptions, such as when there is a legal privilege, court order, or another Act that prohibits disclosure; or if granting the access could result in risk or serious harm or identification of another individual.

children.[7] When a report or referral about a child that may need protective services is received, the first step for the child welfare worker or agency is to assess the information and determine the appropriate response. At this stage, the worker may gather information from other sources, including the provincial or state database containing names of children and families with previous case records or who have previously or are currently receiving services.[8] After considering all available information about the child, family, and situation, including any previous patterns of child welfare involvement and other key factors such as vulnerability of the child or safety threats, the worker may decide to open an investigation; refer the family or child for other services; or take no further action (ie. the case is screened out and not opened for investigation).[9] If an investigation is warranted, the worker follows the established procedures and guidelines under their local regulations (i.e. the Ontario Child Protection Standards, 2016), which may include observation and interviews with the child, family members, or other possible witnesses.[10] The investigation results in a decision or classification of the case depending on whether the worker has determined based on the evidence that the alleged abuse likely did occur, and whether the child or family is need of protective services. The case outcome must be documented and notified to the child and family or individual in question.

In most US states and in some provinces, there may be an additional step of adding certain cases (i.e. those that have been verified or substantiated) to a register or registry containing information about the individual who committed the abuse and other case details. Further information on these registries is provided in the following sections. However, regardless of whether a centralized registry is in place, all investigated reports of

[7] In most states, professionals who interact with children are required by law to report known or suspected child abuse, and in some states, any person is required to report, with penalties for failing to report. (Hollenbeck, 2001)

[8] For example, in Ontario, this database is called the FastTrack Information System. When Children's Aid Societies receive a report of suspected child abuse, they are required to search this database for information that may help determine whether the child is in need of protection. For non-Indigenous agencies, screening workers will look for an existing record in CPIN (Child Protection Information Network).

[9] In Ontario, the Eligibility Spectrum is a tool used at this stage, which was designed to assist child welfare workers in making decisions about eligibility for service when they receive a report or referral. The Spectrum has been in use since the 1990s and was last updated in 2016.

[10] In Ontario, the investigation also includes a safety assessment and a risk assessment, which is used to inform case decision making and service provision (Ministry of Children and Youth Services, 2016).

child abuse and neglect and their outcomes are generally documented and some or all of the information is maintained in the agency's database for use by child welfare services.[11]

2.2 Purpose and use of child abuse databases or registries

The databases of child abuse reports and investigations maintained by child welfare agencies serve a number of important purposes. While their primary purpose is to aid child welfare investigations and protect children from maltreatment, the records may also be used for statistical or research purposes, to improve child welfare services, and to provide background checks for volunteer or employed positions that involve access to or contact with children (Huntzinger, 2020).

As described by Hollenbeck (2001, p.10) and others, central registries in the United States generally have one of four purposes:

1. *Record-keeping and statistics* – providing information to understand the nature and scope of cases of child abuse in the state, which can be useful for staffing and funding purposes (Child Welfare Information Gateway, 2018a)
2. *Quality assurance* – providing information to ensure that child welfare services are delivered effectively and to aid case monitoring and planning (Huntzinger, 2020)
3. *Diagnosis* – allowing child welfare workers to check the database for previous reports on a suspected perpetrator or victim of child abuse during an investigation
4. *Prevention* – providing employers or other agencies in the field of child care with access to reports during screening processes in order to keep abusers from gaining access to children

Using child welfare data for research and evaluation purposes

In addition, while not typically collected for this purpose, the administrative data compiled by state and local child welfare agencies may be a useful resource for policy research and evaluation. By providing information on policy-relevant outcomes such as documented child maltreatment incidents and foster care placements, this data can answer important research questions and contribute to the evidence base for evaluation of interventions and programs to prevent child abuse and improve services for families (Green et al., 2015).

While researchers in the US have long recognized the potential uses of administrative data in the field of child welfare, there is a lack of data and research on the efficacy of child welfare services and programs in Canada (Fallon et al., 2017; Trocmé et al., 2016). In Canada, the only national source of data on child welfare services is the Canadian Incidence

[11] Note: While the term "child protective services" or "CPS" is primarily used in the US, this report generally refers to "child welfare services" as this is the standard wording used in Ontario and Canada.

Study of Reported Child Abuse and Neglect (CIS), a cyclical survey conducted every five years between 1993-2008. The CIS has been accompanied by provincial or territorial incidence surveys, such as the Ontario Incidence Study (OIS), which was last conducted in 2018. However, the data from these studies is cross-sectional and only designed to produce national and provincial level estimates. The Ontario Child Abuse and Neglect Data System (OCANDS) has also been developed as the first provincial data system to track children and families involved with child welfare services longitudinally. Together, data from these studies can be used to describe characteristics of children and families investigated by child welfare services; estimate the rate and type of reported and substantiated child maltreatment; and track service trajectories and outcomes (Fallon et al., 2017). For example, it can help child welfare agencies to identify children at greater risk of outcomes such as long-term foster care; and to develop profiles of families at greater risk of recidivism of child maltreatment.

As described by Fallon et al. (2017), data from the OIS has already been used to inform several key policy initiatives in the province, such as the implementation of differential response models for the provision of child welfare services and the creation of specialized intimate partner violence teams; and has contributed to improved understanding of risk assessments and opportunities for early intervention to prevent future maltreatment among children who are at risk. However, the potential of the data has been limited thus far because most child welfare agencies do not currently have the tools or capacity to use these data effectively; and significant barriers remain in accessing longitudinal administrative data (Fallon et al., 2017; Trocmé et al., 2016). Emerging partnerships between universities and child welfare agencies in Canada, such as those described in Section 8.3, may help to bridge this gap and link child welfare research with policy and practice.

2.3 Comparison of child abuse registries and other registries

While there may be some overlap between cases of child abuse and criminal cases and in the consequences of having a record for either child abuse or another crime, it is important to note that child abuse registries and records are separate and distinct from other types of registries, namely criminal and sex offender registries. Some of the differences between these systems are noted below:

- Typically, there must be a legal finding or conviction made by a court against an individual in order for their name to be added to a criminal or sex offender registry; however, the criteria for being listed on a child abuse registry tends to be less stringent (Huntzinger, 2020). Often, a case record may be added to a child abuse registry before any hearing or court ruling, based only on the decision made by a child protection service worker during their investigation.
- In addition, during that investigation, an accused abuser is not automatically provided with the same type of rights that an accused criminal would be offered during a criminal investigation, such as the Miranda rights (Sen, 2020).
- Another difference is the accessibility of registries – while the information in child

abuse registries is limited to certain individuals, agencies or employers, court records showing criminal convictions can be accessed by the public, and in the United States (but not Canada), sex offender registries can also be searched by the public.

- Depending on the jurisdiction, there may also be differences in the length of time an individual's name is kept on the different types of registries. For example, in New Jersey, a sex offender typically remains on the registry for his or her lifetime unless they have been offense-free for fifteen years, at which time the individual can petition to be removed from the registry; whereas no such provision may be given to individuals on the child abuse registry, whose records generally cannot be expunged if they have been substantiated (Miller, 2011).
- It has also been argued that child abuse registries are more harmful than sex offender registries because of the loss of employment prospects that results from being listed on a child abuse registry, over and above the reputational harm caused by being accused of any type of crime (Navid, 2011).
- While other court systems consider the unique situations of minors and may seal or expunge juvenile criminal records, the child welfare system does not typically differentiate between minor and adult perpetrators in dealing with cases of abuse or neglect, including decisions to expunge records (Barry, 2018).

2.4 Child abuse databases in Canada

In Canada, child protection services are regulated at the provincial or territorial level rather than the federal level. Each province or territory has its own child protection legislation and regulations, with some differences in policies and practices across jurisdictions. Systems for maintaining information on reports and investigations of child abuse and maltreatment also vary, with some provinces having fairly elaborate information systems, while others only provide information at the local level (Fallon et al., 2011). Only three provinces have established child abuse registries to date – Manitoba, Ontario, and Nova Scotia; although some other provinces also allow for record checks of child abuse investigations using their information systems. In those provinces that do maintain registries, an individual may request or apply to have their name removed, although expungement procedures vary by province.

The standards of evidence that are used by child protection authorities to determine whether to intervene or whether maltreatment occurred also vary by province. Most provinces do not use a clear standard for substantiation of maltreatment; however, others use a two-tiered classification system to distinguish between cases where the alleged maltreatment is either 'substantiated' or 'verified' versus unfounded or not verified. In making this classification, some provinces such as Ontario, New Brunswick and Saskatchewan use a "balance of probabilities" approach to determine whether the weight of the evidence supports an allegation of abuse or neglect. In addition, child welfare statutes and standards in most jurisdictions cover not only cases where a child may have experienced maltreatment, but also cases where there is no evidence of harm but children

are at a substantial risk of future maltreatment. For example, in 2008, about three-quarters of all child maltreatment investigations in Canada were conducted for possible incidents of abuse or neglect that had already occurred, while one-quarter were focused on concerns about future maltreatment (Trocmé et al., 2010, Chapter 3). Both types of investigations are thus included in each province or agencies' administrative record systems.

Appendix A provides an overview of the legislation governing child welfare in each province and territory, and any existing policies and procedures for child abuse registries and expungement of records, as well as any information on the standards used for verification of child abuse allegations.

2.5 Child abuse registries in the United States

Overview

All fifty states in the US are required under national legislation to maintain a system of child abuse and neglect records, which include identifying information about the child and family, as well as the results of any investigations completed by child welfare agencies (Child Welfare Information Gateway, 2017). The Child Abuse Prevention and Treatment Act (CAPTA) enacted in 1974 is the primary legislation governing child abuse at the national level, and requires each state to develop their own procedures for the collection and maintenance of child abuse reports, as well as provisions for the prompt expunction of unsubstantiated or false records, if those records are accessible to the public or used for background checks. However, the law also allows for child welfare agencies to keep information on unsubstantiated reports in their case files to assist in future risk and safety assessments. (Child Welfare Information Gateway, 2018b).

While all states maintain these records, most often in the form of a central registry, the procedures and systems vary across states. There is variation in: the standards used to determine whether abuse occurred and whether a case should be placed on the registry; the type of information contained in the registries; the type of cases included in the registry (i.e. all investigated reports or only substantiated reports); who has access to the information in registries; the length of time information is kept on the registry; and conditions and procedures for expunction of data (Child Welfare Information Gateway 2018a; Sen 2020).

When are cases included in the state registry?

Perhaps one of the most important differences across states is the level of evidence needed to place an alleged abuser on the registry. The standards used to substantiate cases of child abuse and neglect are more variable than the standards of proof used in other areas of criminal and civil law (Kahn et al., 2017). For example, standards range from only "probable cause" or "some credible evidence" in some states to the higher level of "substantial evidence" or a "preponderance of the evidence" (Sen, 2020). Overall, most

states have a bias towards *including* cases of reported abuse on the registry, with a low standard of proof for substantiating a report (Hollenbeck, 2001). According to a survey of 38 states, less than two-thirds used the standard of "preponderance of the evidence" or higher to substantiate cases, and only one state applied the highest standard of "clear and convincing evidence" (McDonald, 2012; Kahn et al., 2017).

While in many states, only those cases that are substantiated are placed on the registry, several states also include unsubstantiated case records in their registries or state databases (Hollenbeck, 2001; Child Welfare Information Gateway 2018b).[12] For example, in Florida, only one-fifth of all reports of child abuse and neglect submitted to the registry between 2001-2010 were 'verified'[13], resulting in over 1 million records that were either false or unsubstantiated (Debler, 2012).

When can cases be expunged?

While most substantiated records are maintained in the registry until after the abused child in the report reaches adulthood,[14] unsubstantiated records are generally retained for a shorter period of time. In general, unsubstantiated cases of child abuse are removed or expunged from the state registry after a period ranging from immediately upon

[12] According to a 2003 study, less than half of states (23 states; 45%) restricted their central registry to substantiated, founded, or indicated reports, and 10 states had policies enabling them to maintain all reports on the registry (US Department of Health and Human Services, 2003)
[13] In Florida, 'verified' reports are those that met the standard of 'a preponderance of evidence' to conclude that child abuse or neglect occurred.
[14] However, some states maintain information for longer. For example, in New York, indicated reports remain on the central registry for ten years after the child's eighteenth birthday, meaning that an individual's name could potentially be listed on the registry for nearly 28 years (Barry, 2018). In New Jersey, any identifying information on children who were the subject of a founded report is expunged when the child turns 23; however, the names of perpetrators are retained indefinitely if their social security number or date of birth is known.

determination to 10 years, depending on the state's laws (Child Welfare Information Gateway, 2018b; Hollenbeck, 2001).[15]

Under CAPTA, local child welfare agencies are able to retain some information on even unsubstantiated cases in their records or files with identifying information removed, even if they have been removed from the state central registry. Despite this allowance, some states do call for expungement of the entire case record from the information systems used by child welfare agencies to maintain and track all case information after a specified time, thereby deleting all prior case history.[16] Some examples of states which require immediate or quick data expunction and destruction of all case records are provided in Table 1.

The legislation in Pennsylvania described in Table 1 is noteworthy because it was recently modified to extend the time period for maintaining records before expungement and to allow local agencies to keep information in their own databases, thus bringing the law more in line with other states and the CAPTA allowance. Since 2014, reports of child abuse that were considered to be valid in Pennsylvania were required to maintained in the state database for a period of only five years, after which they had to be expunged within 120 days.[17] In addition, county agencies had to follow the same procedures for the maintenance and expungement of records as the state database (i.e., if a record was expunged from the state database, the county was also required to expunge the record from its own database within 10 days) (Senate of Pennsylvania, 2017a).

In 2017, legislation was introduced to amend Title 23 (Domestic Relations), Section 6337 of the Child Protective Services Law in Pennsylvania, which contains the expungement guidelines for the statewide database of protective services. The new legislation (Senate Bill 938) sought to extend the time period for expunction of valid protective services reports from five to ten years, or until the child who was the subject of the report attains 23 years of age – whichever occurs first.[18] The amendment would also permit county agencies

[15] However, unsubstantiated cases may sometimes be maintained for longer periods in the state database. For example, In Indiana, electronic copies of all unsubstantiated case records are maintained in the state system until the youngest child who is the subject of a report turns 24.
[16] This type of expungement is only done for cases that meet certain conditions, such as those where the alleged abuse has not been confirmed, and where the individual or family has had no subsequent referrals or reports to CPS during the specified time period.
[17] However, if the case was accepted for child welfare services, the record was expunged five years after the closure of services, rather than five years after the report was received.
[18] Note that the proposed legislation did not change the time period for expungement of unfounded records, which was one year.

to continue to maintain information in their own records even if it has been expunged in the statewide database. However, this was to be solely for internal access by the agency "to assist in future risk and safety assessments and research". The proposed legislation was tabled in March 2018, and was enacted in June 2018 (under Act 54).

The Senators who introduced Bill 938 emphasized the importance of keeping administrative records of all reports of child abuse: "*The need for this update stems from the establishment of Act 29 of 2014, which created the Statewide Database of Protective Services within the Department of Human Services. The Statewide Database is an effective tool for tracking child abuse reports, however the language of the law requires counties to delete records in their own database whenever the State deletes information from its central database, based on certain timeframes. This has already affected county agencies, requiring them to expunge critical historical information from their county databases. Continuing to expunge this critical historical information will create unforeseen problems for the way counties utilize data to protect children and investigators and could put them both at potential risk*" (Senate of Pennsylvania, 2017b).

Expungement of Data in the Field of Child Welfare

Table 1 Examples of Procedures for Data Expungement from Child Abuse Information Systems in Selected US States

State	Description of Expunction Procedures
New Jersey	Requires the expunction of all unfounded reports in their entirety after three years – both paper and electronic records must be destroyed, erased, and deleted. Reports that were determined to be "established" or "not established" are not subject to expunction. Reports are expunged only when: they have a finding of "unfounded"; there are no current child protective service (CPS) allegations pending; CPS is not providing services as a result of the investigation; and three years must have passed since the case was closed or since the date of the last finding of 'unfounded' (e.g. if the case was changed from substantiated to unfounded). If any subsequent reports are received during the three-year time period, and these are also unfounded, the expunction date of all reports is three years after the most recent case closure date.
Pennsylvania	Unfounded reports are maintained for one year after the report is received, after which the report is expunged from the state database immediately. Substantiated cases (founded and indicated) are expunged after 10 years or when the child turns 23. The expungement of unfounded cases must be done no later than 120 days after the one-year period. However, if unfounded cases were accepted for social services, the expungement date is one year plus up to 120 days after the family case is closed. No identifying information can be retained by the state department; however, a county agency may maintain information from reports that have been expunged form the statewide database for access only by the county agency to assist in future risk and safety assessments.
New Hampshire	If a report is screened out (determined not to be credible and not referred for assessment), it is retained for one year, after which time the department must delete or destroy all electronic and paper records of the report. If the report is 'unfounded', it is retained for 3 years, and then all electronic and paper records must be destroyed or deleted. A founded report is retained for 7 years after the case is closed, at which time it is destroyed.

Expungement of information from registries through appeal

In addition to the procedures for automatic expungement of some cases after a specified time period, the majority of states also provide individuals the right to challenge or appeal the outcome of a child abuse investigation and request their name to be removed from the

registry; however, expungement procedures vary across states. Usually, the challenge is first made to the child welfare agency where an administrative review is conducted, but may progress to a court hearing if the request was denied and the individual files an appeal (Hollenbeck, 2001). In some states, the individual must petition the court for a hearing if he or she would like to challenge the report (Child Welfare Information Gateway, 2018b). However, there are often limits on the timeframe in which the accused individual can file a request; ranging from only 10-15 days after a notice is received informing the individual that their name is being placed on the registry, to 1-3 months after receiving notice. A few states, however, do not set a time frame, or will grant requests after the deadline if there is good cause (Sen, 2020). In addition, the actual process of challenging or appealing a finding may be quite lengthy and complicated (Huntzinger, 2020). One of the common criticisms against child abuse registries in the US is the difficulties faced by individuals in removing their record when it is false or unsubstantiated.

3.0 Debate Surrounding the Expungement of Data

The issues surrounding the standards and procedures used to maintain or expunge child abuse records have caused considerable debate. While researchers argue the importance of information systems and registries for purposes of risk assessment, prevention, and identifying trends and patterns in child abuse and neglect data, there is a growing movement for reform of the systems used in the United States, including stronger protections for alleged perpetrators. The negative impact on families from being investigated for child abuse and on accused individuals as they lose potential employment or other opportunities after having their name placed in a registry is considered by many to be not only unfair - particularly for low-income families and racial minorities, but also unconstitutional – especially in cases where the report of alleged abuse was false or unsubstantiated. Yet the alternative proposal of expunging case records would also have implications not only for risk assessment due to the loss of information that child welfare workers often rely on when investigating reports of maltreatment or risk of future maltreatment, but also for research studies that could use available administrative data to evaluate and improve service performance. The following section provides an overview of the arguments for and against data expungement in the literature.

3.1 Arguments in support of expungement

Impact on employment and other opportunities

In both Canada and the United States, child abuse registries are often used by employers to conduct background checks on potential employees or volunteers during the hiring process to identify anyone who may pose a risk to children, when the position involves contact with children. In at least 30 states in the US, the record check is either allowed or required (Huntzinger, 2020). When an individual is listed on a registry, they are often not eligible for jobs in child care fields – even when the report of alleged maltreatment is unsubstantiated (Owhe,

2013). For example, in Pennsylvania, the law prevents administrators of child care facilities from hiring anyone listed on the state's child abuse registry for a period of five years after the report (Sherman, 2011).

While employment in child care careers (i.e. child care centres) is predominantly affected, registries may also be checked for other types of employers depending on the state, including education, health care (e.g. home health aides), and transportation jobs (Sen, 2020; Huntzinger, 2020). For example, among indigenous communities in Manitoba, a policy is in place whereby the community council must present evidence showing that any applicant for "a position of public trust" is not listed on the province's child abuse registry. This includes the positions of recreation director, community safety officer, and any paid or volunteer positions that supervise children during recreational activities (Government of Manitoba, 2017). Furthermore, in many states such as New York, names remain on central registries even after the individual has been cleared of child abuse allegations in a court. Therefore, people may continue to lose job prospects even after any charges have been dismissed because of the laws in certain states and the lack of coordination between registries and family courts (Sen, 2020).

Besides employment prospects, other opportunities can be lost by having a prior case record of alleged or substantiated child abuse. This includes disqualification from becoming foster parents or adopting a child. It may also negatively impact a parent in custody determinations, resulting in a lower likelihood of gaining custody or visitation rights to the child. Finally, parents may also be unable to volunteer in their children's schools or participate in their extracurricular activities, such as coaching sports teams (Sen, 2020).

Violation of due process rights

As described in Section 4.0, several courts in the US have considered claims that child abuse registries infringe on citizens' constitutional rights to due process under the Fourteenth Amendment. Most courts have agreed that being listed on an employer-accessible child abuse registry does violate one's rights to both employment and reputation (Hollenbeck, 2001). Many courts have also determined that the standards and procedures used to report, maintain, and disseminate cases of child abuse are not sufficient to protect suspected abusers under the constitution, and have argued for stronger protections (Debler, 2012).

Burden on vulnerable populations

Similar to the consequences of criminal convictions, critics of child protective systems also argue that child abuse investigations and registries place an unfair burden on certain groups or individuals, namely people of lower socioeconomic status, racial minorities, minor parents (i.e. those under age 18), and women. According to Henry et al. (2019), low-income people and people of color are overrepresented in the child welfare system, and are disproportionally reported and substantiated for child abuse and thus placed on registries. Furthermore, the types of jobs that are required to check both criminal and child abuse registries before hiring (i.e. child care jobs) are largely occupied by women – particularly

women of colour (Henry et al., 2019; Krohn & Gullen, 2017). For example, according to 2018 statistics, over 90% of child care workers, preschool and kindergarten teachers in the US were female and almost 40% of child care jobs were held by women of color (Henry, 2019). As a result, employment opportunities for low-income women and women of colour may be disproportionally impacted by child abuse registry policies.

In addition, as noted by Barry (2018), minor parents – particularly those living in poverty – are also more likely to have cases of child abuse or neglect initiated against them and to have their children removed from their care compared to adult parents, which then has major ripple effects on their life, including future job prospects.

Impact on children

While most agree that child abuse registries serve their main purpose of protecting children from the risk of harm, it has also been argued that the consequences of being investigated for child abuse on parents may paradoxically decrease the well-being of children in the long run. If parents are prevented from finding employment as a result of being listed on a registry, their economic prospects are threatened and the family, including children, are more likely to live in poverty. This may then lead to an increase in poverty-related child maltreatment (Henry et al, 2019). Indeed, several studies have found an association between indicators of family poverty, risk of maltreatment, and experiences of maltreatment, as well as an increased risk of recurrent reports to child welfare authorities (Kohl et al., 2009; Fallon et al., 2011).

Again, the implications may be even stronger for women, particularly women of color, who are more likely to face barriers in finding employment in the fields of child care and health care after being placed on a registry. The proportion of household income that comes from women's earnings has increased in recent decades - women were the sole or primary income earners (contributing over half of the family's income) in approximately 40% of households in the US (in 2013) and Canada (2015) (Krohn & Gullen, 2017; Fox & Moyser, 2018). In addition, it has been reported that low-income women of color are the most likely demographic to be accused of child abuse and neglect, often resulting from poverty and stress. The cycle of unemployment, poverty, and child abuse that may result from being listed on a registry is thus an important consequence that must be considered when evaluating registries and expungement procedures.

3.2 Arguments against expungement

Enhancing child protection

The main argument against the expungement of records from child abuse databases and registries is the need to protect children first and foremost and prevent maltreatment. While most researchers and professionals acknowledge the need to protect innocent individuals who are accused of child abuse, they argue that it is more important to protect children who may be at risk, and that increasing protections for suspected abusers would infringe on the rights of children (Hollenbeck, 2001).

Maintaining databases for information purposes, monitoring and evaluation of child welfare services

Furthermore, in order to better protect children and identify those at risk, some argue that it is necessary to keep all case records of reported child abuse – whether substantiated or unsubstantiated – on file for information purposes, including statistical analyses and data collection, and tracking patterns of maltreatment. The more information that is included in the system, the more accurate and detailed data collection and monitoring efforts can be; and the more case reports that are included, the better child welfare workers are able to diagnose potential cases of child maltreatment (Hollenbeck, 2001).

In addition, case records may be important for informing best practices and improvements in child welfare services. For example, prior records may help to evaluate the effectiveness of services and interventions provided to families as a result of reported abuse, or to identify areas where better training or monitoring is needed (PennState, 2018). In Ontario, data from prior records are used to evaluate the performance of children's aid societies (CASs) and improve outcomes for children and youth who are receiving child welfare services (Ontario Association of Children's Aid Societies, 2018). Results are reported on five performance indicators (PIs) focusing on progress towards three key outcome areas: safety, permanency and well-being of children. Data from CASs are also provided to other studies or databases in Ontario to conduct program evaluations, influence policy, and to inform advocacy strategies. Thus the preservation of information from all investigations conducted by child welfare agencies is essential for informing policy and practice.

Prevention efforts

Another reason for keeping all reported instances of child abuse in databases without expunction is to maintain case histories for repeat offenders and thus help to prevent future harm. As noted by researchers such as Putnam-Hornstein et al. (2013), children who are referred to child welfare services for abuse or neglect often face multiple risk factors that result in high rates of rereferrals and even death from subsequent maltreatment – even when the initial allegation was unfounded. For example, data from child welfare agencies in Ontario on safety PIs has been used to track cases that return to the child welfare system after an initial investigation was closed.[19] Results from 2010-2017 show that while the majority of families who were investigated for child protection concerns did not have a recurrence within 12 months of when the case was closed; 14-16% of families

[19] For these analyses, closing a case following an investigation assessment suggests that there are no child protection concerns requiring ongoing CAS involvement or there are factors that are present that are beyond the control of the agency.

were later reinvestigated within 12 months with child protection concerns verified[20] (Ontario Association of Children's Aid Societies, 2019). This points to the challenge of accurately assessing children's risk level and the need for heightened monitoring of all children who are referred to child welfare agencies. It also suggests that the expungement of prior case records would have implications for tracking and preventing recidivism of child maltreatment, as it essentially "would erase all evidence relating to the pattern" (Debler, 2012, p. 32). In other words, child welfare workers would be missing vital information from prior investigations that could assist in identifying children at risk (PennState, 2018; Pierce & Feely, 2020).

Many states in the US use the criteria of substantiation to determine whether to expunge case records. For example, as mentioned in Section 2.5, some states expunge records immediately upon determining that the reported abuse is unsubstantiated, whereas others keep the records on the registry for a few years (although generally a shorter time period than substantiated cases). However, previous researchers have argued that unsubstantiated cases have a great degree of variation or heterogeneity, and that some unsubstantiated cases may still have high levels of harm or future risk, even if the evidence during the investigation was not sufficient to meet the state guidelines for placing the individual on the registry (Kohl et al., 2009). Furthermore, the required level of evidence needed for substantiation varies across states, contributing to the variation in the level of risk across cases. There is some evidence from the US demonstrating that there is no difference between substantiated and unsubstantiated cases of child abuse in the risk of future maltreatment, and thus substantiation is not a good predictor of recidivism among child abusers:

- Data from the National Survey of Child and Adolescent Well-Being, a national probability study of children and families investigated for child maltreatment between 1999-2000, were analyzed to examine whether cases that were initially classified as either substantiated or unsubstantiated differed in rates of recidivism over 36 months afterwards (as classified by either: any rereports, substantiated rereports, or subsequent foster care placements). Overall, 17% of cases had a rereport during the study period. After controlling for case characteristics, there were no differences in risk of recidivism on any of the three outcomes between substantiated vs. unsubstantiated cases (Kohl et al., 2009).
- Another study that used data from one state's child welfare system examined rates of subsequent child abuse reports among cases with an unsubstantiated first report between 2014-2019. The data showed that over one-third (36%) of cases with an unsubstantiated first report had a subsequent report within 4 years. The risk of rereport was highest within the first year, and then declined. A comparison with substantiated cases over the same time frame found no difference in the rates of

[20] The results do not identify whether the same child in the family experienced a recurrence of protection concerns; only that concerns have reoccurred in the same family. In addition, the recurrence may be for any kind of concern, not necessarily the same concern as the original investigation.

subsequent reports (Pierce, 2020).

These findings suggest that the use of the substantiation classification in child welfare policy and practice should be questioned, especially if it is used to make decisions such as placement on central registries. The researchers argue that all cases records should be retained regardless of substantiation status, except for clearly erroneous or malicious cases, which can be safely expunged (Kohl et al., 2009). Maintaining such records could be useful in showing patterns over time that highlight the need for services. In particular, the data from Pierce (2020) suggests that all records should be maintained for at least five years in order to capture the majority of re-reports; any shorter time frame for expunction would result in missing case history data.

4.0 Court Cases in the United States

In the United States, child abuse registries and the procedures regarding the inclusion and exclusion of individuals on the registries have been the subject of a number of court cases where claims of due process violations have been made. In several states, the courts have determined that central registries fail to adequately protect an individual's constitutional rights to due process[21], often resulting in changes to the procedures by which registries operate (Debler, 2012). In most cases, the issue is whether an individual has been deprived of their fundamental rights to liberty as a result of being named on an employer-accessible registry, such as the loss of the right to obtain employment. Other cases have focused on procedural due process violations, involving protections for individuals before their name is added to a registry, such as the right to a hearing or appeal.

A review of some of the key court cases and decisions is summarized below. However, it should be noted that there have not been a great number of cases in federal courts; which may be due to a couple of reasons: first, many people accused of abuse and listed on registries may not have sufficient funds to obtain legal assistance and pursue litigation; second, there is little federal oversight of state registries and their procedures (Sen, 2020; Sherman, 2011). The lack of federal rulings may create uncertainty both for states in maintaining their registries, and for individuals who wish to challenge procedures (Sherman, 2011).

- A precedent in determining whether one's due process rights have been violated was set in a 1983 Supreme Court case, *Paul v. Davis*, in which the plaintiff claimed that his rights were violated when police shared his name and image on a flyer as a convicted shoplifter and was stigmatized as a result (Hollenbeck, 2001; Sen, 2020).

[21] The Due Process Clause of the Fourteenth Amendment to the United States Constitution requires that certain steps must be taken before the state can deprive a person of rights accorded to them by the state. A state cannot deprive a person of a liberty or property interest without providing an appropriate opportunity for review (Sen, 2020, p. 870)

However, the Court decided against the plaintiff and determined that damage to one's reputation alone is not sufficient to invoke the procedural protections of the Due Process Clause. Instead, the reputational harm must be accompanied by some other "more tangible" component in order to meet the criteria for a loss of protected liberty interests, such as loss of employment opportunities. This is known as the "stigma-plus" test. While this case was based on a criminal record, the decision has since been used by courts as a standard to evaluate claims against child abuse registries as well, to determine whether being listed on registries infringes on one's rights beyond just reputation.

- For example, cases such as *Valmonte v. Bane* (1994), *Dupuy v. Samuels* (2005), and *Humphries v. County of Los Angeles* (2009) all determined that one's employment opportunities are impacted by being listed on an accessible child abuse registry, thus meeting the stigma-plus test and depriving a protected liberty interest (Sen, 2020).
- In the Humphries case, the plaintiffs were parents who were unable to remove their names from the California state registry even after a court found they did not commit the alleged child abuse. The Court of Appeals for the Ninth Circuit found that "*The lack of any meaningful, guaranteed procedural safeguards before the initial placement on CACI [Child Abuse Central Index] combined with the lack of any effective process for removal from CACI violates the Humphries' due process rights*" (Humphries *v.* County of Los Angeles, 554 F.3d 1170 (9th Cir. 2009).
- However, not all courts have found potential impacts on employment opportunities or prospects to be sufficient under the stigma-plus test and have dismissed claims for failing to demonstrate a specific and concrete loss of one's liberty interests (ie. a tangible loss of employment or salary) (Sen, 2020; Navid, 2011).

- The *Mathews v. Eldridge* Supreme Court case in 1976 also set a standard for courts when evaluating the procedures used by states in determining whether to place an individual's name on a central registry. The Court established three factors that should be considered in determining the adequacy of these procedures to protect the individual's due process rights, involving weighing the interests of the individual against the interests of the state. Specifically, the court decided that "*Procedural due process must be evaluated by using a balancing test that accounts for the government's interests, the individual's interests, and the risk of error under the existing process as well as how much additional procedures would help*" (Mathews v. Eldridge, 424 U.S. 319, 332 (1976)).
- Some courts have since used the Mathews test to determine that due process rights are violated by listing an individual in a central registry without first providing the opportunity for a hearing. For example:
  - *Jamison v. State Department of Social Services Division of Family Services* (2007) – the Supreme Court of Missouri decided that including a case in a

registry after an investigation by child protective services alone is not sufficient to balance the loss of liberty that comes from being registered, if employment could be affected.

- Similarly, in the *Matter of W.B.M* (2010) – the North Carolina Court of Appeals also decided that listing an individual on the state registry prior to a hearing was unconstitutional.

- In several of the above cases (*Valmonte v. Bane*, *Jamison v. State Department of Social Services Division of Family Services, and In the Matter of W.B.M)*, the court further determined that the standards of proof used to substantiate reports of child abuse are constitutionally deficient because they produced an unacceptable risk of error under the Mathews test. For example, the Valmonte court found that in about one-third of cases of reported abuse based on the standard of only "some credible evidence", the state ultimately removed the individual's name from the registry after a hearing (Sherman, 2011). In each case, the court held that a report of suspected child abuse must be substantiated by a 'preponderance of the evidence' before an individual's name can be added to a state registry (Hollenbeck, 2001; Huntzinger, 2020).
- In addition to claims of due process violations, courts have also considered the issue of defining child abuse in determining whether a record of reported child abuse should be expunged. In Pennsylvania ,where expungement procedures are more stringent than in other states, the Supreme Court decided in 2003 (in *P.R. v. Commonwealth, Department of Public Welfare*) that an act of corporal punishment by a parent that results in serious injury to a child may only be considered as child abuse if it results from criminal negligence, defined as having intent to inflict pain and foreseeable risk (i.e., the parent should have known that their actions would result in an injury). The court in this case expunged the plaintiff's record, which in Pennsylvania means the entire record was deleted from the CPS system and cannot be recovered. This set a precedent for allowing expungement of all records of corporal punishment by parents resulting in serious harm to children, if it can be argued that the act did not meet the definition of child abuse (Behney, 2003).

5.0 Objectives

The central objectives of the literature scan (LS) are threefold:

1) to identify the breadth and scope of existing research evidence exploring the issue of data expungement in the field of child welfare;
2) to uncover the range and nature of research activity on the topic; and
3) to provide an assessment of the value of undertaking a much more rigorous review of the topic that can be utilized to inform policy development and practice.

Expungement of Data in the Field of Child Welfare

6.0 Research Methods

A scan of both peer-reviewed journals and grey literature was conducted to: determine the depth and breadth of information available; and identify, collect and synthesize information relevant to the issue of data expungement in the field of child welfare. The LS for this study involved a series of steps which included:

1) the identification of key words/search terms
2) the identification of relevant data sources
3) the development of search strategies
4) an extensive and detailed search of peer reviewed and grey literature
5) literature screening and data extraction
6) a synthesis of the literature.

6.1 Keywords/Search Terms

The list of keywords/search terms in Table 2 was developed by examining existing abstracts and/or literature for alternative words, subject headings and phrases. Throughout the search process, keywords/search terms were added, deleted or modified as different terms were discovered to enhance the search strategy.

Table 2. Keywords/Search Terms

expungement; child welfare, child abuse, child maltreatment, registry

6.2 Data Sources

Two categories of data sources were selected for the LS: 1) peer-reviewed journals found in electronic databases; and 2) internet based grey literature. An extensive number of electronic databases were searched to identify relevant literature, including descriptive qualitative and quantitative studies for review. Databases searched included: Applied Social Sciences Index and Abstracts (ASSIA); Education Resources Information Center (ERIC); JSTOR; ProQuest; PsychINFO (OVID); Scholar's Portal; Scopus; Web of Science; and HeinOnline. For a brief description of each database, please see Appendix B – Sources of Information (Peer Reviewed).

The LS was expanded to include web based grey literature which included: dissertations and theses; conference proceedings; government publications; white papers; and working papers. Various search engines, research portals, dissertations and theses depositories and institution-specific websites were utilized for the identification and collection of relevant data. For a detailed list, please see Appendix C – Sources of Information (Grey Literature).

An initial scan was conducted from November 30 to December 2, 2019. The search was later revisited and expanded from August 25 to September 5, 2020.

6.3 Search Strategy

Search strategies were developed to meet the specifications and search parameters of each unique database. Search strategies that were used to maximize the number of relevant records retrieved included:

1) keyword and or exact phrase searches in the title, abstract or subject heading of a reference;
2) using Boolean operators (AND, OR and NOT) for different combinations of search terms; and
3) if available, filters specific to the database were used to refine and/or limit search results, allowing for the retrieval of relevant documents. Due to the limited availability of relevant literature, filters were used sparingly throughout the search process to ensure that no literature was overlooked.

Search strategies were tested and refined after search results were reviewed. After reviewing results, it was decided to limit the search results to literature published from the year 2000 through to the present in order to retrieve the most relevant results. A hand search of reference lists was also used to supplement searches. Citation searching is effective in the identification of new and current literature on a subject, resulting in a much more comprehensive search and literature review.

6.4 Literature Selection, Data Extraction and Synthesis

The title and abstracts of records retrieved from the databases and grey literature were screened for key words and any duplicates removed. The absence of variables of interest (e.g. keywords) relevant to the research objective were used as exclusion criteria. Pertinent information was extracted from the literature and presented in tabular form.[22] The extracted data included: the studies' author(s) and year of publication; the source of literature (i.e. peer-reviewed or grey literature); study objectives; a synthesis of results/findings; and conclusions/implications. The literature synthesis tables were then used to complete the remaining sections of the literature scan document.

[22] Note: the literature synthesis tables were developed and used during the review process but have not been included in this final document.

Expungement of Data in the Field of Child Welfare

7.0 Results of the Literature Scan

The results of the literature scan revealed a limited number of published articles that addressed the issue of data expungement from child welfare databases, and none were from Canada. As most states in the US maintain records of reported child abuse in the form of a central registry, most of the literature focused on issues surrounding the placement of individuals on these registries, rather than the broader information systems that may be used by child welfare agencies to track all reports. While the literature has largely been exploratory and untested, a few studies have analyzed data from the US to examine the impact of different standards of evidence used to substantiate reports of child abuse and place individuals on registries.

A central theme found in the literature was the need to balance the rights of children with the rights of their caregivers. While state central registries serve an important function of protecting children from the risk of abuse or maltreatment, they may also have serious negative consequences to the individual suspected of abuse, including barriers to employment and other opportunities. Some articles (e.g. Henry et al., 2019; Luciano, 2019) also focused on the disproportionate burden of central registries on people of low income and people of colour, particularly women. As noted by Henry et al. (2019), is important to consider the possible ways that being listed on a registry may actually undermine child well-being by increasing the risk of family poverty and its associated outcomes. Another theme found in the literature, particularly in the law databases, was the issue of due process rights for suspected perpetrators by placing their names on a registry without providing the opportunity to appeal or remove their record, even if they were found to be not guilty.

Many reviews and critiques of child abuse registries (e.g. Hollenbeck, 2001; Owhe, 2013; Sen, 2020) have argued for policy changes such as increasing protections for suspected perpetrators or raising the standard of proof used to substantiate reports of child abuse or neglect, which would reduce the number of substantiated reports included in databases or registries. For example, an analysis by Kahn et al. (2017) examined data from states where the standard of proof for substantiation of child maltreatment was increased and found that a higher standard is associated with a lower rate of substantiation, as expected. The authors also suggest that increasing protections for parents by raising the standard may not only reduce the likelihood of wrongful accusations, but it may also result in fewer children being placed in foster care, and greater provision of other types of services for families.

However, while these measures may help to reduce the hardships caused by registries on individuals and create more consistent standards, it is important to consider the full impact of such changes, including any possible risks to children. For example, given that many states expunge unsubstantiated case records or keep them on file for a shorter time period, a decrease in substantiated cases could result in a lower likelihood of identifying children at risk who were the subject of previous child welfare reports and referrals. Kohl et al.

(2009) and Pierce (2020) both found no difference between substantiated and unsubstantiated cases of child maltreatment in the likelihood of subsequent reports, demonstrating both the variability in cases and the benefit of maintaining all reported cases of abuse on registries rather than relying on specific classification terms. As noted by Green et al. (2015), "*Unsubstantiated reports are a critical source of information about child maltreatment, given the variability across states in how, when, and to what extent reports are investigated… as well as the evidence suggesting little or no difference between substantiated and unsubstantiated cases in regards to risk factors or future risk.*"

Furthermore, the data on child protective service investigations and their outcomes that is maintained in agencies' information systems may not only help in prevention efforts, but can also serve as a valuable resource for understanding and evaluating child welfare services and their impact. Enhancing the ability of child welfare agencies and researchers to access and utilize this administrative data can lead to more evidence-based practice and policies.

Finally, in addition to the literature on data expungement from child abuse databases, a brief scan of the literature on data expungement for juvenile crimes was conducted to provide an alternative perspective on the consequences of registries. The results of this scan revealed the importance of rehabilitation within the juvenile justice system and defining more flexible responses for those convicted of crimes as juveniles, in order to reduce or avoid lifelong costs associated with having a record.

8.0 Conclusions

The results of the literature scan demonstrate a scarcity of research on the topic of data expungement in child welfare. The majority of the research is grey literature in the form of law review articles and briefs, and focuses primarily on the consequences of child abuse central registries in the United States rather than expungement specifically. The lack of federal oversight of child abuse registries in both the US and Canada, as well as the lack of definite federal rulings in this area along with sometimes unclear or inconsistent definitions and standards of child abuse and neglect continues to leave some uncertainty both for courts, and individuals who wish to challenge the decisions and outcomes of child maltreatment investigations (Sherman, 2011; Navid, 2011; Luciano, 2019).

What is clear from the literature is that there are potential consequences both for wrongly accusing parents or caretakers of child abuse or maltreatment and including them in child welfare information databases or registries, and for failing to identify actual cases of child abuse or maltreatment as a result of the procedures and standards in place for identifying children at risk. Therefore, there is a need for balancing the protections for those accused of child abuse against the need to protect children from harm. Given the level of disagreement by both courts and scholars on this issue thus far, in addition to the large variation in procedures across jurisdictions, it is also clear that there is a lack of consensus as to what procedures would best serve due process and protect children. There is a need

for more robust research on the topic of expungement, including a more critical examination of child abuse registries and their consequences for both children and adults.

8.1 Limitations of this research

As discussed above, a limitation of the existing research is the gap in the literature for countries outside of the United States. While the overall approach to regulation of child protective services is similar in Canada and the US – with legislation in both countries being administered at the regional (states or provinces) rather than national level, resulting in a wide degree of variation across regions – there are also important differences in the approach to child welfare services in the two countries that has not been addressed in the existing literature. A better understanding of these differences and the applicability of legislation and policies in the US for Canadian provinces would be useful in evaluating possible approaches for policies and procedures in Canada. In particular, there is a need for more research on the impact of child abuse registries for minorities and vulnerable groups, including Indigenous populations. In addition, most of the research is descriptive or exploratory in nature, and there is a lack of evidence on the effectiveness of registries in actually reducing rates of child maltreatment and the potential impact of changes to policies or standards regarding child abuse databases and expungement.

8.2 Future research

To overcome the limitations of the existing research and provide a clearer understanding of the issue of data expungement in child welfare, it is recommended that more research is conducted to compare and evaluate the various expungement policies that are in place across jurisdictions in order to make evidence-based recommendations for policy improvements. This would include more data on the impact of changes in legislation on outcomes such as reporting rates, substantiation rates, and economic or other harms faced by families, such as the analyses conducted by Kahn et al. (2017). It would also include more studies analyzing rates of rereport or recidivism among child abusers such as those conducted by Kohl et al. (2009) and Pierce (2020), which would help to shape appropriate policies for maintaining case records in databases. As noted by Kohl et al. (2009), more generalizable efficacy studies conducted with real-world populations is called for. More research is also needed to explore alternative approaches to current procedures for the placement and removal of names in child abuse databases and registries, including those described in Section 8.3 below. Finally, there is a need for more research on Canadian policies and the impact and effectiveness of current systems, including child abuse registries in Manitoba, Nova Scotia, and Ontario.

8.3 Implications for policy

Researchers have offered several suggestions and recommendations for improvements to child welfare systems and the ways they operate. While most have focused on changes to child abuse registries and improved service options, some may have implications for data

expungement as well. A review of some of these suggested policy changes is summarized in this section.

1. Increase protections for suspected perpetrators

Several scholars have argued for the need to increase procedural protections for individuals accused of child abuse to better align with their constitutional rights in the United States. This includes measures such as:

a) Providing adequate notice to individuals when a report of child abuse has been made, including informing them of procedures and ensuring they understand and have the opportunity to respond to these notices;

b) Allowing better access to case records for individuals who have been reported;

c) Allowing individuals to challenge allegations at a hearing prior to being placed on a registry and within a reasonable timeframe; including abolishing or extending the deadlines given in some states for individuals to request expunction of their record;

d) Providing the opportunity for a fair hearing in which individuals may challenge their inclusion in a child abuse registry or database; and

d) Improving the appeals and expunction process by making it easier to quicker to navigate. For example, according to Sen et al. (2020), states should automatically expunge a report from a registry if a court has dismissed the finding of abuse – a procedure that few states actually follow, meaning that individuals are often forced to appeal their reports even when a court has already found that the alleged abuse did not occur. In contrast, many states prevent parents from appealing decisions to list them on a registry when a court has made a finding against them, suggesting a need for more balanced procedures.

2. Raise the standard of evidence required to substantiate reports of child abuse

Many researchers and courts have recommended that states use the higher standard of "the preponderance of evidence" rather than "credible evidence" or an even lower standard when investigating reports of child abuse and neglect and assessing whether to include cases on a registry. According to Sherman (2011, p. 896), *"States should adopt the standard that provides the strongest protection of individual rights, is consistent with the goals of protecting vulnerable populations, and does not present an undue financial or administrative burden on the state".*

The state of Missouri provides one case study for evaluating the potential impact of raising the standard of evidence. Missouri implemented a new law in 2004 changing the standard of evidence needed to substantiate a reported case of child abuse from "probable cause" to the more stringent "a preponderance of the evidence". This change came after a high-profile death of a young child by his foster parent, resulting in a call for legislative reform of

the child protective system to strengthen protections for parents and avoid unnecessary placements of children in foster care. Kahn et al. (2017) demonstrated that the change in the standard decreased the overall probability of substantiation of child abuse allegations by 3% in Missouri in the two years following the change. Studies have shown that while the total number of reports of child abuse and neglect fell in the year immediately following the legislative change in Missouri, the number of children who were the subject of child maltreatment investigations actually increased between 2006-2009. This finding suggests that contrary to arguments that a higher evidentiary standard would lead to an increase in unreported child abuse, increasing the standard does not necessarily lead to a decrease in the number of reported incidents in the long term (Kahn et al., 2017; Owhe, 2013).

3. Move away from current labels used to classify and assess risk

As described earlier, some have argued that current classifications used to determine whether child abuse has occurred in an investigation (i.e. "substantiated" or "unsubstantiated") are highly variable both across jurisdictions and in terms of actual level of risk. Researchers Kohl et al. (2009) suggest that labels used in child welfare cases should be changed to better reflect reality and focus more on risks and service needs in the family. For example, instead of the current "substantiation" label, they suggest a more restrictive label of "appropriate for court intervention" to indicate that there was enough evidence and risk of harm in a case to invoke family court. According to the researchers, "*Tracking such a real-world construct would make far more sense than counting "substantiated" cases"* (Kohl et al., 2009, p.25). Furthermore, understanding and tracking service needs (i.e. parenting support, financial support) would improve policy planning.

4. Diversion of some cases to alternate response systems

Advocates of the Community Partnership approach (as described by Hollenbeck, 2001) argue that state child welfare officers should focus their efforts only on investigating and servicing the most severe cases of child maltreatment, to save resources, while less serious cases should be delegated to private community organizations offering voluntary support services to families. These less severe cases would not be listed in the state registry; thereby limiting the number of cases included on the registry and reducing the stigma associated with being listed on the registry. This type of approach represents a multi-level or multidisciplinary approach to child protective services involving constructive interactions and coordination between stakeholders interested in child health and well-being. As described in a 2010 manual: "*Community partnerships bring child welfare agencies together with community organizations, service providers, concerned neighbors, and family members to help prevent children from entering the child welfare system and to provide families at risk or in crisis with access to services and supports*. (Office on Child Abuse and Neglect, Children's Bureau, 2010, p.5).

Miller (2011) advocates for a similar approach where cases of child abuse and neglect are treated differently depending on the severity of the case. In this view, given the potential

lifetime consequences of being placed on a registry, parents who commit minor (non-criminal) acts of abuse or neglect should not be placed on the same registry as those who have been convicted of more serious offenses. Instead, there should be alternate options provided for these individuals that would help to remove barriers to employment, such as expungement, rehabilitation, or diversionary programs – similar to what may be offered to registered sex offenders or other criminals.

Some states do already provide an alternate or differential response system - a relatively recent approach in child welfare whereby the more serious reports of child abuse receive a formal investigation that could lead to substantiation, while other (i.e. lower risk) reports are instead referred for an assessment of family needs so that appropriate services can be provided – often on a voluntary basis (Kahn et al., 2017; Font et al., 2019). Proponents of these systems argue that they allow child welfare authorities to more quickly respond to reports of child maltreatment with services that meet the immediate needs of families, which may then reduce the number of placements in foster care (Kahn et al., 2017). Font et al. (2019) also suggest that focusing investigations on families' risks and needs and providing services regardless of whether the abuse has been confirmed or substantiated (i.e. 'decoupling' substantiation and service provision) may be a more efficient use of limited resources. These systems are likely to result in fewer substantiated reports, which may further reduce the usefulness of substantiation as an indicator of child maltreatment (Green et al., 2015).

5. Provide targeted services and interventions for more vulnerable people

Similar to the alternate response approach, some researchers argue that child welfare services should recognize and support more vulnerable families and individuals, such as women, lower-income families, and families with substance abuse or mental health issues, by providing targeted social services and interventions. This may include educational opportunities, job training, housing assistance, and mental health or substance abuse treatment programs. According to Kohl et al. (2009), access to services that could help alleviate stressors associated with living in poverty may be important for reducing recidivism rates, and assisting with basic needs such as housing may be more useful than other more complex interventions. As described by Fallon et al. (2011), even families where child maltreatment has not yet occurred but with certain caregiver or societal characteristics that place children at higher risk of maltreatment still need services to address their needs and issues in order to prevent future harm.

In reference to criminal records, Krohn & Gullen (2017) argued that policy efforts must "include and emphasize substantive areas of particularized import to women" (p.274). For example, women with minor criminal records should be offered the chance to enter treatment programs rather than being incarcerated. The authors also recommend expanding expungement laws so that minor crimes are protected from public view, thus helping to give women – particularly women of color - a fairer opportunity to compete in

the job market. While this type of approach is more relevant to criminal records, it may be applicable to the expungement of certain child abuse records as well.

6. Maintain case records only for certain purposes

While child abuse reports are primarily used for the identification and prevention of child maltreatment, there are other uses for the databases that maintain these reports, such as record-keeping and providing statistical information for research and planning purposes (see Section 2.2). One possible approach recommended by the PennState Social Science Research Institute (2018) is to focus on these other internal uses of child abuse databases and limit unrestricted access to case records for purposes such as employment and background checks. These researchers argue that this more balanced approach would maintain case records without expunction but would restrict the information so that it is only accessible for purposes that protect children, including research to strengthen child protective services. Specifically, they recommend that records in registries "*be maintained internally for uses that promote child well-being, enhance caseworker efficiency, and enable research that informs the responsible and effective use of tax dollars*". Green et al. (2015) also recommend that state child welfare agencies should maintain all records of reported child abuse, including unsubstantiated reports, so that this information can be utilized for research purposes, such as the evaluation of interventions and programs for the prevention of child maltreatment.

7. Improve consistency of data collection procedures across jurisdictions by creating a national registry

Given the variation across states and provinces in the legislation of registries and expungement procedures, one policy option could be to centralize data on perpetrators of child abuse by creating a national registry. This has been proposed in the US under the 2006 Adam Walsh Child Protection and Safety Act, which established a national sex offender registry and also directed the Secretary of Health and Human Services to establish a national registry of substantiated cases of child abuse and neglect. An advantage of a national registry would be the ability to identify previous cases of child maltreatment that may have occurred in other jurisdictions and improve the efficiency of information sharing across states (McDonald, 2012). Another advantage would be improved quality and accuracy of data for research and evaluation purposes. As noted by researchers such as Green et al. (2015), accessing, combining and interpreting relevant information from child welfare administrative databases across states currently comes with many challenges and limitations, especially given the variation in procedures across states. If federal and state agencies were to move towards greater consistency in record keeping and procedures for accessing child welfare data, the usefulness of these data systems for research and policy evaluation would improve and expand.

According to a study assessing the feasibility of such a national registry in the US (McDonald, 2012), the foundations for a national child abuse registry already exist given

that nearly all states maintain the necessary data. In addition, the technical capacity exists and there is high interest in creating a national registry. However, in order for a national registry to be useful, a majority of US states would need to participate, and most would need to change their laws in order to participate. Legislative changes would also be needed at the federal level to allow for the collection of minimum information needed to accurately identify perpetrators in the national registry.

8. Enhance resources and support for child welfare research to improve services

The above suggestions to maintain case records for research and evaluation purposes and improve data collection procedures will only be impactful with adequate resources and capacity for mobilizing research efforts in Canada. As noted by researchers such as Fallon et al. (2017) and Trocmé et al. (2016), the paucity of child welfare research in Canada may be due to several factors, including limited resources and support for research; lack of training and research capacity for utilizing data; barriers in accessing longitudinal administrative data; and the absence of infrastructure that would enable linking child welfare data to other data sources (i.e. census data or mental health data). Therefore, providing the necessary supports to child welfare agencies to enable them to use the data they collect more efficiently and effectively would help to better understand child welfare services and their impact, and translate this knowledge into practice.

One method of research capacity building that has successfully been implemented in Canada is research-community partnerships. For example, the Building Research Capacity (BRC) initiative is a partnership between researchers at McGill University and community organizations, including First Nations and mainstream youth protection agencies (Trocmé et al., 2016). BRC was developed to build institutional capacity among youth protection organizations to conduct evidence-based research that would help to better understand and inform child protective services in Quebec. One of the core components of the BRC was to provide services and training to support the use and analysis of administrative service data on children who have been involved with child protections agencies in Quebec. Another example is the formal partnership between the University of Toronto, clinicians, policy analysts, and researchers from child welfare agencies across Ontario that was developed to advance the evidence base with respect to service provision in Ontario. One of the key objectives of this initiative was also to enhance the capacity of service providers to access and analyze administrative data from child welfare systems, in order to better understand service trajectories and outcomes (Fallon et al., 2017).

These examples demonstrate the potential of using administrative data from child welfare agencies for research and evaluation of child welfare services and programs, and the advantages of maintaining rich and accessible administrative datasets and information systems within the child welfare sector.

9. Consider alternate approaches for juveniles/minors accused of child maltreatment or other crimes

When a report of alleged child abuse or neglect is made against a parent who is a minor themselves, the impact on their lives may be more pronounced. Most states do not distinguish between minors and adults in the investigation and treatment of chases of child maltreatment. However, Barry (2018) has argued that minors should be considered differently than adults and provided with more flexible options, as they are in other legal systems. One policy option is to provide minors with the opportunity to expunge their record once they have turned eighteen, or after they have shown proof of rehabilitation, as is done in Arkansas. Another option is to distinguish between minors and adults in the state central registry, as is done in Vermont, and to consider the age of the individual in assessing their level of risk.

Appendix L. Data Expungement in the Field of Child Welfare *(continued)*

Appendix A – Child Abuse Registries and Policies in Canada

Table 3 provides an overview of the legislation governing child welfare in each province and territory, and any existing policies and procedures for child abuse registries and expungement of records, and any information on the standards used for verification of child abuse allegations.

Table 3 Child Abuse Registries and Procedures by Province/Territory

Province	Legislation (Date)	Registry	Information on registry, record checks, and expungement procedures	Standards for verification
Alberta	*Child, Youth and Family Enhancement Act* (2004)	No	No official registry but Child Intervention Record Checks may be completed through children's services. This service is targeted to individuals who will be working directly with children and youth; applicants for a foster home license or child and youth facility license; and applicants to be a kinship care provider. The check (also known as a Child Welfare Check) states whether a person has been involved in a child intervention investigation or has placed a child under the protection of the Child, Youth and Family Enhancement Act.[1,2]	Not specific – the director determines whether the child is in need of intervention.
British Columbia	*Child, Family and Community Service Act* (2000)	No	Social workers must investigate all reports of child abuse, but if they find that no protection is needed, the case file is closed.	Not specific.
Manitoba	*Child and Family Services Act (1985) and Child and*	Yes	The registry contains the names of individuals found to have abused a child – either by a court or a child abuse committee established by a child and family service agency. Access to the registry is only allowed for certain	When an allegation of child abuse is received by a child service agency, the agency establishes a child abuse committee (which consists of a

Appendix L. Data Expungement in the Field of Child Welfare *(continued)*

Expungement of Data in the Field of Child Welfare

	Family Services Authorities Act (2003)		individuals/groups: employers (when the work involves access to children); peace officers; adoption agencies; child and family service agencies; and a person who believes their name is registered[3,4] Expungement: A name is kept on the registry for 10 years, or until the child turns 18 years old, whichever comes last. Individuals have 60 days upon receiving notice of the intent to register their name to file an objection. A court hearing will be held to determine whether abuse occurred and whether the name should be entered into the registry. The court decision is final.	medical practitioner, police officer, school representative, and agency staff) to review the case. The opinion of the committee is determined by a majority vote as to whether they believe abuse occurred and whether the name of the person should be entered into the registry.[5]
New Brunswick	*Family Services Act* (1980)	No	While a registry is not currently in place, an independent review of the province's child protection system that was submitted to the Department of Social Development in 2018 recommended the adoption of a child abuse registry, along the lines of the one in Nova Scotia.[6]	Cases may be 'substantiated' (meaning it is more probable than not that the harm or risk of harm has occurred, currently exists, or is likely to occur); 'unsubstantiated' (it is not more probable than not that harm occurred); or 'inconclusive'. In applying the "more probable than not" test, the social worker must consider whether the evidence is both credible and persuasive.[7]
Newfoundland and Labrador	*Children and Youth Care and Protection Act* (2011)	No	No official registry; however, child protection clearance checks may be requested by employers, child care services, foster parent or adoption applications.[8] Individuals may also apply for a review of the child protection clearance check decision within 30 days.[9]	Investigations may result in one of three outcomes: allegations not verified; allegations verified but child is not in need of intervention; allegations verified and the child is in need of protective intervention.

Appendix L. Data Expungement in the Field of Child Welfare *(continued)*

Northwest Territories	*Child and Family Services Act* (1998; revised 2016)	No	If a report of suspected child abuse is made, a child protection worker conducts an investigation and completes a report that is filed. If no further protection or services are needed, the file is closed.	Assessment outcomes may be either: 'unfounded' (where the evidence does not support the allegation); 'founded' (evidence is sufficient to establish the truth of an allegation); or 'inconclusive' (insufficient evidence to determine truth).[10]
Nova Scotia	*Children and Family Services Act* (1990; revised 2016-17)	Yes	The Child Abuse Register contains the names of individuals who have been found by the court (Supreme Court Family Division or Family Court in Nova Scotia) to have abused a child. A person who is convicted of a criminal offense against or involving a child under the Criminal Code of Canada is also entered into the register. The register is used to: a) screen prospective foster and adoptive parents; b) screen prospective employees and volunteers who would be working with children; and c) help child protection workers to determine whether a child is in need of protective services.[11] Information in the registry is only available to the individual whose name is listed, and to an agency authorized or mandated to investigate whether a child is in need of protective services. An individual may request a search of the Child Abuse Register, and the results are provided in the form of a letter which may be shared with any organization that has requested the check. Expungement: a person whose name is entered on the Child Abuse Register may apply to the court to have their name removed. If the court	Not specific – the court determines whether a child is in need of protective services if they have suffered harm or abuse or there is substantial risk of harm.

Appendix L. Data Expungement in the Field of Child Welfare *(continued)*

			finds that the person does not pose a risk to children, their name is removed. The court decision may also be appealed within 30 days.[12]	
Nunavut	*Child and Family Services Act* (1998; revised 2014)	No		Not specific – a child protection worker determines whether a child needs protection when a report is made.
Ontario	*Child, Youth and Family Services Act* (2018; revised 2020)	Yes	The Child Abuse Register is a confidential database of information on reports of alleged child abuse by Children's Aid Societies (CAS) and is used in child protection investigations. The registry contains information on both abusers and victims (names, demographic data, information about the incident, and actions taken). A report is submitted to the registry only when an investigation of child abuse has been considered as 'verified' by CAS and does not typically include cases of neglect. Access to information in the registry may be provided to the following individuals: the registered individual, a child, the child's lawyer, coroner, medical practitioner, peace officer, employees of the Ministry, the Children's Aid Society, or a child welfare authority outside Ontario, a person providing counselling or treatment to a registered person, or a person engaged in research.[13] Expungement: upon receiving notice that a person's name has been entered in the registry, the registered person may request the Director of Children and Youth Services to remove their	The verification decision in child protection investigations is based on the test of whether it is "more probable than not" that the harm or risk of harm occurred or currently exists. Outcomes of investigations may be: 'verified'; 'not verified'; or 'inconclusive'. In assessing the evidence, the social worker must consider whether the evidence is both credible and persuasive. When an allegation has been verified, it is reported to the Child Abuse Register.[15]

Appendix L. Data Expungement in the Field of Child Welfare *(continued)*

			name. The Director may either grant the request or hold a hearing to determine whether or not to grant the request. If it is determined after the hearing that the information in the registry is in error, the person's name shall be removed and all records amended to reflect the decision. The hearing decision may also be appealed to the Divisional Court.[13] Note: In addition, an amendment to the law implemented in January 2020 set out a legislative privacy framework for Ontario's child and youth sector, establishing new rules for the collection, use, disclosure of, and access to personal information held by service providers. It provides clients the right to request access and correction to their records; and the right to a complaints process and independent review mechanism related to the collection, use, and sharing of personal information.[14]	
Prince Edward Island	*Child Protection Act* (1988; revised 2013, 2017)	No		Not specific – the director of child protection determines whether a child is in need of protection after an investigation.
Quebec	*Youth Protection Act* (1984; revised 2016-17)	No	While there is no information available on an official registry, the *Youth Protection Act* does allow the Government to make regulations to establish a register containing personal information in a child's record. The regulation must indicate which personal information will be entered in the register and on what conditions, and who will be in charge of it. However, the purpose of the register would be	Not specific.

Appendix L. Data Expungement in the Field of Child Welfare *(continued)*

			to allow only the Commission (the "Commission des droits de la personne et des droits de la jeunesse", responsible for protecting the rights of children) and the director of a child protection centre to check if a report has already been made involving the child. The information may only be disclosed under certain conditions, such as when disclosure is necessary to ensure the child's safety.[16]	
Saskatchewan	*Child and Family Services Act* (1990; revised 2017)	No	No registry but certain organizations (e.g. CMHA Saskatchewan) may request a child abuse record check as a condition of employment or volunteering.	Verification of allegations of child abuse or neglect during a child protection investigation may have one of three outcomes: 'substantiated' (where the weight of the evidence supports a finding that the child suffered abuse or neglect); 'unsubstantiated' (the weight of the evidence supports a finding that the child has not suffered abuse of neglect); or 'inconclusive' (not enough information)[17]
Yukon	*Child and Family Services Act* (2010)	No		Not specific – the director of children and family services determines whether a child is in need of protection after an investigation.

Appendix B – Sources of Information (Peer Reviewed)

Databases	Description
Applied Social Sciences Index & Abstracts (ASSIA)	Designed to serve the information needs of the caring professions, including practitioners, researchers, and students in healthcare, social services, education, and related areas. It is focused on a core of around 500 of the most relevant English language scholarly journals covering aspects of health and social care from a broadly social scientific perspective. Subject coverage includes: education; family; gerontology; health services; housing; mental health services; nursing; social work; and substance abuse.
JSTOR	Electronic database of interdisciplinary peer reviewed journals.
ProQuest	Multidisciplinary search engine of academic journals, newspapers, ebooks, and more.
PsychINFO (OVID)	Contains citation information and abstracts from journals in psychology and mental health. The Ovid platform is appropriate for systematic and scoping reviews as well as other advanced searches.
Scholars Portal	Ontario's university students, faculty and researchers have access to an extensive collection of e-journals, e-books, social science and geospatial data. Scholars Portal also supports the online interlibrary loan platform for Ontario's universities, a virtual chat reference service, and other tools designed to aid and enhance academic research in Ontario.
Scopus	Multidisciplinary bibliographic and citation database with extensive journal coverage especially in science, technology and medicine and is expanding its coverage of the social sciences
Web of Science	Citation information and research impact factors for multi-disciplinary journal articles, conference papers, books, and more

Appendix M. One-Page Project Information Sheet

2019 CANADIAN HUMAN RIGHTS TRIBUNAL RULING 39

Preliminary Review of Available Compensation Category Data*

UNIVERSITY OF TORONTO

McGill

In January 2016, the Canadian Human Rights Tribunal (CHRT) ruled that funding and provision of child and family services to First Nations children, as well as implementation of Jordan's Principle, was inequitable and discriminatory. A series of rulings regarding measures to rectify these human rights violations have followed this decision, including the 2019 CHRT ruling 39 released on September 6th, 2019, which ordered Canada to compensate victims of this discrimination and 2020 CHRT 7 ordering Canada to compensate the estates of deceased persons who would otherwise be eligible for compensation. The judicial review of the compensation order was recently dismissed by the federal court. However, the Government of Canada has appealed this decision. This means that, at this time, we do not have confirmation as to whether, how, or when the 2019 CHRT 39 may be implemented.

Pursuant to the compensation order, maximum allowable compensation (up to $40,000) is due to First Nations children and their caregivers who were impacted by FNCFS service inequities and Canada's discriminatory application of Jordan's Principle. Paragraphs 245-257 of the order describe the individuals eligible for compensation. Given the fact that the consultation process is ongoing, the compensation categories are subject to change. As of July 2021, they are categorized as follows:

Child welfare	First Nations children living on reserve or in the Yukon who were removed by the child welfare system and placed outside of their home, family, and community.	From January 1, 2006 until further notice[1]
	First Nations parents or grandparents who were the primary caregiver of a child removed from their home, family, and community; unless the parent or grandparent physically, sexually, or psychologically abused the child.	
Child welfare/ Jordan's Principle	First Nations children living on or off-reserve and their parents or grandparents in cases of unnecessary removal of a child to obtain essential services covered under Jordan's Principle.	From December 12, 2007[2] to November 2, 2017[3]
Jordan's Principle	First Nations children living on or off-reserve and their parents or grandparents who experienced a gap, denial or delay of essential services covered under Jordan's Principle.	

In paragraph 151 of 2020 CHRT 7, Canada must pay compensation to all deceased individuals who would otherwise be eligible.

This project aims to support the possible implementation of the CHRT decision in a way that minimizes the burden on individual claimants to prove their eligibility, by carrying out two main tasks:

- Identifying data sources that may be useful in determining the larger group of potentially eligible individuals for out-of-home care categories (1a, 1b, 2, 3a, and 3c) and Jordan's Principle categories (3a, 3b, 3c, and 3d). Assessing data completeness and the ability to extract information.
- Developing proposals to support a public campaign targeting those potentially eligible under all compensation categories

The project runs from **October 2020 to January 2022** and is funded by Indigenous Services Canada (ISC) with the support of the First Nations Child and Family Caring Society under the leadership of co-investigators Professor Barbara Fallon (Factor-Inwentash Faculty of Social Work at the University of Toronto) and Professor Nico Trocmé (School of Social Work at McGill University). In addition to seeking the advice of First Nations child welfare organizations and experts, the research team will provide reports to - and seek feedback from - the National Advisory Committee on First Nations Child and Family Services (NAC) throughout different project stages.

For more information, please contact the project coordinators: Marie Saint-Girons (marie.saintgirons@mail.mcgill.ca) or Johanna Caldwell (johanna.caldwell@mail.mcgill.ca).

* This version of the document is from November 2021 and is subject to change.

[1] Eligibility for this category will continue until: (1) Panel decides that unnecessary removal of FN children has ceased; (2) Parties agreed on a settlement agreement for long-term relief; or (3) Panel ceases to retain jurisdiction and amends the order.

[2] Date of adoption in the House of Commons of the Jordan's Principle motion (see: Canada. Parliament, House of Commons, Journals, 39th Parliament, 2nd sess., 2007 December 12, Number 036).

[3] Date of Tribunal's CHRT 35 ruling on Jordan's Principle (see: *First Nations Child & Family Caring Society of Canada et al. v. Attorney General of Canada (Representing the Minister of Indigenous and Northern Affairs Canada)*, 2017 CHRT 35).

INFORMATION ON CHILD AND CAREGIVER	**Name of child placed in out-of-home care**						
	Child's date of birth						
	Child's Indian status registration number						
	Child's Indigenous identity						
	Child's residence (on/off reserve)						
	Name of caregiver(s) at time of placement						
	Caregiver(s) Indian status registration number						
	Caregiver(s)' Indigenous identity						
	Caregiver(s) residence (on/off reserve)						
	Caregiver's address at time of removal						
INFORMATION ON PLACEMEENT	Date of entry to placement						
	Date of discharge from placement						
	Address of placement						
	Type of placement (foster care, residential, group care, kinship or customary care)						

1

Appendix N. Template – Child Welfare Data Questionnaire Table *(continued)*

	Placement in informal kinship care						
	Type of investigated maltreatment (physical, sexual, emotional abuse, exposure to intimate partner violence, neglect, and risk of maltreatment)						
	Maltreatment or maltreatment risk substantiation level						
	Reason for removal						
	Alleged perpetrator (name and/or relationship to child)						
CONTEXTUAL INFORMATION	Information regarding child's health and/or developmental needs						
	Information on whether the child was placed in order to receive essential services (e.g. physical or mental health)						
	Information on other health, social, or educational service providers involved with the child or family						
	Information on whether the child or family had been offered and/or received prevention services at the time of removal						
	Information on poverty, substance use, or inadequate housing experienced by the child or family. *If yes, does the worker identify if these factors were a reason for placement?*						

Appendix O. Child Welfare Data Outreach Contact List (Non-First Nations Agencies and Ministries)

This appendix was removed to protect the confidentiality of respondents.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory

Contents

Alberta P-2
British Columbia P-6
Manitoba P-10
New Brunswick P-13
Newfoundland and Labrador P-18
Northwest Territories P-21
Nova Scotia P-24
Ontario P-27
Prince Edward Island P-33
Quebec P-36
Saskatchewan P-42
Yukon P-46

The tables on the following pages document the availability and quality of data in sampled child welfare authorities and agencies across Canada, as they relate to child welfare compensation categories.

Data quality was assessed using three considerations:

- **Data availability** is an assessment of whether a data field is available and whether it can be retrieved.
- **Data completeness** is an assessment of the comprehensiveness and wholeness of data. Low completeness means that there is missing, or the "unknown" category is widely endorsed data.
- **Data accuracy** is an assessment of whether the data value is consistently interpreted as intended

In addition to an evaluation of data quality, we also determined the **applicability** of data – the ability of the variable to determine or assist with operationalizing the compensation classes.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Alberta

Outreach

In Alberta, given that the province is responsible for maintaining the data from both non-First Nations and First Nations child welfare agencies, we reached out to the Ministry of Children's Services to ask about the availability and quality of data as they relate to the CHRT compensation categories. Table P.1 provides a summary of the information received.

Table P.1 Overview of availability of data held at the Alberta Ministry of Children's Services (2006-present)

Alberta – Ministry of Children's Services – Review of data availability

Data system used by provincial and First Nations agencies: *Legacy system:* CYIM from 1996 to 2011-2014; *Current system:* CICIO from 2011-2014 to present[1]

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Information not provided	Very low missing[2]	Information not provided	No issues identified
	Child Date of Birth	Yes	Yes	Information not provided	No missing[3]	Some accuracy issues identified[4]	Minor **accuracy** issue
	Child Indian Registration Number	Yes	Yes	Information not provided	Approx. 30% unknown	Information not provided	**Completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

1 Answers provided re. data availability and quality in Alberta represent 2006-07 to December 2021
2 A low proportion of the Name of Indigenous child placed in out-of-home care is missing from 2006-07 to 2008-09. However, the Child's Name was available for all Indigenous Children for the remaining fiscal years.
3 Date of Birth Data are available for all Indigenous Children not in Care, in care, and receiving SFAA services from 2006-07 to date (Dec 15, 2021).
4 Small proportion of data may not be accurate as some children have been allocated January 1st as their birth Month/Day.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.1 Overview of availability of data held at the Alberta Ministry of Children's Services (2006–present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Is the child First Nations?	Child's First Nations identity	Yes	Yes, called **Aboriginal Group**[5]	Information not provided	Very low missing[6]	Information not provided	No issues identified
Child lives on-reserve?	Child residence on/off reserve	Yes	Yes, through proxies[7]	Information not provided	Varied completeness[8]	Accuracy issues identified	**Completeness** and **accuracy** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes, but not easy to determine caregiver at the time of placement[9]	Yes	Yes	Low % missing	Information not provided	Minor **completeness** and **applicability** issue
	Caregiver Indian Registration Number	Yes	Yes	Information not provided	Medium % missing[10]	Accuracy issues identified	**Completeness** and **accuracy** issues
Is the caregiver First Nations?	Caregiver's First Nations identity	Yes	Yes	Information not provided	About 30% missing[11]	Information not provided	**Completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

5 **Child's First Nations Identity – response options:** First Nations, Inuit, Métis, Registered, Non-registered, Potential to be registered
6 Most of the Indigenous Group was defined for Indigenous children receiving services (a very low percentage Indigenous Group is set as Unknown based on Aboriginal Group)
7 **Child residence on-/off-reserve** – While there is no data field for this variable, there are three proxies that may be used to determine whether a child lives on- or off-reserve: 1) Child's Address; 2) Service delivery (from DFNA or a provincial region); 3) On/Off Reserve Verification (OORV) status (based on caregiver's residence at time of intake).
8 Several completeness issues were identified for the three proxies. **Child's Address:** From 2006-07 to date (Dec 15, 2021), more than 1/3 of Indigenous Child's Address is missing. The majority of missing data are either incomplete or invalid. **Service Delivery:** More than 2/3 of Indigenous children/youth receive services from a Region, however this does not always indicative of where they physically reside. **On/Off Reserve Verification (OORV) status:** From 2006-07 to date (Dec 15, 2021), less than 1/3 of the (OORV) status is outstanding. Note that the OORV process helps determine the OORV status of the child and the OORV status and it is based on the Caregiver's residency at the time of the Intake. In addition, the physical address of a child may be Off-Reserve, but the child OORV status is deemed On-Reserve based on the Administrative Reform Arrangements criteria. As the OORV status remains in effect as long as there is no break in services, this indicator will not be accurate should the child have different addresses (On/Off Reserve) during an Intervention period.
9 From 2006-07 to date (Dec 15, 2021), most of the Indigenous children/youth have at least one person listed as a parent (either parent or non-custodial parent) when they were placed. However, it was not clear whether the name of the listed parent was the child's caregiv*er at* the time of placement.
10 More than 1/3 of the Registration Indigenous Number data is missing for First Nation Parent/Non Custodian Parent.
11 More than 2/3 of parents or non-custodian parents' Indigenous Identity are available.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.1 Overview of availability of data held at the Alberta Ministry of Children's Services (2006–present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
When was the child placed?	Dates of Start/End placement	Yes	Yes	Information not provided	Complete for all placed children	No accuracy issues identified	No issues identified
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes, but defined as child's address[12]	Yes	Information not provided	More than 30% missing (incomplete or invalid)	Accuracy issues identified	**Completeness** and **accuracy** issue
	Address of placement	Yes	Yes	Information not provided	Low % unknown[13]	Information not provided	Minor **completeness** issue
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, includes kinship care[14]	Yes[15]	Information not provided	Complete for all placements	Information not provided	**Applicability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

12 **Caregiver's address** – Address is defined as the child's address in the system – is mandatory but the quality is likely poor.

13 The majority of missing data are for children/youth that are placed in At Home or Independent Living. However, as the placement address for those children/youth is defined as their address and given that 60% of this data is accurate for the mentioned placement type, the overall proportion of missing data is low.

14 **Applicability issue:** Kinship care in AB includes close family friends.
The caregiver must have a family relationship or significant connection to the child – for example, grandparent, aunt or close family friend.

15 **Type of placement – response options:** Foster care, Agency foster care, Kinship care, Agency kinship care, Group care, Campus based care, Independent living, Parent/guardian care, Permanent placement-adoption, Relatives/community member, Absent from placement, Secure services, Personalized community care, Out of province foster care, Out of province kinship care, Out of province group care, PSECA community resource. **Note**: Placements aren't always indicative of legal authority. Some are in the home. You can be in care but receiving services still in the home.

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes	Yes, called **Reason for Involvement**[16]	Information not provided	Completeness issues[17]	Information not provided	**Completeness** issue
	Substantiation or verification level (maltreatment and risk)	Yes	Yes[18]	Information not provided	Completeness issues[19]	Information not provided	**Completeness** issue
	Alleged perpetrator	Yes	Yes[20]	Yes	Information not provided	Information not provided	No issues identified
	Reason for placement	No, nothing beyond substantiation	No	Yes	Information not provided	Information not provided	Significant **availability** issue
Child placed in order to receive essential services?	Child placed to receive essential services	Only as case notes, if available	No	Possibly	Not mandatory; possible completeness issues	Information not provided	**Availability** and **completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

16 **Reason for involvement** – response options: Abandonment, Guardian deceased, Neglect, Sexual abuse by guardian, Risk of sexual abuse by guardian, Physical injury by guardian, Guardian unable/unwilling to protect child from physical injury, Guardian unable/unwilling to protect child from sexual abuse, Emotional injury, Guardian unable/unwilling to protect child from emotional injury, Guardian subjects child to cruel/unusual punishment, Exposure to cannabis grow operation, Exposure to chemicals for manufacture, Illegally manufacture/stores [of chemical or illegal substance to manufacture drug], Involve/expose child to trafficking [drugs], Possess substance for manufacture, Risk phys./emot. Injury, sexual abuse, Surrender.

17 Data on Intervention Open Reason is available from 2006-07 to date. However, from 2006-07 to 2012-13 most of the type of investigated maltreatment data is missing (Investigation Allegation Category – Front End Services); this data is mostly available for the remaining years (2013-14 to date).

18 **Substantiation or Verification level** – Substantiated or Not substantiated

19 From 2006-07 to 2012-13 most of the type of maltreatment or maltreatment risk substantiation level data is missing. The data is mostly available for the remaining years (2013-14 to date).

20 **Alleged perpetrator** – At time of intake a participant can be assigned the role of Alleged Maltreater, but this may be someone other than the caregiver. Additional information on the file would be available to identify the relationship of the participant to the child.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

British Columbia

Outreach

In British Columbia, the province is responsible for the data collection related to non-First Nations agencies and many First Nations child welfare agencies, we contacted officials at the Ministry of Child & Family Development to ask about the availability and quality of data as it relates to the CHRT compensation categories. We also spoke with a First Nations agency in British Columbia who use the ICMS. Table P.2 below summarizes the information.

Table P.2 Overview of availability of data held by the Ministry of Child and Family Development in British Columbia

British Columbia – Ministry of Child and Family Development – Review of data availability
Data system used by provincial and certain First Nations agencies: Integrated Case Management System (ICMS) since 2012

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Possibly	Complete	No accuracy issues identified	No issues identified
	Child Date of Birth	Yes	Yes	Possibly	Complete	Sometimes typos	Minor **accuracy** issue
	Child Indian Registration Number	Yes	Yes	Possibly	Inconsistently documented; not mandatory	Some accuracy issues[21]	**Completeness** and **accuracy** issue
Is the child First Nations?	Child's First Nations identity	Yes	Yes[22]	Possibly	Mandatory	Information not provided	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

21 When documented, this is entered manually so there may be typos.
22 **Child's First Nations Identity – response options:** First Nations, Inuit, Métis

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.2 Overview of availability of data held by the Ministry of Child and Family Development in British Columbia *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child lives on-reserve?	Child residence on/off reserve	Yes	Yes[23]	Information not provided	Inconsistently documented; not mandatory	Accuracy issues[24]	**Completeness** and **availability** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes, but collected at intake hard to extract[25]	No	Yes[26]	Low % missing	Accuracy issues[27]	**Retrievability**, **accuracy**, and **applicability** issue
	Caregiver Indian Registration Number	Yes	Yes	Possibly	Uncertain how often this is completed[28]	Possible accuracy issues	Potential **completeness** and **accuracy** issues
Is the caregiver First Nations?	Caregiver's First Nations identity	Yes	Yes[29]	No	Inconsistent across time[30]	No accuracy issues identified	**Completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

23 **Child residence on/off reserve – response options:** When address is entered, worker can flag "on-reserve." Address is associated to the parent's file, rather than the child's.
24 There may be challenges finding the right address at the right point in time; there can be multiple addresses at one point in time (e.g., one parent on reserve and one parent off reserve with joint custody). Despite a specific flag for "on reserve", there is evidence of inconsistent documentation of on/off reserve for funding purposes .
25 There may be no good way to extract the data without considering the entire electronic file because this is not a data field.
26 This will also be included in the legal orders related to placement.
27 While caregiver name is documented at intake, it could be challenging to link this with placement (if multiple intake files are open at the same time, with different caregivers listed, there could be a question as to which caregiver was the child taken from). Furthermore, biological parents are always included; caregiver at the time of placement is not so clear. Sometimes it's grandparents, aunties, etc who are caring, but the parents are technically the legal guardians from whom the child is removed, unless the child's guardianship was already transferred through a legal agreement.
28 If parents are not the caregiver, this may be less available.
29 **Caregiver's First Nations Identity – response options:** First Nations, Inuit, Métis
30 This is 100% complete since 2015, unclear before this time. Not always complete for both parents.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.2 Overview of availability of data held by the Ministry of Child and Family Development in British Columbia *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
When was the child placed?	Dates of Start/End placement	Yes	Yes	Possibly	100% complete; possible data entry delays[31]	No accuracy issues identified[32]	No issues identified
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes, but at intake[33]	No	No	Information not provided	Information not provided	**Applicability** issue
	Address of placement	Yes	Yes	No	Almost always complete[34]	Minor accuracy issues[35]	Minor **accuracy** issue
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, includes equivalent of kinship (called restricted foster home)[36]	Yes	Yes	High completeness	Accuracy issues identified	**Accuracy** and **applicability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

31 There can be a delay when children age out of care or get discharged, because the social worker hasn't updated the information in the system – at any given time you'll see lags in these updates (up to 2 months).
32 As this is related to payments and legal authority to place children, this is accurately documented.
33 The caregiver address is entered at intake, so the address at the time of removal may or may not be the same.
34 This is always complete when there are formal placements.
35 Placement address field may not fully capture changes in placement; there may also be delays in entering this information.
36 **Restricted foster homes** involve a child being placed in a foster home with a family member, neighbour, or close family friend instead of a standard foster home placement. As such, this placement type in BC includes family members *as well* as neighbours and friends.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.2 Overview of availability of data held by the Ministry of Child and Family Development in British Columbia *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed because of abuse and/or Neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes	Yes[37]	Yes	Almost always complete[38]	Information not provided	No issues identified
	Substantiation or verification level (maltreatment and risk)	Yes, through proxy	Yes[39]	Yes	Often complete	Information not provided	Minor **availability** and **completeness** issue
	Alleged perpetrator	Likely	No	Possibly	Unknown level of completeness	Information not provided	Potential **availability** and **completeness** issue
	Reason for placement	Yes	Yes[40]	Possibly	Information not provided	Information not provided	No issues identified
Child placed in order to receive essential services?	Child placed to receive essential services	Possibly	No	Possibly	Information not provided	Information not provided	Potential **availability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

37 **Type(s) of investigated maltreatment – response options:** "Grounds for investigation": (a) if the child has been, or is likely to be, physically harmed by the child's parent; (b) if the child has been, or is likely to be, sexually abused or exploited by the child's parent; (c) if the child has been, or is likely to be, physically harmed, sexually abused or sexually exploited by another person and if the child's parent is unwilling or unable to protect the child; (d) if the child has been, or is likely to be, physically harmed because of neglect by the child's parent; (e) if the child is emotionally harmed by (i) the parent's conduct, or (ii) living in a situation where there is domestic violence by or towards a person with whom the child resides; (f) if the child is deprived of necessary health care; (g) if the child's development is likely to be seriously impaired by a treatable condition and the child's parent refuses to provide or consent to treatment; (h) if the child's parent is unable or unwilling to care for the child and has not made adequate provision for the child's care; (i) if the child is or has been absent from home in circumstances that endanger the child's safety or well-being; (j) if the child's parent is dead and adequate provision has not been made for the child's care; (k) if the child has been abandoned and adequate provision has not been made for the child's care; (l) if the child is in the care of a director or another person by agreement and the child's parent is unwilling or unable to resume care when the agreement is no longer in force.

38 This is captured in Screening Assessments (almost all cases) and Safety Assessments (80% of cases 2013-2015, 100% of cases since 2015; not all safety assessments complete).

39 **Substantiation or verification level** – Substantiation is documented using the term "a child is in need of protective services". Maltreatment risk is assessed early on in the screening assessment (Protection Response or Non Protection Response), and again later in the safety and/or vulnerability assessments. Vulnerability assessment leads to scores of high, medium, or low risk. We have access to vulnerability since June 2015 (on approx. 80% of closed incidents). Safety assessments lead to a decision of Unsafe, Safe with Intervention, or Safe.

40 **Reason for placement – response options:** AAD-Placement, ABN-Abandoned, ABS-Absent, CBC-Behavioural, CEC-Emotional, CMC-Mental, CPC-Physical, DEA-Death, DEC-Deceased, DEP-Deprived, EMO-Emotional, EDN-Ended, NEG-Neglect, OTC-Othr Cntry, OTP-Other Prov, PAR-Parenting, PHY-Phy. Harm, PNP-No Protect, PRT-Treatment, REL-Relinquish, RTR-Refusal, SXL-Sex Abuse, TPC-Temporary, TRA-Crt Trnsft, UNA-Unable, YRH-Youth Home

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Manitoba

Outreach

In Manitoba, given that the province is responsible for maintaining the data from both non-First Nations and First Nations child welfare agencies, we reached out to contacts at the Department of Families to ask about the availability and quality of data as they relate to the CHRT compensation categories. Table P.3 below summarizes the information.

Table P.3 Overview of availability of data held by the Department of Families Manitoba

Manitoba – Department of Families – Review of data availability
Data system used by provincial and First Nations agencies: Child & Family Services Application system (Intake Module and Child and Family Services Information System) since 1993

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child placed in out-of-home care be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Yes	Estimated around 8-10% missing	Spelling inaccuracies can occur	Minor **completeness** and **accuracy** issues
	Child Date of Birth	Yes	Yes	Yes	Estimated around 8-10% missing	Formatting difference (flipping month-day) can occur	Minor **completeness** and **accuracy** issues
	Child Indian Registration Number	Yes	Yes	Yes	Information not provided	Minor errors in Status Number sometimes occur	Minor **accuracy** issue
Is the child First Nations?	Child's First Nations identity	Yes	Yes, called **Aboriginal Status**[41]	No	Estimated low % missing (higher missing in North)	Not aware of any issues	Minor **completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

41 **Aboriginal Status (CFSIS) – response options:** Not Determined, Not Aboriginal, Status (Treaty), Métis, Non-Status, Inuit

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.3 Overview of availability of data held by the Department of Familes Manitoba *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child lives on-reserve?	Child residence on/off reserve	Yes	Yes[42]	Yes	Estimated low % missing (higher missing in North)	Not aware of any issues	Minor **completeness** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Partial: difficult to identify the caregiver at the time of removal specifically[43]	Yes	Yes	Information not provided	Spelling inaccuracies can occur	Minor **accuracy** and **applicability** issue
	Caregiver Indian Registration Number	Yes	Yes	Yes	Information not provided	Minor data entry errors for Status Number can occur	Minor **accuracy** issue
Is the caregiver First Nations?	Caregiver's First Nations identity	Yes	Yes, called **Aboriginal Status**[41]	Yes	Estimated low % missing (higher missing in North)	Not aware of any issues	Minor **completeness** issue
When was the child placed?	Dates of Start/End placement	Yes	Yes	Yes	Information not provided	Human error sometimes occurs	Minor **accuracy** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

42 **Residence on reserve – response options:** Yes, No, or Unknown

43 Child in care cases capture the associated person name, their relationship status in relation to the child in care, but difficult to identify the exact caregiver at the time of removal

Appendix P. Overview of availability and quality of data held by child welfare authorities and agencies sampled in each province/territory *(continued)*

Table P.3 Overview of availability of data held by the Department of Familes Manitoba *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes	Information not provided	Information not provided	Estimated 30% missing	Human error sometimes occurs	**Completeness** issue and minor **accuracy** issue
	Address of placement	Yes, but could be stored in alternative tracking system	Yes	Yes	Information not provided	Spelling inaccuracies sometimes occur	Minor **accuracy** issue
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, but no direct estimate of kinship placement[44]	Yes, called **placement categories** and **placement type**[45]	Yes	Information not provided	Incorrect category could potentially be selected.	Potential **accuracy and applicability** issue
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes, but stored in the alleged offender protection case[46]	Yes[47]	Yes, in Safety Assessment	Information not provided	None identified	Minor **availability** issue
	Substantiation or verification level (maltreatment and risk)	Yes, for maltreatment, but no verification of risk of maltreatment	Yes, for maltreatment, called **Investigation Status**[48]	Yes	Information not provided	Not very reliable	**Availability** and **accuracy** issue
	Alleged perpetrator	Yes	Yes, name of perpetrator	Sometimes includes relationship	Estimated 10% missing information	Information not provided	Minor **completeness** issue
	Reason for placement	Low: collected, but no info on if child placed because of abuse	Yes, called **placement entry reason**[49]	Sometimes	Information not provided	Information not provided	**Applicability** issue
Child placed in order to receive essential services?	Child placed to receive essential services	Yes, but not consistently	Yes, see **placement entry reason**[49]	Sometimes, but not mandatory	Information not provided	Information not provided	**Availability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

44 Certain studies have used the highlighted placement type response options in the next footnote to determine if a child was placed in kinship care, but these are deemed not to be reliable enough to distinguish foster care from kinship care.

45 **Placement categories – response options:** Foster home, foster home staffed, foster home specialized, place of safety, res care/group home, correctional facility, health, mental health, independent living, out of province, select adoption probation, own home/relative, not known

Placement type – response options: Not Specified, General Placement, Emergency/Receiving, Child specific-family, Child specific-other, Safety-family residence, Safety-Motel/Hotel, Safety-Womens shelter, Historical placement-untracked, Placement alone-Independent living, Placement with proctor-Independent living, Out of province placement, No placement, Select Adoption Probation

46 Maltreatment screen is filled out on the Alleged offender's Protection case. The alleged victim would present as an associated person on the alleged offender's protection case.

47 **Investigated maltreatment – response options:** physical abuse (act of omission, physical injury, physical discipline, physical altercations between siblings, physical-position of trust, physical/sexual abuse, sexual abuse (act of omission, sexual exploitation, Sexual – age of consent, intrafamilial sexual abuse, sexual-position of trust, sexual behaviour between children).

Trauma type – response options: death, physical abuse, sexual abuse, emotional abuse, non-organic failure to thrive, Munchausen Syndrome, Other, Unknown

48 **Investigation status – response options:** not determined, pending/investigation ongoing, maltreatment substantiated, maltreatment inconclusive, unsubstantiated unfounded/did not occur, unsubstantiated inappropriate behaviour, overturned on appeal, and other

49 **Placement entry reason – response options:** Covid-19-Related Hospitalization, Culturally appropriate placement, Customary Care, Customary Care – Continued from Foster home, Entered into care, Extended Care – Medical, Health/Mental Health, Independent Living, Mental Health Disorder – Diagnosed, Mental Health Disorder – Suspected, Own home/relative, Permanent planning, Physical Injury/ Trauma Treatment, Place of Safety, Placed in Custody (criminally), Preferred Placement, Previous placement breakdown, Provincial Placement Desk Referral, Respite Care, Return to Placement – Post Covid-19, Select Adoption Probation, System Generated, Temporary Planning, Transfer In, Treatment Facility – Addiction, Treatment Facility – Behaviour, Treatment Facility – Complex needs, Treatment Facility – Sexual, UA/Unplanned absence

More detailed reasons for entering care or not available from structured data, but rather from unstructured case notes.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

New Brunswick

Outreach

In New Brunswick, as the provincial information system, NB Families, is available to all agencies and First Nations agencies use additional systems, we held conversations with provincial contacts as well as a First Nations agency using Redmane to ask about the availability and quality of data as they relate to the CHRT compensation categories. Table P.4 and Table P.5 below summarize the information.

Table P.4 Overview of availability of data held by the Ministry of Social Development in New Brunswick

New Brunswick – Ministry of Social Development – Review of data availability
Data system used by all provincial agencies and certain First Nations agencies: NB Families since 2004

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Information not provided	Mandatory	Information may include typos	Minor **accuracy** issue
	Child Date of Birth	Yes	Yes	Information not provided	Mandatory	Minor errors; usually corrected with clinical audit[50]	Minor **accuracy** issue
	Child Indian Registration Number	Yes	Yes	Yes	Not mandatory; unclear how often it is completed	Some user error identified	**Accuracy** issue and potential **completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

50 Can enter just a year (not date and month); however usually precise date of birth added if only year was entered initially.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.4 Overview of availability of data held by the Ministry of Social Development in New Brunswick *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Is the child First Nations?	Child's First Nations identity	Yes	Yes[51]	Information not provided	Not mandatory; unclear how often it is completed	Information not provided	Potential **completeness** issue
Child lives on-reserve?	Child residence on/off reserve	Yes (indicated by address)	Yes	Information not provided	Mandatory	Not aware of any issues	No issues identified
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes, upon case opening[52]	Yes[53]	Information not provided	Older records may be 'unknown'	Information not provided	**Completeness** and **applicability** issue
	Caregiver Indian Registration Number	Yes	Information not provided	Information not provided	Information not provided	Information not provided	No issues identified
Is the caregiver First Nations?	Caregiver's First Nations identity	Yes	Information not provided	Information not provided	Information not provided	Information not provided	No issues identified
When was the child placed?	Dates of Start/End placement	Yes	Yes	Possibly	Not completed for on-reserve placements[54]	Information not provided	**Availability** issue for on-reserve placements

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

51 **Child's First Nations Identity – response options:** Yes, No, Unknown; if "Yes," worker selects among the following: Bouctouche, Eel Ground, Eel River Bar (Eel River), Elsipogtog (Big Cove), Esgenoopetitj (Burnt Church), Fort Folly, General List, Indian Island, Kingsclear, Madawaska Maliseet (St. Basile), Metepenagiag (Red Bank), Oromocto, Out of Province, Pabineau, St. Mary's, Tobique, Unknown, Woodstock

52 If the caregiver has changed since case opening, it could be difficult to identify at the time of removal

53 Identified as "head of case"

54 **Dates of Start/End Placement** – Payments for placements of off-reserve children are made through a service requisition in NB Families. However, for on-reserve First Nations children, there is no service requisition tied to placements.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.4 Overview of availability of data held by the Ministry of Social Development in New Brunswick *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes	Yes	Information not provided	Information not provided	Information not provided	No issues identified
	Address of placement	Yes	Yes	Information not provided	Not completed for on-reserve placements[55]	Information not provided	**Availability** issue for on-reserve placements
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, includes kinship	Yes[56]	Information not provided	Not completed for on-reserve placements[57]	Information not provided	**Availability** issue for on-reserve placements
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes	Yes[58]	Information not provided	Information not provided	None identified	No issues identified
	Substantiation or verification level (maltreatment and risk)	Yes	Yes[59]	Yes	Mandatory: 0% missing	None noted	No issues identified
	Alleged perpetrator	Yes	Yes[60]	Information not provided	Information not provided	Information not provided	No issues identified
	Reason for placement	Yes	Yes[61]	Information not provided	Information not provided	Information not provided	No issues identified
Child placed in order to receive Essential services?	Child placed to receive essential services	No	No	Information not provided	NA	NA	No info. available

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

55 **Address of placement** – Completed only when there is a service requisition.
56 **Type of placement – response options:** Addiction-residential treatment, Adoption home-departmental, Adoption home-intercountry, Child placement facility center, Child specific placement, Child placement information/support, Closed cust. Home/secure shelter, Emergency home-child, Foster home, Group home-child, Kinship placement, Life skills-residential care, Open custody group home, Open custody home, Out of province foster home, Safety net, Therapeutic home
57 **Type of placement:** Completed only when there is a service requisition.
58 **Type of investigated maltreatment – response options:** Emotional abuse, Neglect, Other mandated referral, Physical abuse, Sexual abuse, Youth engagement services
59 **Substantiation level – response options:** Substantiation, No substantiation
60 **Alleged perpetrator** – The following information, among other information, is documented for the perpetrator of the alleged abuse: Last name, Given name(s), DOB, Gender, First Nations Status, First Nations Community, Household address, Phone number
61 **Reason for placement** – The decision to remove a place must be endorse by the Permanency Planning Committee, the context and reason for recommending a child's removal and placement would be documented is our Permanency Planning Committee forms and in NBF under an event named 'Permanency Planning Committee'.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.5 Overview of availability of data in First Nations CFS agency sampled in New Brunswick

New Brunswick – Sampled First Nations agency – Review of data availability
Data system used by sampled First Nations agency: Redmane & Paper files

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Yes	Mandatory	Information not provided	No issues identified
	Child Date of Birth	Yes	Yes	Yes	Mandatory	Information not provided	No issues identified
	Child Indian Registration Number	Yes	Yes	Yes	Mandatory	Information not provided	No issues identified
Is the child First Nations?	Child's First Nations identity	Yes	Yes	Yes	Mandatory	Information not provided	No issues identified
Child lives on-reserve?	Child residence on/off reserve	Yes	Yes	Yes	Mandatory	Information not provided	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

62 **Substantiation or verification level** – Documented; risk is categorized under neglect.
63 **Alleged perpetrator** – documented on client information sheet completed during intake and throughout the case file.
64 **Reason for placement** – the type of investigated maltreatment is linked to the placement as a reason.
65 **Child placed to receive essential services** – There are some voluntary removals that happen when parents come to child protection asking for their children to be removed so they can access services. This information would be difficult to retrieve

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Newfoundland and Labrador

Outreach

In Newfoundland and Labrador, given that the province is responsible for maintaining the data from both non-First Nations and First Nations child welfare agencies, we reached out to provincial contacts to ask about the availability and quality of data as they relate to the CHRT compensation categories. Table P.6 summarizes the information.

Table P.6 Overview of availability of data held at the Department of Seniors, Children & Social Development in Newfoundland & Labrador since 2000

Newfoundland & Labrador – Department of Seniors, Children and Social Development – Review of data availability

Data system used by provincial and First Nations agencies: *Legacy system*: Client Referral Management System 2000-2018;
Current system: Integrated Service Management system since 2018

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	No	0% missing	Information not provided	No issues identified
	Child Date of Birth	Yes	Yes	No	0% missing	If date unknown, age may be added	Minor **accuracy** issue
	Child Indian Registration Number	Yes	Yes	No	Not mandatory: unknown % missing	Information not provided	Potential **completeness** issue
Is the child First Nations?	Child's First Nations identity	Yes	Yes[66]	No	Low % missing; captured every quarter	Variation in 'Other' text field	Minor **completeness** and **accuracy** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

66 **Child's First Nations Identity – response options:** Innu, Innu/Inuit, Innu/Métis, Innu/Mi'kmaq, Inuit, Inuit/Métis, Inuit/Mi'kmaq. Métis, Métis/Mi'kmaq, Mi'kmaq, Other (w/ free text)

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.6 Overview of availability of data held at the Department of Seniors, Children & Social Development in Newfoundland & Labrador since 2000 *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child lives on-reserve?	Child residence on/off reserve	Yes, through address	Yes[67]	No	Low % missing; captured every quarter	Potential accuracy issue	Minor **completeness** and **accuracy** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes	Yes	No	Low % missing; captured every quarter	Information not provided	Minor **completeness** issue
	Caregiver Indian Registration Number	Yes	Yes	No	Not mandatory: unknown % missing	Unknown accuracy	Potential **completeness** and **accuracy** issue
Is the caregiver First Nations?	Caregiver's First Nations identity	Yes	Yes[68]	No	Information not provided	Information not provided	No issues
When was the child placed?	Dates of Start/End placement	Yes	Yes	No	High level of completeness[69]	Some issues if child changes placements	Minor **accuracy** issue
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes	Yes[70]	No	Not mandatory: unknown % missing	No issues identified	Potential **completeness** issue
	Address of placement	Yes	Yes	No	Information not provided	Information not provided	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

67 **Child residence on/off reserve – response options:** In community, Out of community (text field within notes section)
68 **Parent's First Nations Identity – response options:** Innu, Innu/Inuit, Innu/Métis, Innu/Mi'kmaq, Inuit, Inuit/Métis, Inuit/Mi'kmaq. Métis, Métis/Mi'kmaq, Mi'kmaq, Other (w/ free text)
69 This is tied to payment to foster parents so is almost always complete.
70 Caregiver address is documented. Community may also be selected from a drop-down menu. Could also refer to child's residence (above).

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.6 Overview of availability of data held at the Department of Seniors, Children & Social Development in Newfoundland & Labrador since 2000 *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, includes kinship	Yes[71]	No	Low % missing; captured every quarter	Information not provided	Minor **completeness** issue
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes	Yes[72]	Information not provided	0% missing	Information not provided	No issues identified
	Substantiation or verification level (maltreatment and risk)	Yes	Yes[73]	Information not provided	Information not provided	Information not provided	No issues identified
	Alleged perpetrator	Yes	Yes[74]	Information not provided	Information not provided	Information not provided	No issues identified
	Reason for placement	Yes	Yes[75]	Possibly[76]	Information not provided	Information not provided	No issues identified
Child placed in order to receive essential services?	Child placed to receive essential services	Partially[77]	No	Yes, if available	Information not provided	Information not provided	**Availability** and **retrievability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

71 **Type of placement – response options:** regular foster home, *kinship ho*me, significant other foster home, group home, Level IV placement, etc.
72 **Type(s) of investigated maltreatment – response options:** Physical abuse, Emotional abuse, Sexual abuse, Neglect, No maltreatment.
73 **Substantiation or verification level** – For types of maltreatment: Verified, Not verified. For risk level: Very high, High, Moderate, Low.
74 **Alleged perpetrator** – This is a field in the Child Protection Referral (CPR) form used when verifying a screened in maltreatment allegation.
75 **Reason for placement** – Captures which section of the *Children, Youth and Fami*lies Act the removal relates to.
76 The decision-making regarding fit between the child and placement resource may be documented in case notes.
77 Not explicitly documented in a data field, but could be available: there are examples of situations of voluntary placement for child to access services – reason for placement would be documented as "maltreatment" or parent voluntarily placing the child (documented according to the legislation – some sort of maltreatment)

Northwest Territories

Outreach

Given the centralization of child welfare information in the Northwest Territories, we reached out to the Department of Health and Social Services, Child and Family Services to ask about the availability and quality of data as they relate to the CHRT compensation categories. Table P.7 below summarizes the information.

Table P.7 Overview of availability of data held at the Northwest Territories Department of Health & Social Services (2000 to present)

Northwest Territories – Department of Health and Social Services – Review of data availability
Data system used by provincial and FN agencies: *Legacy system*: CFIS from 2000 to 2017;
Current system: Matrix from 2017 to present

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Yes	Almost always completed	Name spelling and order of names sometimes inaccurate	Minor **accuracy** issue
	Child Date of Birth	Yes	Yes	No	Often completed	Information not provided	Minor **completeness** issue
	Child Indian Registration Number	Matrix: Not available CFIS: Sometimes[78]	CFIS: Yes	Unlikely	CFIS: estimated around 95% missing	Information not provided	**Availability** and **completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

78 **Child's Indian registration number** is available as a field in CFIS. will be added as a field in Matrix, but is not currently available.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.7 Overview of availability of data held at the Northwest Territories Department of Health & Social Services (2000 to present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Is the child First Nations?	Child's First Nations identity	Yes	Yes[79]	Unlikely	CFIS: estimated around 50% missing[80]	Information not provided	**Completeness** issue
Child lives on-reserve?	Child residence on/off reserve	Yes (as address)	Yes	Partial information[81]	CFIS: estimated around 10% missing	Addresses may be incomplete or inaccurate on reserve	**Availability** and minor **completeness,** and **accuracy** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes	Yes	Possibly	Almost always completed	Name spelling and order of names may be inaccurate	Minor **accuracy** issue
	Caregiver Indian Registration Number	Matrix: Not available CFIS: Sometimes[82]	Matrix: NA CFIS: Yes	Sometimes, in Matrix	CFIS: estimated around 95% missing	Information may be inaccurately typed	**Availability** and **completeness** issue
Is the caregiver First Nations?	Caregiver's First Nations identity	Yes	Yes[83]	Possibly	Matrix: Low % missing CFIS: estimated around 95% missing	Information not provided	**Completeness** issue
When was the child placed?	Dates of Start/End placement	Yes	Yes	Possibly	No missing information	No accuracy issues identified	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

79 **Child's Indigenous Identity – response options:** Matrix: First Nations, Inuit, Métis, Non-Aboriginal, Unknown; CFIS: Aboriginal NOT NWT, Dene, Métis, Inuit, Inuvialuit, Gwitch'in, Non-Aboriginal
80 Because a large proportion of the population in the Northwest Territories is First Nations, this is navigable.
81 Community may be entered
82 **Caregiver's Indian registration number** is available as a field in CFIS. will be added as a field in Matrix, but is not currently available.
83 **Caregiver's Indigenous Identity – response options:** First Nations, Inuit, Métis, Non-Aboriginal, Unknown

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.7 Overview of availability of data held at the Northwest Territories Department of Health & Social Services (2000 to present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes	Yes	Information not provided	Information not provided	Information not provided	No issues identified
	Address of placement	Yes	Yes	Partial information[84]	Matrix: Nearly no % missing CFIS: Around 10% missing[85]	Addresses may be incomplete or imprecise on reserve	Minor **completeness** and **accuracy** issue
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, Matrix includes kinship (information not provided for CFIS)	Yes[86]	Possibly	No missing information	No accuracy issues identified	No issues identified
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes	Yes[87]	Possibly	No missing information	No accuracy issues identified	No issues identified
	Substantiation or verification level (maltreatment and risk)	Yes	Yes[88]	Possibly	Matrix: No missing info CFIS: Estimated about 90% missing[89]	No accuracy issues identified	**Completeness** issue
	Alleged perpetrator	Yes	Yes	Information not provided	Information not provided	Information not provided	No issues identified
	Reason for placement	Yes	No, but can be traced using multiple fields in both Matrix and CFIS	Possibly	Information not provided	Information not provided	No issues identified
Child placed in order to receive essential services?	Child placed to receive essential services	Yes	Yes	Possibly	Matrix: Sometimes completed CFIS: No missing info	No accuracy issues identified	Minor **completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

84 Partial info (e.g., community but not full address) may be entered
85 Almost always completed in Matrix; Estimated around 10% missing in CFIS.
86 **Type of placement** – Matrix: Protection & Prevention streams: each stream can have Foster regular, Foster provisional, Foster extended family, Group home, Facility based treatment, Room and board, Shelter; *Kinship* care is also identified in the Matrix system; CFIS: Foster Home, Group Home, In Transit, Medical Facility, Northern Treatment Facility, Other – Specify: Room & Board, Provisional Foster Home, Southern Treatment Facility, Sport and Recreation Activity, Visitation, Visitation with Parent, YOA Young Offenders Act
87 **Type of investigated maltreatment** – Matrix: Physical maltreatment, Emotional maltreatment, Sexual maltreatment, Neglect; CFIS: Abuse, Child's behaviour, Financial assistance, Neglect, Other, Parents' behaviour
88 **Substantiation level** – Matrix: Non-substantiated, Substantiated, Blank (no entry either due to a data entry mistake or the data is not yet available); CFIS: Referral founded, Referral unfounded, Other protection concern investigated: founded; Other protection concern investigated: unfounded, Referral unfounded: inappropriate discipline, Referral founded: child remains in home, Risk Assessment, Safety assessment
89 SDM implementation took place in 2015 before which time this information would not be available.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Nova Scotia

Outreach: In Nova Scotia, we contacted the Department of Families, who worked in concert with Mi'kmaw Family & Children's Services of Nova Scotia, to ask about the availability and quality of data as they relate to the CHRT compensation categories. Table P.8 below summarizes the information.

Table P.8 Overview of availability of data held by the Department of Families in Nova Scotia (2009 to present)

Nova Scotia – Department of Families - Review of data availability

Data systems used by provincial and First Nations agencies: *Legacy system*: Access Database (until 2008); *Current system*: Integrated Case Management (ICM) from 2009 to present[90]

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child placed in out-of-home care be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Yes	No % missing	Information not provided	No issues identified
	Child Date of Birth	Yes	Yes	Yes	Less than 1% missing	Information not provided	No issues identified
	Child Indian Registration Number	Yes, if known	Yes	Yes	~10% of CIC on-reserve have missing IRN	Information not provided	Minor **completeness** issue
Is the child First Nations?	Child's First Nations identity	Low: Race data is available, specific Ind. status/ identity is not collected	Yes[91]	Yes, and in various planning tools (plan of care, placement info, cultural history collection, etc.)	~25% of all CIC have no race data entered	Case-by-case review needed to provide complete information	**Completeness, accuracy,** and **applicability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

90 Information was only provided for current system (ICM). Information from legacy system (Access Database) is in the archive section of ICM. Respondents indicated that information from previous database exists but was inconsistently migrated.

91 **Race – response options:** Aboriginal, Asian, Black, Caucasian, Middle Eastern, Mi'kmaw, Mixed Race, Other, Blank

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.8 Overview of availability of data held by the Department of Families in Nova Scotia (2009 to present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child lives on-reserve?	Child residence on/off reserve	Yes, as address of residence, but may not be available given passage of time[92]	Yes	Information not provided	No % missing	Field not used consistently across workers[93]	Significant **retrievability** and **accuracy** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes	Yes	Information not provided	No % missing	Information not provided	No issues identified
	Caregiver Indian Registration Number	Yes	Yes	Sometimes	~50% of caregivers of CIC have missing IRN	Information not provided	Significant **completeness** issue
Is the caregiver First Nations?	Caregiver's First Nations identity	Low: Race data is available, but specific Ind. status/identity is not collected	Yes[91]	Sometimes	~50% of all caregivers of CIC are missing race data (~25% for on-reserve)	Data limitations require case-by-case review to provide complete information	Significant **availability** and **completeness** issue
When was the child placed?	Dates of Start/End placement	Yes	Yes	Information not provided	No % missing	Information not provided	No issues identified
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes, aligned with child's residence, but may not be available given passage of time[92]	Yes	Information not provided	No % missing	Field not used consistently across workers	Significant **retrievability** and **accuracy** issue
	Address of placement	Yes	Yes	Information not provided	No % missing	Information not provided	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

92 The caregiver's address at the time of the removal of a child would have been known at the time. However, since that time the individual may have moved several times and only the most recent address included in the system, which may not have been the address at the time the child came into care.

93 Some workers enter placement address, or an office address.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.8 Overview of availability of data held by the Department of Families in Nova Scotia (2009 to present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes	Yes[94]	Information not provided	No % missing	Information not provided	No issues identified
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Partial – only from 2017 onwards[95]	Yes, called **Major Presenting Problem**[96]	Prior to 2017 – sometimes	No % missing from 2017 onwards	Information not provided	Significant **availability** and **completeness** issue
	Substantiation or verification level (maltreatment and risk)	Partial – only from 2017 onwards	Yes	Prior to 2017 – sometimes	No % missing from 2017 onwards	Information not provided	**Significant availability** and **completeness** issue
	Alleged perpetrator	Yes, but difficult to retrieve	Information not provided	Information not provided	Information not provided	Information not provided	**Retrievability** issue
	Reason for placement	Yes, but difficult to retrieve	Information not provided	Information not provided	Information not provided	Information not provided	**Retrievability** issue
Child placed in order to receive essential services?	Child placed to receive essential services	Partial: sometimes (when placement indicates special needs)	Yes, some placements reasons indicate specific needs	Yes	Information not provided	Information not provided	**Availability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

94 Dropdown responses not provided
95 Prior to 2017, this data is collected on the child protection case, but the specific reason for a child coming into care is not linked to the case file.
96 Dropdown responses not provided

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Ontario

Outreach

We sampled two First Nations agencies to identify the availability of data in the information systems they use. We obtained additional information regarding missing and unknown responses for Penlieu, CPIN, and Coyote through the Ontario Child Abuse and Neglect Data System (OCANDS) at the University of Toronto, which obtained data sharing agreements from three agencies to contribute non-identifying information about the availability of data through these information systems for the purpose of this project. Table P.9 provides information on Penlieu, which is used by most First Nations agencies, and Table P.10 provides information on CPIN, which is currently used by all provincial agencies.

Table P.9 Overview of data availability in First Nations CFS agencies sampled in Ontario

First Nations agencies sampled in Ontario – Review of data availability
Data systems used by sampled First Nations agency: Penlieu

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Yes	No missing, required to open a file	No information provided	No issues identified
	Child Date of Birth	Yes	Yes	Information not provided	Around 10% missing	Very high accuracy (verify birth certificate)	No issues identified
	Child Indian Registration Number	Yes, if have status, but not often entered	Yes	Sometimes	70% missing[97]	When collected, it is fairly accurate	**Significant completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

97 Depends on level of legal involvement (if the child is more involved in the child welfare system, more likely to have this information

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.9 Overview of data availability in First Nations CFS agencies sampled in Ontario *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Is the child First Nations?	Child's First Nations identity	Yes	Further broken down by area if First Nations	Sometimes	90% Unknown	May vary by worker	**Significant completeness** issue
Child lives on-reserve?	Child residence on/off reserve	Yes, through address, but inconsistent	Yes	Not often	Inconsistent	Address is accurate (administrator verifies public record)	**Completeness** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes	Yes	Not often	No missing	Very accurate	No issues identified
	Caregiver Indian Registration Number	Yes, for those who have status	Yes	Sometimes	50-70% missing	Amount of info varies	Significant **completeness** issue
Is the caregiver First Nations?	Caregiver's First Nations identity	Yes	Further broken down by location if First Nations[98]	Sometimes	93% Unknown	Information not provided	Significant **completeness** issue
When was the child placed?	Dates of Start/End placement	Yes	Yes	No	No missing	Start of placement can be off by a few days	Minor **accuracy** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

98 No dropdown options provided

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.9 Overview of data availability in First Nations CFS agencies sampled in Ontario *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes, but inconsistent	Yes	Not often	Inconsistent	Address is accurate when available (administrator verifies public record)	**Completeness** issue
	Address of placement	Yes	Yes	No	About 30% missing	No accuracy issues	**Completeness** issue
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, but open-text	Open-text[99]	Some info might be in case notes	No missing	Difficult to obtain info. at granular level because of sign. variance in responses	Significant **accuracy** issue and **availability** issue
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes	Yes, called **eligibility spectrum**[100]	Not often	Pre-2007: 19% Post-2007: less than 1%	Information not provided	Minor **completeness** issue
	Substantiation or verification level (maltreatment and risk)	Yes, but verification understood as being broader than substantiation	Yes[101] **Family Risk Assessment** and **Safety Assessment**	No	Low missing	No accuracy issues noted	**Applicability** issue
	Alleged perpetrator	Yes, allegation report has a list of adults involved in the allegation	Information not provided	Information not provided	95% missing	Information not provided	Significant **completeness** issue
	Reason for placement	Yes, but does not include abuse	Yes[102]	Information not provided	3% Missing	Information not provided	**Applicability** issue
Child placed in order to receive essential services?	Child placed to receive essential services	Yes, but would be hard to trace	Some very unreliable proxies[103]	Could be documented in case notes	Information not provided	Very inconsistent/ unstructured info	Significant **availability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

99 "In care" is the only variable, no drop-down for info at more granular level

100 **Eligibility spectrum – response options:** The eligibility spectrum has more than 100 Section 1-5 options. These are listed here: http://www.oacas.org/wp-content/uploads/2019/12/Eligibility-Spectrum-2021-EN.pdf

101 **Verification – response options:** "Verified" or "not verified"

102 In OCANDS, data is mapped unto **placement start reason:** Maltreatment, Caregiver Capacity, Abandonment, Adoption, Need of the child, Placement breakdown, Relief, ECM/Transitional housing/ Independent, Unknown, Child/ Youth behaviour, Temporary Placement, Treatment/ Objectives met, Return to previous placement, Kinship placement, Child hospitalization/ Institutionalization, Custody/ Jail/ Detention, Assessment, New placement req. (not specified), Administrative Reasons, Court Ordered, Other, Emergency/ Crisis, Return to parents, Not a placement reason, Statistical Move

103 For example, "risk of harm," or "medical neglect" – but these imply a parental problem because there would need to be one for child to be removed

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.10 Overview of data availability in provincial CFS agencies sampled in Ontario

Provincial agencies sampled in Ontario – Review of data availability
Data systems used by sampled provincial agencies: *Legacy system:* Coyote[104]; *Current system:* CPIN

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Yes	CPIN: Mandatory, low missing	Could be minor spelling errors leading to duplicates	Minor **accuracy** issue
	Child Date of Birth	Yes	Yes	Information not provided	CPIN: Around 25% missing	Errors are corrected	**Completeness** issue
	Child Indian Registration Number	Yes, if have status	Yes (text box)	Information not provided	If have it, usually filled in, but not always	No validation procedure	**Completeness** issue and potential **accuracy** issue
Is the child First Nations?	Child's First Nations identity	Yes	Yes, multiple proxies[105]	Information not provided	CPIN (for Aboriginal Ancestry): 1% missing but 61% Unknown Coyote: none missing, but 97% Unknown	Information not provided	Significant **completeness** issue
Child lives on-reserve?	Child residence on/off reserve	Yes	Yes, called **family resides off reserve**[106]	Information not provided	CPIN: Less than 1% missing	Not always reliable	**Accuracy** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

104 Only information regarding completeness was provided for Coyote. All other information in this table is related to CPIN.
105 Multiple values can be selected for "Aboriginal Ancestry" variable. Also have a "Band name" and "Native Status" variables.
Aboriginal ancestry – response options in CPIN: yes/no for First Nations, Inuit, or Métis (separately), Unknown
106 **Family resides off reserve – response options in CPIN:** yes/no

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.10 Overview of data availability in provincial CFS agencies sampled in Ontario *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes	Yes	Information not provided	CPIN: Mandatory	Information not provided	No issues identified
	Caregiver Indian Registration Number	Yes, for those who have status	Yes	Information not provided	CPIN: Usually filled in	Information not provided	Minor **completeness** issue
Is the caregiver First Nations?	Caregiver's First Nations identity	Yes	Yes, multiple proxies[105]	Information not provided	CPIN: Not a lot missing, but many unknown Coyote: Not a lot missing, but many Unknown	Information not provided	Significant **completeness** issue
When was the child placed?	Dates of Start/End placement	Yes	Yes	Information not provided	No missing	High accuracy	No issues identified
Child placed outside of their home and community?	Caregiver's address at time of removal	Information not provided	Information not provided	Information not provided	Information not provided	Information not provided	Information not provided
	Address of placement	Yes	Yes	Information not provided	Mandatory	Information not provided	No issues identified
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, includes kinship	Yes, called **placement type**[107]	Information not provided	CPIN: Less than 1% missing Coyote: None missing	No known accuracy issues	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

107 **Placement type – response options in CPIN:** Adoption Placement; AWOL; Camp; Child Refused Placement; CMHC – All Inclusive Rate; CMHC – Per Diem Rate with Agency Entitlements; Detention; Formal Customary Care – Regular; Formal Customary Care – Supplementary; Specialized/Treatment – Supplementary; Hospital; *Kinship* In Care; Kinship Service; LCR – Staff; LCR Parent Run; LCR Parent Run – Staff Assist; Living Independently; OPR Foster Care; OPR Group Care; OPR Staff; Other; Place of Safety; Regular – Emergency After Hours; Pre-placement visit; Relief Person; Shelter; Vacation/trip; Visiting family; Visiting relatives/neighbour; Regular – Relief; Supplementary – Relief; Specialized/Treatment – Relief

Table P.10 Overview of data availability in provincial CFS agencies sampled in Ontario *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes	Yes, called **Allegation Descriptor** or **Eligibility Spectrum**[108]	Information not provided	CPIN: None missing Coyote: 68% missing pre-2007; 7% missing post-2007	Information not provided	**Completeness** issue
	Substantiation or verification level (maltreatment and risk)	Yes, but verification understood as being broader than substantiation	Yes[109] **Family Risk Assessment** and **Safety Assessment**	Information not provided	CPIN: Mandatory Coyote: Low missing	Information not provided	**Applicability** issue
	Alleged perpetrator	Yes	Yes, called **Alleged Maltreator ID**[110]	Information not provided	CPIN: About 5% missing	Information not provided	No issues identified
	Reason for placement	Yes	Yes, called **Removal Reason**[111]	Information not provided	CPIN: No % missing	Information not provided	No issues identified
Child placed in order to receive essential services?	Child placed to receive essential services	Yes, but would be hard to trace	Unreliable proxy: could be open as "other child welfare case"	Sometimes	Sometimes	Information not provided	**Availability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

108 **Eligibility spectrum – response options**: The eligibility spectrum has more than 100 Section 1-5 options. These are available online, here: http://www.oacas.org/wp-content/uploads/2019/12/Eligibility-Spectrum-2021-EN.pdf

109 **Verification – response options in CPIN:** "Verified" or "not verified"

110 Also variable **Participant Relationship** that defines the relationship between 2 people

111 **Removal reason – response options in CPIN:** Physical/Sexual Harm by Commission; Harm by Omission; Emotional harm/Exposure to Conflict; Caregiver Capacity; Abandonment/Separation; Alcohol; Abuse; Inability to Cope; Child's Behaviour Problem; Death of Parents; Drug Abuse; Inadequate Housing; Incarceration of Parents; Medical Neglect; Neglect; Physical Abuse; Emotional Maltreatment; Relinquishment; Unknown; DM conversion; First Placement post 16th Birthday

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Prince Edward Island

Outreach

In PEI, given that the province is responsible for maintaining child welfare data, we reached out to the Department of Family and Human Services to ask about the availability and quality of data that they hold as they relate to the CHRT compensation categories. Table P.11 below summarizes the information received.

It is important to note that, in PEI, there is a low number of Indigenous children in care (i.e. average of 5 Indigenous children entering care every fiscal year according to our contacts). Therefore, any manual search would likely be more manageable than in other provinces.

Table P.11 Overview of availability of data held by the PEI Ministry of Social Development and Housing (2003 to present)

Prince Edward Island – Ministry of Social Development and Housing – Review of data availability
Data system used by provincial and First Nations agencies: ISM from 2003 until present

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child placed in out-of-home care be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Yes	0% missing, mandatory field	No accuracy issues noted	No issues identified
	Child Date of Birth	Yes	Yes	Yes	0% missing, mandatory field	No accuracy issues noted	No issues identified
	Child Indian Registration Number	Partial: often not filled in in the past	Yes, but only in the last 5 years (because of cultural plans of care)	No	Many missing: only mandatory for permanent care in the last 5 years	No accuracy issues noted	Significant **availability** and **completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.11 Overview of availability of data held by the PEI Ministry of Social Development and Housing (2003 to present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Is the child First Nations?	Child's First Nations identity	Partial: often not filled in in the past (would need to ask worker, or child themselves)	Yes, but only in the last 5 years (because of cultural plans of care)[112]	Sometimes	Many missing: only mandatory in the last 5 years	Information not provided	Significant **availability** and **completeness** issue
Child lives on-reserve?	Child residence on/off reserve	Yes, as address of residence[113]	No[114]	Information not provided	Wouldn't be a lot missing; but would be hard to track	Information not provided	**Retrievability** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes	Yes	Yes	0% missing, mandatory field	Very accurate	No issues identified
	Caregiver Indian Registration Number	Not available	N/A	N/A	N/A	N/A	Information not available
Is the caregiver First Nations?	Caregiver's First Nations identity	Partial: only in the last 5 years	Yes, but only in the last 5 years (because of cultural plans of care)	Sometimes	Many missing: only mandatory in the last 5 years	Information not provided	Significant **availability** and **completeness** issue
When was the child placed?	Dates of Start/End placement	Yes	Yes	Yes	0% missing, mandatory field	Very accurate	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

112 Includes whether identifying as First Nations, Inuit or Métis. Could also find information on if the child is Mi'kmaq.
113 Address is updated in the file so only more recent address in system. Need to search individually for previous addresses. Possible but arduous.
114 Because would be looking at previous addresses, would require a manual search

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.11 Overview of availability of data held by the PEI Ministry of Social Development and Housing (2003 to present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes, as address of residence[113]	No[114]	Information not provided	Wouldn't be a lot missing; but would be hard to go back and track	Information not provided	**Retrievability** issue
	Address of placement	Yes, and kept throughout the years	Yes	Yes	0% missing, mandatory field	Very accurate	No issues identified
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, includes kinship care	Yes[115]	Information not provided	0% missing, mandatory field	Can be arbitrary[116]	**Accuracy** issue
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes	Yes[117]	Information not provided	Mandatory field	Accurate	No issues identified
	Substantiation or verification level (maltreatment and risk)	Yes	Yes	Information not provided	0% missing, mandatory field	Information not provided	No issues identified
	Alleged perpetrator	Yes	No	Yes (would need to be manually retrieved)	Low % missing	Information not provided	Minor **retrievability** issue
	Reason for placement	Sometimes (and only as case notes)	No	Sometimes available in case notes	Low % missing	Information not provided	**Availability** issue
Child placed in order to receive essential services?	Child placed to receive essential services	Sometimes (and only as case notes)[118]	No	Sometimes available in case notes	Information not provided	Information not provided	**Availability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

115 **Type of placement** – response options: foster care (includes kinship), group care
116 In PEI, because kinship placements are foster placements with extended family, a worker might indicate that kinship parents are foster parents.
117 **Investigated maltreatment – response options:** physical abuse, sexual abuse, emotional abuse, neglect, domestic violence
118 Because it is not a large province, this situation happens less often

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Quebec

Outreach

In Quebec, given that the province is responsible for maintaining most of the data from both non-First Nations and First Nations child welfare agencies, we reached out to a contact familiar with the mainstream system under the Ministry of Health and Social Services to ask about the availability and quality of data that they hold as they relate to the CHRT compensation categories. Quebec below summarizes the information received. We also reached out to a delegated First Nations agency that holds its own data, and the results of the information received from that sampled agency is below in Table P.13.

Table P.12 Overview of availability of data held by the Ministry of Health and Social Services regions in Quebec

Quebec – system used by Ministry of Health and Social Services - Review of data availability
Data system used by provincial agencies and some First Nations agencies: Projet Intégration Jeunesse (PIJ)

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Information not provided	Mandatory, 0% missing	Sometimes spelling errors	Minor **accuracy** issue
	Child Date of Birth	Yes	Yes	Information not provided	Mandatory, 0% missing	Sometimes data entry errors	Minor **accuracy** issue
	Child Indian Registration Number	Possibly	No[119]	Possibly	Not mandatory, medium % missing	When available, there may be variation in format	**Completeness** and **accuracy** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

119 However, there is a question asking whether a child has status, with "yes"/"no" answer. This is not mandatory but may be filled out.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.12 Overview of availability of data held by the Ministry of Health and Social Services regions in Quebec *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Is the child First Nations?	Child's First Nations identity	Yes	Yes[120]	Possibly	Not mandatory, medium % missing	Possible accuracy issues[121]	**Completeness** and **accuracy** issue
Child lives on-reserve?	Child residence on/off reserve	Yes	Yes[122]	Possibly	High completeness, some unknown	Sometimes data entry gaps or delays	Minor **completeness** and **accuracy** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes	Yes[123]	Possibly	Not mandatory, high % missing and unknown	Some accuracy issues[124]	Significant **completeness** and **accuracy** issue
	Caregiver Indian Registration Number	Possibly	No	Possibly	High % missing and unknown	Possible accuracy issues when available	Significant **completeness** and **accuracy** issue
Is the caregiver First Nations?	Caregiver's First Nations identity	Possibly	No	Possibly	Not mandatory, high % missing and unknown	Possible accuracy issues	Significant **completeness** and **accuracy** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

120 **Child's First Nations identity** – A numeric code is selected according to the child's ethnic group membership. For Indigenous children this correlate to their band number.

121 This information may not be precise enough to capture what the eligibility categories include: e.g., if live off-reserve but recognized by FN community, the worker may not document it; or if a child is born to parents from different communities (or a FN and non-FN parent), this data may also be incomplete.

122 The first 3 digits of postal code of child's address, and municipality of child's residence are documented. In addition, regarding Indigenous children four categories are documented: not indigenous, yes on-reserve, yes off-reserve, "conventionnée*," don't know. If the child is indigenous on-reserve, a code for their band must also be documented based on a list of all bands in Quebec. For those eligible to be registered with a band, they are considered 'on-reserve' even if they live off that reserve or on another reserve. *(* "Conventionnée" refers to communities with agreements under the James Bay and Northern Quebec Agreement and the Northeastern Quebec Agreement. In this case, the category "conventionnée" is preferred over "on-reserve."*

123 String variable, individuals linked to the child are added to PIJ and assigned their own identifier (and name), which is then linked to the child through a "type de lien" code.)

124 The information may be inaccurate or reflect only one parent; it may also become complicated if the child was not living with the legal parent at the time of placement: if multiple households are involved in caregiving this information may not be fully captured.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.12 Overview of availability of data held by the Ministry of Health and Social Services regions in Quebec *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
When was the child placed?	Dates of Start/End placement	Yes	Yes	Possibly	Mandatory, 0% missing	No issues identified	No issues identified
Child placed outside of their home and community?	Caregiver's address at time of removal	Yes	Yes[125]	Possibly	Mandatory, 0% missing	Some accuracy issues[126]	Minor **accuracy** issue
	Address of placement	Yes	Yes[127]	Possibly	Mandatory, 0% missing	Minor accuracy issues[128]	Minor **accuracy** issue
Child placed outside of their extended family?	Type of placement (specify if includes kinship care)	Yes, includes kinship care	Yes[129]	Possibly	Mandatory, 0% missing	No issues identified	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

125 **Caregiver's address at time of removal** – This is the child's residence.
126 If the child is not living with the caregiver at the time of removal, this would not be accurate. For example, if the child moved from one caregiver to another since their residence was entered, the information would be out-of-date.
127 **Address of placement** – String variable; this is stored in the SIRTF through which payments for out-of-home placements are made.
128 Any initial data entry errors would be corrected as the information is linked to payment.
129 Numeric codes indicate type of placement as well as whether it was voluntary or court-ordered, as follows: *Mesures d'urgence:* 194: Placement dans une ressource de type familial; 195: Placement dans un centre de réadaptation; 196: Placement dans une ressource intermédiaire), *Mesures provisoires:* 369: Que l'enfant soit confié à un CR ou à une famille d'accueil; 370: Enfant placé dans une ressource autre; 371: Enfant placé dans un centre de réadaptation; 372: Enfant placé dans une ressource de type familial), *Mesures intérimaires co*nvenues: 357: Hébergement en centre de réadaptation; 358: Hébergement en famille d'accueil; 356: Hébergement autre que famille d'accueil ou centre de réadaptation).

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.12 Overview of availability of data held by the Ministry of Health and Social Services regions in Quebec *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes	Yes[130]	Possibly	Mandatory, 0% missing	No issues identified	No issues identified
	Substantiation or verification level (maltreatment and risk)	Yes	Yes[131]	Possibly	Mandatory, 0% missing	No issues identified	No issues identified
	Alleged perpetrator	Yes	Yes[132]	Possibly	Unknown[133]	Unknown	Potential **completeness** issue
	Reason for placement	Yes	Yes[134]	Possibly	Information not provided	Information not provided	No issues identified
Child placed in order to receive essential services?	Child placed to receive essential services	Possibly	No	Possibly	Unknown	Unknown	Significant **availability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

130 **Type(s) of investigated maltreatment** – Neglect, Physical abuse, Sexual abuse, Behavioural troubles, and Abandonment)
131 **Substantiation or verification level** – Security or development compromised (SDC), Security or development not compromised (SDNC). Risk of SDC is also documented.
132 **Alleged perpetrator** – A numeric code is assigned to the alleged perpetrator and is linked with the child. Other information regarding the alleged perpetrator is captured, including: relationship with the child, year of birth, whether they lived with the child at the time of abuse, sex, whether the alleged perpetrator was a minor at the time of abuse.
133 In the case of physical abuse and sexual abuse, this is a mandatory field. In cases of physical neglect, this is an optional field.
134 **Reason for placement** – Due to reforms of the *Youth Protection Act* in 2007, the reasons for placement under section 38 of the act changed. Pre-2007: 38a-Non exercice des responsabilités parentales; 38b-Menace au développement mental et affectif; 38c-Menace au développement physique; 38d-Privation de conditions matérielles; 38e-Mode de vie du gardien; 38f-Exploitation; 38gs-Abus sexuel; 38gp-Abus physique; 38h-Troubles de comportement; 38.1a-Fugue; 38.1b-Non-fréquentation scolaire; 38.1c-Délaissement enfant placé. Post-2007: 38a-Responsabilités parentales non assumées par une autre personne; 38b.1i-Négligence sur le plan physique; 38b.1ii-Négligence sur le plan de santé; 38b.1iii-Négligence sur le plan éducatif; 38b.2-Risque sérieux de négligence; 38c-Mauvais traitements psychologiques; 38d.1-Abus sexuels; 38d.2-Risque sérieux d'abus sexuels; 38e.1-Abus physiques; 38e.2-Risque d'abus physiques; 38f-Troubles de comportement sérieux; 38.1a-Fugue; 38.1b-Non fréquentation scolaire; 38.1-Délaissement de l'enfant placé.

Saskatchewan

Outreach

The project team contacted the Ministry of Social Services to obtain information on the child welfare data collected by provincial agencies in Saskatchewan. We also approached six First Nations agencies that were sampled for the project, but none responded to the request for information. Table P.14 below only reflects data collected by the Ministry of Social Services.

Table P.14 Overview of availability of data held by the Ministry of Social Services in Saskatchewan (2006 to present)

Saskatchewan – Ministry of Social Services – Review of data availability

Data systems used by provincial agencies: *Legacy system:* Social Workers Information Network (SWIN) or Automated Client Index (ACI) system from 2006 to 2011/2012
Current system: Linkin Enterprise Case Management and Payment System from 2011/2012 to present[136]

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Yes (paper file for info prior to 2011/2012)	Mandatory field[140]	Information not provided	No issues identified
	Child Date of Birth	Yes	Yes	Yes (paper file for info prior to 2011/2012)	Mandatory field	Information not provided	No issues identified
	Child Indian Registration Number	Yes, if known	Yes	Yes (paper file for info prior to 2011/2012)	Not a mandatory field	Information not provided	Potential **completeness** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

139 Information provided for both current (Linkin from 2011/2012 to present) and legacy systems (SWIN from 2006 to 2011/2012). If difference in data availability between systems, this will be indicated.
140 Respondent was not able to provide more detailed information on completeness at this time. Percent complete would need to be further addressed.

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Table P.14 Overview of availability of data held by the Ministry of Social Services in Saskatchewan (2006 to present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Is the child First Nations?	Child's First Nations identity	Yes, if known	Yes, called **constitutional status**[141]	Yes (paper file for info prior to 2011/2012)	Not a mandatory field	Information not provided	Potential **completeness** issue
Child lives on-reserve?	Child residence on/off reserve	Yes, in case notes. Child address as data field.	Partial, child address collected[142]	Yes (paper file for info prior to 2011/2012)	Not a mandatory field	Information not provided	Potential **completeness** issue
Can the caregiver at the time of the removal be identified?	Caregiver Name (Family Name, Given Name)	Yes	Yes	Yes (paper file for info prior to 2011/2012)	Mandatory field	Information not provided	No issues identified
	Caregiver Indian Registration Number	Yes, if known	Yes	Yes (paper file for info prior to 2011/2012)	Not a mandatory field	Information not provided	Potential **completeness** issue
Is the caregiver First Nations?	Caregiver's First Nations identity	Yes, if known	Yes, called **constitutional status**[141]	Yes (paper file for info prior to 2011/2012)	Not a mandatory field	Information not provided	Potential **completeness** issue
When was the child placed?	Dates of Start/End placement	Yes	Yes	Yes (paper file for info prior to 2011/2012)	Mandatory field	Information not provided	No issues identified

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

141 **Constitutional status – response options (in both legacy and current system):** Status, non status, Métis, Inuit, Other, Unknown. Current system also provides information on the band name.

142 Child's address would be listed in the system but not whether or not that location was a First Nation Reserve.

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

143 Refers to placement with extended family, but includes person with close relationship (unrelated) as well

144 **Placement type – response options in legacy system:** Alternative Care, Board/Room Placement, Group Homes, Intern Level Foster Home, Person of Sufficient Interest*, Practitioner Level Foster Home, Parent Therapist, Receiving Homes, Specialist Level Foster Home, Therapist Level Foster Home, Community Homes
Placement type – response options in current system: Absent from Care, Addiction Treatment Facility, Adoption Pending, Alternate Care, CLD Approved Service Home, CFS CBO Group Home, CLD-Fee for Service Home, CLD Approved Service Home – No Pay, CLD CBO Group Home, Courtesy Interprovincial, First Nations Agency Transfer, First Nations Approved Caregiver, Hospital, Hotel, Independent Living, MSS – Fee for Service Contract, Non Status On Reserve (FNA), Non-Removal Parent, Out of Province Care, Period of Grace, Place of Safety**, Person of Sufficient Interest*, Ranch Ehrlo Treatment Foster Care, Regular Foster Care, Rehabilitation Facility, Room & Board, Stabilization Care, Taken From Placement, Therapeutic Foster Care, Trial Home Placement, Unauthorized Living Arrangement, Young Offender Facility.

* Person of Sufficient Interest is selected when a child resides with an extended family member, **or a person who has a close relationship with the child**, has provided safe care for the child for a minimum of 6 months and is designated by the court as a PSI.

** Place of Safety is selected when the child is placed with an extended family member, **or a person who has a close relationship with the child**, who is willing and able to provide temporary (60 days) and safe care for the child

Appendix P. Overview of availability and quality of data held by child welfare authorities and agencies sampled in each province/territory *(continued)*

Table P.14 Overview of availability of data held by the Ministry of Social Services in Saskatchewan (2006 to present) *(continued)*

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Child placed because of abuse and/or neglect perpetrated by caregivers?	Type(s) of investigated maltreatment	Yes. Prior to 2011/2012, info. only available if services continued after investigation	Yes, called **Legal Status**. Post 2011/2012, also information in Identified Allegation[145]	Yes (paper file for info prior to 2011/2012)	Mandatory field	Information not provided	No issues identified
	Substantiation or verification level (maltreatment and risk)	Partial: substantiation level not provided for maltreatment, just risk	Not available as data field prior to 2011/2012. In current system, data field for risk called **SDM Risk Assessment and/or Re-Assessment**[146]	Yes, for risk assessment (paper file for info prior to 2011/2012)	For current system only, mandatory field	Information not provided	Significant **availability** and **completeness** issue
	Alleged perpetrator	Yes, can be identified at intake or investigation if known	Yes, but only in current system (2011/2012 onwards)	Yes (paper file for info prior to 2011/2012)	Not a mandatory field	Information not provided	Potential **completeness** issue
	Reason for placement	Yes	Yes, but only in current system (2011/2012 onwards)[147]	Yes (paper file for info prior to 2011/2012)	For current system only, mandatory field	Information not provided	Potential **completeness** issue
Child placed in order to receive essential services?	Child placed to receive essential services	Low: If known, could be located in case notes. Not considered as a removal reason.	No	Yes, if known (paper file for info prior to 2011/2012)	Not a mandatory field	Information not provided	Significant **availability** issue

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

145 **Legal Status – response options in legacy system:** Physical Abuse, Sexual Exploitation, Domestic Violence, Emotional Exploitation, Neglect (Essential Medical Care, Remedy Developmental Condition, No Adult Able and Willing, Child Under 12, Physical Neglect)
Legal Status – response options in current system: Physical Abuse –11(a)(i), Sexual Exploitation – 11(a)(iii), Neglect (Essential Medical Care Not Provided to Child – 11(a)(iv), Remedy Developmental Condition – 11(a)(v), No Adult Able and Willing – 11(b), Child Under 12 – 11(c)), Emotional Exploitation – 11(a)(ii), Domestic Violence – 11(a)(vi)
Identified allegation – response options in current system: Physical Abuse, Sexual Abuse, Neglect, Emotional Abuse (Domestic Violence not specific allegation)

146 **SDM Risk Assessment and/or Re-Assessment – response options in current system:** Low/Medium/High

147 **Response options in current system:** Abandonment, Neglect, Physical Abuse, Returning Section 56, Sexual Abuse, Psychological or Emotional Maltreatment, Medical Neglect, Voluntary Surrender, Alcohol Abuse, Drug Abuse, Domestic Violence, Caretaker's Inability to Cope Due to Illness or Other Reasons, Child's Behaviour Problem, Parent Teen Conflict, Incarceration of Parent(s), Death of Parent(s), Repatriation, Ward of Another Province, Conversion, Ward of Indigenous Governing Body, Ward of First Nation Agency, Mobile Crisis

Appendix P. Overview of Availability and Quality of Data Held by Child Welfare Authorities and Agencies Sampled in Each Province/Territory *(continued)*

Yukon

Outreach

In the Yukon, we reached out to the Department of Health and Social Services to ask about the availability and quality of data that they hold as they relate to the CHRT compensation categories. Table P.15 below summarizes the information.

Table. P.15 Overview of availability of data held by the Department of Health and Social Services in the Yukon

Yukon – Department of Health and Social Services – Review of data availability
Data systems used by provincial and First Nations agencies: *Legacy system:* Client Index System (CSI) until 2020; *Current system:* Matrix from 2020 to present

Type of information needed	Information of interest	Availability			Completeness	Accuracy	Summary Issues identified
		Is the information available?	As a data field? *Available dropdown options in footnotes*	As case notes?			
Can the child placed in out-of-home care be identified?	Child Name (Family Name, Given Name)	Yes	Yes	Yes	Low % missing	Accuracy issues noted	**Accuracy** issues
	Child Date of Birth	Yes	Yes	Yes	Low % missing	Accuracy issues noted	**Accuracy** issues
	Child Indian Registration Number	Yes	Yes	Yes	Medium % missing	Accuracy issues noted	**Completeness and accuracy** issues
Is the child First Nations?	Child's First Nations identity	Yes	Yes	Yes	Low % missing	Accuracy issues noted	**Accuracy** issues
Child lives on-reserve?	Child residence on/off reserve	Yes	Yes	Yes	Low % missing	Accuracy issues noted	Accuracy issues

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

Appendix Q1. Jordan's Principle Data Dictionary – 2017-18 – Individual Requests

Source: Unmodified information from ISC staff

Last updated on January 17, 2020

Column #	Data Field	Response options	Description*
A	**Region**	**Atlantic** **Quebec** **Ontario** **Manitoba** **Saskatchewan** **Alberta** **British Columbia** **Northern**	FNIHB or ESDPP Regional office
B	**Province/Territory**	**AB** **BC** **MB** **NB** **NL** **NS** **NT** **NU** **ON** **PE** **QC** **SK** **YT**	Two character provincial or territorial code
C	**Child unique identifier**	**XX-XX-####**	Identifying number to be generated regionally to uniquely identify each client. It is preferred if this number follows the convention of the former department (2-4 character, HC/INAC) - Region (2-3 character, ATL, QC, ON, MB, SK, AB, BC, NT) - Unique 4-5 digit number (as required). For example, HC-AB-12345. Additional numbers separated by a decimal can be added for subsequent requests from the same client (e.g. .001, .002, etc).
D	**Request #**		
E	**Regional Date of Initial Contact (mm-dd-yyyy)**	**mm-dd-yyyy**	Date that the focal point is first contacted by the client. This contact could be via phone, email, fax or lettermail. For fax and lettermail, it is the date on which the focal point receives the letter. This information is used to document the first point of contact from a client about a request.
F	**Date Contacted**	**yyyy-mm-dd**	

Appendix Q1. Jordan's Principle Data Dictionary – 2017-18 – Individual Requests *(continued)*

Last updated on January 17, 2020

Column #	Data Field	Response options	Description*
G	**Regional Time of Initial Contact (hh:mm) 24 hr clock**	**hh:mm**	Time in the date of initial contact that request is received by the focal point. The following format is used: hh:mm in a 24-hour clock. If an application is received by fax, the time that is printed on the fax is used and, if no time is printed, the time the focal point receives the fax is used. If received by lettermail, the time the focal point receives the letter is used. This information is used to calculate the time required to adjudicate the application. All times are entered according to their own time zones.
H	**Date Region Receives Sufficient Information to Assess Request**	**mm-dd-yyyy**	Date that the focal point has received sufficient information about the request in order to make a decision. This includes elements such as client information (age, First Nations status, etc.) and clinical details to support the request (e.g. clinical assessment). This information establishes the initial point in time to calculate the duration needed to evaluate and determine an application. It allows for the calculation of compliance rates.
I	**Date received_for reporting**	**mm-dd-yyyy**	
J	**Time Region Receives Sufficient Information to Assess Request**	**hh:mm**	This is the time the focal point receives all relevant information to sufficiently evaluate and determine the request. The time uses the following format hh:mm using a 24-hour clock. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates. All times are entered according to their own time zones.
K	**If date of contact and date of assessment are different, rationale for elapsed time (e.g. pending assessment)**	**text**	For focal point to provide additional information, if needed.
L	**Electronic File location (e.g. RDIMS path)**		If it was stored electronically in RDIMS, the file location is recorded under this variable
M	**First Nations Status (Yes/No/Pending)**	**Yes** **No** **Pending**	Does the child have Status as a registered First Nation? Eligible responses are: Yes: First Nation - Status (i.e. has First Nations Status) No: First Nation - Non Status Pending: First Nation Status is in progress

Appendix Q1. Jordan's Principle Data Dictionary – 2017-18 – Individual Requests *(continued)*

Last updated on January 17, 2020

Column #	Data Field	Response options	Description*
N	**Sex** **(Male / Female)**	**Female** **Male**	Female or Male
O	**Date of Birth** **(mm-dd-yyyy)**	**mm-dd-yyyy**	Date of birth of the child. This information is used to calculate the age of the applicant for eligibility.
P	**Initial assessment** **(Urgent (12hrs)/Not Urgent (48))**	**Not Urgent** **Urgent**	The initial assessment of the focal point that this application is urgent or not urgent. Requests that are related to a situation that may impact the safety and/or security of the child and/or family, or where there is a risk of irremediable harm, must be dealt with urgently. According to Canadian Human Rights Tribunal decisions, applications deemed urgent are to be addressed within 12 hours and applications deemed not urgent are to be addressed within 48 hours. This variable is used to calculate compliance rates.
Q	**Reason for application/ Needs**	**Text**	Information submitted by the requester that assists in understanding the needs of the client. This information is used for decision making purposes. Reasons why the application is brought to Jordan's Principle are recorded under this variable.
R	**Product/ support/ service requested** **(list each product or service as a separate line item if the client has more than one)**	**Text**	Name of product, support, or service that has been requested. A single applicant may request multiple products or services.
S	**Categorized Type of Request**	**Category (as listed separately in the 'Categories-Individual' tab)**	To ensure consistency in reporting, the type of product or service requested was categorized. A published list of reporting categories is available and provides examples of the types of products and services included.
T	**Does product/ support/ service meet normative standard?** **(Above/ Within/ Below)**	**Above** **Within** **Below**	Is the product/support/service requested above, within or below the normative standard (substantive equality)? This data field reflects the global assessment of the Focal Point and considers the information available at the time of request.
U	**Total funding amount requested**	**Dollar Amount ($)**	The total amount requested for the product or service.
V	**New client?** **(Yes/No)**	**Yes** **No**	Is this a new client, or has the client made previous applications for products or services? This field supports the calculation of unique children applying for service by flagging potential repeat clients from historical datasets.

Appendix Q1. Jordan's Principle Data Dictionary – 2017-18 – Individual Requests *(continued)*

Last updated on January 17, 2020

Column #	Data Field	Response options	Description*
W	**Decision (Approved/ Denied/ Escalated to National Review Centre/ Referred to existing program if so, which/ Pending)**	**Approved** **Denied** **Escalated [to a National Review Centre]** **Pending** **Referred to Existing Program [please state which program]**	What was the decision of the focal point on each product and service requested? A decision may be: Approved Denied Escalated (focal point forwards the request to the Jordan's Principle National Review Centre (HQ) for decision with the information required for decision making. This response is not changed when the HQ makes a decision. Rather, the HQ decision is recorded in the "HQ Decision" column(s)) Pending Referred to an existing program (focal point recognizes that the requested service is eligible under an existing FNIHB or ESDPP program and refers the request there for processing)
X	**Decision Date**	**mm-dd-yyyy**	Date that a decision is made by the focal point. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates.
Y	**Decision Time (hh:mm) 24 hr clock**	**hh:mm**	Time that decision is made by the focal point. The following format of hh:mm in 24-hour clock is used. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates. All times are entered according to their own time zones.
Z	**Total funding amount approved**	**Dollar Amount ($)**	The total amount approved for the product or service. Note this may differ from the amount requested, and will be used to reconcile budget transfer and assess actual approved funding.
AA	**Decision - details (rationale)**	**Text**	Focal point to insert rationale for the decision for any individual request.
AB	**Date of response to requestor (mm-dd-yyyy)**	**mm-dd-yyyy**	Date that decision is communicated by the focal point to the requestor.

Appendix Q1. Jordan's Principle Data Dictionary – 2017-18 – Individual Requests *(continued)*

Last updated on January 17, 2020

Column #	Data Field	Response options	Description*
AC	**Date Communicated**		
AD	**Time of response to requestor (hh:mm) 24 hr clock**	**hh:mm**	Time that decision is communicated by the focal point to the requestor. The format of time is hh:mm in 24-hour clock. All times are entered according to their own time zones.
AE	**Product/ support/ service delivered (Yes/ No/ Unknown)**	**Yes** **No** **Unknown**	If known, was the service or product actually delivered to the client requesting it? (yes or no). If unknown, select Unknown.
AF	**Start date (mm-dd-yyyy)**	**mm-dd-yyyy**	If the product or service was delivered, the date that the product/service starts being delivered. This information enables the calculation of the duration of the service delivery.
AG	**End date (mm-dd-yyyy)**	**mm-dd-yyyy**	If the product or service was delivered, the date that the product or service ceases to be delivered. This information enables the calculation of the duration of the service delivery.
AH	**Actual cost**	**Dollar Amount ($)**	The total amount actually spent on the product/service. Note this may differ from the amount requested and the amount approved, and is used to inform the total actual costs of delivering the product/services required through the program.
AI	**Date Received in HQ (mm-dd-yyyy)**	**mm-dd-yyyy**	If the request was escalated to the National Review Centre (HQ) this is the date the escalation occurred.
AJ	**Time Received in HQ (hh:mm)**	**hh:mm**	If the request was escalated to the National Review Centre (HQ) this is the time that the escalation occurred in the format hh:mm in 24-hour clock. All times are entered according to their own time zones.

Appendix Q1. Jordan's Principle Data Dictionary – 2017-18 – Individual Requests *(continued)*

Last updated on January 17, 2020

Column #	Data Field	Response options	Description*
AK	**HQ Decision**	**Approved** **Denied** **Pending** **Referred to Existing Program** **[please state which program]**	What was the decision of the National Review Centre (HQ) on each product and service requested? A decision may be: Approved Denied Pending Referred to an existing program - the program to which they are referred (e.g. NIHB, Special Education) is listed in the "Decision details" column.
AL	**Decision Date** **(mm-dd-yyyy)** **(if pending, not applicable)2**	**mm-dd-yyyy**	If the National Review Centre (HQ) made the decision, this represents the date that the decision was made. This variable is used in the calculation of compliance rates.
AM	**HQ Decision Date**		
AN	**Decision Time** **(hh:mm)**	**hh:mm**	If the National Review Centre (HQ) made the decision, this column records the time that the decision was made in the format of hh:mm in 24-hour clock. This variable is used in the calculation of compliance rates. All times are entered according to their own time zones.
AO	**Total funding amount approved3**	**Dollar Amount ($)**	The total amount approved by the National Review Centre (HQ) for the product or service.
AP	**Decision - details (rationale)** **4**	**Text**	The National Review Centre (HQ) to insert rationale for the decision for any individual request.
AQ	**Date of response to region** **(mm-dd-yyyy)**	**mm-dd-yyyy**	If the National Review Centre (HQ) made the decision, the date that the decision was communicated to the regional focal point.
AR	**Time of response to region** **(hh:mm) 24 hr clock**	**hh:mm**	If the National Review Centre (HQ) made the decision, the time that the decision was communicated to the regional focal point. All times are entered according to their own time zones.
AS	**HQ Date Communicated**	**mm-dd-yyyy**	
AT	**Date diff**		Column created for compliance calculation
AU	**Source**	**ESDPP** **FNIHB**	The source of the data, distinguishing whether the data came from FNIHB or ESDPP.
AV	**# of days**		Calculation of how long it took to make a decision on the request.
AW	**Service Standard**	**Over** **Within**	
AX	**HQ DATE RECEIVED**	**mm-dd-yyyy**

Appendix Q2. Jordan's Principle Data Dictionary 2017-18 Group Requests

Source: Unmodified information from ISC staff

Last updated on January 17, 2020

Column #	Data Field	Response options	Description*
A	**Region**	**Atlantic** **Quebec** **Ontario** **Manitoba** **Saskatchewan** **Alberta** **British Columbia** **Northern**	FNIHB or ESDPP Regional office.
B	**Province /Territory**	**AB** **BC** **MB** **NB** **NL** **NS** **NT** **NU** **ON** **PE** **QC** **SK** **YT**	Two character provincial code.
C	**Agreement #**	**Text**	Agreements will be given a contract number or a contribution agreement number and an amendment number.
D	**Community /organization name**	**Text**	The name of the organization or community that has made the application for funding.
E	**Date Proposal Received (mm-dd-yyyy)**	**mm-dd-yyyy**	
F	**Date Received**	**mm-dd-yyyy**	Date that the focal point is contacted by the client. This contact could be via phone, email, fax or lettermail. For fax and lettermail, this column records the date the focal point receives the letter. This information is used to document when the region receives a request from a client.
G	**Time Proposal Received (hh:mm)**	**hh:mm**	This column records the time at which the focal point receives the request. The following format hh:mm in a 24-hour clock is used. If an application is received by fax, the time that is printed on the fax is used and if no time is printed, it's the time the focal point receives the fax. If the request is received by lettermail, the time the focal point receives the letter is recorded in this column. This information is used to calculate the time required to adjudicate the application. All times are entered according to their own time zones.
H	**Estimated # of Children**	**Number**	The estimated number of children identified by the organization or community that will benefit from the product or services requested.
I	**Categorized Estimated Number of Children**	**Number**	The estimated number of children identified by the organization or community that will benefit from the product or services requested.
J	**Product/ support/ service requested**	**Text**	The specific product, support, or service that has been requested in the application.
K	**Type of Request**	**Text**	Type of First Nations Organizations.
L	**Categorized Type of Request**	**Category (as listed separately in the 'Categories-Group' tab)**	To ensure consistency in reporting, the type of product or service requested was categorized. A published list of reporting categories is available and provides examples of the types of products and services included.
M	**Does product/ support/ service meet normative standard? (Above/ Within/ Below)**	**Above** **Within** **Below**	Is this product or service consistent with the provincial normative standard of care?
N	**Is the request covered under an existing HC/INAC Contribution Agreement (Yes/No)**	**No** **Yes**	Indicate whether the product or service that has been requested has been previously negotiated with Health Canada or INAC and is already covered under an existing agreement.
O	**If yes, is the program CA in program deficit? (Yes/No)**	**No** **Yes**	If the product or service is already covered under an existing agreement, is that agreement in deficit? (i.e. are there insufficient funds available to meet the needs of the community).
P	**Estimated cost**	**Dollar Amount ($)**	What is the estimated cost of the product or service? What is the amount of funding that has been requested by the organization or community?
Q	**Decision (Approved/ Denied/ Escalated to National Review Centre/ Referred to existing program if so which /Pending)**	**Approved** **Denied** **Escalated to National Review Centre** **Pending** **Referred to Existing Program [please state which program]**	What was the decision of the focal point on each product and service requested? A decision may be: Approved Denied Escalated (focal point forwards the request to the Jordan's Principle National Review Centre (HQ) for decision with the information required for decision making. This response is not changed when the HQ makes a decision. Rather, the HQ decision is recorded in the "HQ Decision" column(s)) Pending Referred to an existing program (focal point recognizes that the requested service is eligible under an existing FNIHB or ESDPP program and refers the request there for processing - which program (e.g. NIHB, Special Education) is inserted into the "Comments" column.)
R	**Decision date and time (mm-dd-yyyy)**	**mm-dd-yyyy**	Date that the decision is made by the focal point. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates.
S	**Decision Date**	**mm-dd-yyyy**	
T	**y**	**yyyy**	Year
U	**m**	**mm**	Month
V	**d**	**dd**	Date
W	**Time (hh:mm)**	**hh:mm**	Time at which the decision is made by the focal point. The format used for the time is hh:mm in 24-hour clock. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates. All times are entered according to their own time zones.
X	**Total funding amount approvedapproved**	**Dollar Amount ($)**	The total amount approved for the product or service. Note this may differ from the amount requested, and is used to reconcile budget transfer and assess actual approved funding.
Y	**Decision - details (includes details of referral to other programs such as NIHB, etc.)**	**Text**	Focal point to insert details or rationale for the decision for any group request.
Z	**Date of response to requestor (mm-dd-yyyy)**	**mm-dd-yyyy**	Date that the focal point communicates decision to the requestor.
AA	**Date Communicated**	**mm-dd-yyyy**	
AB	**Time of response to requestor (hh:mm)**	**hh:mm**	Time that the focal point communicates decision to the requestor. The format used for the time is hh:mm in 24-hour clock. All times are entered according to their own time zones.
AC	**Type of Request22**	**Text**	Type of First Nations Organizations.
AD	**Source**	**ESDPP** **FNIHB**	The source of the data, distinguishing whether the data came from FNIHB or ESDPP.
AE	**# of days**		Calculation of how long it took to make a decision on the request.
AF	**Column1**		
AG	**Service standard**	**Over** **Within**	

*The descriptions are representative of the data, as collected in the 2017/18 Data Tracker Tool.

Appendix Q3. Jordan's Principle Data Dictionary 2017-18 Individual Categories

This appendix was removed for confidentiality.

Appendix Q4. Jordan's Principle Data Dictionary 2017-18 Group Categories

This appendix was removed for confidentiality.

Appendix Q5. Jordan's Principle Data Dictionary 2017-18 Decision Rationales

Source: Unmodified information from ISC staff

Approval Rationales
1 - Product, service or support is available to all children
2 - Product, service or support is within the normative standard
3 - Request ensures substantive equality in the provision of products, services or supports to the child
4 - Request ensures culturally appropriate services, products or supports to the child
5 - Request safeguards the best interest of the child
Denial Rationales
6 - Requestor is above the age of majority for their province of residence
7 - Requestor does not have First Nation status, is not eligible for status, is not ordinarily resident on reserve, and is not recognized by their nation.
8 - Requestor does not have First Nation status, is not eligible for status, is not ordinarily resident on reserve, is recognized by their nation, but is not in an urgent or life-threatening situation.
9 - Product, service or support is not available to all children and the request does not have sufficient information to determine that this product, service or support would ensure substantive equality to justify the provision of product, service or support to the child
10 - Product, service or support is not available to all children and the request does not have sufficient information to determine that this product, service or support would ensure culturally appropriate product, service or support to child
11 - Product, service or support is not available to all children and the request does not have sufficient information to determine that this product, service or support would safeguard the best interest of the child
12 - Product, service or support is beyond the normative standard and the request does not have sufficient information to determine that this product, service or support would ensure substantive equality to justify the provision of product, service or support to the child
13 - Product, service or support is beyond the normative standard and the request does not have sufficient information to determine that this product, service or support would ensure culturally appropriate product, service or support to child
14 - Product, service or support is beyond the normative standard and the request does not have sufficient information to determine that this product, service or support would safeguard the best interest of the child
15 - Requestor is not a Land Claim Organization beneficiary and is not eligible to register as a beneficiary.

Appendix R1. Jordan's Principle Data Tracker 2017-18 TOC

Source: Unmodified information from ISC staff

ONLY TO BE USED FOR THE PRELIMINARY REVIEW OF AVAILABLE COMPENSATION DATA PROJECT

Table of Contents:

Tab name	Description of content
1. Methodology	Provides a description of the methods used to determine data completeness for the FY 2017-18 individual and group trackers.
2. Completeness Individual17-18	Provides estimates of the percentage of complete and the percentage of valid responses for data fields highlighted by U of T in the FY 2017-18 individual tracker.
3. Completeness Group17-18	Provides estimates of the percentage of complete and the percentage of valid responses for data fields highlighted by U of T in the FY 2017-18 group tracker.
4. U of T 2019-20 Individual	Original request from U of T which was based on the FY 2019-20 data dictionary for the individual tracker. This worksheet contains the original data field specification provided by U of T, and provides information on the corresponding data field (or lack there of) in the FY 2017-18 individual tracker.
5. U of T 2019-20 Group	Original request from U of T which was based on the FY 2019-20 data dictionary for the group tracker. This worksheet contains the original data field specification provided by U of T, and provides information on the corresponding data field (or lack there of) in the FY 2017-18 group tracker.

Appendix R2. Jordan's Principle Data Tracker 2017-18 Methodology

Source: Unmodified information from ISC staff

ONLY TO BE USED FOR THE PRELIMINARY REVIEW OF AVAILABLE COMPENSATION DATA PROJECT

Methodology - Analysis of 2017-18 Jordan's Principle Individual Tracker Data Quality *Only included requests with a "Date received_for reporting" up to November 2, 2017 See worksheet: "2. Completeness Individual17-18" Note: The worksheet "4. U of T 2019-20 Individual" contains the original data field specification provided by U of T. Due to differences across FY trackers, not all data fields could be analzyed.	
1. Number of Complete/Valid Entries	▪ The number of complete and number of valid entries were tabulated for each data field in order to calculate the percentage of complete and percentage of valid entries. ▪ Invalid entries were classified as those which were not included in the list of response options or were not in the right format (e.g., date entries in the "Decision Time" data field). ▪ Cells left blank were considered as missing entries.
2. Total Number of Entries	▪ The total number of entries was determined based on the number of entries in the "Region" data field, as this data field had all valid entries. This was used as the denominator to calculate the percentage of all valid entries, except those escalated to Headquarters. For the latter, the denominator used was the number of requests escalated to Headquarters and was determined from the total number of entries in the "HQ Decision" data field.
3. Percentage of Complete/Valid Entries	▪ The percentage of complete and the percentage of valid entries were calculated using the number of complete and valid entries and the total number of entries in the Region data field.
4. Categorization of Data Quality	▪ Data was considered as high quality if more than 76% of entries in the data field were valid. All variables with high quality data are highlighted in green. ▪ Data was considered as moderate quality if between 51% and 75% of entries in the data field were valid. All variables with moderate quality data are highlighted in yellow. ▪ Data was considered as low quality if between 26% and 50% of entries in the data field were valid. All variables with low quality data are highlighted in orange. ▪ Data was considered as very low quality if less than 25% of entries in the data field were valid. All variables with high quality data are highlighted in red. ▪ Data fields that were dependent on the correct entry of other data fields were marked as "Not Applicable". For example, the data field "If date of contact and date of assessment are different, rationale for elapsed time (e.g., pending assessment)" is dependent on the number of requests where the date of contact and date of assessment are different. However, there is no data field that quantifies the number of requests that differ in date of contact and date of assessment.

Methodology - Analysis of 2017-18 Jordan's Principle Group Tracker Data Quality *Only included requests with a "Date Received" up to November 2, 2017 See worksheet: "3. Completeness Group17-18" Note: The worksheet "5. U of T 2019-20 Group" contains the original data field specification provided by U of T. Due to differences across FY trackers, not all data fields could be analzyed.	
1. Number of Complete/Valid Entries	▪ The number of complete and number of valid entries were tabulated for each data field in order to calculate the percentage of complete and valid entries. ▪ Invalid entries were classified as those which were not included in the list of response options or were not in the right format (e.g., date entries in the "Decision Time" data field). ▪ Cells left blank were considered as missing entries.
2. Total Number of Entries	▪ The total number of entries was determined based on the number of entries in the "Region" data field, as this data field contained all valid entries. This was used as the denominator to calculate the percentage of all valid entries.
3. Percentage of Complete/Valid Entries	▪ The percentage of complete entries and the percentage of valid entries were calculated using the number of complete and valid entries and the total number of entries in the "Region" data field.
4. Categorization of Data Quality	▪ Data was considered as high quality if more than 76% of entries in the data field were valid. All variables with high quality data are highlighted in green. ▪ Data was considered as moderate quality if between 51% and 75% of entries in the data field were valid. All variables with moderate quality data are highlighted in yellow. ▪ Data was considered as low quality if between 26% and 50% of entries in the data field were valid. All variables with low quality data are highlighted in orange. ▪ Data was considered as very low quality if less than 25% of entries in the data field were valid. All variables with high quality data are highlighted in red. ▪ Data fields that were dependent on the correct entry of other data fields were marked as "Not Applicable". For example, the data field "If yes, is the program CA in program deficit?" is dependent on the question "Is the request covered under an existing HC/INAC Contribution Agreement (Yes/No)", which has a large number of missing values.

0%-25%	Very Low Quality
N/A	Not Applicable

Data Field 2017-18	Comparable 2019-20 Data Field	Responses in Tracker	Valid Response Options	% Complete	% Valid	Description *Representative of the data, as collected in the 2017/18 Data Tracker Tool
Date Region Receives Sufficient Information to Assess Request	Date Region Receives Sufficient Information to Assess Request (yyyy-mm-dd)	mm-dd-yyyy	Any format of date	87.93%	84.07%	Date that the focal point has received sufficient information about the request in order to make a decision. This includes elements such as client information (age, First Nations status, etc.) and clinical details to support the request (e.g., clinical assessment). This information establishes the initial point in time to calculate the duration needed to evaluate and determine an application. It allows for the calculation of compliance rates.
Date received_for reporting	Date and Time Received	mm-dd-yyyy	Any format of date up to November 2, 2017	100.00%	100.00%	
Time Region Receives Sufficient Information to Assess Request	Time Region Receives Sufficient Information to Assess Request (hh:mm) 24 hr clock	hh:mm	Any format of time with clear indication of AM or PM (either included AM, PM, or was in 24hr format)	84.49%	80.43%	This is the time the focal point receives all relevant information to sufficiently evaluate and determine the request. The time uses the following format hh:mm using a 24-hour clock. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates. All times are entered according to their own time zones.
First Nations Status (Yes/No/Pending)	Indigenous Status (First Nation - Status, First Nation - Eligible for Status, First Nation - Non Status, Inuit - Inuvialuit, Inuit - Nunatsiavut, Inuit - Nunavik, Inuit - Nunavut, Inuit - Non Beneficiary, Métis, and Non-Indigenous)	Yes No Pending	Yes, Y, Oui, No, N, Non, Pending	95.14%	95.10%	Does the child have Status as a registered First Nation? Eligible responses are: Yes: First Nation - Status (i.e. has First Nations Status) No: First Nation - Non Status Pending: First Nation Status is in progress
Sex (Male / Female)	Sex (Female, Male or Unspecified)	Female Male	Female, F, Male, M	94.55%	94.51%	Female or Male
Date of Birth (mm-dd-yyyy)	Date of Birth (yyyy-mm-dd)	mm-dd-yyyy	Any format of date	97.69%	89.61%	Date of birth of the child. This information is used to calculate the age of the applicant for eligibility.
Initial assessment (Urgent (12hrs)/Not Urgent (48))	Urgency Life Threatening, Urgent, Non-Urgent	Not Urgent Urgent	Not urgent, non urgent, urgent, life threatening	99.79%	99.79%	The initial assessment of the focal point that this application is urgent or not urgent. Requests that are related to a situation that may impact the safety and/or security of the child and/or family, or where there is a risk of irremediable harm, must be dealt with urgently. According to Canadian Human Rights Tribunal decisions, applications deemed urgent are to be addressed within 12 hours and applications deemed not urgent are to be addressed within 48 hours. This variable is used to calculate compliance rates.
Reason for application/ Needs	Reason for Application and Identified Need(s)	Text	Text, excluded unknown, TBD, n/a	91.83%	91.16%	Information submitted by the requester that assists in understanding the needs of the client. This information is used for decision making purposes. Reasons why the application is brought to Jordan's Principle are recorded under this variable.
Product/ support/ service requested (list each product or service as a separate line item if the client has more than one)	Product, Support or Service Requested (List each product or service as a separate line item if the client has more than one)	Text	Text	100.00%	100.00%	Name of product, support, or service that has been requested. A single applicant may request multiple products or services.
Categorized Type of Request	Type of Request (See Categories tab for options)	Category (as listed separately in the 'Categories-Individual' tab)	Any reporting category (excluded unknown)	100.00%	99.96%	To ensure consistency in reporting, the type of product or service requested was categorized. A published list of reporting categories is available and provides examples of the types of products and services included.

Does product/ support/ service meet normative standard? (Above/ Within/ Below)	Is the Product, Support or Service Beyond or Within Normative Standard? (Beyond or Within)	Above Within Below	Above, within, below, égal, inférieur, supérieur	97.95%	87.47%	
New client? (Yes/No)	New Client? (Yes or No)	Yes No	Yes, Y, Oui, No, N, Non	98.03%	97.99%	Is this a new client, or has the client made previous applications for products or services? This field supports the calculation of unique children applying for service by flagging potential repeat clients from historical datasets.
Decision (Approved/ Denied/ Escalated to National Review Centre/ Referred to existing program if so, which/ Pending)	Regional Decision (Approved, Cancelled, Escalated, Pending, Pending more information, or Referred to existing program [please state which program], Suspended)	Approved Denied Escalated [to a National Review Centre] Pending Referred to Existing Program [please state which program]	Approved, denied, escalated [to a national review centre], pending, referred to existing program [please state which program], cancelled	99.75%	99.75%	What was the decision of the focal point on each product and service requested? A decision may be: Approved Denied Escalated (focal point forwards the request to the Jordan's Principle National Review Centre (HQ) for decision with the information required for decision making. This response is not changed when the HQ makes a decision. Rather, the HQ decision is recorded in the "HQ Decision" column(s)) Pending
Decision Date	Decision Date (If pending: Not applicable) (yyyy-mm-dd)	mm-dd-yyyy	Any format of date	89.73%	89.69%	Date that a decision is made by the focal point. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates.
Decision Time (hh:mm) 24 hr clock	Decision Time (If pending: Not applicable) (hh:mm) 24 hr clock	hh:mm	Any format of time with clear indication of AM or PM (either included AM, PM, or was in 24hr format)	84.87%	84.70%	Time that decision is made by the focal point. The following format of hh:mm in 24-hour clock is used. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates. All times are entered according to their own time zones.
Decision - details (rationale)	Decision Rationale	Text	Text, removed unknown	59.47%	59.47%	Focal point to insert rationale for the decision for any individual request.
Date of response to requestor (mm-dd-yyyy)	Date of Response to Requestor (yyyy-mm-dd)	mm-dd-yyyy	Any format of date	79.04%	78.96%	Date that decision is communicated by the focal point to the requestor.
Time of response to requestor (hh:mm) 24 hr clock	Time of Response to Requestor (hh:mm) 24 hr clock	hh:mm	Any format of time with clear indication of AM or PM (either included AM, PM, or was in 24hr format)	68.27%	68.19%	Time that decision is communicated by the focal point to the requestor. The format of time is hh:mm in 24-hour clock. All times are entered according to their own time zones.
Product/ support/ service delivered (Yes/ No/ Unknown)	Product, Support or Service Delivered (Yes, No or Unknown)	Yes No Unknown	Yes, oui, no, non, unknown	11.69%	11.61%	If known, was the service or product actually delivered to the client requesting it? (yes or no). If unknown, select Unknown.
Start date (mm-dd-yyyy)	Start Date (yyyy-mm-dd)	mm-dd-yyyy	Any format of date	5.78%	5.78%	If the product or service was delivered, the date that the product/service starts being delivered. This information enables the calculation of the duration of the service delivery.
Date Received in HQ (mm-dd-yyyy)	HQ Date Received (yyyy-mm-dd)	mm-dd-yyyy	Any format of date	1.38%	1.38%	If the request was escalated to the National Review Centre (HQ) this is the date the escalation occurred.
Time Received in HQ (hh:mm)	HQ Time Received (hh:mm)	hh:mm	Any format of time with clear indication of AM or PM (either included AM, PM, or was in 24hr format)	0.34%	0.34%	If the request was escalated to the National Review Centre (HQ) this is the time that the escalation occurred in the format hh:mm in 24-hour clock. All times are entered according to their own time zones.
HQ Decision	HQ Decision (Approved, Cancelled, Denied, Pending a decision, Pending more information, Referred to existing program [please state which program], Rescinded, Suspended)	Approved Denied Pending Referred to Existing Program [please state which program]	Approved, denied, pending, referred to existing program [please state which program], cancelled	18.61%	18.44%	What was the decision of the National Review Centre (HQ) on each product and service requested? A decision may be: Approved Denied Pending Referred to an existing program - the program to which they are referred (e.g. NIHB, Special Education) is listed in the "Decision details" column.
Decision Date (mm-dd-yyyy) (if pending, not applicable)2	HQ Decision Date (If pending: Not applicable) (yyyy-mm-dd)	mm-dd-yyyy	Any format of date	2.85%	2.60%	If the National Review Centre (HQ) made the decision, this represents the date that the decision was made. This variable is used in the calculation of compliance rates.

Orange =	Data field name different in 2017-18 but served the same/similar purpose
Red =	Data field is not at all present in 2017-19

Column #	Data Field	Comparable Data Field in 2017-18	Response options	Description
A	Region	Region	**Atlantic** **Québec** **Ontario** **Manitoba** **Saskatchewan** **Alberta** **British Columbia** **Northern/Yukon**	FNIHB or ESDPP Regional office
B	Province or Territory	Province/Territory	**AB** **BC** **MB** **NB** **NL** **NS** **NT** **NU** **ON** **PE** **QC** **SK** **YT**	Two character provincial or territorial code
C	Child Unique Identifier	Child Unique Identifier	**XX-XX-####**	Identifying number to be generated regionally to uniquely identify each client. It is preferred if this number follows the convention of the former department (2-4 character, HC/INAC) - Region (2-3 character, ATL, QC, ON, MB, SK, AB, BC, NT) - Unique 4-5 digit number (as required). For example, HC-AB-12345. Additional numbers separated by a decimal can be added for subsequent requests from the same client (e.g. .001, .002, etc.).
D	Regional Date of Initial Contact (yyyy-mm-dd)	Regional Date of Initial Contact (mm-dd-yyyy)	**yyyy-mm-dd**	Date that the focal point is first contacted by the client. This contact could be via phone, email, fax or lettermail. For fax and lettermail, it is the date on which the focal point receives the letter. This information is used to document the first point of contact from a client about a request.
E	Regional Time of Initial Contact (hh:mm) 24 hr clock	Regional Time of Initial Contact (hh:mm) 24 hr clock	**hh:mm**	Time in the date of initial contact that request is received by the focal point. The following format is used: hh:mm in a 24-hour clock. If an application is received by fax, the time that is printed on the fax is used and, if no time is printed, the time the focal point receives the fax is used. If received by lettermail, the time the focal point receives the letter is used. This information is used to calculate the time required to adjudicate the application. All times are entered according to their own time zones.
F	Date Region Receives Sufficient Information to Assess Request (yyyy-mm-dd)	Date region receives sufficient information to assess request (mm-dd-yyyy)	**yyyy-mm-dd**	Date that the focal point has received sufficient information about the request in order to make a decision. This includes elements such as client information (age, First Nations status, etc.) and clinical details to support the request (e.g. clinical assessment). This information establishes the initial point in time to calculate the duration needed to evaluate and determine an application. It allows for the calculation of compliance rates.
G	Time Region Receives Sufficient Information to Assess Request (hh:mm) 24 hr clock	Time Region Receives Sufficient Information to Assess Request	**hh:mm**	This is the time the focal point receives all relevant information to sufficiently evaluate and determine the request. The time uses the following format hh:mm using a 24-hour clock. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates. All times are entered according to their own time zones.
I	Date and Time Received	Date received_for reporting	**yyyy-mm-dd hh:mm**	Calculated field used in the calculation of compliance rates: "=TEXT([@[Date Region Receives Sufficient Information to Assess Request (yyyy-mm-dd)]],"yyyy-mm-dd ")&TEXT([@[Time Region Receives Sufficient Information to Assess Request (hh:mm) 24 hr clock]]," hh:mm")"
M	Indigenous Status (First Nation - Status, First Nation - Eligible for Status, First Nation - Non Status, Inuit - Inuvialuit, Inuit - Nunatsiavut, Inuit - Nunavik, Inuit - Nunavut, Inuit - Non Beneficiary, Métis, and Non-Indigenous)	First Nations Status (Yes/No/Pending)	**First Nation - Status** **First Nation - Eligible for Status** **First Nation - Non Status** **Inuit - Inuvialuit** **Inuit - Nunatsiavut** **Inuit - Nunavik** **Inuit - Nunavut** **Inuit - Non Beneficiary** **Métis** **Non-Indigenous**	Child's Indigenous status
J	Ordinarily Resident On? (On, Off or Not Required)	Not in 2017-18	**Yes** **No** **Unknown**	Whether or not the child ordinarily resides on reserve
K	Recognized by their Nation? (Yes, No, or Not Required)	Not in 2017-18	**Yes** **No** **Not Required**	Whether or not the child is recognized by their nation
L	Sex (Female, Male or Unspecified)	Sex (Male / Female)	**Female** **Male** **Unspecified**	Sex of the child.
O	Date of Birth (yyyy-mm-dd)	Date of Birth (mm-dd-yyyy)	**yyyy-mm-dd**	Date of birth of the child. This information is used to calculate the age of the applicant for eligibility.
P	Urgency Life Threatening, Urgent, Non-Urgent	Initial assessment (Urgent (12hrs)/Not Urgent (48))	**Not Urgent** **Urgent** **Life Threatening**	The initial assessment of the focal point that this application is urgent or not urgent. Requests that are related to a situation that may impact the safety and/or security of the child and/or family, or where there is a risk of irremediable harm, must be dealt with urgently. According to Canadian Human Rights Tribunal decisions, applications deemed urgent are to be addressed within 12 hours and applications deemed not urgent are to be addressed within 48 hours. This variable is used to calculate compliance rates.

Appendix R5. Jordan's Principle Data Tracker 2017-18 U of T – Individual *(continued)*

Original data field specification

Yellow =	Same data field name used in 2017-18
Orange =	Data field name different in 2017-18 but served the same/similar purpose
Red =	Data field is not at all present in 2017-19

Column #	Data Field	Comparable Data Field in 2017-18	Response options	Description
Q	Reason for Application and Identified Need(s)	Reason for application/ Needs	**Text**	Information submitted by the requester that assists in understanding the needs of the client. This information is used for decision making purposes. Reasons why the application is brought to Jordan's Principle are recorded under this variable.
P	Product, Support or Service Requested (List each product or service as a separate line item if the client has more than one)	Product/ support/ service requested (list each product or service as a separate line item if the client has more than one)	**Text**	Name of product, support, or service that has been requested. A single applicant may request multiple products or services.
Q	Venture Academy		**Venture**	Indicates if the request is related to Venture Academy, a residential assessment and treatment program.
R	Type of Request (See Categories tab for options)	Type of Request	**Category (as listed separately in the 'Categories-Individual' tab)**	To ensure consistency in reporting, the type of product or service requested was categorized. A published list of reporting categories is available and provides examples of the types of products and services included.
S	Is the Product, Support or Service Beyond or Within Offrmative Standard? (Beyond or Within)	Does product/ support/ service meet normative standard? (Above/ Within/ Below)	**Above** **Within** **Below**	Is the product/support/service requested above, within or below the normative standard (substantive equality)? This data field reflects the global assessment of the Focal Point and considers the information available at the time of request.
T	INUIT ONLY: Is Consultation Required? (On or Off)		**On** **Off**	Whether consultation is required for the request related to an Inuk child.
U	INUIT ONLY: Consultation (Examples: LCO, Medical, Social or Educational Professional, HQ, Provincial or Territorial Government)		**Text**	If a consultation is required for the request related to an Inuk child, this field describes who should be consulted.
V	INUIT ONLY: If Consulted, Please Provide Reason for Consultation		**Text**	If a consultation is required for the request related to an Inuk child, this field provides the reason for consultation
W	INUIT ONLY: Date Shared with LCO (yyyy-mm-dd)		**yyyy-mm-dd**	Date request is shared with an Inuit Land Claim Organization (LCO)
X	INUIT ONLY: LCO Decision (Recommended for Approval or Recommended for Denial)		**Recommended for Approval** **Recommended for Denial**	Decision of the Inuit Land Claim Organization (LCO). A decision may be: Recommended for Approval Recommended for Denial
Y	Total Funding Amount Requested ($)		**Dollar Amount ($)**	The total amount requested for the product or service.
Z	New Client? (Yes or No)	New client? (Yes/No)	**Yes** **No**	Is this a new client, or has the client made previous applications for products or services? This field supports the calculation of unique children applying for service by flagging potential repeat clients from historical datasets.
AA	Regional Decision (Approved, Cancelled, Escalated, Pending,Pending more information, or Referred to existing program [please state which program], Suspended)	Decision (Approved/ Denied/ Escalated to National Review Centre/ Referred to existing program if so, which/ Pending)	**Approved** **Escalated** **Referred to existing program if so, which** **Pending more information** **Pending a Decision** **Cancelled** **Suspended**	What was the decision of the focal point on each product and service requested? A decision may be: Approved Escalated (focal point forwards the request to the Jordan's Principle National Review Centre (HQ) for decision with the information required for decision making. This response is not changed when the HQ makes a decision. Rather, the HQ decision is recorded in the "HQ Decision" column(s)) Referred to an existing program (focal point recognizes that the requested service is eligible under an existing FNIHB or ESDPP program and refers the request there for processing) Pending more information Pending a decision Cancelled Suspended
AB	Decision Rationale	Decision - details (rationale)	**Numeric code** **OR** **Text**	Rationale for the decision for a request. A numeric code from 1 to 15 (see 'Decision Rationales' tab for explanation of numeric code). OR Best interest: Yes/No, Culturally Appropriate: Yes/No, Normative Standard: Above/Within, Substantive Equality: yes/No, Eligibility: Eligible/Ineligible/Not Assessed/Empty
AC	Decision Date (If pending: Not applicable) (yyyy-mm-dd)	Decision Date	**yyyy-mm-dd**	Date that a decision is made by the focal point. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates.
AD	Decision Time (If pending: Not applicable) (hh:mm) 24 hr clock	Decision Time (hh:mm) 24 hr clock	**hh:mm**	Time that decision is made by the focal point. The following format of hh:mm in 24-hour clock is used. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates. All times are entered according to their own time zones.
AE	RO Decision Date and Time	Not in 2017-18	**yyyy-mm-dd hh:mm**	Calculated field used in the calculation of compliance rates: "=TEXT([@[Decision Date (If pending: Not applicable) (yyyy-mm-dd)]],"yyyy-mm-dd ")&TEXT([@[Decision Time (If pending: Not applicable) (hh:mm) 24 hr clock]]," hh:mm")"
AF	Total Funding Amount Approved ($)		**Dollar Amount ($)**	The total amount approved for the product or service. Note this may differ from the amount requested, and will be used to reconcile budget transfer and assess actual approved funding.
AG	Comments and Notes	Not in 2017-18	**Text**	Open text field for the focal point to include comments and notes related to the request.
AH	Date of Response to Requestor (yyyy-mm-dd)	Date of response to requestor (mm-dd-yyyy)	**yyyy-mm-dd**	Date that decision is communicated by the focal point to the requestor.
AI	Time of Response to Requestor (hh:mm) 24 hr clock	Time of response to requestor (hh:mm) 24 hr clock	**hh:mm**	Time that decision is communicated by the focal point to the requestor. The format of time is hh:mm in 24-hour clock. All times are entered according to their own time zones.
AJ	Product, Support or Service Delivered (Yes, No or Unknown)	Product/ support/ service delivered (Yes/ No/ Unknown)	**Yes** **No** **Unknown**	If known, was the service or product actually delivered to the client requesting it? (yes or no). If unknown, select Unknown.

Appendix R5. Jordan's Principle Data Tracker 2017-18 U of T – Individual *(continued)*

Original data field specification

Yellow =	Same data field name used in 2017-18
Orange =	Data field name different in 2017-18 but served the same/similar purpose
Red =	Data field is not at all present in 2017-19

Column #	Data Field	Comparable Data Field in 2017-18	Response options	Description
AK	Start Date (yyyy-mm-dd)	Start date (mm-dd-yyyy)	**yyyy-mm-dd**	If the product or service was delivered, the date that the product/service starts being delivered. This information enables the calculation of the duration of the service delivery.
AL	End Date (yyyy-mm-dd)		**yyyy-mm-dd**	If the product or service was delivered, the date that the product or service ceases to be delivered. This information enables the calculation of the duration of the service delivery.
AM	Actual Cost ($)		**Dollar Amount ($)**	The total amount actually spent on the product/service. Note this may differ from the amount requested and the amount approved, and is used to inform the total actual costs of delivering the product/services required through the program.
AN	HQ Date Received (yyyy-mm-dd)	Date received in HQ (mm-dd-yyyy)	**yyyy-mm-dd**	If the request was escalated to the National Review Centre (HQ) this is the date the escalation occurred.
AO	HQ Time Received (hh:mm)	Time received in HQ (hh:mm)	**hh:mm**	If the request was escalated to the National Review Centre (HQ) this is the time that the escalation occurred in the format hh:mm in 24-hour clock. All times are entered according to their own time zones.
AP	HQ Decision (Approved, Cancelled, Denied, Pending a decision, Pending more information, Referred to existing program [please state which program], Rescinded, Suspended)	HQ Decision (Approved/ Denied/ / Referred to existing program if so, which/ Pending)	**Approved** **Denied** **Referred to existing program if so, which** **Pending more information** **Pending a decision** **Cancelled**	What was the decision of the National Review Centre (HQ) on each product and service requested? A decision may be: Approved Denied Referred to an existing program - the program to which they are referred (e.g. NIHB, Special Education) is listed in the "HQ Decision - details" column Pending more information Pending a decision Cancelled
AQ	HQ Decision Rationale	Decision - details (rationale) 4	**Numeric Code** **OR** **Text**	The National Review Centre (HQ) to insert rationale for the decision for any request. A numeric code from 1 to 15 (see 'Decision Rationales' tab for explanation of numeric code). OR Best interest: Yes/No, Culturally Appropriate: Yes/No, Normative Standard: Above/Within, Substantive Equality: yes/No, Eligibility: Eligible/Ineligible/Not Assessed/Empty
AR	HQ Decision Date (If pending: Not applicable) (yyyy-mm-dd)	Decision date (mm-dd-yyyy) (if pending, not applicable)2	**yyyy-mm-dd**	If the National Review Centre (HQ) made the decision, this represents the date that the decision was made. This variable is used in the calculation of compliance rates.
AS	HQ Decision Time (If pending: Not applicable) (hh:mm)	Decision Time (hh:mm)	**hh:mm**	If the National Review Centre (HQ) made the decision, this column records the time that the decision was made in the format of hh:mm in 24-hour clock. This variable is used in the calculation of compliance rates. All times are entered according to their own time zones.
AT	HQ Decision Date and Time	Not in 2017-18	**yyyy-mm-dd hh:mm**	Calculated field used in the calculation of compliance rates: "=TEXT([@[HQ Decision Date (If pending: Not applicable) (yyyy-mm-dd)]],"yyyy-mm-dd ")&TEXT([@[HQ Decision Time (If pending: Not applicable) (hh:mm)]]," hh:mm")"
AU	HQ Total funding Amount Approved ($)		**Dollar Amount ($)**	The total amount approved by the National Review Centre (HQ) for the product or service.
AV	HQ/Escalation Comments	Decision - details (rationale) 4	**Text**	Open text field for the National Review Centre (HQ) to include comments and notes related to the request.
AW	HQ Date of Response to Region (yyyy-mm-dd)	Date of response to region (mm-dd-yyyy)	**yyyy-mm-dd**	If the National Review Centre (HQ) made the decision, the date that the decision was communicated to the regional focal point.
AX	HQ Time of Response to Region (hh:mm) 24 hr clock	Time of response to region (hh:mm) 24 hr clock	**hh:mm**	If the National Review Centre (HQ) made the decision, the time that the decision was communicated to the regional focal point. All times are entered according to their own time zones.
AY	APPEAL Date Received (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	If the request was appealed, this is the date the appeal occurred.
AZ	APPEAL Time Received (hh:mm)	Not in 2017-18	**hh:mm**	If the request was appealed, this is the time that the appeal occurred in the format hh:mm in 24-hour clock. All times are entered according to their own time zones.
BA	APPEAL Decision (Denial Upheld or Approved (Denial Overturned)	Not in 2017-18	**Denial Upheld** **Approved (Denial Overturned)**	What was the decision of the appeal on each product and service requested? A decision may be: Denial Upheld Approved (Denial Overturned)
BB	APPEAL Decision Rationale	Not in 2017-18	**Text**	Rationale for the decision for the request.
BC	APPEAL Decision Date (If pending: Not applicable) (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	If the appeal resulted in a decision, this represents the date that the decision was made. This variable is used in the calculation of compliance rates.
BD	APPEAL Decision Time (If pending: Not applicable) (hh:mm)	Not in 2017-18	**hh:mm**	If the appeal resulted in a decision, this column records the time that the decision was made in the format of hh:mm in 24-hour clock. This variable is used in the calculation of compliance rates. All times are entered according to their own time zones.
BE	APPEAL Total funding Amount Approved ($)		**Dollar Amount ($)**	The total amount approved for the product or service.
BF	APPEAL Comments	Not in 2017-18	**Text**	Open text field for comments related to the appeal.
BG	APPEAL Date of Response to Region (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	If the appeal resulted in a decision, the date that the decision was communicated to the regional focal point.
BH	APPEAL Time of Response to Region (hh:mm) 24 hr clock	Not in 2017-18	**hh:mm**	If the appeal resulted in a decision, the time that the decision was communicated to the regional focal point. All times are entered according to their own time zones.
BI	Time Difference	# of days	**hh:mm**	Calculated field used in the calculation of compliance rates: "=[@[RO Decision Date and Time]]-[@[Date and Time Received]]" or "=[@[HQ Decision Date and Time]]-[@[Date and Time Received]]", depending on if the decision was made at the regional focal point or at HQ
BJ	Compliance	service standard	**OVER** **WITHIN**	Calculated field to indicate whether the response is over or within compliance timelines: "=IF([@[Time Difference]]>VALUE("48:00"),"OVER","WITHIN")" or "=IF([@[Time Difference]]>VALUE("12:00"),"OVER","WITHIN")", based on the urgency of the request.

Appendix R6. Jordan's Principle Data Tracker 2017-18 U of T – Group

Source: Unmodified information from ISC staff

Original data field specification

Yellow =	Same data field name used in 2017-18
Orange =	Data field name different in 2017-18 but served the same/similar purpose
Red =	Data field is not at all present in 2017-19

Column #	Data Field	Comparable Data Field in 2017-18	Response options	Description*
A	Region	Region	**Atlantic** **Quebec** **Ontario** **Manitoba** **Saskatchewan** **Alberta** **British Columbia** **Northern**	FNIHB or ESDPP Regional office.
B	Province or Territory	Province / Territory	**AB** **BC** **MB** **NB** **NL** **NS** **NT** **NU** **ON** **PE** **QC** **SK** **YT**	Two character provincial code.
C	Contribution Agreement #	Agreement #	**Text**	Agreements will be given a contract number or a contribution agreement number and an amendment number.
D	Request ID # (For Inuit, add IT to Request ID #)	Not in 2017-18	**XX-XX-#####**	Identifying number generated to uniquely identify each client. This number includes the department (2-3 character, HC/ISC) - Region (2-3 character, ATL, QC, ON, MB, SK, AB, BC, NT) - Unique 4-5 digit number (as required). For example, HC-AB-12345. IT indicates a request for Inuit children.
E	Community or Organization Name	Community/organization Name	**Text**	The name of the organization or community that has made the application for funding.
F	Regional Date of Initial Contact (yyyy-mm-dd)	Date received	**yyyy-mm-dd**	Date that the focal point is contacted by the client. This contact could be via phone, email, fax or lettermail. For fax and lettermail, this column records the date the focal point receives the letter. This information is used to document when the region receives a request from a client.
G	Regional Time of Initial Contact (hh:mm) 24 hr clock	Time proposal received	**hh:mm**	This column records the time at which the focal point receives the request. The following format hh:mm in a 24-hour clock is used. If an application is received by fax, the time that is printed on the fax is used and if no time is printed, it's the time the focal point receives the fax. If the request is received by lettermail, the time the focal point receives the letter is recorded in this column. This information is used to calculate the time required to adjudicate the application. All times are entered according to their own time zones.
H	Date Region Receives Sufficient Information to Assess Request (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	Date that the focal point has received sufficient information about the request in order to make a decision. This includes elements such as client information (age, First Nations status, etc.) and clinical details to support the request (e.g. clinical assessment). This information establishes the initial point in time to calculate the duration needed to evaluate and determine an application. It allows for the calculation of compliance rates.
I	Time Region Receives Sufficient Information to Assess Request (hh:mm) 24 hr clock	Not in 2017-18	**hh:mm**	This is the time the focal point receives all relevant information to sufficiently evaluate and determine the request. The time uses the following format hh:mm using a 24-hour clock. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates. All times are entered according to their own time zones.
J	Estimated # of Children	Estimated # of Children	**Number**	The estimated number of children identified by the organization or community that will benefit from the product or services requested.
K	Urgency (Non-urgent [7 days] or Urgent [48 hrs])	Not in 2017-18	**Not Urgent** **Urgent**	The initial assessment of the focal point that this application is urgent or not urgent. Requests that are related to a situation that may impact the safety and/or security of the child and/or family, or where there is a risk of irremediable harm, must be dealt with urgently. According to Canadian Human Rights Tribunal decisions, applications deemed urgent are to be addressed within 48 hours and applications deemed not urgent are to be addressed within 7 days. This variable is used to calculate compliance rates.

Appendix R6. Jordan's Principle Data Tracker 2017-18 U of T – Group *(continued)*

Original data field specification

Yellow =	Same data field name used in 2017-18
Orange =	Data field name different in 2017-18 but served the same/similar purpose
Red =	Data field is not at all present in 2017-19

Column #	Data Field	Comparable Data Field in 2017-18	Response options	Description*
L	Product, Support or Service Requested (List each product or service as a separate line item if the client has more than one)	Product/ support/ service requested	**Text**	The specific product, support, or service that has been requested in the application.
M	Types of Services	Type of Request	**Category (as listed separately in the 'Categories-Group' tab)**	To ensure consistency in reporting, the type of product or service requested was categorized. A published list of reporting categories is available and provides examples of the types of products and services included.
N	Does Product, Support or Service Meet Normative Standard? (Beyond or Within)	Does product/ support/ service meet normative standard? (Above/ Within/ Below)	**Beyond** **Within**	Is this product or service consistent with the provincial normative standard of care?
O	Is the request covered under an existing HC or INAC Contribution Agreement (No or Yes)	Is the request covered under an existing HC/INAC Contribution Agreement (Yes/No)	**No** **Yes**	Indicate whether the product or service that has been requested has been previously negotiated with Health Canada or INAC and is already covered under an existing agreement.
P	If yes, is the program CA in program deficit? (No or Yes)	If yes, is the program CA in program deficit? (Yes/No)	**No** **Yes**	If the product or service is already covered under an existing agreement, is that agreement in deficit? (i.e. are there insufficient funds available to meet the needs of the community).
Q	INUIT ONLY: Is Consultation Required? (Yes or No)		**On** **Off**	Whether consultation is required for the request related to Inuit children.
R	INUIT ONLY: Consultation (Examples: LCO, Medical, Social or Educational Professional, HQ, Provincial or Territorial Government)		**Text**	If a consultation is required for the request related to Inuit children, this field describes who should be consulted.
S	INUIT ONLY: If Consulted, Please Provide Reason for Consultation		**Text**	If a consultation is required for the request related to Inuit children, this field provides the reason for consultation
T	INUIT ONLY: Date Shared with LCO (yyyy-mm-dd)		**yyyy-mm-dd**	Date request is shared with an Inuit Land Claim Organization (LCO)
U	INUIT ONLY: LCO Decision (Recommended for Approval or Recommended for Denial)		**Recommended for Approval** **Recommended for Denial**	Decision of the Inuit Land Claim Organization (LCO). A decision may be: Recommended for Approval Recommended for Denial
V	Estimated Cost ($)		**Dollar Amount ($)**	What is the estimated cost of the product or service? What is the amount of funding that has been requested by the organization or community?
W	Regional Decision (Approved, Cancelled, Escalated, Pending a decision, Pending more information, or Referred to existing program [please state which program], Suspended)	Decision (Approved/ Denied/ Escalated to National Review Centre/ Referred to existing program if so which /Pending)	**Approved** **Denied** **Escalated** **Pending a decision** **Pending more information** **Referred to Existing Program [please state which program]** **Suspended**	What was the decision of the focal point on each product and service requested? A decision may be: Approved Denied Escalated (focal point forwards the request to the Jordan's Principle National Review Centre (HQ) for decision with the information required for decision making. This response is not changed when the HQ makes a decision. Rather, the HQ decision is recorded in the "HQ Decision" column(s)) Pending a decision Pending more information Referred to an existing program (focal point recognizes that the requested service is eligible under an existing FNIHB or ESDPP program and refers the request there for processing - which program (e.g. NIHB, Special Education) is inserted into the "Comments" column.)

Appendix R6. Jordan's Principle Data Tracker 2017-18 U of T – Group *(continued)*

Original data field specification

Yellow =	Same data field name used in 2017-18
Orange =	Data field name different in 2017-18 but served the same/similar purpose
Red =	Data field is not at all present in 2017-19

Column #	Data Field	Comparable Data Field in 2017-18	Response options	Description*
X	Decision Rationale	Not in 2017-18	**Numeric code** **OR** **Text**	Rationale for the decision for a request. A numeric code from 1 to 15 (see 'Decision Rationales' tab for explanation of numeric code). OR Best interest: Yes/No, Culturally Appropriate: Yes/No, Normative Standard: Above/Within, Substantive Equality: yes/No, Eligibility: Eligible/Ineligible/Not Assessed/Empty
Y	Decision Date (If pending: not applicable) (yyyy-mm-dd)	Decision Date	**yyyy-mm-dd**	Date that the decision is made by the focal point. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates.
Z	Decision Time (If pending: not applicable) (hh:mm) 24 hr clock	Time (hh:mm)	**hh:mm**	Time at which the decision is made by the focal point. The format used for the time is hh:mm in 24-hour clock. This information is used to calculate the time required to evaluate and determine the application. It allows for the calculation of compliance rates. All times are entered according to their own time zones.
AA	Total Funding Amount Approved ($)	Total Funding Amount Approved	**Dollar Amount ($)**	The total amount approved for the product or service. Note this may differ from the amount requested, and is used to reconcile budget transfer and assess actual approved funding.
AB	Comments	Decision - details (includes details of referral to other programs such as NIHB, etc.)	**Text**	Focal point to insert details or rationale for the decision for any group request.
AC	Date of Response to Requestor (yyyy-mm-dd)	Date of Response to Requestor	**yyyy-mm-dd**	Date that the focal point communicates decision to the requestor.
AD	Time of Response to Requestor (hh:mm) 24 hr clock	Time of response to requestor (hh:mm)	**hh:mm**	Time that the focal point communicates decision to the requestor. The format used for the time is hh:mm in 24-hour clock. All times are entered according to their own time zones.
AE	HQ Date Received (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	If the request was escalated to the National Review Centre (HQ) this is the date the escalation occurred.
AF	HQ Time Received (hh:mm)	Not in 2017-18	**hh:mm**	If the request was escalated to the National Review Centre (HQ) this is the time that the escalation occurred in the format hh:mm in 24-hour clock. All times are entered according to their own time zones.
AG	HQ Decision (Approved, Cancelled, Denied, Pending a decision, Pending more information, Referred to existing program [please state which program], Rescinded, or Suspended)	Not in 2017-18	**Approved** **Denied** **Referred to existing program if so, which** **Pending more information** **Pending a decision** **Cancelled** **Suspended**	What was the decision of the National Review Centre (HQ) on each product and service requested? A decision may be: Approved Denied Referred to an existing program - the program to which they are referred (e.g. NIHB, Special Education) is listed in the "HQ Decision - details" column Pending more information Pending a decision Cancelled Suspended
AH	HQ Decision Rationale	Not in 2017-18	**Numeric Code** **OR** **Text**	The National Review Centre (HQ) to insert rationale for the decision for any request. A numeric code from 1 to 15 (see 'Decision Rationales' tab for explanation of numeric code). OR Best interest: Yes/No, Culturally Appropriate: Yes/No, Normative Standard: Above/Within, Substantive Equality: yes/No, Eligibility: Eligible/Ineligible/Not Assessed/Empty
AI	HQ Decision Date (If pending: not applicable) (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	If the National Review Centre (HQ) made the decision, this represents the date that the decision was made. This variable is used in the calculation of compliance rates.
AJ	HQ Decision Time (If pending: not applicable) (hh:mm)	Not in 2017-18	**hh:mm**	If the National Review Centre (HQ) made the decision, this column records the time that the decision was made in the format of hh:mm in 24-hour clock. This variable is used in the calculation of compliance rates. All times are entered according to their own time zones.
AK	HQ Total funding Amount Approved ($)		**Dollar Amount ($)**	The total amount approved by the National Review Centre (HQ) for the product or service.
AL	HQ Comments	Not in 2017-18	**Text**	The National Review Centre (HQ) to insert rationale for the decision for any individual request.
AM	HQ Date of Response to Region (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	If the National Review Centre (HQ) made the decision, the date that the decision was communicated to the regional focal point.
AN	HQ Time of Response to Region (hh:mm) 24 hr clock	Not in 2017-18	**hh:mm**	If the National Review Centre (HQ) made the decision, the time that the decision was communicated to the regional focal point. All times are entered according to their own time zones.

Appendix R6. Jordan's Principle Data Tracker 2017-18 U of T – Group *(continued)*

Original data field specification

Yellow =	Same data field name used in 2017-18
Orange =	Data field name different in 2017-18 but served the same/similar purpose
Red =	Data field is not at all present in 2017-19

Column #	Data Field	Comparable Data Field in 2017-18	Response options	Description*
AO	APPEAL Date Received (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	If the request was appealed, this is the date the appeal occurred.
AP	APPEAL Time Received (hh:mm)	Not in 2017-18	**hh:mm**	If the request was appealed, this is the time that the appeal occurred in the format hh:mm in 24-hour clock. All times are entered according to their own time zones.
AQ	APPEAL Decision (Denial Upheld or Approved (Denial Overturned)	Not in 2017-18	**Denial Upheld** **Approved (Denial Overturned)**	What was the decision of the appeal on each product and service requested? A decision may be: Denial Upheld Approved (Denial Overturned)
AR	APPEAL Decision Rationale	Not in 2017-18	**Text**	Rationale for the decision for the request.
AS	APPEAL Decision Date (If pending: not applicable) (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	If the appeal resulted in a decision, this represents the date that the decision was made. This variable is used in the calculation of compliance rates.
AT	APPEAL Decision Time (If pending: not applicable) (hh:mm)	Not in 2017-18	**hh:mm**	If the appeal resulted in a decision, this column records the time that the decision was made in the format of hh:mm in 24-hour clock. This variable is used in the calculation of compliance rates. All times are entered according to their own time zones.
AU	APPEAL Total funding Amount Approved ($)		**Dollar Amount ($)**	The total amount approved for the product or service.
AV	APPEAL Comments	Not in 2017-18	**Text**	Comments for the decision for the request.
AW	APPEAL Date of Response to Region (yyyy-mm-dd)	Not in 2017-18	**yyyy-mm-dd**	If the appeal resulted in a decision, the date that the decision was communicated to the regional focal point.
AX	APPEAL Time of Response to Region (hh:mm) 24 hr clock	Not in 2017-18	**hh:mm**	If the appeal resulted in a decision, the time that the decision was communicated to the regional focal point. All times are entered according to their own time zones.
AY	Time Difference	# of days	**hh:mm**	Calculated field used in the calculation of compliance rates: "=[@[Decision Date (If pending: not applicable) (yyyy-mm-dd)]]-[@[Date Region Receives Sufficient Information to Assess Request (yyyy-mm-dd)]]" or "=[@[HQ Decision Date (If pending: not applicable) (yyyy-mm-dd)]]-[@[Date Region Receives Sufficient Information to Assess Request (yyyy-mm-dd)]]", depending on if the decision was made at the regional focal point or at HQ
AZ	COMPLIANCE	Service standard	**OVER** **WITHIN**	Calculated field to indicate whether the response is over or within compliance timelines: "=IF([@[Time Difference]]>2,"OVER","WITHIN")" or "=IF([@[Time Difference]]>7,"OVER","WITHIN")", based on the urgency of the request.

Appendix S. Overview of Availability of Data Related to Jordan's Principle Individual and Group Requests in FY 2017-2018

The data dictionary for individual and group Jordan's Principle requests in FY 2017-2018 is available in Appendix Q. Appendix R provides information on the completeness and validity of these variables in FY 2017-2018. Using these documents, the project team has summarized the availability and gaps in data held at ISC regarding Jordan's Principle requests in FY 2017-2018 as they relate to the CHRT Jordan's Principle compensation categories in the table below.

Table S.1 Availability of data related to Jordan's Principle requests in FY 2017-2018

Jordan's Principle requests at ISC – Review of data availability for individual and group requests in FY 2017-2018
Data system used: Excel spreadsheets

Type of information needed	Information of interest	Individual requests		Group requests		Summary Issues identified	
		Availability	Completeness	Availability	Completeness	Individual requests	Group requests
Can the child be identified?	Child Name (Family Name, Given Name)	No, but proxy exists: the Child Unique Identifier[1]	Less than 1% missing	No[2]	N/A	Availability issue	Info. not available
	Child Date of Birth	Yes	Less than 3% missing	No	N/A	No issues identified	Info. not available
	Child Indian Registration Number	No	N/A	No	N/A	Info. not available	Info. not available
Is the child First Nations?	Child's First Nations identity	Partial: called First Nations Status[3]	Less than 5% missing	No	N/A	Applicability issue	Info. not available
Can the caregiver be identified?	Caregiver Name (Family Name, Given Name)	No	N/A	No	N/A	Info. not available	Info. not available
	Caregiver Indian Registration Number	No	N/A	No	N/A	Info. not available	Info. not available
Is the caregiver First Nations?	Caregiver's First Nations identity	No	N/A	No	N/A	Info. not available	Info. not available

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

1 It is not clear how the Unique Identifier has been generated or verified within the Region. Each Region has developed their own Unique Identifier format, which in some cases, is made up of personal identifiers such as an alpha-numeric code for region and DOB.
2 Only information on community/organization name and number of children for group requests.
3 **First Nations Status – response options:** Yes/No/Pending.

Appendix S. Overview of Availability of Data Related to Jordan's Principle Individual and Group Requests in FY 2017-2018 *(continued)*

Table S.1 Availability of data related to Jordan's Principle requests in FY 2017-2018 *(continued)*

Type of information needed	Information of interest	Individual requests		Group requests		Summary Issues identified	
		Availability	Completeness	Availability	Completeness	Individual requests	Group requests
Was the request approved?	Decision (Approved or Denied)	Yes[4]	Less than 1% missing	Yes	0% missing	No issues identified	No issues identified
	Was the product/ service delivered?	Yes	More than 88% missing	No	N/A	Significant completeness issue	Info. not available
Did the child obtain the service after an unreasonable delay?	Date request received	Yes	0% missing	Yes	0% missing	No issues identified	No issues identified
	Date region receives sufficient information to assess request	Yes	Approx 12% missing	No	N/A	Minor completeness issue	Info. not available
	Date of decision	Yes	Approx 11% missing	Yes	0% missing	Minor completeness issue	No issues identified
	Date of response	Yes	Approx 21% missing	Yes	Approx 21 % missing	Completeness issue	Completeness issue
	Date service was delivered	Yes	Approx 89% missing	No	N/A	Significant completeness issue	Info. not available

Level of issue: None identified | None identified; some info not provided | Minor | Potential | Medium | Significant | No information available | Information not provided | Applicability issue

(continued on following page)

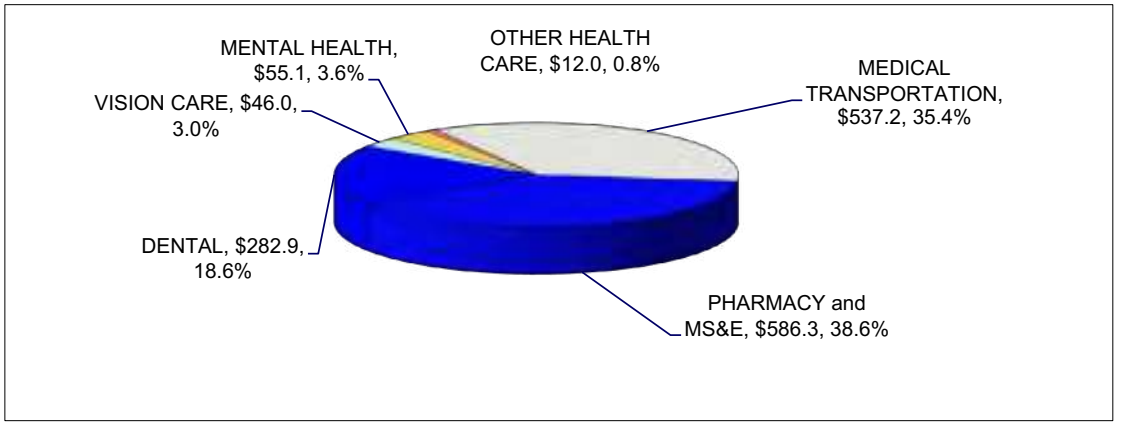
Appendix U. NIHB – Uses and Limitations

Source: Unmodified information from ISC staff

Non-Insured Health Benefits

- The Non-Insured Health Benefits (NIHB) Program provides registered First Nations and recognized Inuit with coverage for a range of medically necessary health benefits including prescription drugs and over-the-counter medications, dental and vision care, medical supplies and equipment, mental health counselling, and transportation to access medically required health services that are not available on reserve or in the community of residence.
- During the 2019/20 Fiscal Year, NIHB provided access to benefits coverage to 887,518 eligible clients.
- Total NIHB program benefit expenditures in this period were $1,519.5 million.



2 ISC INDIGENOUS SERVICES CANADA

NIHB Data Collection

- The NIHB program makes use of data collected and stored in a variety of databases and automated systems to facilitate program management, policy development, reporting and communications activities.
- Data collected and utilized by the NIHB program is administrative in nature and falls into two categories:
  - Reference (e.g., population data, pricing lists, etc.)
  - Transactional (requests adjudicated by a claims processing system according to automated or pre-established business rules)

- Population Data: drawn from the Status Verification System.
  - Population data on First Nations clients are based on information provided by Crown-Indigenous Relations and Northern Affairs Canada (CIRNA).
  - Data on Inuit clients are based on information provided by the Governments of the Northwest Territories and Nunavut, and Inuit organizations including the Inuvialuit Regional Corporation, Nunavut Tunngavik Incorporated and the Makivik Corporation.

3 ISC INDIGENOUS SERVICES CANADA

NIHB Data Collection (Transactional Data)

- A number of automated information management systems are used to process and pay claims in accordance with NIHB client/benefit eligibility and pricing policies.

- Claims for the NIHB pharmacy, dental, medical supplies and equipment, vision care and mental health counselling benefits are processed via the Health Information and Claims Processing Services (HICPS) system.
  - In 2019/20 a total of 29,229,020 claim lines were processed through HICPS
  - Claim lines are an administrative unit of measure as opposed to a health care unit of measure and represent a transaction in the claims processing system.
  - Prior to June 2020, Vision Care and Mental Health Counselling benefits were administered via various regionally managed systems.

- Medical Transportation data are collected through several electronic systems, including the Medical Transportation Reporting System (MTRS) through which operational data at the regional level are tracked.

4

ISC INDIGENOUS SERVICES CANADA

NIHB Data: Uses

The administrative data collected by NIHB is used in the adjudication of benefit requests, as well as to facilitate other program management activities, including:

- development of public facing communication products, including the NIHB Annual Report
- development and implementation of client safety initiatives
- financial analysis to support forecasting and policy development
- departmental reporting
- responding to Access to Information requests
- evaluation and monitoring activities, including those to ensure efficacy and effectiveness of program processes and to determine impacts of policy changes
- negotiation and administration of Product Listing Agreements and other activities to ensure program sustainability
- supporting Indigenous Partners
- contract monitoring

5 ISC INDIGENOUS SERVICES CANADA

NIHB Data: Limitations

Use of NIHB data is limited by several factors, including:

- NIHB data does not contain information on residency (client addresses)
  - Individuals are associated with the band to which they are registered or the land claim organization under which they are recognized
- A significant proportion of NIHB benefits are delivered in community under contribution agreements or other transfer arrangements
  - Data on services delivered in this manner are not collected or maintained by NIHB
  - Services delivered in this manner represent approximately 20% of NIHB expenditures
- Some NIHB benefits are provided through contracts with service providers (e.g., dentists, mental health councillors, etc.)
  - Service level data are not maintained for most for these arrangements
- NIHB data is administrative in nature
  - Requests go through several stages of adjudication and can be stopped (or "denied") for various reasons, including incorrect or missing information

6

ISC INDIGENOUS SERVICES CANADA

NIHB Data: Limitations

Given its inherent limitations, NIHB data should and/or can not be used:

- To make determinations as to an individual or population's residency
  - Reporting by P/T of registration or provider location only
- As an absolute value for benefit or treatment access or uptake
  - Utilization underrepresented as claim expenditures covered by P/T plans, provincially funded programs, public or private insurance or cash transactions and data for services provided in Nursing Homes and under contribution or transfer agreements not included
- As a measure of disease prevalence
  - Data is limited to claims paid by NIHB only
  - Medications often have multiple indications
- To determine benefit approval rates
  - Claims may be rejected for administrative reasons
  - Rejected claims may have been subsequently approved for the same item/procedure, a similar item/procedure, or once a quantity-frequency limit has reset

Appendix X. NIHB – Information on Historical Data Systems Used by Regions for Medical Transportation

Source: Unmodified information from ISC staff

Information on the three regions that, historically, did not utilize the national MTRS system for administration of the Medical Transportation benefit is below:

Manitoba:

- Have used MTRS for operational and non-emergency travel since MTRS developed
- Used FoxPro to track land and air ambulance travel between 2004 and 2014
    - A subset of the FoxPro data has been downloaded to the Medical Transportation Data Store
    - Aggregate data from FoxPro is also available in SiA

Ontario:

- Utilized a regionally developed and maintained system, the Ontario Medical Transportation System (OMTS), for the administration of Medical Transportation benefits from between 2006 and 2013 (depending on the Ontario Region Zone) and late 2016
    - While OMTS has been decommissioned, most of the data it contained has been stored in a data warehouse and can be accessed via ISC IT services
    - A subset of the OMTS data has also been downloaded to the Medical Transportation Data Store

Alberta:

- Utilized a regionally developed and maintained system, the Medical Transportation Reporting Database (MTRD), between 2005 and late 2019
    - MTRD data is stored, and can be accessed, through SiA
    - A subset of the MTRD data has also been downloaded to the Medical Transportation Data Store
- Used FoxPro to track land and air ambulance travel between 2004 and 2014
    - A subset of the FoxPro data has been downloaded to the Medical Transportation Data Store
    - Aggregate data from FoxPro is also available in SiA

Northwest Territories and Nunavut have their own systems that are used to manage the Medical Transportation Benefit.

- Data from these systems can be requested from the Territorial Governments.

Overview

The Non-Insured Health Benefits (NIHB) program provides registered First Nations and recognized Inuit with coverage for a range of medically necessary health benefits including prescription drugs and over-the-counter (OTC) medications, dental and vision care, medical supplies and equipment, mental health counselling and transportation to access medically required health services that are not available on reserve or in the community of residence.

The First Nations and Inuit and Health Branch's (FNIHB) current Medical Transportation (MT) benefit processing system, the Medical Transportation Records System (MTRS), is a national, real-time, bilingual (French and English), web-based application used by NIHB regions and their partners to facilitate MT benefit delivery, payment, and the management of MT data.

The following primary MTRS subject areas can be reported on:

- Travel Authorizations
- Vouchers
- Invoices
- Appointments
- Patients

Definitions

Each subject area contains measures and attributes.

Measures

A measure is an indicator that is quantifiable such as an amount of time, the number of appointments or a cost. Measures for each of the subject areas noted above and their related business definitions / limitations are listed in the tables below.

Attributes

Attributes are the data elements needed in the information repository for reporting and analysis purposes. These data elements can be used as content in an analysis or report. They may also be used to sort, filter, summarize, or group the information in an analysis or report.

Travel Authorizations

A Travel Authorization (TA) is a request for MT benefits entered into MTRS which includes at least one appointment and any service vouchers required for the particular trip. A TA is the core of the MTRS system and defines all of the appointments, participants, estimated costs and actual costs associated with a defined medical transportation request.

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

Travel Authorization Measures

Measure Name	Definition	Data Considerations
Count of Travel Authorizations	The number of TAs	A TA can be a single round trip, a single one-way trip or several trips combined
Count of Appointments	The number of appointments	May not include all appointments attended by the client as only appointments covered by the NIHB MT benefit are reported
Count of Clients	The number of clients	May exclude infants
Count of Escorts	The number of medical and/or non-medical escorts	
Count of Vouchers	The number of vouchers. A voucher can be for Transportation, Accommodation or Meals for one or more individuals (i.e. an escort can have a separate voucher or be included in the same voucher as the client)	A transportation voucher can be a ticket for a one-way flight or a round trip flight for one or more individuals. An accommodation voucher can include a stay at an accommodation for one or more individuals. A meals voucher can include all the meals for one or more individuals.
Costs Each TA may have one or more estimates for any of the following cost areas: accommodation, meals and transportation. Costs may be a mix of estimates and actuals and include the costs of escorts.		
Total Accommodation Estimate	Total accommodation cost estimate	Accommodation costs may include meal costs
Total Transportation Estimate	Total transportation cost estimate	
Total Meal Estimate	Total meal cost estimate	
Grand Total Estimate	Total estimate cost	
Grand Total Paid	Total paid cost	May not include all paid travel
Grand Total Invoiced	Total invoiced cost	May not include all invoices

Travel Authorization Attributes

TAs may be selected based on one or more of the following.

Attribute name	Definition	Data Considerations
Travel Authorization Number	Unique computer generated identifier	
TA Creation Date	Date TA was created	

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

Attribute name	Definition	Data Considerations
TA Start Date	Earliest recorded date within a TA (can be appointment date or voucher date)	
TA End Date	Latest recorded date within a TA (can be the appointment or voucher date)	Interpreted as the last day of travel
TA Status	Status of a TA: Approved, Cancelled, Completed, No Show, Pending, Rejected, Travel NS	TAs that are Approved, Completed, or Pending are considered completed
TA Origin	The region/city/community of departure	The TA origin does not necessarily represent the region/city/community of residence
TA Destination	The destination region/city/community of the patient	The TA destination does not necessarily represent the location of the service provider or the health service
Authorizing Region	Region that authorized the MT trip	The authorizing region does not necessarily represent the region of residence. Travel may be authorized by more than one region (i.e. cross-provincial travel). In these cases, the departing origin is selected for the purposes of the analysis.
TA Escort Reason	Reason client required to be accompanied during travel • Age restriction • Behavior • Care instructions required • Dependability • Language barrier/interpreter • Legal consent required • Medically incapacitated • Medically incompetent • Other • Personal Suitability • Physical/mental disability • Second Escort required (Exception)	
Jordan's Principle Indicator	Yes/No/Shared Indicator	Some Jordan's Principle travel may still be recorded as NIHB travel as the indicator was not available in the system at the time
Contribution Agreement Indicator	Yes/No/Shared Indicator	Some contribution agreement data may be recorded as operational data
Wheelchair Indicator	Yes/No Indicator	

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

Vouchers

A voucher is an electronic or physical paper issued to clients to deliver to service providers for the purpose of communicating Canada's commitment to pay for the client's incurred expenses.
One or more vouchers may be related with a single TA. A voucher can also be related to one or more travellers (client, escorts). Voucher analysis can be related to all Travel Authorization attributes.

Voucher Measures

Measure name	Definition	Data Considerations
Estimated Cost – Sub Total	Estimated cost before taxes	
Estimated Cost - Total	Total estimated cost	
Estimated Cost – Total Taxes	Total estimated tax	
Paid Total	Total paid cost	May not include all paid travel
Invoiced Total	Total invoice cost	May not include all invoices
Total Accommodation Estimate	Total accommodation cost estimate	Accommodation costs may include meal costs
Total Transportation Estimate	Total transportation cost estimate	
Total Meal Estimate	Total meal cost estimate	

Voucher Attributes

Attribute name	Definition	Data Considerations
Voucher Type	A voucher can be for Accommodation, Transportation, or Meals	A transportation voucher can be a ticket for a one-way flight or a round trip flight for one or more individuals. An accommodation voucher can include a stay at an accommodation for one or more individuals. A meals voucher can include all the meals for one or more individuals.
Service Type	**Meals:** Breakfast, Lunch, Dinner, Full Day Meal, Extra Meal and General Meal **Accommodation:** Apartment, Boarding Home, Day Room, Double Occupant, Kitchenette, Private Accommodation, Single Occupant and Suite **Transportation:** Air Ambulance, Boat, Chartered Bus, Chartered Flight, Ground Ambulance, Medical Van, Private Vehicle, Professional Vehicle, Scheduled Bus, Scheduled Flight, Taxi and Train	

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

Attribute name	Definition	Data Considerations
Voucher Number	Unique computer generated identifier	
Voucher Start Date	Start date of service depending on voucher type • Transportation Voucher: Departure Date • Accommodation Voucher: Check-In Date • Meal Voucher: Start Date	
Voucher End Date	End date of service depending on voucher type • Transportation Voucher: Return Date • Accommodation Voucher: Check-Out Date • Meal Voucher: End Date	
Status	Status of a Voucher: Cancelled, Paid, Pending, Reconciled, Rejected	Vouchers that are Paid, Pending or Reconciled are considered completed
Quantity	Quantity depending on the voucher type: • Accommodations: Number of Nights • Meals: Number of Meals • Transportation: Distance	
Transportation Origin	The region/city/community of departure	
Transportation Destination	The region/city/community of destination	
Service Provider	Provider of service (i.e. Air Canada, Holiday Inn)	
Provider Address	Address of Provider	
Tax Province	Tax Province	
Jordan's Principle Indicator	Yes/No Indicator	Some Jordan's Principle travel may still be recorded as NIHB travel as the indicator was not available in the system at the time
Contribution Agreement Indicator	Yes/No Indicator	Some contribution agreement data may be recorded as operational data

Appointments

Each individual appointment is related to a single TA. There may be more than one appointment to a TA.
Values represent NIHB claim data entered in the Medical Transportation Record System (MTRS) and should not be interpreted as prevalence or incidence of treatment, disorder or disease.
May not include all appointments attended by client as only appointments covered by the NIHB MT benefit are reported.

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

Appointment Attributes

Attribute name	Definition	Data Considerations
Appointment Date	Date of the appointment	
Status	Status of an appointment: Approved, Cancelled, Completed, Missed, No Show, Pending, Rejected, Rescheduled	Appointments that are Approved, Completed and Pending are considered completed
Appointment Reason	Reason of the appointment • Cancer/Chemo/Radiation • Childbirth • Day Surgery • Dental • Detox • Diagnostic Test – Lab Work • Diagnostic Test – MRI • Diagnostic Test – Mammogram • Diagnostic Test – Other • Diagnostic Test – Scope • Diagnostic Test – Ultrasound - Prenatal • Diagnostic Test – Ultrasound - Other • Diagnostic Test – X-rays • Dialysis • Emergency Treatment • Hearing/Speech Test • Hospital Admission • Hospital Discharge • IRS-RHSP • Insured Service, not dialysis • MS&E • Mental Health • Methadone • NNADAP • Pandemic Reasons • Physiotherapy • Post-Operative Followup • Postnatal Care • Pre-Operative Visit • Prenatal Care • Scheduled Appointment • Specialist clinic • Suboxone • Telehealth • Traditional Healer • Vision Care	The appointment reason may not always represent the reason for travel as there may be multiple appointments in one TA. Many appointment reasons only contain the value of 'Scheduled Appointment'.
Medical Specialty	Specialty of the health provider or facility • Addiction	

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

Attribute name	Definition	Data Considerations
	• Allergist • Alternative Med. • Anaesthesiologist • Audiologist • Audioprosthetist • Cardiologist • Cardiovascular Surgeon • Chiropractor • Community Med. • Dentist • Denturist • Dermatologist • Diabetes • Dietitian/Dietician • ENT • Electrophysiology • Emergentologist • Endocrinologist • Endodontist • Gastroenterologist • Gen. Practitioner • Gen. Surgeon • Genetist • Geriatric Med. • Hematologist • Infectious Disease • Internist • Laboratory • Mental Health • Midwife • Nephrologist • Neurologist • Neurosurgeon • Nuclear Medicine • Nurse Practitioner • Obstetrics/Gynecology • Occupational Therapist • Ocularist • Oncologist • Opthalmologist • Optician • Optometrist • Oral Maxillofacial Surgeon • Oral Medicine • Oral Pathologist	

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

Attribute name	Definition	Data Considerations
	• Orthodontist • Orthopeadic Surgeon • Orthotist/Prosthetist • Paedodontist • Pathologist • Pediatrician • Periodontist • Physiatrist • Physiotherapist • Plastic Surgeon • Pneumologist • Podiatrist • Prosthodontist • Psychiatrist • Psychologist • Pulmunologist/Respirologist • Radiologist • Rehabilitation • Research • Rheumatologist • Speech Therapist • Thoracic Surgeon • Traditional Healer • Urologist • Vascular • Vascular Surgeon	
Provider Name	Name of the health provider or facility	
Provider Address	Address of the health provider or facility	
Jordan's Principle Indicator	Yes/No Indicator	Some Jordan's Principle travel may still be recorded as NIHB travel as the indicator was not available in the system at the time
Wheelchair Indicator	Yes/No Indicator	

Patients

Only one patient can be associated with a TA. A patient may or may not be associated with a Voucher. A patient is always associated with an appointment.

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

Patient Attributes

Attribute name	Definition	Data Considerations
Client ID	Unique identifier. Data obtained from SVS	
Last Name	Last name of client. Data obtained from SVS	
First Name	First name of client. Data obtained from SVS	
Full Name	Last Name, First Name. Data obtained from SVS	
Date of Birth	Client date of birth. Data obtained from SVS	
Current Status	Client's eligibility status: Eligible, Ineligible or Deceased	
Client Type	First Nation, Inuit, Infant, Other. Data obtained from SVS	
Gender	Client's gender. Data obtained from SVS.	
Escort Reason (current)	Reason client requires to be accompanied during travel: • Age restriction • Behavior • Care instructions required • Dependability • Language barrier/interpreter • Legal consent required • Medically incapacitated • Medically incompetent • Other • Personal Suitability • Physical/mental disability • Second Escort required (Exception)	
Region	Represents the region of the band to which the client is registered. Data is obtained from SVS.	The client region does not necessarily represent the region/city/community of residence.
Band Number	Represents the band number to which the client is registered. Data is obtained from SVS.	
Band	Represents the band to which the client is registered. Data is obtained from SVS.	
Wheelchair Required Indicator	Yes/No Indicator	
Contribution Agreement Indicator	Yes/No Indicator	
McIvor / Bill C3	Yes/No indicator indicating if the client is covered as a result of the McIvor/Bill C-3	
FNHA Indicator	Yes/No indicator indicating if the client is currently covered by the First Nation Health Authority (FNHA) benefits program	

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

Additional Data Considerations

- Medical Transportation is funded through two program envelopes, Operational (OP) and Contribution Agreements (CA), and travel can be funded by both. Depending on the region and the community, the contribution agreement portion of the trip may not be captured in MTRS. This is especially relevant for regions that receive MT funding primarily via CA, such as Quebec, the Northwest Territories and Nunavut.

- There are several limitations to the MTRS data related to data submission compliance, differences in interpretation, system limitations, and data entry practices and errors.

- Data may not necessarily represent a historical usage trend but rather changes in systems and data practices.

- MTRS contains data from 2009/10; however it does not apply to all regions. Please refer to the table below that presents availability of data in MTRS.

Region	Data Type	11/12	12/13	13/14	14/15	15/16	16/17	17/18	18/19	19/20
AT	OP	✓	✓	✓	✓	✓	✓	✓	✓	✓
	CA	✓	✓	✓	✓	✓	✓	✓	✓	✓
QC	OP	✓	✓	✓	✓	✓	✓	✓	✓	✓
	CA	Partial	Partial	Partial	Partial	Partial	Partial	Partial	Partial	Partial
ON	OP						Dec 2016	✓	✓	✓
	CA									
MB	OP	✓	✓	✓	✓	✓	✓	✓	✓	✓
	Emergency				Nov 2014	✓	✓	✓	✓	✓
	CA									
SK	OP	✓	✓	✓	✓	✓	✓	✓	✓	✓
	CA	Partial	Partial	Partial	Partial	Partial	Partial	Partial	Partial	Partial
AB	OP									Oct 2019
	Emergency				Aug 2014	✓	✓	✓	✓	✓
	CA									Oct 2019
YT	OP	✓	✓	✓	✓	✓	✓	✓	✓	✓

- The variance in emergency data is attributed to the differences between the provincial coverage.

Appendix Y. NIHB – Medical Transportation Data Reporting *(continued)*

- The volume of TAs/trips varies based on factors such as regional operations and the geography of the region. For example:
  - Trips might be captured in two different TAs. For example, the trip from the client's home to their appointment may be captured in one TA, while the return trip may be captured in another TA. This is the case for many emergency trips. An initial TA would be created for the return trip and, once the invoice for the ambulance is received, the emergency travel may be added to the existing TA if a correlation between the two components of the trip can be made. If this correlation can not easily be made, a new TA could be created for the emergency portion of the trip.
  - Recurring appointments, such as dialysis appointments, can be captured as one trip per appointment or as multiple appointments per trip.
  - Regions whose clients live in proximity to urban centres would coordinate trips less frequently than regions in which travel is primarily air.

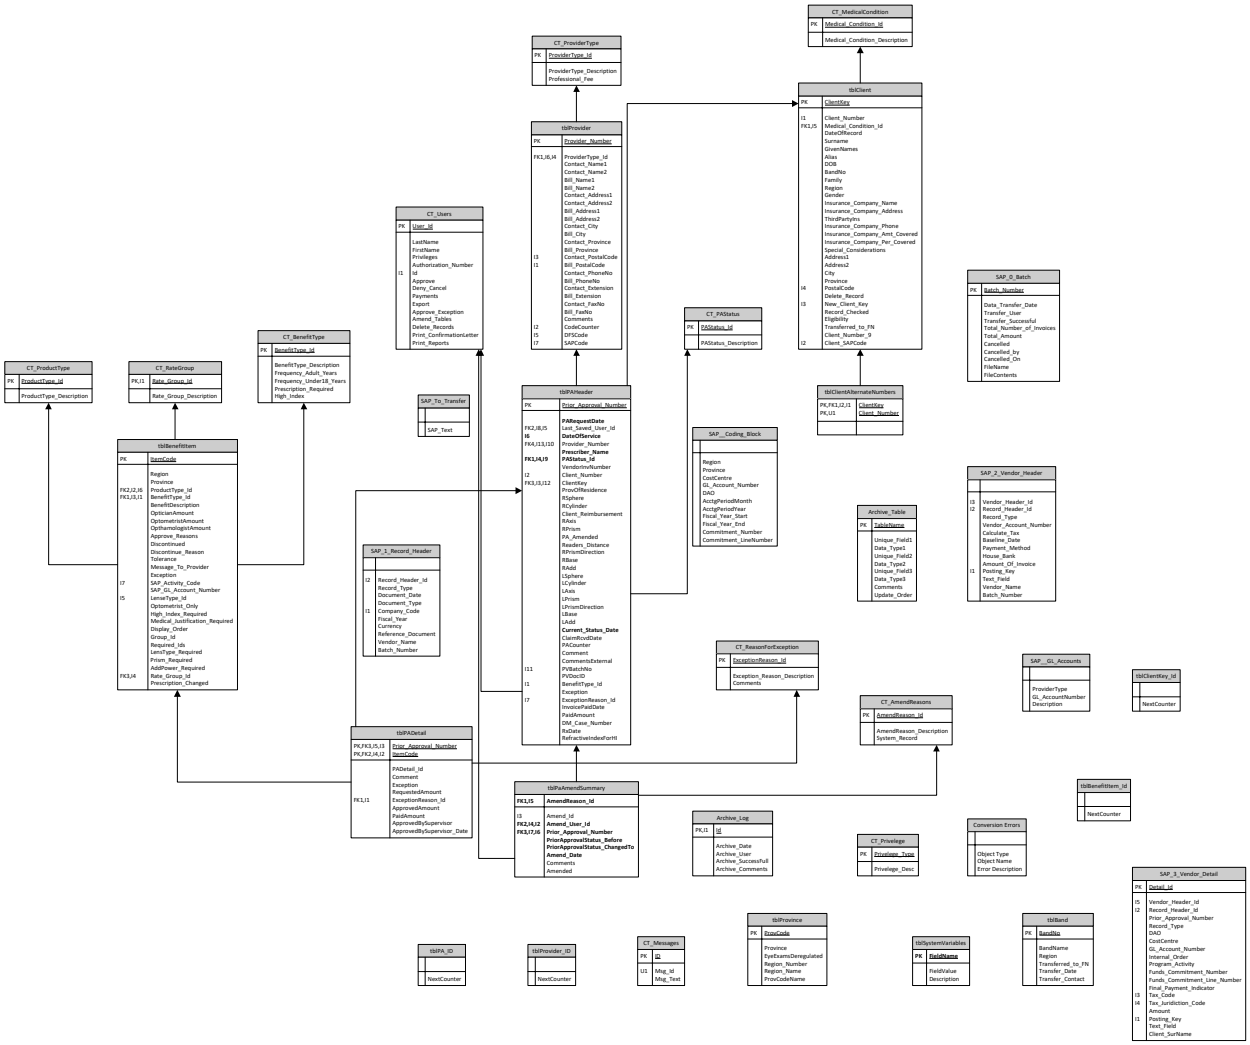
Database name: VIS_ALB.accdb

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

1.2. Table Diagram



Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

1.3. Query Diagram

2. Table Description

2.1. Archive_log

Table Name: Archive_log		
Table Description: This table stores the log of the archives performed on this database. It captures the number of times the archive was performed and also the date, time, user who performed and the outcome of the archive.		
Field name	Data Type	Field Description
Id	Long Integer	System Generated Unique Number
Archive_Date	Date/Time	The date on which archive was performed
Archive_User	Text	The user who performed the archive
Archive_SuccessFull	Yes/No	Whether the archive was successful or not
Archive_Comments	Text	Contains a comment indicating success or failure and also a date before which all data was archived. Ex: "Successfully Archived All Prior Approvals and related data, where Date of Service is less than or equal to: March 31, 2012"

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.2. Archive_table

Table Name: Archive_table		
Table Description: This table contains a list of Reference tables that will be archived by the archive process.		
Field name	Data Type	Field Description
TableName	Text	The name of the table that will be archived
Unique_Field1	Text	The unique field in the table to be archived. Ex: for table tblProvider, Provider_Number is the unique key
Data_Type1	Text	Data type of the unique field
Unique_Field2	Text	Some tables have a compound key, this column is used for storing the name of the 2nd key.
Data_Type2	Text	Data type of the 2nd key
Unique_Field3	Text	Not Used
Data_Type3	Text	Not Used
Comments	Text	Not Used
Update_Order	Integer	The order in which tables are archived. It starts from 1.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.3. Conversion Errors

Table Name : Conversion Errors		
Table Description:		
Field name	Data Type	Field Description
Object Type	Text	
Object Name	Text	
Error Description	Memo	

2.4. CT_Amendreasons

Table Name : CT_Amendreasons		
Table Description: This is a code table that contains a list of reasons for amending a prior approval		
Field name	Data Type	Field Description
AmendReason_Id	Long Integer	Unique Id
AmendReason_Description	Text	Reason description
System_Record	Yes/No	This field denotes whether the reason is used internally by VCS or whether it is a user entered reason. Ex: PA Filed is used by VCS whenever a PA record is created and this record cannot be deleted. Whereas 'Adding Benefit Details' is a user entered reason and can be deleted if needed.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.5. CT_BenifitTypes

Table Name: CT_BenifitTypes

Table Description: This table is a reference table that contains list of all benefit types:

- New EyeWear
- Eye Exams
- Major Repair
- Minor Repair
- Eye Exam/Reassessment

Field name	Data Type	Field Description
BenefitType_Id	Integer	Unique Id
BenefitType_Description	Text	Description of benefit type, ex: New EyeWear
Frequency_Adult_Years	Integer	Number of years an adult has to wait before they are eligible again for the benefit type
Frequency_Under18_Years	Integer	Number of years an under 18 client has to wait before they are eligible again for the benefit type
Prescription_Required	Yes/No	Whether prescription is required for the client to be eligible for this benefit type
High_Index	Yes/No	Whether prescription should have an high index for the client to be eligible for this benefit type

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.6. CT_MedicalCondition

Table Name: CT_MedicalCondition

Table Description: Contains a list of medical conditions that I client may have. The conditions are related to client's eligibility for vision care benefit only.

Ex:

- DIABETIC
- VISION PROBLEMS
- GLUCOMA

Field name	Data Type	Field Description
Medical_Condition_Id	Long Integer	Unique ID
Medical_Condition_Description	Text	Description of medical condition

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.7. CT_Messages

Table Name: CT_Messages		
Table Description: Contains a list of messages used by VCS. These messages are either displayed for information purposes or as warnings and/or questions to VCS users.		
Field name	Data Type	Field Description
ID	Double	Unique ID
Msg_Id	Text	A code used by the system to lookup the message description
Msg_Text	Text	Actual message description

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.8. CT_PAStatus

Table Name: CT_PAStatus		
Table Description: Contains a list of all prior approval statuses: Ex: • Incomplete • Filed • Approved • Denied • Cancelled • Paid - Selected for Payment • Paid - Export in Progress • Paid and Exported Successfully		
Field name	Data Type	Field Description
PAStatus_Id	Integer	Unique ID
PAStatus_Description	Text	Description of Prior Approval Status

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.9. CT_Privelege

Table Name: CT_Privelege		
Table Description: Contains the various roles a user can have within VCS. Ex: • Administrator • User • Team Leader		
Field name	Data Type	Field Description
Privelege_Type	Integer	Unique Id
Privelege_Desc	Text	Role Description

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.10. CT_ProductType

Table Name: CT_ProductType

Table Description: Contains a list of product type. Product type is broader category of benefit item. Every benefit item must belong to a product type.

Ex: Product Type "Lenses" is a parent of following benefit items:

- Lens - Plastic - Single Vision
- Lens - Plastic - Bifocal
- Lens - Glass - Single Vision
- Lens - Glass - Bifocal

Field name	Data Type	Field Description
ProductType_Id	Integer	Unique ID
ProductType_Description	Text	Description/Name of product type

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.11. CT_ProviderType

Table Name: CT_ProviderType		
Table Description: Contains eligible provider types in VCS: • Optician • Optometrist • Ophthalmologist		
Field name	**Data Type**	**Field Description**
ProviderType_Id	Integer	Unique Id
ProviderType_Description	Text	Description of provider type
Professional_Fee	Yes/No	Whether the provide type is eligible for professional fees

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.12. CT_RateGroup

Table Name: CT_RateGroup		
Table Description: Contains a list of groupings to which a certain benefit item can belong. Ex: All single vision plastic lenses belong to a rate grouping of "SV Plastic". This information is used by VCS to ensure that only item of certain rate category is approved in a Prior Approval.		
Field name	Data Type	Field Description
Rate_Group_Id	Integer	Unique Id
Rate_Group_Description	Text	Description of rate group.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.13. CT_ReasonForException

Table Name: CT_ReasonForException

Table Description: Contains a list of reasons for which a prior approval can be approved on exceptional basis.

Ex:

- Exceptional Circumstances - Accident
- Medical Condition
- Special Design
- Exceptional Circumstances - Theft
- Add Power Exception
- Exceptional Circumstances - House Fire
- Exceptional Circumstances - Assault

Field name	Data Type	Field Description
ExceptionReason_Id	Long Integer	Unique Id
Exception_Reason_Description	Text	Description of exception reason
Comments	Text	Comments that can be displayed on screen to provide extra information to the user

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.14. CT_Users

Table Name: CT_Users		
Table Description: Contains a list of all users of VCS and their rights in the system.		
Field name	Data Type	Field Description
User_Id	Text	Username, ex: CBen for Charles Ben
LastName	Text	User's lastname
FirstName	Text	User's firstname
Privileges	Integer	User role, i.e. Admin, User or Team Leader
Authorization_Number	Text	4 character number/name that is saved with all prior approvals
Id	Long Integer	Unique Id
Approve	Yes/No	Whether a user can approve prior approvals
Deny_Cancel	Yes/No	Whether a user can deny prior approvals
Payments	Yes/No	Whether a user can pay prior approvals
Export	Yes/No	Whether a user can export payment records
Approve_Exception	Yes/No	Whether a user can approve prior approvals on exception basis
Amend_Tables	Yes/No	Whether a user can amend prior approvals
Delete_Records	Yes/No	Whether a user can delete prior approvals
Print_ConfirmationLetter	Yes/No	Whether a user can print prior approval confirmation letter
Print_Reports	Yes/No	Whether a user can print other reports

2.15. SAP_Coding_Block

Table Name: SAP_Coding_Block		
Table Description: This table stores SAP coding block. Coding block implies specific coding that the payment system requires in order for an invoice to be paid.		
Field name	Data Type	Field Description
Region	Text	Region code of the region, ex: 07 for Atlantic
Province	Text	Province code of the region, ex: 02 for Atlantic
CostCentre	Text	Financial Coding – Cost Centre
GL_Account_Number	Text	Financial Coding – G/L Account Number – this field is not used as table SAP__GL_Accounts is used instead
DAO	Text	Financial Coding – DAO
AcctgPeriodMonth	Text	
AcctgPeriodYear	Text	
Fiscal_Year_Start	Text	Financial Coding – Fiscal Year's Start Year
Fiscal_Year_End	Text	Financial Coding – Fiscal Year's End Year
Commitment_Number	Text	This field is not used
Commitment_LineNumber	Text	This field is not used

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.16. SAP_GL_Accounts

Table Name: SAP_GL_Accounts		
Table Description: This table stores General Ledger (G/L) codes for various provider types		
Field name	Data Type	Field Description
ProviderType	Integer	Provider Type Id
GL_AccountNumber	Text	General Ledger Code
Description	Text	Provider Type Description

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.17. SAP_0_Batch

Table Name: SAP_0_Batch		
Table Description: This is the batch header table. When a payment batch is created, a record is added to this table for every single batch.		
Field name	Data Type	Field Description
Batch_Number	Text	VCS generated batch number
Data_Transfer_Date	Date/Time	The date on which batch is created
Transfer_User	Text	The user who created the batch
Transfer_Successful	Yes/No	Whether batch creation was successful(yes) or not(no)
Total_Number_of_Invoices	Integer	Total number of payments included in the batch
Total_Amount	Currency	Sum of all payments included in the batch
Cancelled	Yes/No	Whether batch was cancelled by user?
Cancelled_by	Text	The name of user who cancelled the batch
Cancelled_On	Date/Time	The date on which the batch was cancelled
FileName	Text	The temporary file name that contains all batch data i.e. payment records. This file is then ftp'ed to SAP and then subsequently deleted.
FileContents	Memo	The contents of the file.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.18. SAP_1_Record_Header

Table Name: SAP_1_Record_Header

Table Description: This table is zapped every time a new batch is created. At any given point, this table contains data related to one batch only. The table is used to arrange data as per specifications of the final output file for SAP.

This table contains a record per vendor per invoice.

Field name	Data Type	Field Description
Batch_Number	Text	VCS Batch Number that is being exported to SAP
Data_Transfer_Date	Date/Time	
Transfer_User	Text	
Transfer_Successful	Yes/No	
Total_Number_of_Invoices	Integer	
Total_Amount	Currency	
Cancelled	Yes/No	
Cancelled_by	Text	
Cancelled_On	Date/Time	
FileName	Text	

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.19. SAP_2_Vendor_Header

Table Name: SAP_2_Vendor_Header

Table Description: This table is zapped every time a new batch is created. At any given point, this table contains data related to one batch only. The table is used to arrange data as per specifications of the final output file for SAP.

This table also contains a record per vendor per invoice.

Field name	Data Type	Field Description
Vendor_Header_Id	Long Integer	Unique Id
Record_Header_Id	Long Integer	Record_Header_Id from table SAP_1_Record_Header
Record_Type	Text	Always 'V'
Vendor_Account_Number	Text	SAP Account number of vendor
Calculate_Tax	Text	Set to one space i.e. not applicable for VCS
Baseline_Date	Text	Vendor Invoice Date
Payment_Method	Text	'C' or cheque and 'E' for Electronic
House_Bank	Text	Set to '27 '
Amount_Of_Invoice	Text	Total amount as per vendor's invoice
Posting_Key	Text	Always set to '31'
Text_Field	Text	This field is set to combination of following: • System generated unique id per vendor + • Client's surname + • Prior Approval Number
Vendor_Name	Text	Name of the vendor
Batch_Number	Text	VCS Batch Number that is being exported to SAP

2.20. SAP_3_Vendor_Detail

Table Name: SAP_3_Vendor_Detail

Table Description: This table is zapped every time a new batch is created. At any given point, this table contains data related to one batch only. The table is used to arrange data as per specifications of the final output file for SAP.

This table is also called Vendor (invoice) Detail table.

This table also contains one or more records per vendor per invoice per VCS Prior Approval per VCS Prior Approval Detail:

- Vendor Invoice
  - Will contain one or more Prior Approvals
    - A Prior Approval will contain one or more Prior Approval Details
    - This table will contain one record per Prior Approval Detail record

Field name	Data Type	Field Description
Detail_Id	Long Integer	Unique Id
Vendor_Header_Id	Long Integer	Vendor_Header_Id from table SAP_2_Vendor_Header
Record_Header_Id	Long Integer	Record_Header_Id from table SAP_1_Record_Header
Prior_Approval_Number	Text	Prior Approval number of record being paid
Record_Type	Text	Always set to 'D'
DAO	Text	DAO code from SAP_Coding_Block table
CostCentre	Text	CostCentre code from SAP_Coding_Block table
GL_Account_Number	Text	General Ledger code from SAP_GL_Accounts depending upon provider type.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

Internal_Order	Text	Set to '30' + Client's 3 character band code
Program_Activity	Text	Program Activity code fetched from tblBenefitItem: tblPAHeader-> tblPADetail-> tblBenefitItem
Funds_Commitment_Number	Text	This field is not used
Funds_Commitment_Line_Number	Text	This field is not used
Final_Payment_Indicator	Text	This field is not used
Tax_Code	Text	Always set to 'I0' for VCS
Tax_Juridiction_Code	Text	Always set to 'CAON' for VCS
Amount	Text	Amount being paid on each PADetail record
Posting_Key	Text	Always set to '40' for VCS
Text_Field	Text	Set to combination of following: • VCS Batch Number • Unique id generated per vendor per invoice • Prior Approval Number • Client's surname • Benefit Item Description
Client_SurName	Text	Set to client's surname

2.21. SAP_To_Transfer

Table Name: SAP_To_Transfer		
Table Description: This table is not used		
Field name	Data Type	Field Description
SAP_Text	Text	

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.22. tblBand

Table Name: tblBand		
Table Description: Stores a list of bands		
Field name	Data Type	Field Description
BandNo	Text	Band Number
BandName	Text	Band Name
Region	Text	The region in which the band exists
Transferred_to_FN	Yes/No	Whether the band has been transferred to First Nations control
Transfer_Date	Date/Time	If yes, then transfer date
Transfer_Contact	Text	If yes, The name of contact person in the band office

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.23. tblBenifitItem

Table Name: tblBenifitItem		
Table Description: This table stores list of benefit items that VCS will approve for a Prior Approval Request. This table is also VCS's rate table.		
Field name	Data Type	Field Description
Region	Text	Region code of the region
Province	Text	Province code of the region
ProductType_Id	Integer	This is a higher level grouping of the Benefit Item. For example, all lenses will have a Product Type of "Lenses", Benefit Items like Cleaning Kit etc., would have a product type of "Accessories". This is the code value which is fetched from CT_ProductType table.
BenefitType_Id	Integer	There are five types of Benefits: • New Eye Wear, • Major Repair, • Minor Repair, • Eye Exams and • Eye Exam Reassessment This is another level of grouping that VCS uses to calculate the frequency. Therefore depending upon the Benefit Item, appropriate Benefit Type is stored in this field. Benefit Type Id is taken from CT_BenefitType table
ItemCode	Long Integer	Unique Id
BenefitDescription	Text	Description of the Benefit Item
OpticianAmount	Currency	The max amount that will be paid to an Optician for this Benefit Item.
OptometristAmount	Currency	The max amount that will be paid to an Optometrist for this Benefit Item.
OpthamologistAmount	Currency	The max amount that will be paid to an Ophthalmologist for this Benefit Item.
Approve_Reasons	Memo	If benefit is an exception, then reason for exception is saved in this field
Discontinued	Yes/No	If benefit has been discontinued
Discontinue_Reason	Text	Discontinued reason
Tolerance	Double	The recommended value for tolerance is 0.05 i.e. 5%. A tolerance of 5% denotes that the providers can bill for up to 105% of the allowable/set price. Default is 0, i.e. tolerance is 0%.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

Message_To_Provider	Text	If a message has to be displayed to the user/provider, then a message can be saved in this field. Example: For Benefit Item "Oversize Lens - BiFocal – Major", the message can be "*Measurement must be over 56mm. Record the measurement in the comment field.*"
Exception	Yes/No	Whether benefit item will be approved on exceptional basis only?
SAP_Activity_Code	Text	This is the SAP activity code. In order for Vision Care SAP Interface to work, every Benefit Item **must** have an SAP activity code.
SAP_GL_Account_Number	Text	This field is not used
LenseType_Id	Long Integer	All lens Benefit Items must have a lens type selected
Optometrist_Only	Yes/No	If a particular benefit item applies to optometrists only?
High_Index_Required	Yes/No	Whether Benefit Item has a pre-requisite of "High Index"
Medical_Justification_Required	Yes/No	Whether Medical Justification is required for the Benefit Item
Display_Order	Long Integer	This field controls the order in which the Benefit Items are displayed in the Prior Approval screen.
Group_Id	Integer	Default is 0. This field is used to group certain type of benefits. For example, all Lenses have a group id of 1. VCS can use this field to ensure that only one benefit item from a group can be selected in the Prior Approval Screen. If the Benefit Item is an independent, for example, "Coating - Anti Reflective", then the value can be set to 0.
Required_Ids	Text	This field ensures that the user cannot approve certain benefit items in the Prior Approval screen without selecting their dependent benefit items. For example, VCS will not let the user select "High Index Lens" unless the user has selected a Benefit Item of LENS. So the pre-requisites for "High Index Lens" are item codes "4,5,6,7,8,9,44,45". This value indicates that any one of these items must have been selected prior to the selection of "High Index Lens". If the Benefit Item does not depend on any other Benefit Item (for example: "Lens - Glass Bifocal"), then this field is set to 0.
LensType_Required	Yes/No	Whether Lens type is required for this Benefit Item
Prism_Required	Yes/No	Whether Prism is required for this benefit Item
AddPower_Required	Yes/No	Whether Add-Power is required for the Benefit Item.
Rate_Group_Id	Integer	Rate Group is used by the system to calculate optometrist's costs for Lenses. So, when entering a Benefit Item other than lenses, field is set to **None** for Rate Group or else an appropriate Rate Group is selected.
Prescription_Changed	Yes/No	Whether Prescription Change is required for the Benefit Item to be approved.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.24. tbl_BenifitItem_Id

Table Name: tbl_BenifitItem_Id		
Table Description: This table has one record and one field only. The field stores the next value for a new BenefitItem		
Field name	Data Type	Field Description
NextCounter	Long Integer	Stores the next value that is used as a unique id of a new BenefitItem record.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.25. tbl_BenifitItem_Modified

Table Name: tbl_BenifitItem_Modified		
Table Description: this table is not used		
Field name	Data Type	Field Description
Region	Text	
Province	Text	
ProductType_Id	Integer	
BenefitType_Id	Integer	
ItemCode	Long Integer	
BenefitDescription	Text	
OpticianAmount	Currency	
OptometristAmount	Currency	
OpthamologistAmount	Currency	
Approve_Reasons	Memo	
Discontinued	Yes/No	
Discontinue_Reason	Text	
Tolerance	Double	
Message_To_Provider	Text	
Exception	Yes/No	
SAP_Activity_Code	Text	
SAP_GL_Account_Number	Text	
LenseType_Id	Long Integer	
Optometrist_Only	Yes/No	
High_Index_Required	Yes/No	
Medical_Justification_Required	Yes/No	
Display_Order	Long Integer	
Group_Id	Integer	
Required_Ids	Text	
LensType_Required	Yes/No	

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

Prism_Required	Yes/No	
AddPower_Required	Yes/No	
Rate_Group_Id	Integer	
Prescription_Changed	Yes/No	

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.26. tblClient

Table Name: tblClient		
Table Description: This table stores all the first nation clients being serviced by VCS. Client record get automatically added/updated when a Prior Approval record is created.		
Field name	Data Type	Field Description
ClientKey	Text	SVS generated key
Client_Number	Text	9 or 10 digit DIAND
Medical_Condition_Id	Long Integer	Client's medical condition – if any
DateOfRecord	Date/Time	Date the record is created
Surname	Text	Client's surname
GivenNames	Text	Client's firstname
Alias	Text	Client's alias
DOB	Date/Time	Client's date of birth
BandNo	Text	Client's 3 digit band number
Family	Text	Client's 5 digit family number
Region	Text	Client's region
Gender	Text	Client's gender
Insurance_Company_Name	Text	Client's insurance company name – if they have any insurance
Insurance_Company_Address	Text	Client's insurance company address – if they have any insurance
ThirdPartyIns	Yes/No	Whether client has 3rd party insurance
Insurance_Company_Phone	Text	Client's insurance company phone – if they have any insurance
Insurance_Company_Amt_Covered	Long Integer	Client's insurance coverage amount – if they have any insurance
Insurance_Company_Per_Covered	Long Integer	Client's insurance coverage period – if they have any insurance
Special_Considerations	Memo	Special considerations that NIHB must be aware of as pertaining to a given client
Address1	Text	Client's address line 1

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

Address2	Text	Client's address line 2
City	Text	Client's city
Province	Text	Client's province
PostalCode	Text	Client's postal code
Delete_Record	Yes/No	Whether record is logically deleted
New_Client_Key	Text	Field not used
Record_Checked	Yes/No	Field not used
Eligibility	Text	Whether client is eligible in SVS
Transferred_to_FN	Yes/No	Field not used
Client_Number_9	Text	Client's 9 digit number
Client_SAPCode	Text	Client's SAP code – used in case of client reimbursements
ClientID	Long Integer	VCS generated unique id
Internal_Order	Text	Client's internal order number – '30' + 3 character band code

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.27. tblClientAlternateNumbers

Table Name: tblClientAlternateNumbers		
Table Description: This table stores all alternate numbers of a client. This table is a child table of tblClient. Every record in tblClient must have one or more records in this table		
Field name	Data Type	Field Description
ClientKey	Text	ClientKey from tblClient table
Client_Number	Text	Client Number

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.28. tbl_ClientKey_Id

Table Name: tbl_ClientKey_Id		
Table Description: This table has one record and one field only. The field stores the next value for a new ClientKey		
Field name	Data Type	Field Description
NextCounter	Long Integer	Stores the next value that is used as a unique id of a new Client record.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.29. tblMcIvor

Table Name: tblMcIvor		
Table Description: This table is used to store a list of all McIvor clients.		
Field name	Data Type	Field Description
ID	Long Integer	Unique Id
DIAND	Text	DIAND number of the client who is part of McIvor initiative
RegionID	Long Integer	Region of the client
ClientKey	Text	Client's ClientKey i.e. link to VCS's tblClient

2.30. tbl_PA_Id

Table Name: tbl_PA_Id		
Table Description: This table has one record and one field only. The field stores the next value for a new Prior Approval		
Field name	Data Type	Field Description
NextCounter	Long Integer	Stores the next value that is used as a unique id of a new Prior Approval record.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.31. tblPaAmendSummary

Table Name: tblPaAmendSummary		
Table Description: This table stores a log of all changes/actions made to a Prior Approval record		
Field name	Data Type	Field Description
Amend_Id	Long Integer	Unique Id
Amend_User_Id	Text	User making changes/actions to a PA record
AmendReason_Id	Long Integer	Reason for making the change/action
Prior_Approval_Number	Text	PA# of the PA to which the change/action was made
PriorApprovalStatus_Before	Long Integer	Status of PA before the change
PriorApprovalStatus_ChangedTo	Long Integer	Status of PA after the change
Amend_Date	Date/Time	Date of action
Comments	Text	Additional comments
Amended	Yes/No	Whether the Prior Approval was amended

2.32. tblPaAmendSummaryBackdoor

Table Name: tblPaAmendSummaryBackdoor		
Table Description: This tables stores log records of changes made to a PA through a special back door function in VCS. This function is only available to users with special privileges.		
Field name	Data Type	Field Description
Amend_Id	Long Integer	Unique Id
Amend_User_Id	Text	User making changes/actions to a PA record
AmendReason_Id	Long Integer	Reason for making the change/action
Prior_Approval_Number	Text	PA# of the PA to which the change/action was made
PriorApprovalStatus_Before	Long Integer	Status of PA before the change
PriorApprovalStatus_ChangedTo	Long Integer	Status of PA after the change
Amend_Date	Date/Time	Date of action
Comments	Memo	Additional comments
Amended	Yes/No	Whether the Prior Approval was amended

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.33. tblPADetail

Table Name: tblPADetail
Table Description: This table contains all the benefit item details contained in a Prior Approval record. This table is a child table of tblPAHeader. For every record in tblPAHeader there will at least one or more records in this table, otherwise the Prior Approval record will not be approved by VCS.

Field name	Data Type	Field Description
Prior_Approval_Number	Text	PA #
ItemCode	Long Integer	Benefit Item code, ex: Lens, Frames etc.
PADetail_Id	Long Integer	Unique Id
Comment	Text	Comments
Exception	Yes/No	Whether Benefit Item is an exception
ExceptionReason_Id	Long Integer	If exception, this field will store reason for exception
RequestedAmount	Currency	Amount requested by client/vendor
ApprovedAmount	Currency	Amount approved by VCS. Is less than or equal to the maximum amount stored in tblBenefitItem
PaidAmount	Currency	Total amount paid to the vendor, is less than or equal to the approved amount
ApprovedBySupervisor	Yes/No	For exceptional cases, this is a confirmation field that is selected by the supervisor
ApprovedBySupervisor_Date	Date/Time	For exceptional cases, this is the date on which the record was approved by supervisor.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.34. tblPAHeader

Table Name: tblPAHeader		
Table Description:		
Field name	Data Type	Field Description
Prior_Approval_Number	Text	System generated unique PA #
PARequestDate	Date/Time	Request date of PA
Last_Saved_User_Id	Text	Userid of user who last saved this record
DateOfService	Date/Time	Date on which provider provided services to the client
Provider_Number	Text	Provider number of the provider who provided services
Prescriber_Name	Text	Name of prescriber who wrote client's prescription
PAStatus_Id	Long Integer	Status of PA
VendorInvNumber	Text	Invoice number of vendor
Client_Number	Text	DIAND of client receiving services
ClientKey	Text	ClientKey of client receiving services
ProvOfResidence	Text	Province of service
RSphere	Single	Right eye sphere Rx
RCylinder	Single	Right eye cylinder Rx
Client_Reimbursement	Yes/No	Whether the PA is being entered as a client reimbursement
RAxis	Single	Right eye axis Rx
RPrism	Single	Right eye prism Rx
PA_Amended	Yes/No	Whether PA has been amended
Readers_Distance	Integer	Field not used
RPrismDirection	Text	Right eye Prism direction
RBase	Text	Right eye base Rx
RAdd	Single	Right eye add power Rx
LSphere	Single	Left eye sphere Rx
LCylinder	Single	Left eye cylinder Rx
LAxis	Single	Left eye axis Rx
LPrism	Single	Left eye prism Rx

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

LPrismDirection	Text	Left eye prism direction Rx
LBase	Text	Left eye base Rx
LAdd	Single	Left eye add power Rx
Current_Status_Date	Date/Time	Date on which current status was set
ClaimRcvdDate	Date/Time	Invoice receipt date
PACounter	Long Integer	VCS generated unique id
Comment	Memo	Internal comments
CommentsExternal	Memo	External comments
PVBatchNo	Text	Batch number in which this PA is included
PVDocID	Text	Payment voucher number – generated one per vendor per invoice
BenefitType_Id	Long Integer	Ex: Eye Exams, New Eye Wear etc.
Exception	Yes/No	Whether this PA is being set as an exception
ExceptionReason_Id	Long Integer	Exception Reason
InvoicePaidDate	Date/Time	Date on which this PA was paid
PaidAmount	Currency	Total Paid Amount
DM_Case_Number	Text	Field not used
RxDate	Date/Time	Date of Prescription
RefractiveIndexForHI	Double	Refractive Index for High Index lenses
ThirdPartyInsuranceName	Text	If client has third party insurance, then this field stores client's third party insurance company's name
ThirdPartyInsuranceAmount	Currency	If client has third party insurance, then this field stores client's third party insurance max coverage amount
SelectedForPaymentUserId	Text	The user who initiates payment of this PA
PaymentExportUserId	Text	User who exports this PA to SAP

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.35. tblProvider

Table Name: tblProvider		
Table Description: This tables stores VCS providers i.e. individuals or businesses that provide vision care services to first nation clients		
Field name	Data Type	Field Description
Provider_Number	Text	Provider provided or system generated unique number
ProviderType_Id	Integer	Type of provider, ex: optician, optometrist etc.
Contact_Name1	Text	Contact Name 1 of the provider
Contact_Name2	Text	Contact Name 2 of the provider
Bill_Name1	Text	Billing Name 1 of the provider
Bill_Name2	Text	Billing Name 1 of the provider
Contact_Address1	Text	Contact Address 1 of the provider
Contact_Address2	Text	Contact Address 2 of the provider
Bill_Address1	Text	Billing Address 1 of the provider
Bill_Address2	Text	Billing Address 2 of the provider
Contact_City	Text	Contact city
Bill_City	Text	Billing city
Contact_Province	Text	Contact Province
Bill_Province	Text	Billing Province
Contact_PostalCode	Text	Contact Postal Code
Bill_PostalCode	Text	Billing Postal Code
Contact_PhoneNo	Text	Contact Phone Number
Bill_PhoneNo	Text	Billing Phone Number
Contact_Extension	Text	Contact Extension number
Bill_Extension	Text	Billing phone Extension number
Contact_FaxNo	Text	Contact Fax number
Bill_FaxNo	Text	Billing Fax number
Comments	Memo	Comments
CodeCounter	Long Integer	VCS generated unique id

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

DFSCode	Text	Field is not used
SAPCode	Text	Every VCS provider is registered in SAP for payment purposes. This field stores the vendor id that SAP generates.
RegistrationNumber	Text	Field used to store vendor's email address
ExpiryDate	Date/Time	Expiration date of vendor record
PrescriberOnlyIND	Yes/No	Whether Provider is only a prescriber i.e. does not actually provide services
PaymentMethodCode	Text	C for cheque and E for Electronique

2.36. tblProvider_ID

Table Name: tblProvider_ID		
Table Description: This table has one record and one field only. The field stores the next value for a new Provider record		
Field name	Data Type	Field Description
NextCounter	Long Integer	Stores the next value that is used as a unique id of a new Provider record.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.37. tblProvince

Table Name: tblProvince		
Table Description: This is the province table of VCS		
Field name	Data Type	Field Description
ProvCode	Text	Province code, ex: 01, 02…
Province	Text	Province name
EyeExamsDeregulated	Yes/No	Whether Eye Exams are deregulated in this province
Region_Number	Long Integer	Region of the province
Region_Name	Text	Region Name
ProvCodeName	Text	Province code, ex: ON, BC etc.

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

2.38. tblSystemVariables

Table Name: tblSystemVariables		
Table Description: This table stores system options		
Field name	Data Type	Field Description
FieldName	Text	The name of the variable, ex: HighIndexDiopterValue
FieldValue	Text	Value of the variable, ex: 6
Description	Text	Brief description of the variable

3. 3 Query Description

3.1. 3.1 qry_Confirmation_Letter_Details

4. Query Name:	qry_Confirmation_Letter_Details
Query Description:	
Query Statement :	PARAMETERS parmPA Text (255); INSERT INTO rpt_Confirmation_Letter_Details (BenefitDescription, High_Index_Required) SELECT tblPADetail.*, tblBenefitItem.BenefitDescription, tblBenefitItem.High_Index_Required FROM tblBenefitItem INNER JOIN tblPADetail ON tblBenefitItem.ItemCode = tblPADetail.ItemCode WHERE (((tblPADetail.Prior_Approval_Number)=[parmPA])) ORDER BY tblPADetail.PADetail_Id;

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

4.1. 3.2 qry_Confirmation_Letter_Header

Query Name:	qry_Confirmation_Letter_Header
Query Description:	
Query Statement :	PARAMETERS parmPA Text (255); INSERT INTO rpt_Confirmation_Letter_Header (Contact_Name1, Contact_Name2, Bill_Name1, Bill_Name2, Contact_Address1, Contact_Address2, Bill_Address1, Bill_Address2, Contact_City, Bill_City, Contact_Province, Bill_Province, Contact_PostalCode, Bill_PostalCode, Contact_PhoneNo, Bill_PhoneNo, Contact_Extension, Bill_Extension, Contact_FaxNo, Bill_FaxNo, Comments, CodeCounter, SAPCode, Surname, GivenNames, Alias, DOB, BandNo, Region, Family, Gender, Address1, Address2, City, Province, PostalCode, BenefitType) SELECT tblPAHeader.*, tblProvider.Contact_Name1, tblProvider.Contact_Name2, tblProvider.Bill_Name1, tblProvider.Bill_Name2, tblProvider.Contact_Address1, tblProvider.Contact_Address2, tblProvider.Bill_Address1, tblProvider.Bill_Address2, tblProvider.Contact_City, tblProvider.Bill_City, tblProvider.Contact_Province, tblProvider.Bill_Province, tblProvider.Contact_PostalCode, tblProvider.Bill_PostalCode, tblProvider.Contact_PhoneNo, tblProvider.Bill_PhoneNo, tblProvider.Contact_Extension, tblProvider.Bill_Extension, tblProvider.Contact_FaxNo, tblProvider.Bill_FaxNo, tblProvider.Comments, tblProvider.CodeCounter, tblProvider.SAPCode, tblClient.Surname, tblClient.GivenNames, tblClient.Alias, tblClient.DOB, tblClient.BandNo, tblClient.Region, tblClient.Family, tblClient.Gender, tblClient.Address1, tblClient.Address2, tblClient.City, tblClient.Province, tblClient.PostalCode, CT_BenefitType.BenefitType_Description FROM tblProvider INNER JOIN (tblClient INNER JOIN (tblPAHeader INNER JOIN CT_BenefitType ON tblPAHeader.BenefitType_Id = CT_BenefitType.BenefitType_Id) ON tblClient.ClientKey = tblPAHeader.ClientKey) ON tblProvider.Provider_Number = tblPAHeader.Provider_Number WHERE (((tblPAHeader.Prior_Approval_Number)=[parmPA]));

4.2. 3.3 qry_SAP_AddAmendReason

5. Query Name:	qry_SAP_AddAmendReason
Query Description:	
Query Statement :	PARAMETERS parmPA Text (255); INSERT INTO rpt_Confirmation_Letter_Details (BenefitDescription, High_Index_Required) SELECT tblPADetail.*, tblBenefitItem.BenefitDescription, tblBenefitItem.High_Index_Required FROM tblBenefitItem INNER JOIN tblPADetail ON tblBenefitItem.ItemCode = tblPADetail.ItemCode WHERE (((tblPADetail.Prior_Approval_Number)=[parmPA])) ORDER BY tblPADetail.PADetail_Id;

5.1. 3.4 qry_SAP_PrintCoverPages

Query name:	qry_SAP_PrintCoverPages
Query Description:	
Query Statement:	PARAMETERS parmBatchNumber Text (255); INSERT INTO rpt_CoverPages (PVBatchNo, Provider_Number, ClientKey, Prior_Approval_Number, PARequestDate, Last_Saved_User_Id, DateOfService, Prescriber_Name, PAStatus_Id, VendorInvNumber, Client_Number, ProvOfResidence, RSphere, RCylinder, Client_Reimbursement, RAxis, RPrism, PA_Amended, Readers_Distance, RPrismDirection, RBase, RAdd, LSphere, LCylinder, LAxis, LPrism, LPrismDirection, LBase, LAdd, Current_Status_Date, ClaimRcvdDate, PACounter, PVDocID, BenefitType_Id, [Exception], ExceptionReason_Id, InvoicePaidDate, PaidAmount, DM_Case_Number, Pr_Name, Pr_Address, Contact_City, Contact_Province, Contact_PostalCode, Contact_PhoneNo, Contact_FaxNo, SAPCode, Surname, GivenNames, Alias, DOB) SELECT tblPAHeader.PVBatchNo, tblPAHeader.Provider_Number, tblPAHeader.ClientKey, tblPAHeader.Prior_Approval_Number, tblPAHeader.PARequestDate, tblPAHeader.Last_Saved_User_Id, tblPAHeader.DateOfService, tblPAHeader.Prescriber_Name, tblPAHeader.PAStatus_Id, tblPAHeader.VendorInvNumber, tblPAHeader.Client_Number, tblPAHeader.ProvOfResidence, tblPAHeader.RSphere, tblPAHeader.RCylinder, tblPAHeader.Client_Reimbursement, tblPAHeader.RAxis, tblPAHeader.RPrism, tblPAHeader.PA_Amended, tblPAHeader.Readers_Distance, tblPAHeader.RPrismDirection, tblPAHeader.RBase, tblPAHeader.RAdd, tblPAHeader.LSphere, tblPAHeader.LCylinder, tblPAHeader.LAxis, tblPAHeader.LPrism, tblPAHeader.LPrismDirection, tblPAHeader.LBase, tblPAHeader.LAdd, tblPAHeader.Current_Status_Date, tblPAHeader.ClaimRcvdDate, tblPAHeader.PACounter, tblPAHeader.PVDocID, tblPAHeader.BenefitType_Id, tblPAHeader.Exception, tblPAHeader.ExceptionReason_Id, tblPAHeader.InvoicePaidDate, tblPAHeader.PaidAmount, tblPAHeader.DM_Case_Number, [tblProvider]![Contact_Name1] & " " & [tblProvider]![Contact_Name2] AS Pr_Name, [tblProvider]![Contact_Address1] & " " & [tblProvider]![Contact_Address2] AS Pr_Address, tblProvider.Contact_City, tblProvider.Contact_Province, tblProvider.Contact_PostalCode, tblProvider.Contact_PhoneNo, tblProvider.Contact_FaxNo, tblProvider.SAPCode, tblClient.Surname, tblClient.GivenNames, tblClient.Alias,

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

	tblClient.DOB FROM tblPAHeader, tblProvider, tblClient WHERE (((tblPAHeader.PVBatchNo)=[parmBatchNumber]) AND ((tblPAHeader.Provider_Number)=[tblProvider].[Provider_Number]) AND ((tblPAHeader.ClientKey)=[tblClient].[ClientKey]));

5.2. 3.5 qry_Send_PADetails_To_Wrk

Query Name	qry_Send_PADetails_To_Wrk
Query Description:	
Query Statement :	PARAMETERS parmPA Text (255); INSERT INTO tblPADetail_Wrk SELECT tblPADetail.* FROM tblPADetail WHERE (((tblPADetail.Prior_Approval_Number)=[parmPA]));

5.3. 3.6 Transfer_AppendAlternateNumber

Query Name:	Transfer_AppendAlternateNumber
Query Description :	
Query Statement :	INSERT INTO tblClientAlternateNumbers (ClientKey, Client_Number) SELECT [parmClientKey] AS Expr1, [parmClientNumber] AS Expr2;

Appendix Z. NIHB – Alberta Vision Care Database Architecture *(continued)*

5.4. 3.7 Transfer_AppendClient

Query Name:	Transfer_AppendClient
Query Description :	
Query Statement :	PARAMETERS parmClientKey Text (255); INSERT INTO tblClient (ClientKey, Client_Number, DateOfRecord, Surname, GivenNames, Alias, DOB, BandNo, Family, Region, Gender, Address1, ThirdPartyIns) SELECT tblClient1.ClientKey AS Expr1, tblClient1.[Client#] AS Expr2, tblClient1.DateOfRecord AS Expr3, tblClient1.Surname AS Expr4, tblClient1.GivenNames AS Expr5, tblClient1.Alias AS Expr6, tblClient1.DOB AS Expr7, Left([tblClient1]![Client#],3) AS Expr1, tblClient1.Family AS Expr8, tblClient1.Region AS Expr9, tblClient1.Sex AS Expr10, tblClient1.Address AS Expr11, tblClient1.ThirdPartyIns AS Expr12 FROM tblClient1 WHERE ((([tblClient1].[ClientKey])=[parmClientKey]));

5.5. 3.8 Transfer_AppendPADetails

Query Name:	Transfer_AppendPADetails
Query Description :	
Query Statement :	PARAMETERS parmPA Text (255); INSERT INTO tblPADetail (Prior_Approval_Number, ItemCode, Comment, RequestedAmount, ApprovedAmount, PaidAmount) SELECT tblPADetail1.[PA#] AS Expr1, tblPADetail1.ItemCode AS Expr2, tblPADetail1.Comment AS Expr3, tblPADetail1.RequestedAmount AS Expr4, tblPADetail1.ApprovedAmount AS Expr5, tblPADetail1.PaidAmount AS Expr6 FROM tblPADetail1 WHERE ((([tblPADetail1].[PA#])=[parmPA]));

5.6. 3.9 Transfer_AppendProvider

Query Name:	Transfer_AppendProvider
Query Description :

Appendix BB1. CBRT – Data Dictionary CBRT Overview

Source: Unmodified information from ISC staff

Purpose of the Community-Based Reporting Template (CBRT)
First implemented in fiscal year 2008-2009, the Community-Based Reporting Template (CBRT) is a national reporting template that collects information on program areas that some First Nations communities are required to report on annually as part of their Contribution Agreement with the First Nations and Inuit Health Branch (FNIHB). The information collected via the CBRT is one element of many that FNIHB uses to support relevant program planning and evaluation.

Program areas
The program areas covered by the CBRT from 2013-2014 through 2015-16 include:
- Healthy Child Development
- Mental Wellness
- Healthy Living
- Communicable Disease Control & Management (CDCM)
- Primary Care (Home & Community Care and Clinical & Client Care)
- Environmental Public Health.

From 2015-2016 to 2017-18, the questions on Environmental Public Health were no longer included in the CBRT.

Content
The CBRT collects four types of information relevant to FNIHB programs, including:
- What programs and services communities deliver
- How communities implement certain programs
- How community health systems operate
- Select health status and health outcome data related to clients accessing FNIHB programs or services.

Data Limitations
The data collected via the CBRT have several limitations, and any results obtained through analyses of these data should be interpreted with caution. Limitations include:
- The CBRT data represents only those communities that submitted the CBRT as required by their Contribution agreement, and is therefore not representative of all First Nations communities.
- Communities may have provided conflicting or incorrect information in error.
- There is a risk that the CBRT questions may have been interpreted differently from community to community, or that communities tracked the data reported in the CBRT in different ways.
- Not all communities that submitted a CBRT provided responses for every program area or question, and therefore not all variables have sufficient data for meaningful analysis. Variables must meet the following criteria to be eligible for FNIHB analysis purposes:
  1. The question that the variable is associated with has a sufficient response rate (i.e., at least 40% of communities that reported delivering the program responded to the question).
  2. Issues of reliability are not identified for the question responses associated with the variable (e.g., there were no obvious mathematical irregularities, the results did not rely on unverifiable counts or denominators, there were no obvious factual errors identified in the responses.)
- The CBRT datasets do not include the variables and associated data for the "Worker Information" & "CDCM Worker Information" sections of the CBRT.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15

Source: Unmodified information from ISC staff

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
A	REGION	ALB ATL BC MB ON QC SK	Region that the community is located in.
B	FiscYear	yy-yy	The fiscal year during which the data was collected. E.g., '13-14' indicates the fiscal year 2013-2014.
C	Agrnum	Text-Numeric	The contribution agreement number for the community.
D	BLFLTR	Block (Flexible or Flexible Transfer) CFNA Flexible Flexible (Transitional) Set	The highest type of funding model in the contribution agreement.
E	MultiCom	0=No 1=Yes	The services delivered in the Agreement were for multiple communities.
F	NumCom	Numeric	The number of communities that services were delivered to. Asked only of those communities that reported delivering services to multiple communities.
G	ComName	Text	The name of the community.
H	ReciNam	Text	The organization / recipient name(s) linked to the agreement number.
I	HFName	Text	The name of the Health Facility Name linked to the agreement number.
J	StarDate	YYYY-MM-DD	The starting date of the fiscal year.
K	EndDate	YYYY-MM-DD	The end date of the fiscal year.
L	Submby	Text	The name of the person who submitted the completed CBRT template.
M	SubmPosition	Text	The position of the person who submitted the completed CBRT template.
N	SubmDat	YYYY-MM-DD	The date when the completed CBRT template was submitted.
O	Authby	Text	The name of the person who authorized the completed CBRT template.
P	AuthPosition	Text	The position of the person who authorized the completed CBRT template.
Q	AuthDat	YYYY-MM-DD	The date of authorization of the completed CBRT Template.
R	Hpreg	0=No 1=Yes	Healthy Pregnancy and Early Infancy programs and services were provided in the community as part of the Healthy Child Development initiatives during the reporting year.
S	EarChDev	0=No 1=Yes	Early Childhood Development programs and services were provided in the community as part of the Healthy Child Development initiatives during the reporting year.
T	OralH	0=No 1=Yes	Oral Health programs and services were provided in the community as part of the Healthy Child Development initiatives during the reporting year.
U	MHeSuiPr	0=No 1=Yes	Mental Health and Suicide Prevention programs and services were provided in the community as part of the Mental Wellness initiatives during the reporting year.
V	SubAbuPr	0=No 1=Yes	Substance Abuse Prevention programs and services were provided in the community as part of the Mental Wellness initiatives during the reporting year.
W	ChrDisPr	0=No 1=Yes	Chronic Disease Prevention and Management programs and services were provided in the community as part of the Healthy Living initiatives during the reporting year.
X	InjPrev	0=No 1=Yes	Injury Prevention programs and services were provided in the community as part of the Healthy Living initiatives during the reporting year.
Y	Immuni	0=No 1=Yes	Vaccine-preventable Diseases and Immunization programs and services were provided in the community as part of the Communicable Disease Control and Management initiatives during the reporting year.
Z	BlBoDis	0=No 1=Yes	Blood-Borne Disease and Sexually Transmitted Infections programs and services were provided in the community as part of the Communicable Disease Control and Management intitiatives during the reporting year.
AA	RespInf	0=No 1=Yes	Respiratory Infections programs and services were provided in the community as part of the Communicable Disease Control and Management initiatives during the reporting year.
AB	ComDisEm	0=No 1=Yes	Communicable Disease Emergencies programs and services were provided in the Communicable Disease Control and Management initiatives during the reporting year.
AC	HomComCar	0=No 1=Yes	Home and Community Care programs and services were provided in the community during the reporting year.
AD	ClinClCar	0=No 1=Yes	Clinical and Client Care services* were provided in the community during the reporting year. *Clinical and Client Care services are defined as a nursing station or Health Centre with Treatment providing clinical and treatment services 24 hours a day either 5 or 7 days per week.
AE	CCCServ	0=No 1=Yes	Clinical and Client Care services provided in the community during the reporting year were provided by Health Canada. Asked only of those communites that reported having Clinical and Client Care services.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
AF	EnvPubHea	0=No 1=Yes	Environmental Public Health programs and services were provided in the community during the reporting year.
AG	FTHealthManager	Numeric	The number of Full-Time Health Managers in the community at the end of the reporting year.
AH	FTBENP	Numeric	The number of Full-Time Band employed nurse practitioners in the community at the end of the reporting year.
AI	FTBDRN	Numeric	The number of Full-Time Band employed registered nurses in the community at the end of the reporting year.

AK	FTHCENP	Numeric	The number of Full-Time Health Canada employed nurse practitioners in the community at the end of the reporting year.
AL	FTHCERN	Numeric	The number of Full-Time Health Canada employed registered nurses in the community at the end of the reporting year.
AM	FTHCELPN	Numeric	The number of Full-Time Health Canada employed licensed practical nurses in the community at the end of the reporting year.
AN	FTCBPOtherLicenced	Numeric	The number of Full-Time Other licensed or regulated Health Care Professionals in the community at the end of the reporting year.
AO	FTCBNNADAP	Numeric	The number of Full-Time Community-based health workers (e.g., CHR, NNADAP, ADI, AHSOR, CPNP, MCH Home Visitors, FASD Community Coordinators and Mentors, HCC Personal Care Workers, Youth Worker, Mental Health Worker) in the community at the end of the reporting year.
AP	FTCBAdmJanit	Numeric	The number of Full-Time Administrative, janitorial and housekeeping staff working in health facilities and for health programs in the community at the end of the reporting year.
AQ	FTTOTAL	Numeric	The total number of Full-Time health care workers in the community at the end of the reporting year.
AR	PTHealthManager	Numeric	The number of Part Time Health Managers in the community at the end of the reporting year.
AS	PTBENP	Numeric	The number of Part-Time and visiting Band employed nurse practitioners in the community at the end of the reporting year.
AT	PTBDRN	Numeric	The number of Part-Time and visiting Band employed registered nurses in the community at the end of the reporting year.
AU	PTBDLPN	Numeric	The number of Part-Time and visiting Band employed licensed practical nurses in the community at the end of the reporting year.
AV	PTHCENP	Numeric	The number of Part-Time and visiting Health Canada employed nurse practitioners in the community at the end of the reporting year.
AW	PTHCERN	Numeric	The number of Part-Time and visiting Health Canada employed registered nurses in the community at the end of the reporting year.
AX	PTHCELPN	Numeric	The number of Part-Time and visiting Health Canada employed licensed practical nurses in the community at the end of the reporting year.
AY	PTCBPOtherLicenced	Numeric	The number of Part-Time and visiting Other licensed or regulated Health Care Professionals in the community at the end of the reporting year.
AZ	PTCBNNADAP	Numeric	The number of Part-Time and visiting Community-based health workers (e.g., CHR, NNADAP, ADI, AHSOR, CPNP, MCH Home Visitors, FASD Community Coordinators and Mentors, HCC Personal Care Workers, Youth Worker, Mental Health Worker) in the community at the end of the reporting year.
BA	PTCBAdmJanit	Numeric	The number of Part-Time and visiting Administrative, janitorial and housekeeping staff working in health facilities and for health programs in the community at the end of the reporting year.
BB	PTTOTAL	Numeric	The total number of Part-Time and visiting health care workers in the community at the end of the reporting year.
BC	TWHealthManager	Numeric	The total number of Health Managers in the community at the end of the reporting year.
BD	TWBENP	Numeric	The total number of Band employed nurse practitioners in the community at the end of the reporting year.
BE	TWBERN	Numeric	The total number of Band employed registered nurses in the community at the end of the reporting year.
BF	TWBELPN	Numeric	The total number of Band employed licensed practical nurses in the community at the end of the reporting year.
BG	TWHCENP	Numeric	The total number of Health Canada employed nurse practitioners in the community at the end of the reporting year.
BH	TWHCRN	Numeric	The total number of Health Canada employed registered nurses in the community at the end of the reporting year.
BI	TWHCLPN	Numeric	The total number of Health Canada employed licensed practical nurses in the community at the end of the reporting year.
BJ	TWCBOtherLicensed	Numeric	The total number of Other licensed or regulated Health Care Professionals in the community at the end of the reporting year.
BK	TWCBNNADAP	Numeric	The total number of Community-based health workers (e.g., CHR, NNADAP, ADI, AHSOR, CPNP, MCH Home Visitors, FASD Community Coordinators and Mentors, HCC Personal Care Workers, Youth Worker, Mental Health Worker) in the community at the end of the reporting year.
BL	TWCBAdm	Numeric	The total number of Administrative, janitorial and housekeeping staff working in health facilities and for health programs in the community at the end of the reporting year.
BM	TWTOTAL	Numeric	The total number of health care workers in the community at the end of the reporting year.
BN	ArrangementMOH	0=No 1=Yes	The community had an arrangement with a medical officer of health or medical health officer to provide public health services to the community.
BO	ProvinceOrRegional	0=No 1=Yes	A medical officer of health or medical health officer that worked for the Province or Regional Health Authority/local health unit provided public health services to the community. Asked only of those communities that reported having an arrangment with a medical officer of health or medical health officer for provision of public health services.
BP	FNIH	0=No 1=Yes	A medical officer of health or medical health officer that worked for the First Nation and Inuit Health Branch provided public health services to the community. Asked only of those communities that reported having an arrangment with a medical officer of health or medical health officer for provision of public health services.
BQ	TribalAuthorityOrFNBand	0=No 1=Yes	A medical officer of health or medical health officer that worked for the Tribal Authority or First Nation Band provided public health services to the community. Asked only of those communities that reported having an arrangment with a medical officer of health or medical health officer for provision of public health services.

The variables and associated data for"Worker Information" are not included in this dataset.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
BZ	Q2NutDiet	0=No 1=Yes	Nutrition or dietary screening activities and services were provided as part of the Pre and Postnatal Nutrition activities in the community.
CA	Q2OneNutEdu	0=No 1=Yes	One-on-one nutrition counselling/education services were provided as part of the Pre and Postnatal Nutrition activities in the community.
CB	Q2GrNutEdu	0=No 1=Yes	Group nutrition counselling/education services were provided as part of the Pre and Postnatal Nutrition activities in the community.
CC	Q2BabyFoo	0=No 1=Yes	Baby food making workshops/classes were provided as part of the Pre and Postnatal Nutrition activities in the community.
CD	Q2GrocSto	0=No 1=Yes	Grocery store tours were provided as part of the Pre and Postnatal Nutrition activities in the community.
CE	Q2FooVou	0=No 1=Yes	Food vouchers were distributed as part of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.
CF	Q2CommKit	0=No 1=Yes	Community kitchens/community cooking classes were provided as part of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.
CG	Q2FooBoxGr	0=No 1=Yes	Food boxes or groceries were distributed as part of of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.
CH	Q2CommGar	0=No 1=Yes	Community gardens were part of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.
CI	Q2TradFoo	0=No 1=Yes	Traditional food gathering/distribution/preparation activities were provided as part of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.
CJ	Q2EducWork	0=No 1=Yes	Breastfeeding education workshops were delivered as part of the Pre and Postnatal Nutrition activities in the community.
CK	Q2OneBrSup	0=No 1=Yes	One-on-one breastfeeding support was provided as part of the Pre and Postnatal Nutrition activities in the community.
CL	Q2GrBrSup	0=No 1=Yes	Group breastfeeding support was provided as part of the Pre and Postnatal Nutrition activities in the community.
CM	Q2PeerSup	0=No 1=Yes	Breastfeeding peer support programs were provided as part of the Pre and Postnatal Nutrition activities in the community.
CN	Q2SuppEle	0=No 1=Yes	Supportive Elements that address specific needs of at-risk clients (i.e., transportation, child care, etc.) were delivered in the community as part of the Pre and Postnatal Nutrition activities.
CO	Q3FirstTrim	Numeric	The number of pregnant women served by pre and postnatal nutrition programming in the community during the reporting year who first received these services in their 1st trimester (0-12 weeks).
CP	Q3SecondTrim	Numeric	The number of pregnant women served by pre and postnatal nutrition programming in the community during the reporting year who first received these services in their 2nd trimester (13-26 weeks).
CQ	Q3ThirdTrim	Numeric	The number of pregnant women served by pre and postnatal nutrition programming in the community during the reporting year who first received these services in their 3rd trimester (27-40 weeks)
CR	Q3AfterBirth	Numeric	The number of pregnant women served by pre and postnatal nutrition programming in the community during the reporting year who first received these services after they had given birth (with an infant or infants 0-12 months of age).
CS	Q4NumbPartMoth	Numeric	The total number of participating mothers enrolled in healthy pregnancy programs with babies who turned six months during the reporting year.
CT	Q4BrFedLTTwoATLANTIC	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for at least 2 months. This data applies to the Atlantic region only as communities in this region use a different format for reporting of breastfeeding initiation and duration.
CU	QB4BrFedLTFourATLANTIC	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for at least 4 months. This data applies to the Atlantic region only as communities in this region use a different format for reporting of breastfeeding initiation and duration.
CV	Q4MothersWhoInitiatedBreastfeedingATLANTIC	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who initiated breast feeding. This data applies to the Atlantic region only as communities in this region use a different format for reporting of breastfeeding initiation and duration.
CW	Q4BrFedLThree	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for less than 3 months (less than 15 weeks).
CX	Q4BrFedLTThree	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for longer than 3 months and less than 6 months (15 weeks to 23 weeks).
CY	Q4BrFedSixMo	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for 6 months (24 weeks to 27 weeks).
CZ	Q4BrFedLTSixMo	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for longer than 6 months (28 weeks or more).
DA	Q4DidNotBrFeed	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older who did not initiate breastfeeding.
DB	Q4Unknown	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older for whom it was unknown if breastfeeding was initiated.
DC	Q5TotPregConc	Numeric	The total number of participants in healthy pregnancy programs whose pregnancies concluded during the reporting year.
DD	Q5MatAgeLTTwenty	Numeric	The number of women with a maternal age less than 20 years among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
DE	Q5MatAgeGEThirtyFiv	Numeric	The number of women with a maternal age of 35 years or older among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
DF	Q5SmokDurPreg	Numeric	The number of women that smoked during pregnancy among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
DG	Q5DrugSolvDuringPre	Numeric	The number of women that used drugs or solvents during pregnancy among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
DH	Q5AlcoholDuringPreg	Numeric	The number of women that consumed alcohol during pregnancy among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
DI	Q5DiabetesPriortoPreg	Numeric	The number of women diagnosed with diabetes before pregnancy among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
DJ	Q5DiabetesDuringPreg	Numeric	The number of women diagnosed with diabetes during pregnancy (gestational diabetes) among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
DK	Q5PrevPostPartumMoodDis	Numeric	The number of women with a previous diagnosis of post-partum mood disorders among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
DL	Q6TotNumbBabyBorn	Numeric	The total number of babies born to mothers who lived in the community during the reporting year.
DM	Q7FTLTTwentyFiveHundredGr	Numeric	The number of full term babies weighing less than 5 lb 9 oz (less than 2500 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DN	Q7FTBETTwentyFiveHundredGrandFourThousandGr	Numeric	The number of full term babies weighing between 5 lb 9 oz and 8 lb 11 oz (2500 g - 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DO	Q7FTGTFourThousandGr	Numeric	The number of full term babies weighing more than 8 lb 11 oz (more than 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DP	Q7FTWeightUnknown	Numeric	The number of full term babies with birth weight unknown born to women enrolled in healthy pregnancy programs during the reporting year.
DQ	Q7PTLTTwentyFiveHundredGr	Numeric	The number of pre-term babies weighing less than 5 lb 9 oz (less than 2500 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DR	Q7PTBETTwentyFiveHundredGrandFourThousandGr	Numeric	The number of pre-term babies weighing between 5 lb 9 oz and 8 lb 11 oz (2500 g - 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DS	Q7PTGTFourThousandGr	Numeric	The number of pre-term babies weighing more than 8 lb 11 oz (more than 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DT	Q7PTWeightUnknown	Numeric	The number of pre-term babies with birth weight unknown born to women enrolled in healthy pregnancy programs during the reporting year.
DU	Q7UTLTTwentyFiveHundredGr	Numeric	The number of unknown term babies weighing less than 5 lb 9 oz (less than 2500 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DV	Q7UTBETTwentyFiveHundredGrandFourThousandGr	Numeric	The number of unknown term babies weighing between 5 lb 9 oz and 8 lb 11 oz (2500 g - 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DW	Q7UTGTFourThousandGr	Numeric	The number of unknown term babies weighing more than 8 lb 11 oz (more than 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DX	Q7UTWeightUnknown	Numeric	The number of unknown term babies with birth weight unknown born to women enrolled in healthy pregnancy programs during the reporting year.
DY	Q8InitBefSixMonths	Numeric	The number of infants who turned 6 months during the reporting year and had solid foods initiated before 6 months
DZ	Q8InitAtSixMonths	Numeric	The number of infants who turned 6 months during the reporting year and had solid foods initiated at 6 months
EA	Q8InitAfterSixMonths	Numeric	The number of infants who turned 6 months during the reporting year and had solid foods initiated after 6 months.
EB	Q8InitUnknown	Numeric	The number of infants who turned 6 months during the reporting year and for whom the time of initiation to solid foods was unknown.
EC	Q9RiskFactPregWom	0=No 1=Yes	Screening and assessments for risk factors in pregnant women and new mothers (e.g., post partum depression, chronic conditions such as Type 2 diabetes, gestational diabetes, and tobacco/alcohol/drug/solvent use) were delivered as part of the Maternal and Child Health Screening and Assessment initiatives during the reporting year.
ED	Q9RiskFactDevelopMilestones	0=No 1=Yes	Screening and assessments for risk factors for developmental milestones for infants and children were delivered as part of the Maternal and Child Health Screening and Assessment initiatives during the reporting year.
EE	Q9VisionHearDental	0=No 1=Yes	Vision/hearing/dental screenings or assessments for referrals were delivered as part of the Maternal and Child Health Screening and Assessment initiatives during the reporting year.
EF	Q10TotaReceivHomeVisits	Numeric	The total number of participants who received home visits as part of the maternal and child health home visiting and case management programming provided by the community during the reporting year. Participant is defined as the primary contact for services.
EG	Q10TotalReceivCaseManagement	Numeric	The total number of participants who received case management services as part of the maternal and child health home visiting and case management programming provided by the community during the reporting year. Participant is defined as the primary contact for services.
EH	Q11FirstTrimester	Numeric	The number of pregnant women who received home visits through maternal and child health programming provided by the community during the reporting year and who received their first home visit in their 1st trimester.
EI	Q11SecondTrimester	Numeric	The number of pregnant women who received home visits through maternal and child health programming provided by the community during the reporting year and who received their first home visit in their 2nd trimester.
EJ	Q11ThirdTrimester	Numeric	The number of pregnant women who received home visits through maternal and child health programming provided by the community during the reporting year and who received their first home visit in their 3rd trimester.
EK	Q11Postnatal	Numeric	The number of women who received home visits through maternal and child health programming provided by the community during the reporting year and who received their first home visit within 6 months of giving birth (postnatal).
EL	Q12CommuCapaBuildAct	0=No 1=Yes	Fetal Alcohol Spectrum Disorder community capacity building activities (i.e. awareness and prevention activities, and development of action plans) were delivered by the community during the reporting year.
EM	Q12CommuCoordinaCaseManag	0=No 1=Yes	Fetal Alcohol Spectrum Disorder community coordination or case management services were delivered by the community during the reporting year.
EN	Q12Mentoring	0=No 1=Yes	Fetal Alcohol Spectrum Disorder mentoring services were delivered by the community during the reporting year.
EO	Q12NumCommunityCoordinationCaseMgmnt	Numeric	The number of participants that received Fetal Alcohol Spectrum Disorder community coordination services or case management services during the reporting year.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.

Column #	Data Field	Response options	Description
EP	Q12NumMentoring	Numeric	The number of participants that received Fetal Alcohol Spectrum Disorder mentoring services during the reporting year.
EQ	Q13aNumberCommunitiesServed	Numeric	The number of communities served by the Aboriginal Head Start On Reserve program delivered by the community.
ER	Q13bProgramOfferOutreachHomeVisit	0=No 1=Yes	The Aboriginal Head Start On Reserve program delieved by the community offers outreach/home visiting.
ES	Q13cAHSORsiteCentreBased	0=No 1=Yes	The Aboriginal Head Start On Reserve program site in the community is centre-based.
ET	Q13dAHSORProgramLicensed	0=No 1=Yes	The Aboriginal Head Start On Reserve (AHSOR) program in the community is licensed. Only asked of those communities that reported that their AHSOR site was centre-based.
EU	Q13eNumberFullDaysWeek	Numeric	The number of full days per week that the centre-based Aboriginal Head Start On Reserve (AHSOR) program in the community operates. Only asked of those communities that reported that their AHSOR site was centre-based.
EV	Q13eNumberHalfDaysWeek	Numeric	The number of half days per week that the centre-based Aboriginal Head Start On Reserve (AHSOR) program in the community operates. Only asked of those communities that reported that their AHSOR site was centre-based.
EW	Q13fAHSORProgramCoLocated	0=No 1=Yes	The Aboriginal Head Start On Reserve (AHSOR) program in the community is co-located. Only asked of those communities that reported that their AHSOR site was centre-based.
EX	Q13gAHSORProgramCoLocatedWithSchool	0=No 1=Yes	The Aboriginal Head Start On Reserve (AHSOR) program in the community is co-located with a school or daycare facility. Only asked of those communities that reported that their AHSOR was centre-based and co-located.
EY	Q14TeachingChildrenLanguage	0=No 1=Yes	Teaching children their First Nation language(s) was an activity provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EZ	Q14TradCeremonies	0=No 1=Yes	Traditional ceremonies and activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FA	Q14EarlyLiteracySkills	0=No 1=Yes	Early literacy skills activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FB	Q14FineGrossMotor	0=No 1=Yes	Fine and gross motor development activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FC	Q14ProvHealthyFoods	0=No 1=Yes	Healthy foods (snacks and/or lunches) were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FD	Q14PersonalHygieneDental	0=No 1=Yes	Healthy personal hygiene and dental habits activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FE	Q14PhysicalActivity	0=No 1=Yes	Physical activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FF	Q14Linkages	0=No 1=Yes	Linkages (including referrals and collaborations) to professionals and community supports and providers (e.g., housing, education, specialists) were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FG	Q14ParentAndFamily	0=No 1=Yes	Parent and family support activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FH	Q14VisitsHealthProfess	0=No 1=Yes	Visits from health professionals (e.g., nurses and dental hygienists) were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FI	Q14SafetyEducAwar	0=No 1=Yes	Safety education and awareness activities (e.g., play ground safety, car seat technician training, car seat use, seat belt use, bike safety, etc.) were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
FJ	Q15ChildrenLTThreeCB	Numeric	The number of children younger than 3 years old that participated in Centre-based Aboriginal Head Start On Reserve programming in the community.
FK	Q15ChildrenLTThreeOutrHomeVisit	Numeric	The number of children younger than 3 years old that participated in Outreach/Home visiting Aboriginal Head Start On Reserve programming in the community.
FL	Q15ChildrenLTThreeProgKeepWaitingListYorN	0=No 1=Yes	The Aboriginal Head Start On Reserve program in the community keeps a waiting list for children younger than 3 years old.
FM	Q15ChildrenLTThreeIfYesNumbOfChildrenOnWaitingList	Numeric	The number of children younger than 3 years old that are on the waiting list. Asked only of those communities that reported having a waiting list for children younger than 3 years old for the Aboriginal Head Start On Reserve program.
FN	Q15ChildrenThreeToSixCB	Numeric	The number of children 3-6 years old that participated in Centre-based Aboriginal Head Start On Reserve programming in the community.
FO	Q15ChildrenThreeToSixOutrHomeVisit	Numeric	The number of children 3-6 years that participated in Outreach/Home visiting Aboriginal Head Start On Reserve programming in the community.
FP	Q15ChildrenThreeToSixProgKeepWaitingListYorN	0=No 1=Yes	The Aboriginal Head Start On Reserve program in the community keeps a waiting list for children 3-6 years old.
FQ	Q15ChildrenThreeToSixIfYesNumbOfChildrenOnWaitingList	Numeric	The number of children 3-6 years old that are on the waiting list. Asked only of those communities that reported having a waiting list for children 3-6 years old for the Aboriginal Head Start On Reserve program.

Column #	Data Field	Response options	Description
FR	Q16CBNumbChildrenDiagnSpNeeds	Numeric	The number of children participating in a centre-based Aboriginal Head Start On Reserve program who were diagnosed with special needs during the reporting year.
FS	Q16CBNumbChildrenScreenedAssessedSpNe	Numeric	The number of children participating in a centre-based Aboriginal Head Start On Reserve program who were screened/assessed for special needs during the reporting year.
FT	Q16CBNumbChildrenReferResources	Numeric	The number of children participating in a centre-based Aboriginal Head Start On Reserve program who were referred to other resources (e.g., nurses, doctors, specialists, etc.) for special needs support or diagnosis during the reporting year.
FU	Q16CBNumberOnWaitListForDiagnAssessment	Numeric	The number of children participating in a centre-based Aboriginal Head Start On Reserve program who were on a wait list for special needs diagnostic assessment at the end of the reporting year.
FV	Q16OUTRHVNumbChildrenDiagnSpNeeds	Numeric	The number of children participating in an outreach/home visiting Aboriginal Head Start On Reserve program who were diagnosed with special needs during the reporting year.
FW	Q16OUTRHVNumbChildrenScreenedAssessedSpNeeds	Numeric	The number of children participating in an outreach/home visiting Aboriginal Head Start On Reserve program who were screened/assessed for special needs during the reporting year.
FX	Q16OUTRHVNumbChildrenReferResources	Numeric	The number of children participating in an outreach/home visiting Aboriginal Head Start On Reserve program who were referred to other resources (e.g., nurses, doctors, specialists, etc.) for special needs support or diagnosis during the reporting year.
FY	Q16OUTRHVNumberOnWaitListForDiagnAssessment	Numeric	The number of children participating in an outreach/home visiting Aboriginal Head Start On Reserve program who were on a wait list for diagnostic assessment at the end of the reporting year.
FZ	Q17NPFPDaily	Numeric	The number of parent/family participants involved on a daily basis in centre-based Aboriginal Head Start On Reserve programs.
GA	Q17NPFPWeekly	Numeric	The number of parent/family participants involved on a weekly basis in centre-based Aboriginal Head Start On Reserve programs.
GB	Q17NPFPMonthlySpecialOccasions	Numeric	The number of parent/family participants involved on a monthly basis or on special occasions in centre-based Aboriginal Head Start On Reserve programs.
GC	Q17NPFPTotal	Numeric	The total number of parent/family participants in centre-based Aboriginal Head Start On Reserve programs.
GD	Q18CHildLTFiveTotalNumbCommuni	Numeric	The total number of children less than 5 years of age living in the community.
GE	Q18ChildLTFiveParticInCOHI	Numeric	The number of children less than 5 years of age living in the community that participated in Children's Oral Health Initiative activities during the reporting year.
GF	Q18CHildFiveToSevenTotalNumbCommuni	Numeric	The total number of children 5 to 7 years of age living in the community.
GG	Q18ChildFiveToSevenParticInCOHI	Numeric	The number of children 5 to 7 years of age living in the community that participated in Children's Oral Health Initiative activities during the reporting year.
GH	Q18NumbPrenatalOneOnOneOralHealth	Numeric	The number of prenatal clients in the community that participated in an individual session on oral health during the reporting year as part of the Children's Oral Health Initiative activities.
GI	Q18NumbPrenatalOralPresentations	Numeric	The number of individuals in the community that attended prenatal presentations on oral health during the reporting year as part of the Children's Oral Health Initiative activities.
GJ	Q18NumbGrOralHealthPresProvided	Numeric	The number of group oral health presentations provided in the community during the reporting year as part of the Children's Oral Health Initiative activities.
GK	Q19RHAHSZNutritionDietician	0=No 1=Yes	Nutritionist/Dietician services were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
GL	Q19RHAHZNPhysicalActivityRecreation	0=No 1=Yes	Physical Activity/Recreation services were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
GM	Q19RHAHZNSpecialistCare	0=No 1=Yes	Specialist Care was provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
GN	Q19RHAHZNTreatmentManagement	0=No 1=Yes	Treatment/Management services were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
GO	Q19RHAHZNDiagnosticsScreening	0=No 1=Yes	Diagnostics/Screening services were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
GP	Q19RHAHSZDrugAlcoholTreatment	0=No 1=Yes	Drug/Alcohol Treatment services were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
GQ	Q19RHAHZDDental	0=No 1=Yes	Dental services were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
GR	Q19RHAHZDChildAndFamilySocialServiceSupports	0=No 1=Yes	Child and family social service supports were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
GS	Q19RHAHSZOccupationalTherapistSpeechLanguagePathologist	0=No 1=Yes	Occupational Therapist or Speech and Language Pathologist services were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.

Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
LW	Q25POLSuicidePrevention	0=No 1=Yes	Suicide prevention services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Police (Band, RCMP, Local/Provincial) during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
LX	Q25POLMentalHealthTreatmentAftercare	0=No 1=Yes	Mental health treatment and aftercare services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Police (Band, RCMP, Local/Provincial) during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
LY	Q25POLClientCaseManagement	0=No 1=Yes	Client case management services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Police (Band, RCMP, Local/Provincial) during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
LZ	Q25POLCrisisResponse	0=No 1=Yes	Crisis response services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Police (Band, RCMP, Local/Provincial) during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
MA	Q25PROVMentalWellnessPromotion	0=No 1=Yes	Mental Wellness Promotion services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
MB	Q25PROVDetoxServ	0=No 1=Yes	Detoxification services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
MC	Q25PROVAddictionTreatmentAftercare	0=No 1=Yes	Addiction treatment and aftercare services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
MD	Q25PROVSuicidePrevention	0=No 1=Yes	Suicide prevention services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
ME	Q25PROVMentalHealthTreatmentAftercare	0=No 1=Yes	Mental health treatment and aftercare services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
MF	Q25PROVClientCaseManagement	0=No 1=Yes	Client case management services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
MG	Q25PROVCrisisResponse	0=No 1=Yes	Crisis response services were provided in the community via a Mental Health and Addictions service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
MH	Q26aHCTrackingToolsUsedTrackMentalWellnessActivitiesYesOrNo	0=No 1=Yes	Health Canada tracking tools were used to track Mental Wellness activities during the reporting year.
MI	Q26bNameOfTrackingTool	Text	The name of the tracking tool(s) used to track Mental Wellness activities during the reporting year. Asked only of those communities that reported using a Health Canada tracking tool.
MJ	Q26cTrackingToolUsefulTrackingWorkMentalWellness	-2=Strongly Disagree -1=Disagree 1=Neutral 2=Agree 3=Strongly Agree	The Health Canada tracking tool(s) was useful in tracking work in Mental Wellness. Asked only of those communities that reported using a Health Canada tracking tool.
MK	Q26dTrackingToolAidedCompletionCBRT	-2=Strongly Disagree -1=Disagree 1=Neutral 2=Agree 3=Strongly Agree	The Health Canada tracking tool(s) aided in the completion of the CBRT. Asked only of those communities that reported using a Health Canada tracking tool.
ML	Q26eTrackingToolUsefulAcrossActivityAreas	-2=Strongly Disagree -1=Disagree 1=Neutral 2=Agree 3=Strongly Agree	The Health Canada tracking tool(s) was useful across activity areas. Asked only of those communities that reported using a Health Canada tracking tool.
MM	Q27PAAwarenessActivities	0=No 1=Yes	Awareness activities related to physical activity were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MN	Q27PAWalkingClubs	0=No 1=Yes	Walking clubs were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MO	Q27PASportRecreationActivities	0=No 1=Yes	Sport/recreation activities (e.g., soccer, basketball, etc.) were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MP	Q27PATraditionalPhysicalActivities	0=No 1=Yes	Traditional physical activites (e.g., jigging, dancing, games, showshoeing, canoeing) were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MQ	Q27NUTRITIONCookingSessions	0=No 1=Yes	Cooking sessions or classes (including community kitchens) were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MR	Q27NUTRITIONTraditionalHarvesting	0=No 1=Yes	Traditional harvesting, food preparation, food preservation activities (e.g., berry picking, cleaning fish, canning, etc.) were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MS	Q27NUTRITIONHealthyEatingAwareness	0=No 1=Yes	Healthy eating awareness and eduction activities (e.g., health fairs, radio shows, etc.) were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MT	Q27NUTRITIONGroceryTours	0=No 1=Yes	Grocery tours were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.

MU	Q27NUTRITIONCommunityGardens	0=No 1=Yes	Community gardens were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MV	Q27NUTRITIONGoodFoodBoxes	0=No 1=Yes	Good food boxes were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MW	Q27NUTRITIONFoodVouchers	0=No 1=Yes	Food vouchers were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MX	Q27NUTRITIONSchoolBasedFeedingProgram	0=No 1=Yes	School-based feeding programs were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MY	Q27ADDITIONALDiabetesInfoSessions	0=No 1=Yes	Diabetes information sessions or workshops were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
MZ	Q27ADDITIONALDevelopmentResourceMaterial	0=No 1=Yes	Development of resource materials (e.g., posters, cookbooks, displays, guides, etc.) occurred during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
NA	Q27ADDITIONALInjuryPreventionTraining	0=No 1=Yes	Injury prevention training and awareness raising activities (e.g., safety committees, tool kits, "A Journey to the Teachings" training, etc.) were provided during the reporting year as part of the Chronic Disease and Injury Prevention aspect of Healthy Living initiatives in the community.
NB	Q28DiabetesDiagnosticScreening	0=No 1=Yes	Diabetes diagnostic screening services (e.g., fasting glucose, OGTT) were conducted in the community during the reporting year.
NC	Q28NumberIndividualsScreenedReportingYea	Numeric	The number of individuals that received diabetes diagnostic screening services (e.g., fasting glucose, OGTT) in the commuity during the reporting year. Asked only of those communities that provided this service.
ND	Q28NonDiagnosticDiabetesAwarenessPreve	0=No 1=Yes	Non-diagnostic diabetes awareness/prevention screening services (i.e., non-diagnostic screenings at schools, workplaces, sporting events, health fairs, etc.) were provided in the community during the reporting year.
NE	Q28EstimateNonDiagnostic	Numeric	An estimate of the number of non-diagnostic screenings (i.e., non-diagnostic screenings at schools, workplaces, sporting events, health fairs, etc.) conducted in the community during the reporting year.
NF	Q29DiabetesSupportHealthyLivingGroups	0=No 1=Yes	Diabetes Support or healthy living groups were provided as part of the Diabetes Management intitiatives in the community.
NG	Q29ScreeningComplicationsRetinalScreenin	0=No 1=Yes	Retinal screening services for diabetes related complications were provided as part of the Diabetes Management intitiatives in the community.
NH	Q29ScreeningComplicationsRenalScreening	0=No 1=Yes	Renal screening services for diabetes related complications were provided as part of the Diabetes Management intitiatives in the community.
NI	Q29Referrals	0=No 1=Yes	Referrals to health professionals or services were provided as part of the Diabetes Management intitiatives in the community.
NJ	Q29DiabetesSelManagementSessions	0=No 1=Yes	Diabetes self-management sessions were provided as part of the Diabetes Management intitiatives in the community.
NK	Q30SupportDiabetesEducationClinicsTrainin	0=No 1=Yes	Provided or supported diabetes education clinics and training for clients to support their self-management in the community.
NL	Q30NumberofIndividualServed	Numeric	The number of individuals served by diabetes education clinics and training for self-management of diabetes provided by the community. Asked only of those communities that provided this service.
NM	Q30FootClinicsProvided	0=No 1=Yes	Foot clinics were provided as part of the Diabetes Clinics and Training initiatives in the community.
NN	Q30NumberIndividualsServed	Numeric	The number of individuals served by diabetes related foot clinics provided by the community. Asked only of those communities that provided this service.
NO	Q31RHAHSZHealthyEatingNutrition	0=No 1=Yes	Healthy eating/nutrition services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NP	Q31RHAHSZPhysicalActivityRecreation	0=No 1=Yes	Physical activity/recreation services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NQ	Q31RHAHSZSpecialistCare	0=No 1=Yes	Specialist care services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NR	Q31RHAHSZInjuryPrevention	0=No 1=Yes	Injury prevention services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NS	Q31RHAHSZTreatmentManagement	0=No 1=Yes	Treatment/management services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NT	Q31RHAHSZDiagnosticsScreening	0=No 1=Yes	Diagnostics/screening services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NU	Q31EOHealthyEatingNutrition	0=No 1=Yes	Healthy eating/nutrition services were provided in the community via a Healthy Living service linkage between community health staff and Educational Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NV	Q31EOPhysicalActivityRecreation	0=No 1=Yes	Physical activity/recreation services were provided in the community via a Healthy Living service linkage between community health staff and Educational Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.

QI	Q40LTONEYEARPertussis	Numeric	The number of cases of Pertussis in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QJ	Q40LTONEYEARTetanus	Numeric	The number of cases of Tetanus in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QK	Q40LTONEYEARPoliomyelitis	Numeric	The number of cases of Poliomyelitis in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QL	Q40LTONEYEARHaemophilusInfluenzaTypeBHIB	Numeric	The number of cases of Haemophilus Influenzae type B (HiB) in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QM	Q40LTONEYEARMeasles	Numeric	The number of cases of Measles in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QN	Q40LTONEYEARMumps	Numeric	The number of cases of Mumps in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QO	Q40LTONEYEARRubella	Numeric	The number of cases of Rubella in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QP	Q40LTONEYEARHepatitisB	Numeric	The number of cases of Hepatitis B in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QQ	Q40LTONEYEARInvasiveMeningococcalDiseases	Numeric	The number of cases of Invasive Meningococcal Disease in children less than 1 year living in the community (i.e., on-reserve including non-First Nations).
QR	Q40LTONEYEARInvasivePneumococcalDisease	Numeric	The number of cases of Invasive Pneumococcal Disease in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QS	Q40LTONEYEARVaricella	Numeric	The number of cases of Varicella in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QT	Q40LTONEYEARSeasonalInfluenzaSI	Numeric	The number of cases of Seasonal Influenza (SI) in children less than 1 year of age living in the community (i.e., on-reserve including non-First Nations).
QU	Q40ONETOFOURDiphtheria	Numeric	The number of cases of Diphtheria in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
QV	Q40ONETOFOURPertussis	Numeric	The number of cases of Pertussis in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
QW	Q40ONETOFOURTetanus	Numeric	The number of cases of Tetanus in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
QX	Q40ONETOFOURPoliomyelitis	Numeric	The number of cases of Poliomyelitis in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
QY	Q40ONETOFOURHaemophilusInfluenzaTypeBHIB	Numeric	The number of cases of Haemophilus Influenzae type B (HiB) in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
QZ	Q40ONETOFOURMeasles	Numeric	The number of cases of Measles in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
RA	Q40ONETOFOURMumps	Numeric	The number of cases of Mumps in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
RB	Q40ONETOFOURRubella	Numeric	The number of cases of Rubella in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
RC	Q40ONETOFOURHepatitisB	Numeric	The number of cases of Hepatitis B in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
RD	Q40ONETOFOURInvasiveMeningococcalDiseases	Numeric	The number of cases of Invasive Meningococcal Disease in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
RE	Q40ONETOFOURInvasivePneumococcalDisease	Numeric	The number of cases of Invasive Pneumococcal Disease in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
RF	Q40ONETOFOURVaricella	Numeric	The number of cases of Varicella in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
RG	Q40ONETOFOURSeasonalInfluenzaSI	Numeric	The number of cases of Seasonal Influenza (SI) in children 1 to 4 years of age living in the community (i.e., on-reserve including non-First Nations).
RH	Q40FIVETONINETEENDiphteria	Numeric	The number of cases of Diphtheria in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RI	Q40FIVETONINETEENPertussis	Numeric	The number of cases of Pertussis in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RJ	Q40FIVETONINETEENTetanus	Numeric	The number of cases of Tetanus in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RK	Q40FIVETONINETEENPoliomyelitis	Numeric	The number of cases of Poliomyelitis in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RL	Q40FIVETONINETEENHaemophilusInfluenzaTypeBHIB	Numeric	The number of cases of Haemophilus Influenzae type B (HiB) in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RM	Q40FIVETONINETEENMeasles	Numeric	The number of cases of Measles in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RN	Q40FIVETONINETEENMumps	Numeric	The number of cases of Mumps in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RO	Q40FIVETONINETEENRubella	Numeric	The number of cases of Rubella in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RP	Q40FIVETONINETEENHepatitisB	Numeric	The number of cases of Hepatitis B in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RQ	Q40FIVETONINETEENInvasiveMeningococcalDiseases	Numeric	The number of cases of Invasive Meningococcal Disease in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RR	Q40FIVETONINETEENInvasivePneumococcalDisease	Numeric	The number of cases of Invasive Pneumococcal Disease in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RS	Q40FIVETONINETEENVaricella	Numeric	The number of cases of Varicella in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RT	Q40FIVETONINETEENSeasonalInfluenzaSI	Numeric	The number of cases of Seasonal Influenza (SI) in children/youth 5 to 19 years of age living in the community (i.e., on-reserve including non-First Nations).
RU	Q40TWENTYTOFIFTYNINEDiphteria	Numeric	The number of cases of Diphtheria in adults 20 to 59 years of age living in the community (i.e., on-reserve including non-First Nations).
RV	Q40TWENTYTOFIFTYNINEPertussis	Numeric	The number of cases of Pertussis in adults 20 to 59 years of age living in the community (i.e., on-reserve including non-First Nations).

UB	Q41NDLDCCBMMR	Numeric	The total number of MMR vaccines lost due to cold chain breakages in the community.
UC	Q41NDLDCCBHepatitisB	Numeric	The total number of Hepatitis B vaccines lost due to cold chain breakages in the community.
UD	Q41NDLDCCBMenincoccalConjugate	Numeric	The total number of Meningococcal Conjugate vaccines lost due to cold chain breakages in the community.
UE	Q41NDLDCCBPneumococcalConjugate	Numeric	The total number of Pneumococcal Conjugate vaccines lost due to cold chain breakages in the community.
UF	Q41NDLDCCBVaricella	Numeric	The total number of Varicella vaccines lost due to cold chain breakages in the community.
UG	Q41NDLDCCBPneumococcalPolysaccharide	Numeric	The total number of Pneumococcal polysaccharide vaccines lost due to cold chain breakages in the community.
UH	Q41NDLDCCBHPV	Numeric	The total number of HPV vaccines lost due to cold chain breakages in the community.
UI	Q41NDLDCCBInfluenzA	Numeric	The total number of Influenza vaccines lost due to cold chain breakages in the community.
UJ	Q41NDLDCCBOther	Numeric	The total number of Other vaccines lost due to cold chain breakages in the community.
UK	Q42ImmunizationCoverageReportFormCompletedSubmittedReportingTemplate	0=No 1=Yes	The immunization coverage report form was completed and submitted with the CBRT reporting template by the community.
UL	Q43TBTESTUNGMALES	Numeric	The number of males living on-reserve (including non-First Nations) who were given a tuberculosis skin test (TST) as screening for latent tuberculosis infections during the reporting year from January 1 to December 31. Includes testing done for routine screening and contract tracing.
UM	Q43MaleNumberOfPositive	Numeric	The number of males living on-reserve (including non-First Nations) who were given a tuberculosis skin test (TST) as screening for latent tuberculosis infections and tested positive during the reporting year from January 1 to December 31. Includes testing done for routine screening and contract tracing.
UN	Q43MaleNumberOfNegative	Numeric	The number of males living on-reserve (including non-First Nations) who were given a tuberculosis skin test (TST) as screening for latent tuberculosis infections and tested negative during the reporting year from January 1 to December 31. Includes testing done for routine screening and contract tracing.
UO	Q43MaleNumberClientsFurtherAssessedActiv	Numeric	The number of males living on-reserve (including non-First Nations) who were given a tuberculosis (TST) as screening for latent tuberculosis and were further assessed for active tuberculosis during the reporting year from January 1 to December 31.
UP	Q43MaleNoTB	Numeric	The number of males living on-reserve (including non-First Nations) who were further assessed for active tuberculosis and did not have tuberculosis during the reporting year from January 1 to December 31.
UQ	Q43MaleActiveTB	Numeric	The number of males living on-reserve (including non-First Nations) who were further assessed for active tuberculosis and were diagnosed with active tuberculosis during the reporting year from January 1 to December 31.
UR	Q43MaleLTBI	Numeric	The number of males living on-reserve (including non-First Nations) who were further assessed for active tuberculosis and were diagnosed with latent tuberculosis during the reporting year from January 1 to December 31.
US	Q43MalePopulationNumber	Numeric	The population count for all males living on-reserve (including non-First Nations) during the reporting year from January 1 to December 31.
UT	Q43MalePopulationDataSource	Text	The data source used for the community's population count of all males living on-reserve (including non-First Nations) for the reporting year January 1 to December 31.
UU	Q43TBTESTUNGFEMALES	Numeric	The number of females living on-reserve (including non-First Nations) who were given a tuberculosis skin test (TST) as screening for latent tuberculosis infections during the reporting year from January 1 to December 31. Includes testing done for routine screening and contract tracing.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.

UV	Q43FemaleNumberOfPositive	Numeric	The number of females living on-reserve (including non-First Nations) who were given a tuberculosis skin test (TST) as screening for latent tuberculosis infections and tested positive during the reporting year from January 1 to December 31. Includes testing done for routine screening and contract tracing.
UW	Q43FemaleNumberOfNegative	Numeric	The number of females living on-reserve (including non-First Nations) who were given a tuberculosis skin test (TST) as screening for latent tuberculosis infections and tested negative during the reporting year from January 1 to December 31. Includes testing done for routine screening and contract tracing.
UX	Q43FemaleNumberClientsFurtherAssessedActiveTB	Numeric	The number of females living on-reserve (including non-First Nations) who were given a tuberculosis (TST) as screening for latent tuberculosis and were further assessed for active tuberculosis during the reporting year from January 1 to December 31.
UY	Q43FemaleNoTB	Numeric	The number of females living on-reserve (including non-First Nations) who were further assessed for active tuberculosis and did not have tuberculosis during the reporting year from January 1 to December 31.
UZ	Q43FemaleActiveTB	Numeric	The number of females living on-reserve (including non-First Nations) who were further assessed for active tuberculosis and were diagnosed with active tuberculosis during the reporting year from January 1 to December 31.
VA	Q43FemaleLTBI	Numeric	The number of females living on-reserve (including non-First Nations) who were further assessed for active tuberculosis and were diagnosed with latent tuberculosis during the reporting year from January 1 to December 31.
VB	Q43FemalePopulationNumber	Numeric	The population count for all females living on-reserve (including non-First Nations) during the reporting year from January 1 to December 31.
VC	Q43FemalePopulationDataSource	Text	The data source used for the community's population count of all females living on-reserve (including non-First Nations) for the reporting year January 1 to December 31.
VD	Q44NANoProvincailTBPreventionControlProg	0=No 1=Yes	The community did not use tuberculosis clinical, treatment, health promotion, or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs because these programs were not available.
VE	Q44YESCommunityAvailableExpertiseResources	0=No 1=Yes	The community made use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
VF	Q44NOCommunityDoesNotMakeAvailableExpertiseResources	0=No 1=Yes	The community did not make use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
VG	Q44ProgramDevelopment	0=No 1=Yes	The community used program development expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
VH	Q44ProgramImplementation	0=No 1=Yes	The community used program implementation expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
VI	Q44ProgramEvaluation	0=No 1=Yes	The community used program evaluation expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
VJ	Q44Research	0=No 1=Yes	The community used research expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
VK	Q44ClinicalAdvice	0=No 1=Yes	The community used clinical advice expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
VL	Q45HIVTestingAccessibleOnOrNearReserve	0=No 1=Yes	HIV testing was accessible on or near the reserve.
VM	Q45HIVTreatmentAccessibleOnOrNearReserv	0=No 1=Yes	HIV treatment was accessible on or near the reserve.
VN	Q46HIVAIDSSupportGroupsCommunity	0=No 1=Yes	HIV/AIDS support groups were available in the community.
VO	Q46LimitedFunding	0=No 1=Yes	The community did not have HIV/AIDS support groups because of limited funding. Asked only of those communities that did not have HIV/AIDS support groups.
VP	Q46InsufficientCapacityEstablishLeadSupportGroups	0=No 1=Yes	The community did not have HIV/AIDS support groups because of an insufficient capacity to establish and lead support groups. Asked only of those communities that did not have HIV/AIDS support groups.
VQ	Q46NeedSupportGroupsNotIdentified	0=No 1=Yes	The community did not have HIV/AIDS support groups because the need for support groups was not identified. Asked only of those communities that did not have HIV/AIDS support groups.
VR	Q46IndividualsHIVPreferNotToInvolveHealthCentreStaff	0=No 1=Yes	The community did not have HIV/AIDS support groups because individuals with HIV prefer not to involve health centre staff in their follow-up. Asked only of those communities that did not have HIV/AIDS support groups.
VS	Q46IndividualsHIVPreferAccessServicesOffRe	0=No 1=Yes	The community did not have HIV/AIDS support groups because individuals with HIV prefer to access services off-reserve, especially for HIV/Sexually transmitted infections. Asked only of those communities that did not have HIV/AIDS support groups.
VT	Q46OtherReasons	0=No 1=Yes	The community did not have HIV/AIDS support groups because of other reasons (e.g., stigma associated with HIV/AIDS). Asked only of those communities that did not have HIV/AIDS support groups.
VU	Q47CommunityCollectAdditionalInformationBloodBornePathogens	0=No 1=Yes	Additional information on blood borne pathogens and sexually transmitted infections was collected by the community.
VV	Q47AdditionalInformationCollected	Text	A description of the types of additional information on blood borne pathogens and sexually transmitted infections collected by the community. Asked only of those communities that reported collecting additional information on blood borne pathogens and sexually transmitted infections.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
VW	Q48DoesCommunityOrgaCollaboServDelivArrangHCCServSupExtPr	0=No 1=Yes	The community or organization had a collaborative service delivery arrangement for Home and Community Care services or supports with external providers. Collaborative arrangements may be formal with a written agreement in the form of a Memorandum of Understanding, protocol, agreement, contract, etc. or informal with a non-written agreement to provide services or information to support Home and Community Care clients services in the community.
VX	Q48NumberOfAgreeDistrictOrRHA	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Home and Community Care services or supports with the District or Regional Health Authority. Asked only of those communities that reported having collaborative service deliverary arrangements for Home and Community Care services or supports.
VY	Q48NumberOfAgreeHospitals	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Home and Community Care services or supports with hospitals. Asked only of those communities that reported having collaborative service deliverary arrangements for Home and Community Care services or supports.
VZ	Q48NumberOfAgreeClientCareAccessCentres	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Home and Community Care services or supports with Client Care Access Centres. Asked only of those communities that reported having collaborative service deliverary arrangements for Home and Community Care services or supports.
WA	Q48NumberOfAgreeOther	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Home and Community Care services or supports with other organizations. Asked only of those communities that reported having collaborative service deliverary arrangements for Home and Community Care services or supports.
WB	Q49ProcessPlaceManageHCCComplaintsAppelasYesOrNo	0=No 1=Yes	The community had a process in place to manage Home and Community Care complaints and appeals.
WC	Q50HCCIncidentOccurenceReportingProcessInPlaceYesOrNo	0=No 1=Yes	The community had a Home and Community Care incident and occurance reporting process in place.
WD	Q51HCCPogramAccreditedByAccreditationCanadaOrOtherRecognizedAccreditationOrganizationYesOrNo	0=No 1=Yes	The community's Home and Community Care program has been accredited by Accreditation Canada or another recognized accreditation organization.
WE	Q52NumberOfCommunityMembersAccessedCCCServicesLeastOnc	Numeric	The number of community members that accessed Clinical and Client Care services at least once during the reporting year. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WF	Q53UrgentUnderOneYear	Numeric	The number of service encounters for urgent clinical services for community members under 1 year of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WG	Q53UrgentOneToFourYears	Numeric	The number of service encounters for urgent clinical services for community members 1-4 years of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WH	Q53UrgentFiveToNineenYears	Numeric	The number of service encounters for urgent clinical services for community members 5-9 years of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WI	Q53UrgentTwentyToFortyFourYears	Numeric	The number of service encounters for urgent clinical services for community members 20-44 years of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WJ	Q53UrgentFortyFivetoSixtyFourYears	Numeric	The number of service encounters for urgent clinical services for community members 45-64 years of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WK	Q53UrgentOverSixtyFiveYears	Numeric	The number of service encounters for urgent clinical services for community members 65 years of age and older. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WL	Q53UrgentTotalEncounters	Numeric	The total number of service encounters for urgent clinical services for community members. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WM	Q53NonUrgentUnderOneYear	Numeric	The number of service encounters for non-urgent clinical services for community members under 1 year of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WN	Q53NonUrgentOneToFourYears	Numeric	The number of service encounters for non-urgent clinical services for community members 1-4 years of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WO	Q53NonUrgentFiveToNineteenYears	Numeric	The number of service encounters for non-urgent clinical services for community members 5-19 years of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WP	Q53NonUrgentTwentyToFortyFourYears	Numeric	The number of service encounters for non-urgent clinical services for community members 20-44 years of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WQ	Q53NonUrgentFortyFiveToSixtyFOurYears	Numeric	The number of service encounters for non-urgent clinical services for community members 45-64 years of age. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WR	Q53NonUrgentOverSixtyFiveYears	Numeric	The number of service encounters for non-urgent clinical services for community members 65 years of age and older. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WS	Q53NonUrgentTotalEncounters	Numeric	The total number of service encounters for non-urgent clinical services for community members. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WT	Q54NEDiagnosticScreeningPreventativeProcedures	Numeric	The number of primary care encounters related to diagnostic, screening and preventative procedures that were provided as part of the Clinical and Client Care services in the community during the reporting year. Category of primary care based on the International Classification of Primary Care developed by the the World Health Organizations. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
WU	Q54NEMedicationProvisionClinicalProcedures	Numeric	The number of primary care encounters related to medication provision and clinical procedures that were provided as part of the Clinical and Client Care services in the community during the reporting year. Category of primary care based on the International Classification of Primary Care developed by the the World Health Organizations. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WV	Q54NESymptomsComplaints	Numeric	The number of primary care encounters related to symptoms and complaints that were provided as part of the Clinical and Client Care services in the community during the reporting year. Category of primary care based on the International Classification of Primary Care developed by the the World Health Organizations. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WW	Q54NEProvisionTestResultsFollowUp	Numeric	The number of primary care encounters related to provision of test results and follow-up that were provided as part of the Clinical and Client Care services in the community during the reporting year. Category of primary care based on the International Classification of Primary Care developed by the the World Health Organizations. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WX	Q54NEReferrals	Numeric	The number of primary care encounters related to referrals that were provided as part of the Clinical and Client Care services in the community during the reporting year. Category of primary care based on the International Classification of Primary Care developed by the the World Health Organizations. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WY	Q54NEChronicDisease Management	Numeric	The number of primary care encounters related to chronic disease management that were provided as part of the Clinical and Client Care services in the community during the reporting year. Category of primary care based on the International Classification of Primary Care developed by the the World Health Organizations. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
WZ	Q54NEOtherReasons	Numeric	The number of primary care encounters related to other reasons that were provided as part of the Clinical and Client Care services in the community during the reporting year. Category of primary care based on the International Classification of Primary Care developed by the the World Health Organizations. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XA	Q55NursingPermanentFTEAllocatedDeliveryServicesNursingStationsHealthCentreWithTreat	Numeric	The number of nursing permanent full-time equivalents allocated to deliver the services of the nursing station/health centre with treatment at the end of the reporting year. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XB	Q55NursingPermanentFTEActuallyDeliveryServicesNursingStationHealthCentreTreatment	Numeric	The number of nursing permanent full-time equivalents that actually delivered the services of the nursing station/health centre with treatment at the end of the reporting year. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XC	Q55NursingFTEBandEmployedNurses	Numeric	The number of nursing permanent full-time equivalents that were filled by band-employed nurses at the end of the reporting year. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XD	Q55NursingFTEAgencyNurses	Numeric	The number of nursing permanent full-time equivalents that were filled by agency nurses at the end of the reporting year. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XE	Q55NursingFTEContractHCNurses	Numeric	The number of nursing permanent full-time equivalents that were filled by contract (Health Canada) nurses at the end of the reporting year. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XF	Q56TotalNumberOvertimeHoursWorkedNurse	Numeric	The total number of overtime hours worked by nurses at the end of the reporting year. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XG	Q57TotalNumberContractHoursWorkedAgencyNurses	Numeric	The total number of contract hours worked by agency nurses at the end of the reporting year. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XH	Q58NNCPathophysiology	Numeric	The number of nurses who completed the mandatory course/certification for Pathophysiology. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XI	Q58NNCAdvancedHealthAssessment	Numeric	The number of nurses who completed the mandatory course/certification for Advanced Health Assessment. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XJ	Q58NNCPharmacotherapeutics	Numeric	The number of nurses who completed the mandatory course/certification for Pharmacotherapeutics (including a module or course to meet the upcoming Section 56 Ministerial exemption on Controlled Drugs and Substances Act CDSA). Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or
XK	Q58NNCBasicTraumaLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for Basic Trauma Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XL	Q58NNCInternationalTraumaLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for International Trauma Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XM	Q58NNCAdvancedTraumaLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for Advanced Trauma Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XN	Q58NNCBasicCardiacLifeSupprtCPR	Numeric	The number of nurses who completed the mandatory course/certification for Basic Cardiac Life Support (CPR). Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XO	Q58NNCAdvanceCardiacLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for Advanced Cardiac Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XP	Q58NNCPaediatricAdvancedLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for Pediatric Advanced Cardiac Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XQ	Q58NNCTraumaNurseCoreCourse	Numeric	The number of nurses who completed the mandatory course/certification for Trauma Nurse Core Course. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XR	Q58NNCImmunizationCertificate	Numeric	The number of nurses who completed the mandatory course/certification for Immunization certification. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
XS	Q58TTHPathophysiology	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Pathophysiology. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XT	Q58TTHAdvancedHealthAssessment	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Advanced Health Assessment. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XU	Q58TTHPharmacotherapeutics	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Pharmacotherapeutics (including a module or course to meet the upcoming Section 56 Ministerial exemption on Controlled Drugs and Substances Act CDSA). Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day,
XV	Q58TTHBasicTraumaLifeSupport	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Basic Trauma Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XW	Q58TTHInternationalTraumaLifeSupport	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for International Trauma Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XX	Q58TTHAdvancedTraumaLifeSupport	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Advanced Trauma Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XY	Q58TTHBasicCardiacLifeSupprtCPR	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Basic Cardiac Life Support (CPR). Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
XZ	Q58TTHAdvanceCardiacLifeSupport	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Advanced Cardiac Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YA	Q58TTHPaediatricAdvancedLifeSupport	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Pediatric Advanced Cardiac Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YB	Q58TTHTraumaNurseCoreCourse	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Trauma Nurse Core Course. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YC	Q58TTHImmunizationCertificate	Numeric	The total number of training hours for nurses who completed the mandatory course/certification for Immunization certification. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YD	Q59NRGeneralPractitioners	Numeric	The number of referrals (scheduled and non-scheduled) made to general practioners/family physicians outside of the community. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YE	Q59NRPhysicianSpecialists	Numeric	The number of referrals (scheduled and non-scheduled) made to physician specialists outside of the community. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YF	Q59NRDiagnosticClinicsLaboratories	Numeric	The number of referrals (scheduled and non-scheduled) made to diagnostic clinics or laboratories (e.g., mammography, X-rays, ultrasound, CT and other imaging) outside of the community. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YG	Q59NRTherapyServices	Numeric	The number of referrals (scheduled and non-scheduled) made to therapy services (e.g., physiotherapy, occupational therapy) outside of the community. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YH	Q59NRDentistsOralSurgeons	Numeric	The number of referrals (scheduled and non-scheduled) made to dentists/oral surgeons outside of the community. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YI	Q59NRNursePractitoners	Numeric	The number of referrals (scheduled and non-scheduled) made to nurse practitioners outside of the community. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YJ	Q60CommunityOrganizationCollaborativeServiceDeliveryArrangementsCCCServicesSupportsExternalProviders	0=No 1=Yes	The community has a collaborative service delivery arrangement for Clinical and Client Care services with external providers. Collaborative arrangements may be formal with a written agreement in the form of a Memorandum of Understanding, contract, etc. or informal with a non-written agreement to provide services or information to support Clinical and Client Care services in the community. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YK	Q60NAGRDistrictRegionalHealthAuthority	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Clinical and Client Care services with the District or Regional Health Authority. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week, and that reported having a collaborative service delivery arrangement for Clinical and Client Care services.
YL	Q60NAGRHospitals	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Clinical and Client Care services with hospitals. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week, and that reported having a collaborative service delivery arrangement for Clinical and Client Care services.
YM	Q60NAGROther	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Clinical and Client Care services with other organizations. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week, and that reported having a collaborative service delivery arrangement for Clinical and Client Care services.
YN	Q61ProcessPlaceManageCCCComplaintsAp	0=No 1=Yes	The community had a process in place to manage Clinical and Client Care complaints and appeals. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YO	Q62CCCIncidentOccurenceReportingProcessPlace	0=No 1=Yes	The community had a Clinical and Client Care incident and occurrence reporting process in place. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
YP	Q63ReportsEHOAvailableHCDirectlyEHIS	0=No 1=Yes	Reports from the environmental health officer who works in the community were available to Health Canada directly through the Environmental Health Information System.
YQ	Q64ProgramActivitesEnteredEHOIntoEHIS	0=No 1=Yes	All programs have been entered by the community environmental health officer into the Environmental Health Information System for the entire reporting year. Asked only of those communities that reported that reports from the environmental health officer were available to Health Canada through the Environmental Health Information System.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.

	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
YR	Q65ProfessionalCompetenciesTraining	0=No 1=Yes	The environmental health officer in the community completed professional competencies training during the reporting year. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
YS	Q65OtherTraining	0=No 1=Yes	The environmental health officer in the community completed other training during the reporting year. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
YT	Q66NRICommunityWastewaterSystems	Numeric	The number of routine inspections of community wastewater systems conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
YU	Q66NRIPermanentFoodFacilities	Numeric	The number of routine inspections of permanent food facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
YV	Q66NRISeasonalFood Facilites	Numeric	The number of routine inspections of seasonal food facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
YW	Q66NRISpecialEventFoodFacilities	Numeric	The number of routine inspections of special event food facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
YX	Q66NRIHealthFacilities	Numeric	The number of routine inspections of health facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
YY	Q66NRICommunityCareFacilities	Numeric	The number of routine inspections of community care facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
YZ	Q66NRIGeneralFacilities	Numeric	The number of routine inspections of general facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZA	Q66NRIRecretionalFacilities	Numeric	The number of routine inspections of recreational facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZB	Q66NRIRecretionalWaterFacilities	Numeric	The number of routine inspections of recreational water facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZC	Q66NRISolidWasteDisposalSites	Numeric	The number of routine inspections of solid waste disposal sites conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZD	Q66NRINSPNewOnSiteSewageDisposalSyste	Numeric	The number of requested inspections of new on-site sewage disposal systems conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZE	Q66NRINSPExistingOnSiteSewageDisposalSy	Numeric	The number of requested inspections of existing on-site sewage disposal systems conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZF	Q66NRINSPCommunityWasteWaterSystems	Numeric	The number of requested inspections of community wastewater systems conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZG	Q66NRINSPHousingUnits	Numeric	The number of requested inspections of housing units conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZH	Q66NRINSPPermanentFoodFacilities	Numeric	The number of requested inspections of permanent food facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZI	Q66NRINSPSeasonalFoodFacilities	Numeric	The number of requested inspections of seasonal food facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZJ	Q66NRINSPSpecialEventFoodFacilities	Numeric	The number of requested inspections of special event food facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZK	Q66NRINSPHealthFacilities	Numeric	The number of requested inspections of health facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZL	Q66NRINSPCommunityCareFacilities	Numeric	The number of requested inspections of community care facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZM	Q66NRINSPGeneralFacilities	Numeric	The number of requested inspections of general facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZN	Q66NRINSPRecreationalFacilities	Numeric	The number of requested inspections of recreational facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZO	Q66NRINSPRecretionalWaterFacilities	Numeric	The number of requested inspections of recreational water facilities conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZP	Q66NRINSPSolidWasteDisposalSites	Numeric	The number of requested inspections of solid waste disposal sites conducted by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZQ	Q66TNTFYCNewOnSiteSewageDisposalSyste	Numeric	The total number of new on-site sewage disposal systems in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ZR	Q66TNTFYCExistingOnSiteSewageDisposalS	Numeric	The total number of existing on-site sewage disposal systems in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.

ZZ	Q66TNTFYCGeneralFacilities	Numeric	The total number of general facilities in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAA	Q66TNTFYCRecreationalFacilities	Numeric	The total number of recreational facilities in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAB	Q66TNTFYCRecretionalWaterFacilities	Numeric	The total number of recreational water facilities in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAC	Q66TNTFYCSolidWasteDisposalSites	Numeric	The total number of solid waste disposal sites in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAD	Q67ANumberFoodbornellIlnessInvestigationsCommunity	Numeric	The number of foodborne illness investigations completed by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAE	Q67AForEachIllnessInvetigationsProvideDetailsAlsoDescribeEHORoleOutComesResultsInves	Text	The details of each foodborne illness investigation completed by the environmental health officer in the community including: type (e.g., listeriosis, salmonella, etc.), scope of investigation (e.g., duration, location, number of suspected or confirmed cases of each outbreak), the environmental health officer's role, and investigation outcomes/results. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System, and who reported having foodborne illness investigations in the community.
AAF	Q67BNumberWaterbornellIlnessInvestigationsCommunity	Numeric	The number of waterborne illness investigations completed by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAG	Q67BBForEachIllnessInvetigationsProvideDetailsTypeScopeAlsoDescribeEHORoleOutcomesResultsInvestigation	Text	The details of each waterborne illness investigation completed by the environmental health officer in the community including: type (e.g., *E coli* , giardia, unidentified), scope of investigation (e.g., duration, location, number of suspected or confirmed cases of each outbreak), the environmental health officer's role, and investigation outcomes/results. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System, and who reported having waterborne illness investigations in the community.
AAH	Q67CNumberVectorbornellIlnessInvestigations	Numeric	The number of vectorborne illness investigations completed by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAI	Q67CForEachIllnessInvetigationsProvideDetailsTypeScopeAlsoDescribeEHORoleOutcomesResultsInvestigation	Text	The details of each vectorborne illness investigation completed by the environmental health officer in the community including: type (e.g., animal bite/rabies, West Nile virus, unidentifed), scope of investigation (e.g., duration, location, number of suspected or confirmed cases of each outbreak), the environmental health officer's role, and investigation outcomes/results. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System, and who reported having vectorborne illness investigations in the community.
AAJ	Q68NumberOtherEnvironmentalDiseaseInvestigations	Numeric	The number of other environmental disease investigations completed by the environmental health officer in the community. Other investigations are those for which the source is unknown or there are multiple sources. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAK	Q68SIXTYEIGHTForEachIllnessInvetigationsProvideDetailsTypeScopeAlsoDescribeEHORoleOutcomesResultsInve	Text	The details of each other environmental disease investigation completed by the environmental health officer in the community including: type (if known), scope of investigation (e.g., duration, location, number of suspected or confirmed cases of each outbreak), the environmental health officer's role, and investigation outcomes/results. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System, and who reported having other environmental investigations in the community.
AAL	Q69NumberZoonoticInterventionActivitiesCommunity	Numeric	The number of zoonotic intervention activities completed by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
AAM	Q69EachZoonoticInterventionActivityProvideDetailsAboutTypeScopeAlsoDescribeEHORoleOutcomesResultsInves	Text	The details of each zoonotic intervention activity completed by the environmental health officer in the community including: type (e.g., mosquito larviciding or adulticiding, dog control, rodent control), scope of surveillance activity (e.g., duration, location, number of suspected or confirmed cases of each outbreak), the environmental health officer's role, and surveillance outcomes/results. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System, and who reported having zoonotic intervention activities in the community.
AAN	Q70NumberEmergencyPlanningActivities	Numeric	The number of emergency planning activities completed by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAO	Q70ForEachEmergencyPlanningActivityProvideDetailsEHORoleOfOthersInvolvedTypesActivitiesUndertakenDurationOutcomesResults	Text	The details of each emergency planning activity completed by the environmental health officer in the community including: the environmental health officer's role, other parties involved, the types of activities undertaken, duration, and activity outcomes/results. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System, and who reported having emergency planning activities in the community.
AAP	Q71NumberEmergencyResponseEventsCommunity	Numeric	The number of emergency response events completed by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAQ	Q71ForEachEmergencyResponseEventProvideDetailsAboutEmergencyEventEHORoleOthersInvolvedTypesActivitiesUndertakenDurationOutcomesResults	Text	The details of each emergency response event completed by the environmental health officer in the community including: the environmental health officer's role, other parties involved, the types of activities undertaken, duration, and activity outcomes/results. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System, and who reported having emergency response events in the community.
AAR	Q72NumberEmergencyRecoveryActivitiesCommunity	Numeric	The number of emergency recovery activities completed by the environmental health officer in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAS	Q72ForEachEmergencyRecoveryEventProvideDetailsAboutEmergencyEventEHORoleOthersInvolvedTypesActivitiesUndertakenDurationOutcomesResults	Text	The details of each emergency recovery activity completed by the environmental health officer in the community including: the environmental health officer's role, other parties involved, the types of activities undertaken, duration, and activity outcomes/results. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System, and who reported having emergency recovery activities in the community.
AAT	Q73NSDFoodSafety	Numeric	The number of food safety (including food handler) training sessions delivered by the community environmental health officer to community members and community staff. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAU	Q73NSDCommunityBasedWaterMonitoringTraining	Numeric	The number of community-based water monitoring training sessions delivered by the community environmental health officer to community members and community staff. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAV	Q73NSDHandWashingInfectionControl	Numeric	The number of hand washing and infection control training sessions delivered by the community environmental health officer to community members and community staff. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAW	Q73NSDWHMIS	Numeric	The number of WHMIS (Workplace hazardous materials information system) training sessions delivered by the community environmental health officer to community members and community staff. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAX	Q73NSDTransportationDangerousGoods	Numeric	The number of transportation of dangerous goods (TDG) training sessions delivered by the community environmental health officer to community members and community staff. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAY	Q73NSDOthers	Numeric	The number of other training sessions delivered by the community environmental health officer to community members and community staff. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
AAZ	Q73TNPTFoodSafety	Numeric	The total number of people that received food safety (include food handler) training delivered by the community environmental health officer. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ABA	Q73TNPTCommunityBasedWaterMonitoringTraining	Numeric	The total number of people that received community-based water monitoring training delivered by the community environmental health officer. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ABB	Q73TNPTHandWashingInfectionControl	Numeric	The total number of people that received hand washing and infection control training delivered by the community environmental health officer. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ABC	Q73TNPTWHMIS	Numeric	The total number of people that received WHMIS (Workplace hazardous materials information system) training delivered by the community environmental health officer. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ABD	Q73TNPTTransportationDangerousGoods	Numeric	The total number of people that received transportation of dangerous goods (TDG) training delivered by the community environmental health officer. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ABE	Q73TNPTOthers	Numeric	The total number of people that received other training delivered by the community environmental health officer. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
ABF	Q74NumberEnvironmentalPublicHealthEducationalTrainingMaterialsDevelopedCommunity	Numeric	The number of environmental public health educational and training materials developed in the community. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System.
ABG	Q74ForEachItemEducationalTrainingMaterialDevelopedProvideDetailsTypeMaterialEHORoleOtherPartners	Text	The details for each environmental public health educational and training material developed in the community including: the environmental health officer's role, the role of other partners, intended audience, distribution, and observed results. Only asked of communities whose reports from the environmental health officer were not available to Health Canada directly through the Environmental Health Information System, and who reported having developed environmental public health education and training material in the community.
ABH	Q75DrinkingWaterDataCollectedEHOCommunityAvailableHCThroughDatabase	0=No 1=Yes	The drinking water data collected by the environmental health officer in the community was available to Health Canada through a database (i.e., WaterTrax).
ABI	Q76NumberOfCBWMCommunity	Numeric	The number of community-based drinking water quality monitors in the community during the reporting period. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABJ	Q76NumberOfCBWMCommunityAttendedEducationalSessionOrReceivedOnSiteTraining	Numeric	The number of community-based drinking water quality monitors in the community who attended an educational session or received on-site training. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABK	Q76PIPEDWATERSYSTEMSWITHFIVECONNECIONSORMORENumberOfSamplesAnalysedForBacteriologicalParametersUsingPortableKi	Numeric	The number of samples from piped water systems with 5 connections or more in the community that were analyzed for bacteriological parameters using a portable kit. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABL	Q76PIPEDWATERSYSTEMSWITHFIVECONNECIONSORMORENumberOfSamplesAnalysedForBacteriologicalParametersAccreditedLabo	Numeric	The number of samples from piped water systems with 5 connections or more in the community that were analyzed for bacteriological parameters by an accredited laboratory. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABM	Q76PIPEDWATERSYSTEMSWITHFIVECONNECIONSORMORENumberOfSamplesAnalysedForProtozoaParameters	Numeric	The number of samples from a piped water systems with 5 connections or more in the community that were analyzed for protozoa parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABN	Q76PIPEDWATERSYSTEMSWITHFIVECONNECIONSORMORENumberOfSamplesAnalysedForChemicalParameters	Numeric	The number of samples from piped water systems with 5 connections or more in the community that were analyzed for chemical parameters (routine and baseline). Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABO	Q76PIPEDWATERSYSTEMSWITHFIVECONNECIONSORMORENumberOfSamplesAnalysedForTHMParametersWhe	Numeric	The number of samples from piped water systems with 5 connections or more in the community that were analyzed for THM parameters when required. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABP	Q76PIPEDWATERSYSTEMSWITHFIVECONNECIONSORMORENumberOfSamplesAnalysedForRadiologicalParame	Numeric	The number of samples from piped water systems with 5 connections or more in the community that were analyzed for radiological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABQ	Q76PUBLICWATERSYSTEMSNumberOfSamplesAnalysedForBacteriologicalParametersUsingPortableKit	Numeric	The number of samples from public water systems in the community that were analyzed for bacteriological parameters using a portable kit. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABR	Q76PUBLICWATERSYSTEMSNumberOfSamplesAnalysedForBacteriologicalParametersAccreditedLaboratory	Numeric	The number of samples from public water systems in the community that were analyzed for bacteriological parameters by an accredited laboratory. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
ABS	Q76PUBLICWATERSYSTEMSNumberOfSamplesAnalysedForProtozoaParameters	Numeric	The number of samples from public water systems in the community that were analyzed for protozoa parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABT	Q76PUBLICWATERSYSTEMSNumberOfSamplesAnalysedForChemicalParameters	Numeric	The number of samples from public water systems in the community that were analyzed for chemical parameters (routine and baseline). Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABU	Q76PUBLICWATERSYSTEMSNumberOfSamplesAnalysedForTHMParametersWhenRequire	Numeric	The number of samples from public water systems in the community that were analyzed for THM parameters when required. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABV	Q76PUBLICWATERSYSTEMSNumberOfSamplesAnalysedForRadiologicalParameters	Numeric	The number of samples from public water systems in the community that were analyzed for radiological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABW	Q76TRUCKEDWATERSYSTEMSNumberOfSamplesAnalysedForBacteriologicalParametersUsingPortableKit	Numeric	Number of samples from trucked water systems in the community that were analyzed for bacteriological parameters using a portable kit. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABX	Q76TRUCKEDWATERSYSTEMSNumberOfSamplesAnalysedForBacteriologicalParametersAccreditedLaboratory	Numeric	The number of samples from trucked water systems in the community that were analyzed for bacteriological parameters by an accredited laboratory. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABY	Q76TRUCKEDWATERSYSTEMSNumberOfSamplesAnalysedForProtozoaParameters	Numeric	The number of samples from trucked water systems in the community that were analyzed for protozoa parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ABZ	Q76TRUCKEDWATERSYSTEMSNumberOfSamplesAnalysedForChemicalParameters	Numeric	The number of samples from trucked water systems in the community that were analyzed for chemical parameters (routine and baseline). Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACA	Q76TRUCKEDWATERSYSTEMSNumberOfSamplesAnalysedForTHMParametersWhenRequir	Numeric	The number of samples from trucked water systems in the community that were analyzed for THM parameters when required. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACB	Q76TRUCKEDWATERSYSTEMSNumberOfSamplesAnalysedForRadiologicalParameters	Numeric	The number of samples from trucked water systems in the community that were analyzed for radiological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACC	Q76INDWATERSYSTEMSNumberSamplesAnalysedBacteriologicalParametersPortableKit	Numeric	The number of water samples from individual water systems in the community that were analyzed for bacteriological parameters using a portable kit. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACD	Q76INDWATERSYSTEMSNumberSamplesAnalysedBacteriologicalParametersAccreditedLaboratory	Numeric	The number of water samples from individual water systems in the community that were analyzed for bacteriological parameters by an accredited laboratory. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACE	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsWithFiveOrMoreConn	Numeric	The number of piped water systems with 5 or more connections in the community. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACF	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsMonitoredWeeklyForB	Numeric	The number of piped water systems with 5 or more connections in the community that were monitored weekly for bacteriological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.

Column #	Data Field	Response options	Description
ACG	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsMonitoredOnlyBiWeek	Numeric	The number of piped water systems with 5 or more connections in the community that were monitored only biweekly for bacteriological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACH	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsMonitoredOnlyMonthl	Numeric	The number of piped water systems with 5 or more connections in the community that were monitored only monthly for bacteriological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACI	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsNeverMonitoredForBa	Numeric	The number of piped water systems with 5 or more connections in the community that were never monitored for bacteriological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACJ	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsMonitoredForProtozo	Numeric	The number of piped water systems with 5 or more connections in the community that were monitored for protozoa parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACK	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsMonitoredForRoutine	Numeric	The number of piped water systems with 5 or more connections in the community that were monitored for routine chemical parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACL	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSysemsMonitoredForBaselin	Numeric	The number of piped water systems with 5 or more connections in the community that were monitored for baseline chemical parameters in the last 5 years. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACM	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsThatRequieQuarterly	Numeric	The number of piped water systems with 5 or more connections in the community that require quarterly monitoring for THMs. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACN	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsMonitoredQuaterlyFor	Numeric	The number of piped water systems with 5 or more connections in the community that were monitored quarterly for THMs when required. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACO	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsMonitoredForRadiolo	Numeric	The number of piped water systems with 5 or more connections in the community that were monitored for radiological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACP	Q76PIPEDWATERSYSTEMSWITHFIVECONNECTIONSORMORENumberOfPipedWaterSystemsMonitoredForRadiologicalParametersLastFiveYears	Numeric	The number of piped water systems with 5 or more connections in the community that were monitored for radiological parameters in the last 5 years. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACQ	Q76PWSNumberOfPublicWaterSystemsComm	Numeric	The number of public water systems in the community. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACR	Q76PWSNumberOfPublicWaterSystemsAtLeastQuarterlyForBiologicalParameters	Numeric	The number of public water systems in the community that were monitored at least quarterly (including weekly, biweekly and monthly monitoring) for bacteriological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.

Column #	Data Field	Response options	Description
ACS	Q76PWSNumberOfPublicWaterSystemsNeverMonitoredForBacteriologicalParameters	Numeric	The number of public water systems in the community that were never monitored for bacteriological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACT	Q76PWSNumberOfPublicWaterSystemsMonitoredForProtozoa	Numeric	The number of public water systems in the community that were monitored for protozoa parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACU	Q76PWSNumberOfPublicWaterSystemsMonitoredForRoutineChemicalParameters	Numeric	The number of public water systems in the community that were monitored for routine chemical parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACV	Q76PWSNumberOfPublicWaterSystemsMonitoredForBaselineChemicalParametersLastFive	Numeric	The number of public water systems in the community that were monitored for baseline chemical parameters in the last 5 years. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACW	Q76PWSNumberOfPublicWaterSystemRequireQuarterlyMonitoringTH	Numeric	The number of public water systems in the community that require quarterly monitoring for THMs. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACX	Q76PWSNumberOfPublicWaterSysemsMonitoredQuarterlyforTHMWhenRequired	Numeric	The number of public water systems in the community that were monitored quarterly for THMs when required. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACY	Q76PWSNumberOfPublicWaterSystemsMonitoredForRadiologicalP	Numeric	The number of public water systems in the community that were monitored for radiological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ACZ	Q76PWSNumberOfPublicWaterSystemsMonitoredForRadiologicalParametersInTheLastFiv	Numeric	The number of public water systems in the community that were monitored for radiological parameters in the last 5 years. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADA	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsCom	Numeric	The number of trucked water systems in the community. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADB	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsMonitoredAtLeastQuarterlyForBacteriologicalPar	Numeric	The number of trucked water systems in the community that were monitored at least quarterly (including weekly, biweekly and monthly monitoring) for bacteriological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADC	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsNeverMonitoredForBacteriologicalParameters	Numeric	The number of trucked water systems in the community that were never monitored for bacteriological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADD	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsMonitoredForProtozoa	Numeric	The number of trucked water systems in the community that were monitored for protozoa parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADE	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsMonitoredForRoutineChemicalParameters	Numeric	The number of trucked water systems in the community that were monitored for routine chemical parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADF	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsMonitoredForBaselineChemicalParametersInTheLastFiveYears	Numeric	The number of trucked water systems in the community that were monitored for baseline chemical parameters in the last 5 years. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Column #	Data Field	Response options	Description
ADG	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsMonitoredForTHMatThePlant	Numeric	The number of trucked water systems in the community that were monitored for THMs at the plant. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADH	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsRequireQuarterlyMonitoring	Numeric	The number of trucked water systems in the community that required quarterly monitoring for THMs. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADI	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsMonitoredQuarterlyTHMWhenRequited	Numeric	The number of trucked water systems in the community that were monitored for THMs when required. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADJ	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsMonitoredForRadiologicalParameters	Numeric	The number of trucked water systems in the community that were monitored for radiological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADK	Q76TRUCKEDWATERSYSTEMSNumberOfTruckedWaterSystemsMonitoredForRadiologicalParametersInLastFiveyears	Numeric	The number of trucked water systems in the community that were monitored for radiological parameters in the last 5 years. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADL	Q76INDWATERSYSTEMSNumberIndividualsWaterSystemsCommu	Numeric	The number of individual water systems in the community. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADM	Q76INDWATERSYSTEMSNumberIndividualsWaterSystemsMonitoredAtLeastOnceForBacteriologicalParameters	Numeric	The number of individual water systems in the community that were monitored at least once for bacteriological parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADN	Q76INDWATERSYSTEMSNumberIndividualsWaterSystemsMonitoredChemicalParameters	Numeric	The number of individual water systems in the community that were monitored for chemical parameters. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADO	Q76DRINKINGWATERQUALITYMONITORINGNumberOfAllWaterDistributinSystemsCommunityMonitoredBacteriologicalParametersOnlyByTrainedCBWM	Numeric	The number of all water distribution systems (piped, public, trucked and individual) in the community that were monitored for bacteriological parameters only by a trained community-based drinking water quality monitor. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADP	Q76DRINKINGWATERQUALITYMONITORINGNumberOfAllWaterDistributinSystemsCommunityMonitoredBacteriologicalParametersOnlyByEHO	Numeric	The number of all water distribution systems (piped, public, trucked and individual) in the community that were monitored for bacteriological parameters only by an environmental health officer. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADQ	Q76DRINKINGWATERQUALITYMONITORINGNumberOfAllWaterDistributinSystemsCommunityMonitoredBacteriologicalParametersOnlyByTrainedCBWMorEHO	Numeric	The number of all water distribution systems (piped, public, trucked and individual) in the community that were monitored for bacteriological parameters by a trained community-based drinking water quality monitor or an environmental health officer. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.

Appendix BB2. CBRT – Data Dictionary 2013-14 and 2014-15 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
ADR	Q76DRINKINGWATERQUALITYMONITORINGDoesCommunityHaveAccessToOnSiteTestKitsForBacteriologicalPara	0=No 1=Yes	The community had access to on-site test kits for bacteriological parameters (e.g., Colilert). Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADS	Q76DRINKINGWATERQUALITYMONITORINGDoesCommunityHaveAc	0=No 1=Yes	The community had access to chlorine residual test kits. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADT	Q76QANumberWaterDistributionSystemsSendingGETenPCTOfSamples	Numeric	The number of all water distribution systems (piped, public, trucked and individual) that sent at least 10% of samples to an accredited laboratory for bacteriological analyses. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADU	Q76QANumberWaterDistributionSystemsSendingBetweenFiveAndTenPCTOfSamples	Numeric	The number of all water distribution systems (piped, public, trucked and individual) that sent between 5 and 10% of samples to an accredited laboratory for bacteriological analyses. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADV	Q76QANumberWaterDistributionSystemsSendingLTFivePCTOfSampl	Numeric	The number of all water distribution systems (piped, public, trucked and individual) that sent less than 5% of samples to an accredited laboratory for bacteriological analyses. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADW	Q76DWINumberConfirmedCasesWaterbornellInessIdentifiedCommu	Numeric	The number of confirmed cases of waterborne illness identified in the community. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADX	Q76DWINumberLaboratoryConfirmedOutbreaksWaterboneDiseasesI	Numeric	The number of laboratory confirmed outbreaks of waterborne diseases identified in the community. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADY	Q76PANumberPublicAwarenessSessionsRelatedDrinkingWaterImplementedDelivereCommunities	Numeric	The number of public awareness sessions related to drinking water implemented or delivered to the community. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database.
ADZ	Q76PASpecifyTypeSessionSubjectFormatAudiencePublicAwareness	Text	The details for each type of public awareness session related to drinking water including: type of session, subject, format, and audience. Only asked of communities where the drinking water data collected by the environmental health officer was not available to Health Canada through a database, and where the community reported delivering public awareness sessions.

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
A	FiscYr	yy-yy	The fiscal year during which the data was collected. E.g., '13-14' indicates the fiscal year 2013-2014.
B	Region	ALB ATL BC MB ON QC SK	Region that the community is located in.
C	Agrnum	Text-Numeric	The contribution agreement number for the community.
D	BLFLTR	Block (Flexible or Flexible Transfer) CFNA Flexible Flexible (Transitional) Set	The highest type of funding model in the contribution agreement.
E	MultiCom	0=No 1=Yes	The services delivered in the Agreement were for multiple communities.
F	NumCom	Numeric	The number of communities that services were delivered to. Asked only of those communities that reported delivering services to multiple communities.
G	ComName	Text	The name of the community.
H	ReciNam	Text	The organization / recipient name(s) linked to the agreement number.
I	HFName	Text	The name of the Health Facility Name linked to the agreement number.
J	StarDate	YYYY-MM-DD	The starting date of the fiscal year.
K	EndDate	YYYY-MM-DD	The end date of the fiscal year.
L	Submby	Text	The name of the person who submitted the completed CBRT template.
M	SubmPosition	Text	The position of the person who submitted the completed CBRT template.
N	SubmDat	YYYY-MM-DD	The date when the completed CBRT template was submitted.
O	Authby	Text	The name of the person who authorized the completed CBRT template.
P	AuthPosition	Text	The position of the person who authorized the completed CBRT template.
Q	AuthDat	YYYY-MM-DD	The date of authorization of the completed CBRT Template.
R	Hpreg	0=No 1=Yes	Healthy Pregnancy and Early Infancy programs and services were provided in the community as part of the Healthy Child Development initiatives during the reporting year.
S	EarChDev	0=No 1=Yes	Early Childhood Development programs and services were provided in the community as part of the Healthy Child Development initiatives during the reporting year.
T	OralH	0=No 1=Yes	Oral Health programs and services were provided in the community as part of the Healthy Child Development initiatives during the reporting year.
U	MHeSuiPr	0=No 1=Yes	Mental Health and Suicide Prevention programs and services were provided in the community as part of the Mental Wellness initiatives during the reporting year.
V	SubAbuPr	0=No 1=Yes	Substance Abuse Prevention programs and services were provided in the community as part of the Mental Wellness initiatives during the reporting year.
W	ChrDisPr	0=No 1=Yes	Chronic Disease Prevention and Management programs and services were provided in the community as part of the Healthy Living initiatives during the reporting year.
X	InjPrev	0=No 1=Yes	Injury Prevention programs and services were provided in the community as part of the Healthy Living initiatives during the reporting year.
Y	Immuni	0=No 1=Yes	Vaccine-preventable Diseases and Immunization programs and services were provided in the community as part of the Communicable Disease Control and Management initiatives during the reporting year.
Z	BlBoDis	0=No 1=Yes	Blood-Borne Disease and Sexually Transmitted Infections programs and services were provided in the community as part of the Communicable Disease Control and Management intitiatives during the reporting year.
AA	RespInf	0=No 1=Yes	Respiratory Infections programs and services were provided in the community as part of the Communicable Disease Control and Management initiatives during the reporting year.
AB	ComDisEm	0=No 1=Yes	Communicable Disease Emergencies programs and services were provided in the Communicable Disease Control and Management initiatives during the reporting year.

AC	HomComCar	0=No 1=Yes	Home and Community Care programs and services were provided in the community during the reporting year.
AD	ClinClCar	0=No 1=Yes	Clinical and Client Care services* were provided in the community during the reporting year. *Clinical and Client Care services are defined as a nursing station or Health Centre with Treatment providing clinical and treatment services 24 hours a day either 5 or 7 days per week.
AE	CCCServ	0=No 1=Yes	Clinical and Client Care services provided in the community during the reporting year were provided by Health Canada. Asked only of those communites that reported having Clinical and Client Care services.
AF	EnvPubHea	0=No 1=Yes	Environmental Public Health programs and services were provided in the community during the reporting year.
AG	FTHealthManager	Numeric	The number of Full-Time Health Managers in the community at the end of the reporting year.
AH	FTBENP	Numeric	The number of Full-Time Band employed nurse practitioners in the community at the end of the reporting year.
AI	FTBDRN	Numeric	The number of Full-Time Band employed registered nurses in the community at the end of the reporting year.
AJ	FTBDLPN	Numeric	The number of Full-Time Band employed licensed practical nurses in the community at the end of the reporting year.
AK	FTHCENP	Numeric	The number of Full-Time Health Canada employed nurse practitioners in the community at the end of the reporting year.
AL	FTHCERN	Numeric	The number of Full-Time Health Canada employed registered nurses in the community at the end of the reporting year.
AM	FTHCELPN	Numeric	The number of Full-Time Health Canada employed licensed practical nurses in the community at the end of the reporting year.
AN	FTCBPOtherLicenced	Numeric	The number of Full-Time Other licensed or regulated Health Care Professionals in the community at the end of the reporting year.
AO	FTCBNNADAP	Numeric	The number of Full-Time Community-based health workers (e.g., CHR, NNADAP, ADI, AHSOR, CPNP, MCH Home Visitors, FASD Community Coordinators and Mentors, HCC Personal Care Workers, Youth Worker, Mental Health Worker) in the community at the end of the reporting year.
AP	FTCBAdmJanit	Numeric	The number of Full-Time Administrative, janitorial and housekeeping staff working in health facilities and for health programs in the community at the end of the reporting year.
AQ	PTHealthManager	Numeric	The number of Part Time Health Managers in the community at the end of the reporting year.
AR	PTBENP	Numeric	The number of Part-Time and visiting Band employed nurse practitioners in the community at the end of the reporting year.
AS	PTBDRN	Numeric	The number of Part-Time and visiting Band employed registered nurses in the community at the end of the reporting year.
AT	PTBDLPN	Numeric	The number of Part-Time and visiting Band employed licensed practical nurses in the community at the end of the reporting year.
AU	PTHCENP	Numeric	The number of Part-Time and visiting Health Canada employed nurse practitioners in the community at the end of the reporting year.
AV	PTHCERN	Numeric	The number of Part-Time and visiting Health Canada employed registered nurses in the community at the end of the reporting year.
AW	PTHCELPN	Numeric	The number of Part-Time and visiting Health Canada employed licensed practical nurses in the community at the end of the reporting year.
AX	PTCBPOtherLicenced	Numeric	The number of Part-Time and visiting Other licensed or regulated Health Care Professionals in the community at the end of the reporting year.
AY	PTCBNNADAP	Numeric	The number of Part-Time and visiting Community-based health workers (e.g., CHR, NNADAP, ADI, AHSOR, CPNP, MCH Home Visitors, FASD Community Coordinators and Mentors, HCC Personal Care Workers, Youth Worker, Mental Health Worker) in the community at the end of the reporting year.
AZ	PTCBAdmJanit	Numeric	The number of Part-Time and visiting Administrative, janitorial and housekeeping staff working in health facilities and for health programs in the community at the end of the reporting year.
BA BB BC BD BE BF BG BH	The variables and associated data for"Worker Information" are not included in this dataset.		
BI	Q1NutDiet	0=No 1=Yes	Nutrition or dietary screening activities and services were provided as part of the Pre and Postnatal Nutrition activities in the community.
BJ	Q1OneNutEdu	0=No 1=Yes	One-on-one nutrition counselling/education services were provided as part of the Pre and Postnatal Nutrition activities in the community.
BK	Q1GrNutEdu	0=No 1=Yes	Group nutrition counselling/education services were provided as part of the Pre and Postnatal Nutrition activities in the community.
BL	Q1BabyFoo	0=No 1=Yes	Baby food making workshops/classes were provided as part of the Pre and Postnatal Nutrition activities in the community.
BM	Q1GrocSto	0=No 1=Yes	Grocery store tours were provided as part of the Pre and Postnatal Nutrition activities in the community.
BN	Q1FooVou	0=No 1=Yes	Food vouchers were distributed as part of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.
BO	Q1CommKit	0=No 1=Yes	Community kitchens/community cooking classes were provided as part of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.
BP	Q1FooBoxGr	0=No 1=Yes	Food boxes or groceries were distributed as part of of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.

Appendix BB3. CBRT – Data Dictionary 2015-16 through 2017-18 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
BQ	Q1CommGar	0=No 1=Yes	Community gardens were part of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.
BR	Q1TradFoo	0=No 1=Yes	Traditional food gathering/distribution/preparation activities were provided as part of the Maternal Nourishment aspect of the Pre and Postnatal Nutrition activities in the community.
BS	Q1EducWork	0=No 1=Yes	Breastfeeding education workshops were delivered as part of the Pre and Postnatal Nutrition activities in the community.
BT	Q1OneBrSup	0=No 1=Yes	One-on-one breastfeeding support was provided as part of the Pre and Postnatal Nutrition activities in the community.
BU	Q1GrBrSup	0=No 1=Yes	Group breastfeeding support was provided as part of the Pre and Postnatal Nutrition activities in the community.
BV	Q1PeerSup	0=No 1=Yes	Breastfeeding peer support programs were provided as part of the Pre and Postnatal Nutrition activities in the community.
BW	Q1SuppEle	0=No 1=Yes	Supportive Elements that address specific needs of at-risk clients (i.e., transportation, child care, etc.) were delivered in the community as part of the Pre and Postnatal Nutrition activities.
BX	Q2FirstTrim	Numeric	The number of pregnant women served by pre and postnatal nutrition programming in the community during the reporting year who first received these services in their 1st trimester (0-12 weeks).
BY	Q2SecondTrim	Numeric	The number of pregnant women served by pre and postnatal nutrition programming in the community during the reporting year who first received these services in their 2nd trimester (13-26 weeks).
BZ	Q2ThirdTrim	Numeric	The number of pregnant women served by pre and postnatal nutrition programming in the community during the reporting year who first received these services in their 3rd trimester (27-40 weeks)
CA	Q2AfterBirth	Numeric	The number of pregnant women served by pre and postnatal nutrition programming in the community during the reporting year who first received these services after they had given birth (with an infant or infants 0-12 months of age).
CB	Q3NumbPartMoth	Numeric	The total number of participating mothers enrolled in healthy pregnancy programs with babies who turned six months during the reporting year.
CC	Q3BrFedLTTwoATLANTIC	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for at least 2 months. This data applies to the Atlantic region only as communities in this region use a different format for reporting of breastfeeding initiation and duration.
CD	QB3BrFedLTFourATLANTIC	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for at least 4 months. This data applies to the Atlantic region only as communities in this region use a different format for reporting of breastfeeding initiation and duration.
CE	Q3MothersWhoInintiatedBreastfeedingATLANTIC	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who initiated breast feeding. This data applies to the Atlantic region only as communities in this region use a different format for reporting of breastfeeding initiation and duration.
CF	Q3BrFedLThree	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for less than 3 months (less than 15 weeks).
CG	Q3BrFedLTTHree	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for longer than 3 months and less than 6 months (15 weeks to 23 weeks).
CH	Q3BrFedSixMo	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for 6 months (24 weeks to 27 weeks).
CI	Q3BrFedLTSixMo	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older and who breast fed for longer than 6 months (28 weeks or more).
CJ	Q3DidNotBrFeed	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older who did not initiate breastfeeding.
CK	Q3Unknown	Numeric	The number of mothers enrolled in healthy pregnancy programs with babies 6 months or older for whom it was unknown if breastfeeding was initiated.
CL	Q4TotPregConc	Numeric	The total number of participants in healthy pregnancy programs whose pregnancies concluded during the reporting year.
CM	Q4MatAgeLTTwenty	Numeric	The number of women with a maternal age less than 20 years among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
CN	Q4MatAgeGEThirtyFive	Numeric	The number of women with a maternal age of 35 years or older among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
CO	Q4SmokDurPreg	Numeric	The number of women that smoked during pregnancy among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
CP	Q4DrugSolvDuringPreg	Numeric	The number of women that used drugs or solvents during pregnancy among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
CQ	Q4AlcoholDuringPreg	Numeric	The number of women that consumed alcohol during pregnancy among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
CR	Q4DiabetesPriortoPreg	Numeric	The number of women diagnosed with diabetes before pregnancy among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
CS	Q4DiabetesDuringPreg	Numeric	The number of women diagnosed with diabetes during pregnancy (gestational diabetes) among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
CT	Q4PrevPostPartumMoodDis	Numeric	The number of women with a previous diagnosis of post-partum mood disorders among those women enrolled in healthy pregnancy programs and whose pregnancies concluded during the reporting year.
CU	Q5TotNumbBabyBorn	Numeric	The total number of babies born to mothers who lived in the community during the reporting year.
CV	Q6FTLTTwentyFiveHundredGr	Numeric	The number of full term babies weighing less than 5 lb 9 oz (less than 2500 g) born to women enrolled in healthy pregnancy programs during the reporting year.

Appendix BB3. CBRT – Data Dictionary 2015-16 through 2017-18 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
CW	Q6FTBETTwentyFiveHundredGrFourThousandGr	Numeric	The number of full term babies weighing between 5 lb 9 oz and 8 lb 11 oz (2500 g - 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
CX	Q6FTGTFourThousandGr	Numeric	The number of full term babies weighing more than 8 lb 11 oz (more than 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
CY	Q6FTWeightUnknown	Numeric	The number of full term babies with birth weight unknown born to women enrolled in healthy pregnancy programs during the reporting year.
CZ	Q6PTLTTwentyFiveHundredGr	Numeric	The number of pre-term babies weighing less than 5 lb 9 oz (less than 2500 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DA	Q6PTBETTwentyFiveHundredGrFourThousandGr	Numeric	The number of pre-term babies weighing between 5 lb 9 oz and 8 lb 11 oz (2500 g - 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DB	Q6PTGTFourThousandGr	Numeric	The number of pre-term babies weighing more than 8 lb 11 oz (more than 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DC	Q6PTWeightUnknown	Numeric	The number of pre-term babies with birth weight unknown born to women enrolled in healthy pregnancy programs during the reporting year.
DD	Q6UTLTTwentyFiveHundredGr	Numeric	The number of unknown term babies weighing less than 5 lb 9 oz (less than 2500 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DE	Q6UTBETTwentyFiveHundredGrFourThousandGr	Numeric	The number of unknown term babies weighing between 5 lb 9 oz and 8 lb 11 oz (2500 g - 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DF	Q6UTGTFourThousandGr	Numeric	The number of unknown term babies weighing more than 8 lb 11 oz (more than 4000 g) born to women enrolled in healthy pregnancy programs during the reporting year.
DG	Q6UTWeightUnknown	Numeric	The number of unknown term babies with birth weight unknown born to women enrolled in healthy pregnancy programs during the reporting year.
DH	Q7InitBefSixMonths	Numeric	The number of infants who turned 6 months during the reporting year and had solid foods initiated before 6 months
DI	Q7InitAtSixMonths	Numeric	The number of infants who turned 6 months during the reporting year and had solid foods initiated at 6 months
DJ	Q7InitAfterSixMonths	Numeric	The number of infants who turned 6 months during the reporting year and had solid foods initiated after 6 months.
DK	Q7InitUnknown	Numeric	The number of infants who turned 6 months during the reporting year and for whom the time of initiation to solid foods was unknown.
DL	Q8RiskFactPregWom	0=No 1=Yes	Screening and assessments for risk factors in pregnant women and new mothers (e.g., post partum depression, chronic conditions such as Type 2 diabetes, gestational diabetes, and tobacco/alcohol/drug/solvent use) were delivered as part of the Maternal and Child Health Screening and Assessment initiatives during the reporting year.
DM	Q8RiskFactDevelopMilestones	0=No 1=Yes	Screening and assessments for risk factors for developmental milestones for infants and children were delivered as part of the Maternal and Child Health Screening and Assessment initiatives during the reporting year.
DN	Q8VisionHearDental	0=No 1=Yes	Vision/hearing/dental screenings or assessments for referrals were delivered as part of the Maternal and Child Health Screening and Assessment initiatives during the reporting year.
DO	Q9TotaReceivHomeVisits	Numeric	The total number of participants who received home visits as part of the maternal and child health home visiting and case management programming provided by the community during the reporting year. Participant is defined as the primary contact for services.
DP	Q9TotalReceivCaseManagement	Numeric	The total number of participants who received case management services as part of the maternal and child health home visiting and case management programming provided by the community during the reporting year. Participant is defined as the primary contact for services.
DQ	Q10FirstTrimester	Numeric	The number of pregnant women who received home visits through maternal and child health programming provided by the community during the reporting year and who received their first home visit in their 1st trimester.
DR	Q10SecondTrimester	Numeric	The number of pregnant women who received home visits through maternal and child health programming provided by the community during the reporting year and who received their first home visit in their 2nd trimester.
DS	Q10ThirdTrimester	Numeric	The number of pregnant women who received home visits through maternal and child health programming provided by the community during the reporting year and who received their first home visit in their 3rd trimester.
DT	Q10Postnatal	Numeric	The number of women who received home visits through maternal and child health programming provided by the community during the reporting year and who received their first home visit within 6 months of giving birth (postnatal).
DU	Q11CommuCapaBuildAct	0=No 1=Yes	Fetal Alcohol Spectrum Disorder community capacity building activities (i.e. awareness and prevention activities, and development of action plans) were delivered by the community during the reporting year.
DV	Q11CommuCoordinaCaseManag	0=No 1=Yes	Fetal Alcohol Spectrum Disorder community coordination or case management services were delivered by the community during the reporting year.
DW	Q11Mentoring	0=No 1=Yes	Fetal Alcohol Spectrum Disorder mentoring services were delivered by the community during the reporting year.

Appendix BB3. CBRT – Data Dictionary 2015-16 through 2017-18 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
DX	Q11CommunityCoordinationCaseMgmnt	Numeric	The number of participants that received Fetal Alcohol Spectrum Disorder community coordination services or case management services during the reporting year.
DY	Q11NumMentoring	Numeric	The number of participants that received Fetal Alcohol Spectrum Disorder mentoring services during the reporting year.
DZ	Q12NumberCommunitiesServed	Numeric	The number of communities served by the Aboriginal Head Start On Reserve program delivered by the community.
EA	Q12ProgramOfferOutreachHomeVisit	0=No 1=Yes	The Aboriginal Head Start On Reserve program delieved by the community offers outreach/home visiting.
EB	Q12AHSORsiteCentreBased	0=No 1=Yes	The Aboriginal Head Start On Reserve program site in the community is centre-based.
EC	Q12AHSORProgramLicensed	0=No 1=Yes	The Aboriginal Head Start On Reserve (AHSOR) program in the community is licensed. Only asked of those communities that reported that their AHSOR site was centre-based.
ED	Q12NumberFullDaysWeek	Numeric	The number of full days per week that the centre-based Aboriginal Head Start On Reserve (AHSOR) program in the community operates. Only asked of those communities that reported that their AHSOR site was centre-based.
EE	Q12NumberHalfDaysWeek	Numeric	The number of half days per week that the centre-based Aboriginal Head Start On Reserve (AHSOR) program in the community operates. Only asked of those communities that reported that their AHSOR site was centre-based.
EF	Q12AHSORProgCoLocated	0=No 1=Yes	The Aboriginal Head Start On Reserve (AHSOR) program in the community is co-located. Only asked of those communities that reported that their AHSOR site was centre-based.
EG	Q12AHSORProgCoLocatedSchool	0=No 1=Yes	The Aboriginal Head Start On Reserve (AHSOR) program in the community is co-located with a school or daycare facility. Only asked of those communities that reported that their AHSOR was centre-based and co-located.
EH	Q13TeachingChildrenLanguage	0=No 1=Yes	Teaching children their First Nation language(s) was an activity provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EI	Q13TradCeremonies	0=No 1=Yes	Traditional ceremonies and activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EJ	Q13EarlyLiteracySkills	0=No 1=Yes	Early literacy skills activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EK	Q13FineGrossMotor	0=No 1=Yes	Fine and gross motor development activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EL	Q13ProvHealthyFoods	0=No 1=Yes	Healthy foods (snacks and/or lunches) were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EM	Q13PersonalHygieneDental	0=No 1=Yes	Healthy personal hygiene and dental habits activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EN	Q13PhysicalActivity	0=No 1=Yes	Physical activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EO	Q13Linkages	0=No 1=Yes	Linkages (including referrals and collaborations) to professionals and community supports and providers (e.g., housing, education, specialists) were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EP	Q13ParentAndFamily	0=No 1=Yes	Parent and family support activities were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
EQ	Q13VisitsHealthProfess	0=No 1=Yes	Visits from health professionals (e.g., nurses and dental hygienists) were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
ER	Q13SafetyEducAwar	0=No 1=Yes	Safety education and awareness activities (e.g., play ground safety, car seat technician training, car seat use, seat belt use, bike safety, etc.) were provided by the Aboriginal Head Start On Reserve program in the community during the reporting year.
ES	Q14ChildrenLTThreeCB	Numeric	The number of children younger than 3 years old that participated in Centre-based Aboriginal Head Start On Reserve programming in the community.
ET	Q14ChildrenLTThreeOutrHomeVisit	Numeric	The number of children younger than 3 years old that participated in Outreach/Home visiting Aboriginal Head Start On Reserve programming in the community.
EU	Q14ChildrenLTThreeProgKeepWaitingListYorN	0=No 1=Yes	The Aboriginal Head Start On Reserve program in the community keeps a waiting list for children younger than 3 years old.
EV	Q14ChildrenLTThreeIfYesNumbOfChildrenOnWaitingList	Numeric	The number of children younger than 3 years old that are on the waiting list. Asked only of those communities that reported having a waiting list for children younger than 3 years old for the Aboriginal Head Start On Reserve program.
EW	Q14ChildrenThreeToSixCB	Numeric	The number of children 3-6 years old that participated in Centre-based Aboriginal Head Start On Reserve programming in the community.

Appendix BB3. CBRT – Data Dictionary 2015-16 through 2017-18 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
EX	Q14ChildrenThreeToSixOutrHomeVisit	Numeric	The number of children 3-6 years that participated in Outreach/Home visiting Aboriginal Head Start On Reserve programming in the community.
EY	Q14ChildrenThreeToSixProgKeepWaitingListYorN	0=No 1=Yes	The Aboriginal Head Start On Reserve program in the community keeps a waiting list for children 3-6 years old.
EZ	Q14ChildrenThreeToSixIfYesNumbOfChildrenOnWaitingList	Numeric	The number of children 3-6 years old that are on the waiting list. Asked only of those communities that reported having a waiting list for children 3-6 years old for the Aboriginal Head Start On Reserve program.
FA	Q15CBNumbChildrenDiagnSpNeeds	Numeric	The number of children participating in a centre-based Aboriginal Head Start On Reserve program who were diagnosed with special needs during the reporting year.
FB	Q15CBNumbChildrenScreenedAssessedSpNeeds	Numeric	The number of children participating in a centre-based Aboriginal Head Start On Reserve program who were screened/assessed for special needs during the reporting year.
FC	Q15CBNumbChildrenReferResources	Numeric	The number of children participating in a centre-based Aboriginal Head Start On Reserve program who were referred to other resources (e.g., nurses, doctors, specialists, etc.) for special needs support or diagnosis during the reporting year.
FD	Q15CBNumberOnWaitListForDiagnAssessment	Numeric	The number of children participating in a centre-based Aboriginal Head Start On Reserve program who were on a wait list for special needs diagnostic assessment at the end of the reporting year.
FE	Q15OUTRHVNumbChildrenDiagnSpNeeds	Numeric	The number of children participating in an outreach/home visiting Aboriginal Head Start On Reserve program who were diagnosed with special needs during the reporting year.
FF	Q15OUTRHVNumbChildrenScreenedAssessedSpNeeds	Numeric	The number of children participating in an outreach/home visiting Aboriginal Head Start On Reserve program who were screened/assessed for special needs during the reporting year.
FG	Q15OUTRHVNumbChildrenReferResources	Numeric	The number of children participating in an outreach/home visiting Aboriginal Head Start On Reserve program who were referred to other resources (e.g., nurses, doctors, specialists, etc.) for special needs support or diagnosis during the reporting year.
FH	Q15OUTRHVNumberOnWaitListForDiagnAssessment	Numeric	The number of children participating in an outreach/home visiting Aboriginal Head Start On Reserve program who were on a wait list for diagnostic assessment at the end of the reporting year.
FI	Q16NPFPDaily	Numeric	The number of parent/family participants involved on a daily basis in centre-based Aboriginal Head Start On Reserve programs.
FJ	Q16NPFPWeekly	Numeric	The number of parent/family participants involved on a weekly basis in centre-based Aboriginal Head Start On Reserve programs.
FK	Q16NPFPMonthlySpecialOccasions	Numeric	The number of parent/family participants involved on a monthly basis or on special occasions in centre-based Aboriginal Head Start On Reserve programs.
FL	Q16NPFPTotal	Numeric	The total number of parent/family participants in centre-based Aboriginal Head Start On Reserve programs.
FM	Q17CHildLTFiveTotalNumbCommuni	Numeric	The total number of children less than 5 years of age living in the community.
FN	Q17ChildLTFiveParticInCOHI	Numeric	The number of children less than 5 years of age living in the community that participated in Children's Oral Health Initiative activities during the reporting year.
FO	Q17aCHildFiveToSevenTotalNumbCommuni	Numeric	The total number of children 5 to 7 years of age living in the community.
FP	Q17aChildFiveToSevenParticInCOHI	Numeric	The number of children 5 to 7 years of age living in the community that participated in Children's Oral Health Initiative activities during the reporting year.
FQ	Q17bNumbPrenatalOneOnOneOralHealth	Numeric	The number of prenatal clients in the community that participated in an individual session on oral health during the reporting year as part of the Children's Oral Health Initiative activities.
FR	Q17bNumbPrenatalOralPresentations	Numeric	The number of individuals in the community that attended prenatal presentations on oral health during the reporting year as part of the Children's Oral Health Initiative activities.
FS	Q17bNumbGrOralHealthPresProvided	Numeric	The number of group oral health presentations provided in the community during the reporting year as part of the Children's Oral Health Initiative activities.
FT	Q18RHAHSZNutritionDietician	0=No 1=Yes	Nutritionist/Dietician services were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
FU	Q18RHAHZNPhysicalActivityRecreation	0=No 1=Yes	Physical Activity/Recreation services were provided in the community via a Healthy Child Development service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.

Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
MZ	Q30RHAHSZSpecialistCare	0=No 1=Yes	Specialist care services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NA	Q30RHAHSZInjuryPrevention	0=No 1=Yes	Injury prevention services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NB	Q30RHAHSZTreatmentManagement	0=No 1=Yes	Treatment/management services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NC	Q30RHAHSZDiagnosticsScreening	0=No 1=Yes	Diagnostics/screening services were provided in the community via a Healthy Living service linkage between community health staff and the Regional Health Authority/Health Service Zone during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
ND	Q30EOHealthyEatingNutrition	0=No 1=Yes	Healthy eating/nutrition services were provided in the community via a Healthy Living service linkage between community health staff and Educational Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NE	Q30EOPhysicalActivityRecreation	0=No 1=Yes	Physical activity/recreation services were provided in the community via a Healthy Living service linkage between community health staff and Educational Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NF	Q30EOSpecialistCare	0=No 1=Yes	Specialist care services were provided in the community via a Healthy Living service linkage between community health staff and Educational Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NG	Q30EOInjuryPrevention	0=No 1=Yes	Injury prevention services were provided in the community via a Healthy Living service linkage between community health staff and Educational Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NH	Q30EOTreatmentManagement	0=No 1=Yes	Treatment/Management services were provided in the community via a Healthy Child Development service linkage between community health staff and Educational Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NI	Q30EODiagnosticsScreening	0=No 1=Yes	Diagnostics/Screening services were provided in the community via a Healthy Child Development service linkage between community health staff and Educational Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NJ	Q30NPOHealthyEatingNutrition	0=No 1=Yes	Healthy eating/nutrition services were provided in the community via a Healthy Living service linkage between community health staff and Non-Profit Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NK	Q30NPOPhysicalActivityRecreation	0=No 1=Yes	Physical Activity/Recreation services were provided in the community via a Healthy Child Development service linkage between community health staff and Non-Profit Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NL	Q30NPOspecialistCare	0=No 1=Yes	Specialist Care was provided in the community via a Healthy Child Development service linkage between community health staff and Non-Profit Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NM	Q30NPOInjuryPrevention	0=No 1=Yes	Injury prevention services were provided in the community via a Healthy Living service linkage between community health staff and Non-Profit Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NN	Q30NPOTreatmentManagement	0=No 1=Yes	Treatment/Management services were provided in the community via a Healthy Child Development service linkage between community health staff and Non-Profit Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NO	Q30NPODiagnosticsScreening	0=No 1=Yes	Diagnostics/Screening services were provided in the community via a Healthy Child Development service linkage between community health staff and Non-Profit Organizations during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.

Appendix BB3. CBRT – Data Dictionary 2015-16 through 2017-18 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
NP	Q30PROHealthyEatingNutrition	0=No 1=Yes	Healthy eating/nutrition services were provided in the community via a Healthy Living service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NQ	Q30PROPhysicalActivityRecreation	0=No 1=Yes	Physical activity/recreation services were provided in the community via a Healthy Living service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NR	Q30PROspecialistCare	0=No 1=Yes	Specialist care services were provided in the community via a Healthy Living service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NS	Q30PROInjuryPrevention	0=No 1=Yes	Injury prevention services were provided in the community via a Healthy Living service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NT	Q30PROTreatmentManagement	0=No 1=Yes	Treatment/management services were provided in the community via a Healthy Living service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NU	Q30PRODiagnosticsScreening	0=No 1=Yes	Diagnostics/screening services were provided in the community via a Healthy Living service linkage between community health staff and Provincial Services during the reporting year. Service linkages can be formal or informal arrangements, collaborations, or processes with external individuals and organizations to facilitate the delivery of health services.
NV	Q31aDiabetesTrackingToolChronicDiseaseRegistryT1T2	0=No 1=Yes	A diabetes tracking tool, chronic disease registry, or other tracking system was used to track clients living with type 1 and type 2 diabetes or other chronic diseases in the community.
NW	Q31bType1	Numeric	The number of individuals in the community living with type 1 diabetes according to the tracking system used by the community. Asked only of those communities that reported using a tracking tool, chronic disease registry, or other tracking system for type 1 and type 2 diabetes or other chronic diseases.
NX	Q31bType2	Numeric	The number of individuals in the community living with type 2 diabetes according to the tracking system used by the community. Asked only of those communities that reported using a tracking tool, chronic disease registry, or other tracking system for type 1 and type 2 diabetes or other chronic diseases.
NY	Q31cWasTrackingToolProvided	0=No 1=Yes	The tracking tool used by the community to track diabetes was provided by Health Canada. Asked only of those communities that reported using a tracking tool, chronic disease registry, or other tracking system for type 1 and type 2 diabetes or other chronic diseases.
NZ	Q31dProvideNameTrackingTool	Text	Name of the Health Canada tracking tool used by the community to track diabetes. Asked only of those communities that reported using a Health Canada tracking tool, chronic disease registry, or other tracking system for type 1 and type 2 diabetes or other chronic diseases.
OA	Q31eTrackingToolHL	-2=Strongly Disagree -1=Disagree 1=Neutral 2=Agree 3=Strongly Agree	The tracking tool(s) was useful in tracking work in Healthy Living. Asked only of those communities that reported using a Health Canada tracking tool, chronic disease registry, or other tracking system for type 1 and type 2 diabetes or other chronic diseases.
OB	Q31fTrackingToolHLCompletionCBRT	-2=Strongly Disagree -1=Disagree 1=Neutral 2=Agree 3=Strongly Agree	The tracking tool(s) aided in the completion of the CBRT. Asked only of those communities that reported using a Health Canada tracking tool, chronic disease registry, or other tracking system for type 1 and type 2 diabetes or other chronic diseases.
OC	Q31gTrackingToolUsefulActivitiesAreasHL	-2=Strongly Disagree -1=Disagree 1=Neutral 2=Agree 3=Strongly Agree	The tracking tool(s) was useful across activity areas. Asked only of those communities that reported using a Health Canada tracking tool, chronic disease registry, or other tracking system for type 1 and type 2 diabetes or other chronic diseases.
OD	Q32NumberPeopleWorkCDCMCommunity	Numeric	The number of health care workers working in Communicable Disease Control and Management (CDCM) in the community.
OE OF OG OH OI OJ OK OL	While the heading "CDCM Worker Info" is present in the dataset, the actual variables and data for this topic are not included.		
OM	Q34HIVAIDSBloodBorneSTIs	Numeric	The number of HIV/AIDS-blood borne and sexually transmitted infections awareness and education activities conducted in the community.

Appendix BB3. CBRT – Data Dictionary 2015-16 through 2017-18 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
ON	Q34TB	Numeric	The number of tuberculosis awareness and education activities conducted in the community.
OO	Q34Immunization	Numeric	The number of immunization awareness and education activities conducted in the community.
OP	Q34PandemicPlanning	Numeric	The number of pandemic planning awareness and education activities conducted in the community.
OQ	Q34InfectionPreventionControl	Numeric	The number of infection prevention and control awareness and education activities conducted in the community.
OR	Q35FNIHBNationalOffice	0=No 1=Yes	A health status report that included data on communicable diseases was received by the community from the First Nations and Inuit Health Branch national office.
OS	Q35FNIHRegionalOffice	0=No 1=Yes	A health status report that included data on communicable diseases was received by the community from the First Nations and Inuit Health Branch regional office.
OT	Q35Province	0=No 1=Yes	A health status report that included data on communicable diseases was received by the community from the Province.
OU	Q35DistrictRHA	0=No 1=Yes	A health status report that included data on communicable diseases was received from the District/Regional Health Authority.
OV	Q35Other	0=No 1=Yes	A health status report that included data on communicable diseases was received from Other Organization.
OW	Q36bReportReceivedInformationSpecific	0=No 1=Yes	The community received a health status report that included data on communicable diseases, and information that was specific to the community. Asked only of those communities that reported receiving a health status report on communicable diseases.
OX	Q36cUseReportProgrammingDecisions	0=No 1=Yes	The community used the health status report that included data on communicable diseases for programming decisions in the community. Asked only of those communities that reported receiving a health status report on communicable diseases.
OY	Q37BriefDescription	Text	A brief description of either a) how the health status report that included data on communicable diseases was used by the community, or b) why the health status report was not used by the community.
OZ	Q37aCommunityPandemicPlan	0=No 1=Yes	The community had a pandemic plan as part of its Communicable Disease Control and Management initiatives.
PA	Q37bCommunityPandemicPlanLastUpdated	YYYY-MM-DD	The date that the Pandemic Plan was last updated. Asked only of those communities that reported having a pandemic plan.
PB	Q37cCommunityTestedPandemicPlanEngagingAppropriateStakeholders	0=No 1=Yes	The community has tested the Pandemic Plan engaging the appropriate stakeholders as identified in the plan. Asked only of those communities that reported having a pandemic plan.
PC	Q37dCommunityPlanTestedDate	YYYY-MM-DD	The date that the Pandemic Plan was last tested. Asked only of those communities that had tested the plan engaging the appropriate stakeholders as identified in the plan.
PD	Q37eCommunityAllHazardsEmergencyPlan	0=No 1=Yes	The community had an all hazards emergency plan. Asked only of those communities that reported having a pandemic plan.
PE	Q37fCommunityPlanBeenIntegratedEmergencyManagementPlan	0=No 1=Yes	The community Pandemic Plan has been integrated with the Emergency Management Plan. Asked only of those communities that reported having an all hazards emergency plan.
PF	Q38ImmunizationCoverageReportFormCompletedSubmittedReportingTemplate	0=No 1=Yes	The immunization coverage report form was completed and submitted with the CBRT reporting template by the community.
PG	Q39NANoProvincailTBPreventionControlPrograms	0=No 1=Yes	The community did not use tuberculosis clinical, treatment, health promotion, or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs because these programs were not available.
PH	Q39YESCommunityAvailableExpertiseResources	0=No 1=Yes	The community made use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
PI	Q39NOCommunityDoesNotMakeAvailableExpertiseResources	0=No 1=Yes	The community did not make use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.

Appendix BB3. CBRT – Data Dictionary 2015-16 through 2017-18 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
PJ	Q39ProgramDevelopment	0=No 1=Yes	The community used program development expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
PK	Q39ProgramImplementation	0=No 1=Yes	The community used program implementation expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
PL	Q39ProgramEvaluation	0=No 1=Yes	The community used program evaluation expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
PM	Q39Research	0=No 1=Yes	The community used research expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
PN	Q39ClinicalAdvice	0=No 1=Yes	The community used clinical advice expertise/resources from the available provincial or territorial tuberculosis prevention and control programs. Asked only of those communities that reported making use of the available tuberculosis clinical, treatment, health promotion, and/or public health expertise and resources from the provincial or territorial tuberculosis prevention and control programs.
PO	Q40HIVTestingAccessibleOnOrNearReserve	0=No 1=Yes	HIV testing was accessible on or near the reserve.
PP	Q40HIVTreatmentAccessibleOnOrNearReserve	0=No 1=Yes	HIV treatment was accessible on or near the reserve.
PQ	Q41HIVAIDSSupportGroupsCommunity	0=No 1=Yes	HIV/AIDS support groups were available in the community.
PR	Q41LimitedFunding	0=No 1=Yes	The community did not have HIV/AIDS support groups because of limited funding. Asked only of those communities that did not have HIV/AIDS support groups.
PS	Q41InsufficientCapacityEstablishLeadSupportGroups	0=No 1=Yes	The community did not have HIV/AIDS support groups because of an insufficient capacity to establish and lead support groups. Asked only of those communities that did not have HIV/AIDS support groups.
PT	Q41NeedSupportGroupsNotIdentified	0=No 1=Yes	The community did not have HIV/AIDS support groups because the need for support groups was not identified. Asked only of those communities that did not have HIV/AIDS support groups.
PU	Q41IndividualsHIVPreferNotToInvolveHealthCentreStaff	0=No 1=Yes	The community did not have HIV/AIDS support groups because individuals with HIV prefer not to involve health centre staff in their follow-up. Asked only of those communities that did not have HIV/AIDS support groups.
PV	Q41IndividualsHIVPreferAccessServicesOffReserve	0=No 1=Yes	The community did not have HIV/AIDS support groups because individuals with HIV prefer to access services off-reserve, especially for HIV/Sexually transmitted infections. Asked only of those communities that did not have HIV/AIDS support groups.
PW	Q41OtherReasons	0=No 1=Yes	The community did not have HIV/AIDS support groups because of other reasons (e.g., stigma associated with HIV/AIDS). Asked only of those communities that did not have HIV/AIDS support groups.
PX	Q42CommunityCollectAdditionalInformationBloodBornePathogensSTIs	0=No 1=Yes	Additional information on blood borne pathogens and sexually transmitted infections was collected by the community.
PY	Q42AdditionalInformationCollected	Text	A description of the types of additional information on blood borne pathogens and sexually transmitted infections collected by the community. Asked only of those communities that reported collecting additional information on blood borne pathogens and sexually transmitted infections.
PZ	Q43DoesCommunityOrgaCollaboServDelivArrangHCCServSupExtProv	0=No 1=Yes	The community or organization had a collaborative service delivery arrangement for Home and Community Care services or supports with external providers. Collaborative arrangements may be formal with a written agreement in the form of a Memorandum of Understanding, protocol, agreement, contract, etc. or informal with a non-written agreement to provide services or information to support Home and Community Care clients services in the community.
QA	Q43NumberOfAgreeDistrictOrRHA	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Home and Community Care services or supports with the District or Regional Health Authority. Asked only of those communities that reported having collaborative service deliverary arrangements for Home and Community Care services or supports.
QB	Q43NumberOfAgreeHospitals	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Home and Community Care services or supports with hospitals. Asked only of those communities that reported having collaborative service deliverary arrangements for Home and Community Care services or supports.

Appendix BB3. CBRT – Data Dictionary 2015-16 through 2017-18 *(continued)*

Colour Key	GREY	Do not have sufficient response rates to provide meaningful statistics, have data quality issues, or do not have any data entered into the dataset and therefore cannot not be used for analysis purposes.
	YELLOW	Have privacy implications, and cannot be shared.
	ORANGE	Have varying response rates across reporting years, and have not been analyzed or reported on by FNIHB.
	GREEN	Were not reported directly for FNIHB purposes, but were used to calculate a number (e.g., Total number, average number per community, etc.)

Column #	Data Field	Response options	Description
QC	Q43NumberOfAgreeClientCareAccessCentres	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Home and Community Care services or supports with Client Care Access Centres. Asked only of those communities that reported having collaborative service deliverary arrangements for Home and Community Care services or supports.
QD	Q43NumberOfAgreeOther	Numeric	The number of agreements that the community had in place at the end of the reporting year for collaborative service delivery arrangements for Home and Community Care services or supports with other organizations. Asked only of those communities that reported having collaborative service deliverary arrangements for Home and Community Care services or supports.
QE	Q44ProcessPlaceManageHCCComplaintsAppelasYesOrNo	0=No 1=Yes	The community had a process in place to manage Home and Community Care complaints and appeals.
QF	Q45HCCIncidentOccurenceReportingProcesIsInPlaceYesOrNo	0=No 1=Yes	The community had a Home and Community Care incident and occurance reporting process in place.
QG	Q46HCCPogramAccreditedByAccreditationCanadaOrOtherRecognizedAccreditationOrganizationYesOrNo	0=No 1=Yes	The community's Home and Community Care program has been accredited by Accreditation Canada or another recognized accreditation organization.
QH	Q47NumberOfCommunityMembersAccessedCCCServicesLeastOnce	Numeric	The number of community members that accessed Clinical and Client Care services at least once during the reporting year. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QI	Q48UrgentTotalEncounters	Numeric	The total number of service encounters for urgent clinical services for community members. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QJ	Q48NonUrgentTotalEncounters	Numeric	The total number of service encounters for non-urgent clinical services for community members. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QK	Q50aNNCPathophysiology	Numeric	The number of nurses who completed the mandatory course/certification for Pathophysiology. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QL	Q50aNNCAdvancedHealthAssessment	Numeric	The number of nurses who completed the mandatory course/certification for Advanced Health Assessment. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QM	Q50aNNCPharmacotherapeutics	Numeric	The number of nurses who completed the mandatory course/certification for Pharmacotherapeutics (including a module or course to meet the upcoming Section 56 Ministerial exemption on Controlled Drugs and Substances Act CDSA). Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QN	Q50bNNCBasicTraumaLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for Basic Trauma Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QO	Q50bNNCInternationalTraumaLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for International Trauma Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QP	Q50bNNCAdvancedTraumaLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for Advanced Trauma Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QQ	Q50bNNCBasicDardiacLifeSupprtCPR	Numeric	The number of nurses who completed the mandatory course/certification for Basic Cardiac Life Support (CPR). Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QR	Q50bNNCAdvanceCardiacLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for Advanced Cardiac Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QS	Q50bNNCPaediatricAdvancedLifeSupport	Numeric	The number of nurses who completed the mandatory course/certification for Pediatric Advanced Cardiac Life Support. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QT	Q50bNNCPTraumaNurseCoreCourse	Numeric	The number of nurses who completed the mandatory course/certification for Trauma Nurse Core Course. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.
QU	Q50bNNCPImmunizationCertificate	Numeric	The number of nurses who completed the mandatory course/certification for Immunization certification. Only asked of communities with a Nursing Station and/or Health Centre with treatment providing primary care clinical and treatment services 24 hours a day, seven days a week or five days a week.

Section 1 – Information Générale

Comment se servir de l'outil « Profils »

Objectifs du guide et présentation

L'objectif de ce guide est de fournir des informations sur la manière d'utiliser les « Profils » de Synergie en Action (SEA). Il est conçu pour aider à générer des rapports en utilisant des filtres et des variables et à comprendre comment les rapports fonctionnent et quelles informations ils contiennent.

1.1 Qu'est-ce que sont les « Profils »?

Les « Profils » **sont des outils organisés sur une plateforme de rapports** conçus pour aider à la prise de décision en fournissant des informations tactiques sur les communautés autochtones, les ententes de financement et les organisations financées qui offrent des services aux communautés ou aux individus. Les rapports présentent des informations structurées et bien présentées, facilement accessibles à l'aide de filtres et exportables dans différents formats. Les données proviennent de différentes sources et sont mises à jour quotidiennement. Il existe trois (3) types de « Profils » :

Profil des communautés

Le profil des communautés est un système de guichet unique permettant d'accéder rapidement à un grand nombre d'informations tactiques sur les communautés autochtones. Grâce à des filtres, il est possible de générer des rapports statiques qui fournissent des informations détaillées sur des données telles que les données démographiques, les contacts au sein des communautés, les résultats d'élections, les établissements de santé, les ententes de financement, les nouvelles et les entreprises au sein de chaque communauté.

Profil des organisations

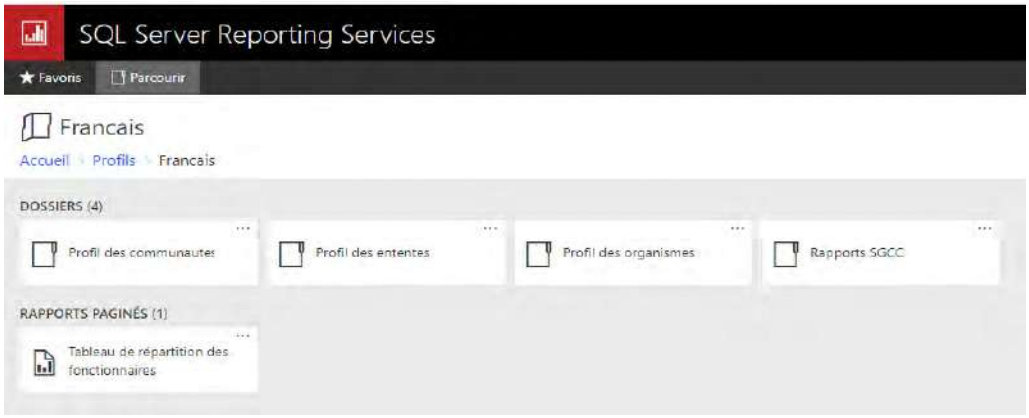
Le profil des organisations permet d'accéder rapidement à un grand nombre d'informations tactiques sur les organisations financées, les autorités de santé publique et les conseils tribaux. Des rapports statiques peuvent être générés en utilisant des filtres pour accéder à des informations détaillées sur des données telles que les contacts des organisations, les communautés desservies, les ententes de financement et les nouvelles.

Profil des ententes

Le profil des ententes fournit des informations sur les ententes de financement. Les données sont exportées du Système de Gestion de l'Information des Subventions et Contributions (SGISC) et manipulées pour créer des rapports puissants qui résument l'information sur les flux de trésorerie, l'état des rapports, les chèques émis et les modifications apportées aux ententes. En plus de rendre les informations du SGISC plus accessibles, ce profil peut également offrir une

vue d'ensemble de la gestion de la performance (par exemple, sur les rapports financiers en retard) et une analyse proactive.

Tous les profils sont accessibles en cliquant sur l'icône « Profils (Fr/Eng) » sur la page des produits du site web de *Synergie en Action (SEA) :* ***http://sia-sea/fr-ca/Pages/Produits.aspx*****.** Cliquer sur le lien correspondant au profil souhaité et ajouter la page d'accueil de SEA dans les favoris.



1.2 Comment ouvrir et utiliser les rapports « Profils »?

Sélections

Lors de l'ouverture d'un rapport, une liste d'options permet de modifier l'affichage du rapport et de préciser la recherche. Toutes ces options n'apparaissent pas sur tous les rapports.

- Langue du rapport : Choisir d'afficher le rapport en anglais ou en français. La langue définie par défaut sera celle choisie lors de l'accès à l'outil « Profils » via le site web de *SEA.*
- Recherche (Nom ou numéro SGISC) : Inscrire le numéro du bénéficiaire ou une partie du nom du bénéficiaire pour trouver la communauté désirée.
- Onglet(s) à ouvrir : Pour les rapports volumineux, sélectionner la section des rapports à consulter en cliquant sur les cases à cocher. Par défaut, aucun onglet ne s'ouvrira. Les onglets peuvent être ouverts ultérieurement en cliquant sur le bouton plus (+) de n'importe quel rapport.

Filtres

Chaque rapport comporte une série de filtres numérotés permettant de sélectionner différents paramètres. Chaque filtre a une incidence sur les filtres subséquents. Si un filtre comporte un paramètre ou une variable sélectionné, la liste des valeurs des filtres suivants sera réduite en fonction de l'effet combiné de tous les filtres précédents. Chaque rapport aura des options de filtre légèrement différentes et tous les filtres énumérés ci-dessous n'apparaîtront pas sur tous les rapports.

- Région: Zone où la communauté ou l'organisation est située
- Traité: Accord/Entente/Traité dont la communauté fait partie
- Agent: Liste des agents assignés aux communautés/organisations
- Nation: La nation dont la communauté fait partie (p. ex. Crie)
- Entente: Pour chercher des bénéficiaires d'ententes de contribution ou de subvention
- Domaine fonctionnel: Utilisé pour filtrer les clients qui disposent d'un financement dans un programme particulier (code Q ou K)
- Client : Présente la liste des noms des communautés incluant les noms des conseils de band et les noms couramment utilisés par la DGSPNI
- Année : Permet de sélectionner l'année civile pour les données démographiques
- Communauté desservie : Fournit la liste des communautés desservies par une quelconque organisation ou faisant partie d'une organisation particulière

Après avoir sélectionné le dernier filtre (habituellement « Client »), cliquer sur Afficher le rapport **pour ouvrir le rapport.**

Une fois le rapport ouvert, une barre d'outils sera disponible pour naviguer et localiser de l'information :

- Cliquer sur les flèches pour circuler entre les pages du rapport. Dans de nombreux rapports, la dernière page indique les sources des données et la manière d'utiliser efficacement les informations. Les flèches mènent vers la première ou la dernière page du rapport.
- Cliquer sur pour actualiser la page.
- Cliquer sur 100% pour modifier l'agrandissement de la page.
- Cliquer sur pour sauvegarder le rapport. Il peut être sauvegardé en format Word, Excel ou PDF.
- Cliquer sur pour imprimer le rapport.
- La case Rechercher | Suivant permet de chercher un texte correspondant dans le rapport.

Dernière page du rapport

La dernière page du rapport présente les sources utilisées pour bâtir le rapport ainsi que les clauses de non-responsabilité de SEA quant à l'utilisation des données du rapport. Elle disposera également d'une adresse électronique permettant de contacter SEA pour toutes questions, commentaires ou pour signaler toutes erreurs rencontrées dans le rapport.

Pour visualiser la dernière page du rapport, cliquer sur après avoir généré le rapport. La liste complète des sources d'information se trouve à la dernière page de chaque « Rapport général ».

Sources des informations
Information générale
Numéro et Nom selon AANC : Affaires autochtones et du Nord Canada (AANC)
Alias et autres graphies : Direction Générale de la Santé des Premières Nations et Inuits (DGSPNI)
Nation : Direction Générale de la Santé des Premières Nations et Inuits (DGSPNI)
Langue ancestrale : Classification de la langue, Classifications statistiques, Statistique Canada
Niveau d'isolement : Système de Gestion et de Planification Communautaire (SGPC), Direction Générale de la Santé des Premières Nations et Inuits (DGSPNI)
Affaires autochtones et du Nord Canada (AANC)
Traités/Ententes sur l'autonomie gouvernementale : Système d'information sur les droits ancestraux et issus de traités (SIDAIT), Affaires autochtones et du Nord Canada (AANC)
Profil de recensement : Profil du recensement, Statistique Canada
Profil AANC : Profils des Premières Nations, Affaires autochtones et du Nord Canada (AANC)
Carte interactive des profils des collectivités inuites, Affaires autochtones et du Nord Canada (AANC)

1.3 Mise à jour – Sources d'information

Les informations mises à jour manuellement dans les « Profils » auront une ligne « Date de la dernière mise à jour/*Last Updated Date* » au-dessus de chaque section correspondante. Les données financières provenant du SGISC sont mises à jour quotidiennement, tandis que les données démographiques sont mises à jour annuellement. Toutes les autres informations sont

mises à jour au fur et à mesure que la direction de SEA est informée des changements à apporter.

Pour tout commentaire, ou pour signaler une information inexacte, contacter Synergie en Action, en précisant le titre du rapport et le nom de l'onglet auquel s'applique le commentaire, à l'adresse:

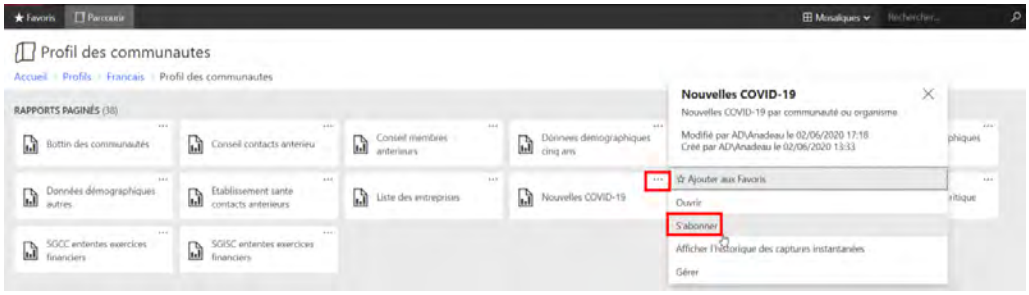
sac.sea-sia.isc@canada.ca

1.4 Abonnement aux rapports

Il est possible de s'abonner à n'importe quel rapport des « Profils » afin d'en recevoir une copie par courriel selon la fréquence choisie. Le rapport peut être envoyé sous forme de document Word, PDF ou Excel. Pour les rapports plus volumineux, comme le **Rapport général**, il est possible de ne recevoir que certaines sections. Noter que le rapport ne peut être envoyé qu'à la fréquence préalablement déterminée et ne peut pas être programmé en fonction des changements apportés au rapport.

Comment s'abonner :

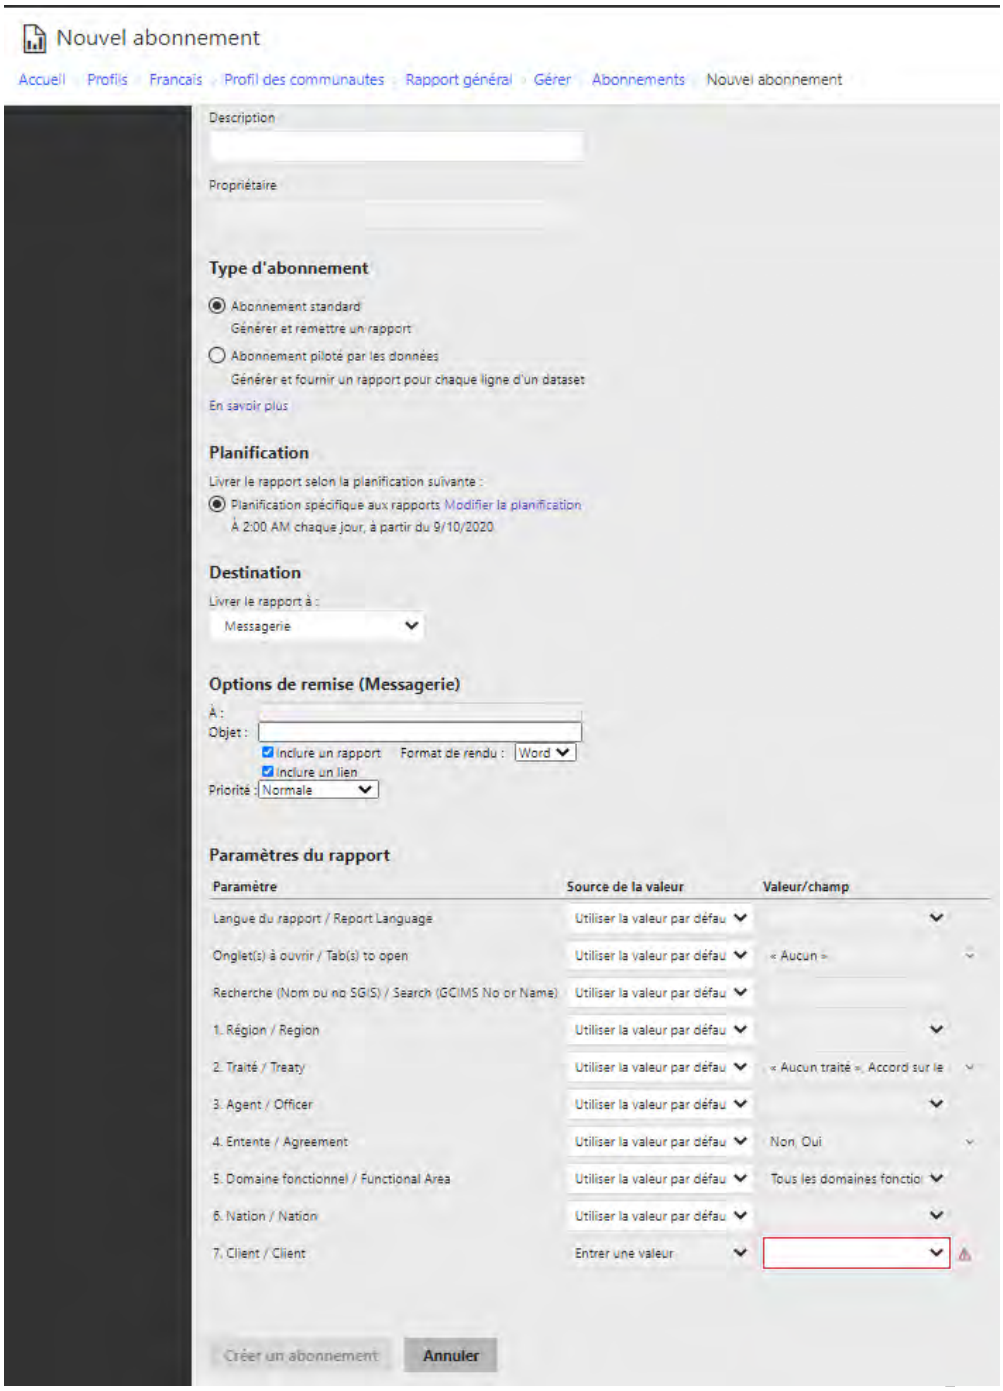
En consultant la liste des rapports pour un certain profil, cliquer sur l'icône des trois (3) points d'un rapport et sélectionner « S'abonner ».



L'écran suivant apparaîtra permettant ainsi de sélectionner les paramètres souhaités qui correspondent aux filtres du rapport. L'adresse courriel du destinataire est automatiquement prélevée du profil de l'utilisateur. Sélectionner le format du rapport, l'horaire (par exemple : hebdomadaire, lundi à 8h00) et les filtres pour personnaliser le rapport en fonction des besoins. Après avoir sélectionné tous les paramètres, cliquer sur « Créer un abonnement ».

Note : L'heure reflétée est celle du fuseau horaire de l'Alberta (UTC -6) puisque le serveur est situé dans cette région.

Appendix CC. SIA Community Profiles Database Guide *(continued)*



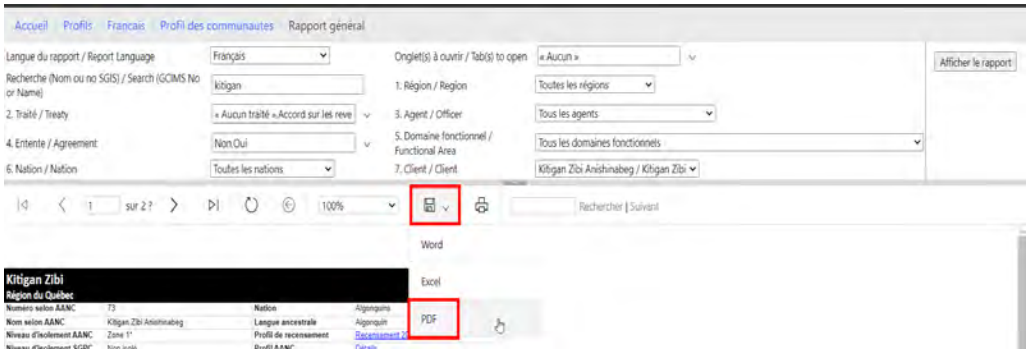
1.5 Politique de confidentialité

La plupart des rapports sont considérés comme étant *Protégé B*, tel qu'indiqué dans le coin supérieur droit du rapport. Toutefois, certaines sections comportent moins de restrictions. Pour plus de renseignements, contacter *SEA* à l'adresse courriel suivante :

sac.sea-sia.isc@canada.ca.

1.6 Enregistrement des rapports

Il est possible d'exporter tous les rapports sous forme de fichiers Adobe PDF, Word ou Excel. Par exemple, le rapport général ci-dessous est configuré pour être exporté au format PDF.



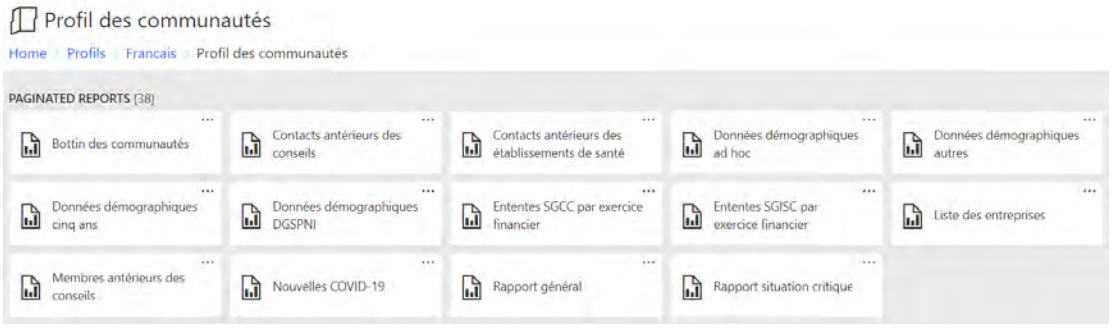
Une boîte de dialogue s'ouvrira et il sera possible d'enregistrer ou d'ouvrir le fichier. Cliquer sur « Enregistrer sous » pour sauvegarder le fichier à l'endroit désiré ou cliquer sur « Ouvrir » pour le visualiser seulement.

Section 2 – Rapports Profils

Profils des communautés, des organisations et des ententes

1. Rapports - Profils des communautés

Le **Profil des communautés** contient des informations relatives aux Premières Nations et aux Inuits, notamment des données démographiques et des informations sur les ententes de financement. Il se compose de plusieurs rapports, détaillés ci-dessous :



Description du rapport et contenu

1.1 Rapport général

Dans le **Profil des communautés**, le rapport le plus complet est le **Rapport général**. Il présente un aperçu complet des informations sur toutes les communautés des Premières Nations et des Inuits à travers le Canada. La plupart des informations contenues dans les autres rapports sont présentes dans le **Rapport général**. Cependant, celui-ci n'offre pas autant de détails que ces rapports plus spécialisés car sa fonction principale est d'offrir une vue d'ensemble. Il s'agit toutefois du meilleur rapport à utiliser pour une toute première consultation des **Profils** ou si un résumé d'une communauté spécifique est nécessaire.

De nombreux filtres permettent de produire un rapport sur une communauté donnée. Les filtres eux-mêmes peuvent donner une réponse rapide à des questions telles que : « *Quelles sont les communautés qui ne sont pas couvertes par une entente? Quelles sont les communautés qui sont gérées par une tierce partie? Quelles sont les communautés qui détiennent une entente* ***active****? »*

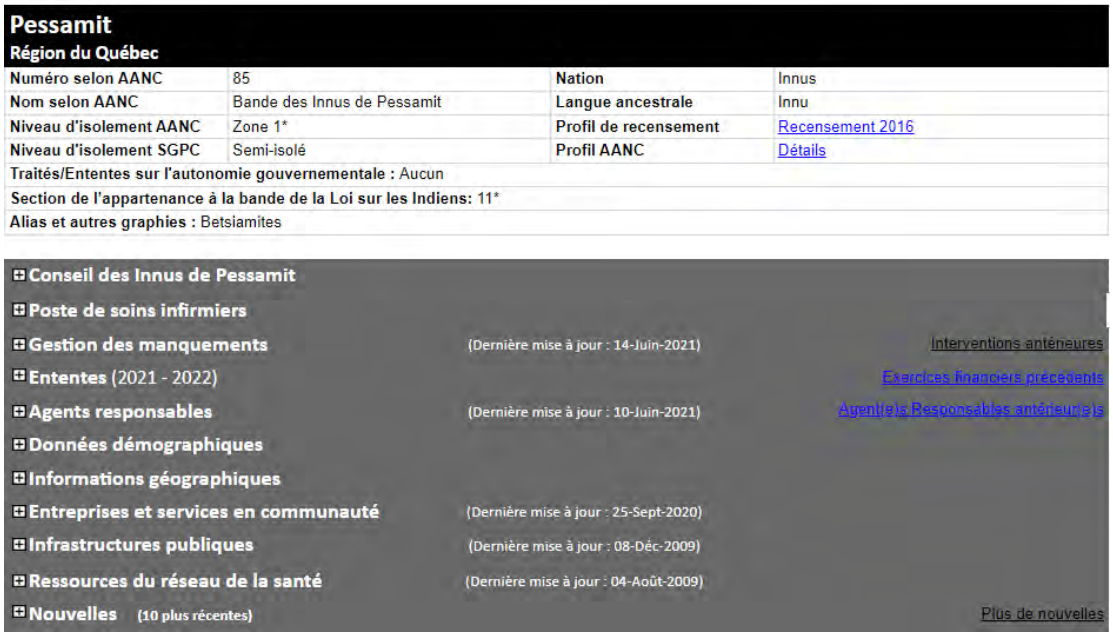
Le **Rapport général** est composé de douze (12) sections :

1) Section d'information générale

- Numéro du conseil de bande selon AANC
- Nation
- Nom du conseil de bande selon AANC
- Langue ancestrale
- Niveau d'isolement AANC : Classé de 1 à 4 (1 étant le niveau d'isolement le moins élevé et 4 le plus élevé)

- Lien vers le dernier recensement de Statistique Canada
- Niveau d'isolement SGPC (Système de Gestion et de Planification Communautaire)
- Lien vers le Profil AANC
- Traités/Ententes sur l'autonomie gouvernementale
- Alias et autres graphies
- Section de l'appartenance à la bande de la Loi sur les Indiens

Voici un exemple de rapport général pour lequel l'option « Aucun » a été sélectionnée dans le filtre « Onglet(s) à ouvrir ». L'option « Aucun » affichera le rapport en mode compressé et ne montrera que la section des informations générales. Pour ouvrir un onglet, cliquer sur le signe plus (+) à côté de celui-ci.



Pessamit
Région du Québec

Numéro selon AANC	85	**Nation**	Innus
Nom selon AANC	Bande des Innus de Pessamit	**Langue ancestrale**	Innu
Niveau d'isolement AANC	Zone 1*	**Profil de recensement**	Recensement 2016
Niveau d'isolement SGPC	Semi-isolé	**Profil AANC**	Détails
Traités/Ententes sur l'autonomie gouvernementale : Aucun			
Section de l'appartenance à la bande de la Loi sur les Indiens: 11*			
Alias et autres graphies : Betsiamites			

2) Onglet - Conseil de bande (Premières Nations) / Conseil Municipal (Inuits)

Cette section contient le nom officiel du conseil de bande ou du conseil municipal, l'adresse, la langue de correspondance, les numéros de téléphone, de fax et les adresses de courrier électronique. Elle contient également le mode électoral et des commentaires sur le conseil.

Les deux (2) sous-sections suivantes contiennent les coordonnées des membres actuels du conseil ainsi que celles de *non-élus*. Elles indiquent le numéro de téléphone, le fax, le portefeuille et les dates des mandats. Si un contact dispose d'une adresse courriel, son nom est surligné en bleu. En cliquant sur le nom de cette personne, un nouvel e-mail s'ouvrira automatiquement. La date de la dernière mise à jour est disponible puisque les informations des contacts sont ajustées manuellement

via l'application *Profiles WebApp*. Cliquer sur « Membres antérieurs du conseil » ou « Contacts antérieurs » pour afficher les contacts inactifs.

3) Onglet – Établissements de santé

Cette section contient des informations sur les établissements de santé de la communauté, y compris le nom, le type d'établissement, le numéro de téléphone, le fax, le courriel, le site web, le réserve, le numéro SIGBI et les commentaires. Elle contient également un lien vers l'organigramme de l'établissement de santé ainsi qu'une photo de l'établissement pour aider ceux qui visitent la communauté.

De plus, les coordonnées des contacts de l'établissement de santé ainsi que la date du début de leur mandat s'y trouvent. Si un contact dispose d'une adresse courriel, son nom est surligné en bleu. En cliquant sur le nom de cette personne, un nouvel e-mail s'ouvrira automatiquement. La date de la dernière mise à jour est disponible puisque les informations des contacts sont ajustées manuellement via l'application *WebApp Profiles*. Cliquer sur « Contacts antérieurs » pour afficher les anciens contacts de l'établissement de santé.

L'onglet « Établissement de santé » contient également des informations sur la connectivité de l'établissement afin de déterminer s'il est possible d'organiser une vidéo-conférence ou d'accéder à certains programmes médicaux. Cette section indique si l'établissement dispose ou non de **Panorama**, le nombre d'employés à temps plein (ETP), le rapport entre les ETP et le nombre d'utilisateurs travaillant simultanément (calcul du pic de la demande) et le nombre de postes informatiques. De plus, les informations sur le fournisseur internet, le type de bande passante et les vitesses de télé-versement

et de téléchargement de la connexion sont affichés. Si des applications de santé particulières existent, celles-ci seront listées sous la section « Ressources ».

5) Ententes

Cette section présente un résumé des informations sur les accords de contribution provenant du système SGISC pour l'exercice financier en cours. Elle est mise à jour quotidiennement. Les informations relatives à l'exercice financier précédent peuvent être trouvées en cliquant sur « Exercices financiers précédents ». Les fonds sont divisés en deux sections : les fonds budgétés et les fonds versés. Ceux-ci sont répartis par programme et par code de domaine fonctionnel (code Q). Le sous-total se trouve au bas de chaque tableau. Le numéro de l'entente, le type d'entente, le numéro SGISC, la période de l'entente ainsi que le statut sont affichés.

Ententes (2020 - 2021)		Exercices financiers précédents
Commentaires :		
		Budgeté	Payé
2021-QC-000023 / CFA / SGISC : 0074 Statut : Active (01 Avr 2020 - 31 Mars 2025)

Total / Entente		1 651 108	730 156

Les activités financières de l'exercice en cours représentent un historique de tout ce qui a affecté le financement de l'entente durant l'année financière :

- Les activités budgétaires initiales de l'année;
- Les ajustements et modifications du budget initial;
- Les avis d'ajustements budgétaires (NOBA)

*Ce tableau est actuellement en processus d'amélioration et la nouvelle version contiendra : le code, la date, et le type.

Activités financières pour l'exercice financier 2020 - 2021

			A50403	B2710	A50403	Flex	Q21G	114 805	59 075

6) Onglet – Agents Responsables

Cette section contient les coordonnées des travailleurs de la DGSPNI tels que les agents de liaison, les agents de programme, les agents financiers, les agents de santé environnementale ou de transport médical. Les agents régionaux de SAC ou de RCAANC peuvent également y figurer. Cliquez sur le nom de l'agent pour ouvrir leur courriel. La date de la dernière mise à jour est disponible puisque les informations des contacts sont ajustées manuellement via l'application *Profils WebApp*.

Agents responsables (Dernière mise à jour : 20-Mai-2021) Agent(e)s Responsables antérieur(e)s

Agents régionaux DGSPNI			Date de début
Directeur, Centre de service du Nord	Ms. Mary Vermette	(306) 953-8601	01-Mai-2021
Gestionnaire des services de santé	Ms. Jamie Untereiner	(306) 953-8685	29-Mars-2021
Agents régionaux SAC/RCAANC			**Date de début**
Agent aux services de financement (SAC)	Kalen Wright	(306) 987-0562	01-Mai-2021
Capital Environment Officer	Mr. Ed Lenchuk	(306) 940-4765	01-Mai-2021

7) Onglet – Données démographiques selon le dernier recensement

Cette section présente les données démographiques pour l'année de recensement la plus récente. Les données sont présentées par groupes d'âge de cinq (5) ans et par groupes d'âge selon les programmes offerts par la DGSPNI. Elles sont ensuite divisées par *hommes* et *femmes*, *sur* ou *hors-réserve*. Pour des raisons de confidentialité, les chiffres exacts ne sont pas indiqués lorsque moins de cinq (5) personnes entrent dans une certaine catégorie. Cliquer sur « Données antérieures » pour accéder aux données démographiques des années précédentes.

Ces données proviennent du ***Système d'inscription des Indiens*** (SII), ***Affaires autochtones et du Nord Canada*** (AANC) et existent pour toutes les communautés sauf les Inuits et Oujé-Bougoumou (Nation Crie). Pour les Inuits et Oujé-Bougoumou (Nation Crie), les données proviennent du ***Registre des bénéficiaires Cris et Naskapis de la convention de la Baie-James et du nord québécois et de la convention du nord-est québécois***. Seul le système SII est mis à jour pour l'année fiscale en cours.

Par groupe d'âges de 5 ans — Données antérieures

2019	Sur réserve			Hors-réserve			Total		
Groupe d'âges	Sexe masculin	Sexe féminin	Total	Sexe masculin	Sexe féminin	Total	Sexe masculin	Sexe féminin	Total
0 à 4 ans	< 5	< 5	< 5	< 5	< 5	< 5	< 5	< 5	< 5

Total	< 5	< 5	< 5	< 5	< 5	< 5	< 5	< 5	< 5

8) Onglet - Informations géographiques

Cette section contient des informations géographiques telles que les territoires de la communauté, les descriptions toponymiques, la région de santé, la région administrative, les circonscriptions électorales (provinciales et fédérales) et des commentaires sur la localisation de la communauté. Il y a également une carte cliquable qui montre l'emplacement de la communauté par rapport aux points d'intérêt de la région.

Informations géographiques

Territoire(s) avec limites législatives	: NUNAVUT LAND CLAIMS AGREEMENT - JOINTLY OWNED LAND (Terres visées par un règlement)
Descriptions toponymiques	: Akulivik
Région de santé	: Nunavik
Région administrative	: Nord-du-Québec
Circonscription électorale provinciale	: Ungava
Circonscription électorale fédérale	: Abitibi--Baie-James--Nunavik--Eeyou
Commentaires	: Le territoire est situé sur la côte est de la baie d'Hudson. Akulivik est construit sur une presqu'île qui s'avance dans la baie en direction sud-ouest et fait face à l'île Smith. Akulivik est sur le 60e parallèle.

9) Onglet – Entreprises et services dans la communauté

Il s'agit d'une liste des entreprises et des services disponibles au sein ou à proximité d'une communauté donnée, présentée par catégorie. Elle comprend la catégorie et les informations de contact (nom de l'entreprise, adresse, téléphone et fax).

Entreprises et services en communauté	(Dernière mise à jour : 01-Avr-2010)

11) Onglet - Ressources du réseau de la santé

Disponible uniquement pour la province du Québec, cette section indique la distance entre la communauté et les établissements de santé provinciaux. Elle est idéale pour le transport médical ou pour estimer la distance à parcourir pour obtenir un traitement spécialisé. Les hôpitaux, les pharmacies, les cliniques médicales et les cliniques dentaires les plus proches sont indiqués.

Appendix CC. SIA Community Profiles Database Guide *(continued)*

12) Onglet - Nouvelles

Cette section fournit une liste des dix (10) actualités qui concernent la communauté selon la date de leur publication. Pour lire la nouvelle, cliquer sur le titre en bleu. Les nouvelles sont générées à partir d'une recherche Bing Azure et sont mises à jour une fois par jour. Puisque le système de recherche est limité, certaines actualités peuvent ne pas être pertinentes à la communauté.

Nouvelles (10 plus récentes)	Plus de nouvelles
Grand titre	**Parution**
Uashat sort dans les rues contre la DPJ	04-Sept-2020
Les Innus prennent connaissance de l'entente historique avec Rio Tinto	03-Sept-2020

COVID-19: le Québec enregistre 104 nouveaux cas, six décès s'ajoutent	23-Août-2020

1.2 Données démographiques Ad hoc

Ce rapport fait état des données démographiques par groupes d'âge personnalisés pour toutes les communautés, **sauf pour les Inuits et Oujé-Bougoumou (Nation Crie)**.

Les informations sont affichées pour une année spécifique et sont divisées par *hommes* et *femmes*, *sur* ou *hors-réserve*. Des filtres personnalisés par groupe d'âge permettent de sélectionner un âge minimum et maximum précis. Contrairement au **Rapport général**, ce rapport peut afficher des données pour les années de recensement précédentes et n'est pas limité par des catégories d'âge spécifiques.

Ces données proviennent du Système d'inscription des Indiens (SII), des Affaires Autochtones et du Nord Canada (AANC) et du Système de Vérification de Statut (SVS) (pour les données après 2017). Pour des raisons de confidentialité, les données démographiques dont la valeur est inférieure à cinq (5) ont été remplacées par « < 5 » et ont été exclues des totaux. De plus, ces données sont destinées à un usage interne uniquement et ne doivent pas être partagées.

Groupe d'âge : 0 à 85 ans et plus

1.3 Données démographiques cinq (5) ans

Ce rapport affiche les profils démographiques des communautés des Premières Nations par groupes d'âge de cinq (5) ans pour toutes les communautés sauf pour **les Inuits et Oujé-Bougoumou (Nation Crie).**

Les informations sont affichées pour une année spécifique et sont divisées par *hommes* et *femmes* vivant *sur* ou *hors-réserve* par groupes d'âge prédéfinis de cinq (5) ans. Contrairement au **Rapport général**, ce rapport peut également afficher les données des années précédentes.

Ces données proviennent du Système d'inscription des Indiens (SII), des Affaires Autochtones et du Nord Canada (AANC) et du Système de Vérification de Statut (SVS) (pour les données après 2017). Pour des raisons de confidentialité, les données démographiques dont la valeur est inférieure à cinq (5) ont été remplacées par « < 5 » et ont été exclues des totaux. De plus, ces données sont destinées à un usage interne uniquement et ne doivent pas être partagées.

1.8 Contacts antérieurs des conseils

Ce rapport affiche une liste des personnes qui travaillent actuellement pour le conseil de bande ou le conseil municipal d'une communauté donnée, ou qui y ont travaillé dans le passé. Il affiche également les catégories de contact pour identifier le rôle de chaque individu. Cette liste n'indique que les représentants non-élus. Pour chaque contact, l'adresse électronique, les numéros de téléphone, les numéros de poste et de fax sont indiqués s'ils sont connus.

1.13 Nouvelles COVID-19

Ce rapport fournit des nouvelles relatives à la pandémie COVID-19 pour chaque communauté et organisation. Il est possible de consulter les nouvelles pour tous les clients en sélectionnant l'option « Tous les clients » au filtre « Client » avant de générer le rapport. Il existe également un filtre servant à visualiser les nouvelles qui ont été publiées hier ou seulement au cours des derniers jours. Les informations contenues dans ce rapport sont mises à jour trois (3) fois par jour et sont générées par Bing Azure. En raison des limites de la recherche, il est possible que tous les résultats ne soient pas pertinents. Les résultats en français n'apparaissent que pour les clients du Québec.

1.14 Rapport de situation critique

Ce rapport fournit des données spécifiques tirées du **Rapport général** afin de donner un aperçu tactique d'une communauté en cas de crise. Les informations présentées ne sont que celles qui sont les plus utiles pour faire face à des crises sanitaires telles que la grippe H1N1 ou la COVID-19. Contrairement au **Rapport général**, il n'y a pas d'option de filtre pour ouvrir ou fermer les onglets de ce rapport. Toutefois, l'onglet « Connectivité » est fermé par défaut et doit être ouvert en cliquant sur le signe plus (+) dans le rapport.

Le **Rapport de situation critique** comporte huit (8) sections. Pour plus d'information sur ces sections, consulter le **Rapport général**.

1) Information générale
2) Information sur le conseil de bande (Premières Nations) / conseil municipal (Inuits)
3) Établissements de santé
4) Ententes
5) Données démographiques
6) Informations géographiques
7) Entreprises et services en communauté
8) Nouvelles

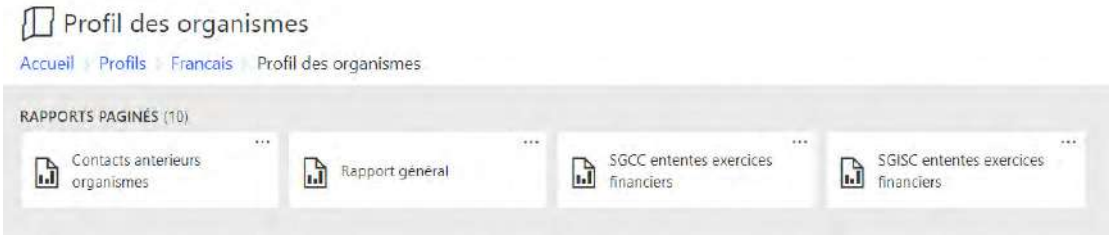
2.Profil des organisations

Le **Profil des organisations** comprend des rapports sur les organisations financées dans le cadre du SGISC et du SGCC, les conseils tribaux et les autorités de santé. Il se compose de plusieurs rapports, détaillés ci-dessous :



Description du rapport et contenu

2.1 Rapport général

Dans le **Profil des organisations**, le rapport le plus complet est le **Rapport général**. Il présente un aperçu détaillé de toutes les organisations figurant dans les profils. La plupart des informations contenues dans les autres rapports sont présentes dans le **Rapport général**, bien que celui-ci n'offre pas autant de détails que les rapports les plus spécialisés. Toutefois, il s'agit de la meilleure option pour une première navigation dans les profils des organisations ou pour obtenir un résumé sur une organisation spécifique.

De nombreux filtres permettent de produire un rapport sur une organisation donnée. Les filtres eux-mêmes peuvent offrir des réponses rapides à des questions telles que : « *Quelles organisations fournissent des services à une Première nation spécifique? Avec quelles organisations la DGSPNI a-t-elle conclu des accords au cours du présent exercice?* »

Voici un exemple pour lequel l'option « Aucun » a été sélectionnée dans le filtre « Onglet(s) à ouvrir ». En sélectionnant « Aucun », le rapport s'affiche en mode compressé : pour ouvrir un onglet, cliquer sur le signe (+) à côté de celui-ci.

Tel que montré dans l'image précédente, le **Rapport général** comprend six (6) onglets :

1) Informations générales

Cet onglet contient une section d'informations générales et de contacts où se trouvent les coordonnées des principaux directeurs, coordinateurs ou administrateurs des organisations. Il indique la langue de correspondance, la catégorie d'organisation (par exemple : organisation politique) et si l'organisation est accréditée ou non. La date de la dernière mise à jour est disponible puisque les informations des contacts sont ajustées manuellement via l'application *WebApp Profiles*.

2) Ententes

Cette section présente un résumé de l'information sur les ententes de contribution provenant du SGISC pour l'exercice financier en cours. Elle est mise à jour quotidiennement. Les renseignements sur l'exercice financier précédent peuvent être trouvés en cliquant sur « Exercice financiers précédents ».

Les fonds sont divisés en deux sections : les fonds budgétés et les fonds payés. Ils sont répartis par code de programme et par code de domaine fonctionnel (code Q). Les sous-totaux se trouvent au bas de chaque colonne. De plus, le numéro de l'entente, le type d'entente, le numéro SGISC, l'échéance et le statut de l'entente sont affichés.

- Ajustements et modifications du budget initial;
- Avis de Rajustement Budgétaire (ARB)

*Ce tableau est présentement en processus d'amélioration et la nouvelle version contiendra : le code, la date, et le type.

Activités financières pour l'exercice financier 2020 - 2021

Code	Date	Type	Activité de programme	Zone de services des programmes	Centre de coût	Mode de financement	Domaine fonctionnel	Budgété	Payé
			A53014	B5110	A53014	Block	Q302	90 801	45 400
			A53051	B2710	A53051	Block	Q217	589 987	294 994

3) Agents responsables

Cette section contient les coordonnées des employés(es) de la DGSPNI tels que les agents de liaison, les agents de programme ou les agents de financement. Les agents régionaux de SAC ou de RCAANC peuvent également y figurer. La date de la dernière mise à jour est disponible puisque les informations des contacts sont ajustées manuellement via l'application *WebApp Profiles*.

Agents responsables	(Dernière mise à jour : 10-Juin-2021)		Agent(e)s Responsables antérieur(e)s
Agents régionaux DGSPNI			**Date de début**
Agent de financement	Ms. Eugénie Vu	(514) 283-1583	01-Nov-2020
Agent de programme	Mme Leanne Pang	(438) 364-2816	29-Mars-2021

4) Informations géographiques

Cette section contient des informations géographiques sur l'organisation, y compris les circonscriptions électorales fédérales et provinciales dont elle fait partie, et si l'organisation est pancanadienne ou panrégionale. Cette section contient également une liste des communautés desservies, c'est-à-dire des communautés qui font partie de cette organisation ou qui utilisent les services de l'organisation.

Informations géographiques			
Circonscription électorale provinciale	Ungava	**Pan-canadien**	Non
Circonscription électorale fédérale	Abitibi--Baie-James--Nunavik--Eeyou	**Pan-régional**	Non
Communautés desservies : Akulivik / Aupaluk / Inukjuak / Ivujivik / Kangiqsualujjuaq / Kangiqsujuaq / Kangirsuk / Kuujjuaq / Kuujjuarapik / Puvirnituq / Quaqtaq / Salluit / Tasiujaq / Umiujaq			

5) Nouvelles

Cette section fournit une liste des dix (10) dernières nouvelles qui mentionnent l'organisation selon la date de parution. En cliquant sur le titre souligné en bleu, l'article s'ouvrira. Les nouvelles sont générées à partir d'une recherche Bing Azure et sont mises à jour une fois par jour. Puisque le système de recherche est limité, certaines actualités peuvent ne pas être pertinentes à la communauté.

2.2 Ententes SGISC par exercice financier

Ce rapport donne la liste des ententes existantes dans SGISC pour chaque organisation par exercice financier.

Il présente l'entente, sa date de début et de fin, l'exercice financier correspondant, les montants payés et budgétés par programme et par activité de programme ainsi que les modifications en vigueur. Les données n'existent qu'à partir de l'exercice 2015-2016.

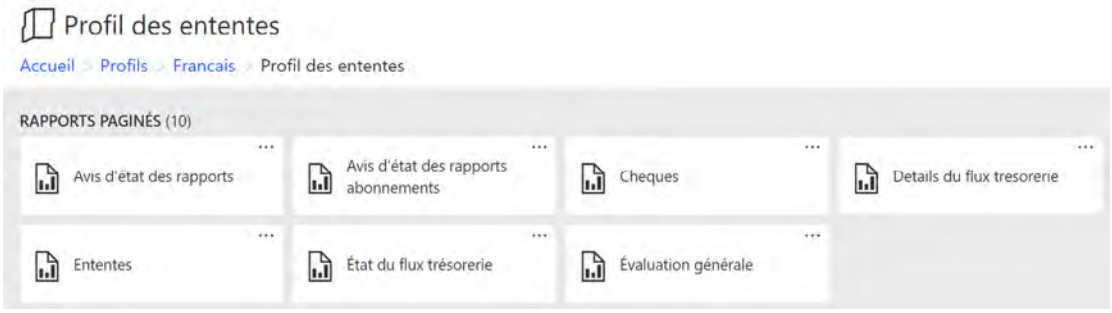
3. Profil des ententes



Les rapports suivants sont configurés pour répondre aux exigences spécifiques du groupe de Finances et Administration, pour une meilleure compréhension des ententes et en guise d'outil de gestion des données financières de la DGSPNI.

Noter qu'à partir d'avril 2019, en raison de la transition du SGISC, le « Profil des ententes » n'est exceptionnellement précis que pour l'exercice 2018-2019 et avant. Le processus de mise à jour de ces rapports avec les nouvelles données du SGISC est en cours.

Le « Profil des ententes » comprend sept (7) rapports :

1. Ententes : Résumé des engagements pour les ententes par exercice financier;
2. État des flux de trésorerie : Budget globale de l'entente réparti par mois;
3. Détails des flux de trésorerie : Détails des transactions dans l'entente par mois;
4. Chèques : Informations sur les chèques émis pour les ententes de financement;
5. Évaluation générale : Évaluation des risques par partenaire selon SGISC;
6. Avis d'état des rapports : Lettres automatisées qui informent les utilisateurs des rapports en retard et reçu;
7. Avis d'abonnement de l'état des rapports : Informations indiquant si les clients ont des utilisateurs abonnés à l'**avis d'état des rapports**.

Appendix CC. SIA Community Profiles Database Guide *(continued)*

Description et contenu du rapport

3.1 Ententes

Ce rapport fournit un résumé des engagements pour les ententes par exercice financier. Il présente un résumé des montants approuvés, payés, engagés et encore disponibles pour la durée de l'entente (de sa date de début à sa date de fin) dans SGISC. **Il affiche le financement total de l'entente à ce jour,** c'est-à-dire le montant initial de l'entente plus la somme de tous les amendements approuvés par date.

L'information affichée comprend le numéro de bénéficiaire selon SGISC, la région, le numéro d'entente, le type d'entente, la date de début et fin de l'entente, le statut de l'entente, l'année financière (l'année financière en cours est surlignée), les montants payés à ce jour et le solde.

Région du Québec

Total / Client								**707 257**	**707 257**	**0**

3.2 État des flux de trésorerie

Ce rapport présente un résumé du flux de trésorerie d'une entente, par exercice financier, afin de suivre la manière dont l'argent est budgété et engagé dans les ententes de financement. Les informations sont fournies par mois, à partir d'avril, le premier mois de l'exercice financier. L'information est répartie sur plusieurs colonnes par code de domaine fonctionnel (code Q) et par type d'entente. Le centre de coûts, le numéro d'ordre interne et le statut de l'entente sont également affichés sur chaque ligne.

Chaque mois est divisé en quatre (4) colonnes : budget; retenu/libéré; recouvert; et payé. La colonne des paiements est codée par couleur : une case verte signifie que le montant payé est égal au montant budgété, une case rouge indique que le montant payé est inférieur au montant budgété et une case bleue signifie que le montant payé est supérieur au montant budgété. Une case rose indique que le paiement est en cours et une case jaune indique qu'il est en attente d'approbation. La couleur de la cellule du mois indique l'état général des paiements par rapport au budget établi.

Légende : Paiement < Affectations du budget | Paiement = Affectations du budget | Paiement > Affectations du budget | Paiement en cours | En attente d'approbation

Les totaux du mois sont affichés à la fin de chaque colonne. La dernière section du tableau, à l'extrême droite, affiche les totaux pour l'entente : budgété par mois, en retenu/libéré, recouvert, payé en mars excluant CAFE (comptes créditeurs à la fin de l'exercice), payé total excluant CAFE, payé CAFE, CAFE en attente, payé et pool/retenu. Les cellules colorées de cette section représentent également les totaux de l'entente.

Il est possible d'accéder au rapport « **Détails des flux de trésorerie** » en cliquant sur le numéro de l'entente surligné en bleu.

3.3 Détails des flux de trésorerie

Ce rapport développe ce qui figure déjà dans le rapport « État des flux de trésorerie » en montrant la répartition mensuelle des paiements de manière plus détaillée. Il présente l'activité financière tout au long du cycle de financement depuis l'initiation jusqu'au paiement. Contrairement au rapport « État des flux de trésorerie », ce rapport détaille chaque transaction financière. Les informations concernant la facture et le chèque émis sont ajoutées au fur et à mesure que le paiement progresse dans le cycle de financement.

L'information est divisée en trois (3) sections:

1. Activité financière: Cette section présente la répartition des activités financières par mois. Le mois est numéroté et figure dans la colonne « **période** ». Les colonnes suivantes fournissent des informations sur l'activité financière : le code de domaine fonctionnel, le mode de financement (global, souple, fixe ou préétabli), le centre de coût associé, le statut de l'entente, la date de financement, le code de l'activité (PMT= paiement; INT= initialisation, etc.), la catégorie de l'activité et le montant planifié (montant d'argent traité).
2. Facture : Cette section contient des renseignements sur la facture provenant de SAP tels que le numéro de document créé à la réception de la facture *DocSAP*, le numéro de référence du SGISC, l'état de la facture et le montant total.
3. Chèque: Cette section contient des informations sur les chèques de SAP. Elle indique le numéro du chèque SAP, la date d'émission, le montant et le nom du fournisseur. Il est possible d'accéder au rapport sur les **Chèques** en cliquant sur le numéro de chèque souligné en bleu.

Activité financière									Facture				Chèque			
Période	Domaine fonctionnel	Mode de financement	Centre de coût	Statut	Date de financement	Code	Catégorie	Montant planifié	Doc SAP	Numéro	Statut	Montant	No de chèque	Date	Montant	Nom du vendeur

3.4 Chèques

Ce rapport fournit de l'information détaillée sur les chèques émis pour le financement des activités programmées dans les ententes de financement. Il est possible d'effectuer une recherche par numéro de chèque, par numéro d'entente ou par nom de client.

Les informations figurant sur le chèque sont réparties par domaine fonctionnel (code Q) afin que les utilisateurs puissent comprendre rapidement quels programmes composent un chèque. De plus, le numéro de chèque, le numéro de document SAP (SAP Doc), le numéro de référence GCIMS et le centre de coût sont fournis pour chaque ligne. Le montant planifié fait référence à la somme déboursée par domaine fonctionnel (code Q) tandis que le montant facturé présente le montant total du chèque. Le nom du fournisseur SAP est également inclus à titre de référence.

Région du Québec

2015-2016

/ SGIS :

Doc SAP - Facture No	Domaine fonctionnel	Centre de coût	Montant planifié	Montant facturé	Vendeur

3.5 Évaluation générale

Les évaluations générales sont effectuées dans SGISC et sont utilisées pour aider à la gestion des risques. Ceci répond à la Politique sur les paiements de transfert du Conseil du Trésor (2008) qui exige que tous les ministères fédéraux appliquent une approche fondée sur l'analyse des risques potentiels spécifique pour chaque partenaire dans la gestion des paiements de transfert. Elle fait partie des initiatives fédérales visant à renforcer la responsabilisation et à améliorer les résultats pour les Canadiens.

Le rapport d'évaluation générale (EG) fournit des indicateurs pour l'évaluation des risques par partenaire et par entente. Le risque est évalué par quatre (4) facteurs différents : 1. Gouvernance ; 2. Planification ; 3. Gestion financière et ; 4. Gestion du programme, et peut également être évalué par des sous-facteurs. Une note est attribuée pour montrer le niveau de risque. Le niveau de cette note est décrit dans la colonne « Niveau ». Un score total et une note sont données pour l'entente.

3.6 Avis d'état des rapports

Ce document fournit de l'information sur les rapports financiers et les rapports spécifiques aux programmes reçus et en retard dans SGISC. Il est conçu pour réduire le volume des rapports *en retard*, pour fournir un avis aux clients avant que les fonds ne soient retenus et permet aux clients de suivre le processus de révision des rapports à l'interne.

Pour utiliser ce rapport, sélectionner le nom de la personne abonnée au rapport sous le filtre « **4) Abonné** ». S'il n'y a pas d'abonné au rapport, sélectionner « **Envoi mensuel – abonné** ». Par défaut, la première page de ce rapport est toujours en français et la seconde est en anglais.

Chaque ligne fournit des informations sur le rapport : le code ICD et le nom du rapport, la date exigible, le numéro d'entente, l'exercice financier et le programme (code Q). Afin de fournir un aperçu de l'état des rapports, le tableau est divisé en quatre (4) sections :

1) (Avis 1) Premier avis pour un retard de 30 jours ou moins (Rapport(s) en retard) : Cette section fournit une liste des rapports en retard. Tous les rapports en retard de moins de trente et un (31) jours se trouvent dans cette section. Les rapports doivent d'abord figurer dans cette section avant d'entrer dans « Avis 2 ».
2) (Avis 2) Avis pour un retard de 31 jours ou plus (Rapport(s) en souffrance) : Tous les rapports en retard d'au moins trente et un (31) jours et affichés précédemment à « l'Avis 1 » apparaîtront dans cette section. Si des rapports figurent dans cette section, il est possible que des fonds soient retenus car aucun rapport n'a été reçu.
3) Rapport(s) reçu(s) depuis les 30 derniers jours : Ceci confirme que les rapports ont été reçus et enregistrés dans SGISC.
4) Rapport(s) attendu(s) d'ici les prochains 90 jours : Cette section sert à prévoir les rapports ayant une date exigible inférieure à quatre-vingt-dix (90) jours. Ainsi, les parties peuvent effectuer un suivi prospectif.

ÉTAT DES EXIGENCES DE RAPPORTS

En conformité avec les lignes directrices sur les retenues de fonds pour les ententes de financement de la Direction générale de la santé des Premières Nations et des Inuits (DGSPNI), cet état des exigences de rapports vous est acheminé selon le calendrier établi.

Nous vous rappelons qu'un rapport est considéré en retard le premier jour suivant la date limite de remise établie dans l'entente de financement.

Dans l'éventualité où nous ne recevons pas le/les rapport(s) dû(s), nous pourrions retenir les paiements futurs à la fin des 30 jours civils suivant la date d'exigibilité, en raison du non-respect des modalités et conditions de l'entente de financement.

Sur l'état des rapports ci-dessous, vous retrouverez les rapports faisant l'objet d'un :

(AVIS 1) Premier avis pour un retard

(AVIS 2) Avis pour un retard déjà signalé ayant maintenant atteint 31 jours ou plus

(AVIS 1) Premier avis pour un retard de 30 jours ou moins (Rapport(s) en retard) — Nombre de document(s) : 0

Aucun Rapport sujet à l'AVIS 1

(AVIS 2) Avis pour un retard de 31 jours ou plus (Rapport(s) en souffrance) — Nombre de document(s) : 5

3.7 Avis d'état des rapports - Abonnement

Ce rapport complémente l'**Avis d'état des rapports** et indique les coordonnées et le statut d'abonnement par client. Il sert à gérer les abonnements et à s'assurer que tous les clients ont un abonnement mensuel actif à l'**Avis d'état des rapports**.

Actuellement, l'*Avis d'état des rapports* n'est pas envoyé mensuellement, il n'est donc pas entretenu.

4. Rapports SGCC

Les rapports SGCC contiennent de l'information de l'ancien Système de gestion des contrats et contributions (SGCC) jusqu'à l'exercice financier de 2014-2015 inclus. Au cours de l'exercice 2015-2016, SGISS a remplacé SGCC et toutes les données des exercices ultérieurs se trouvent dans le **Profil des ententes**. Bien que les données de l'exercice 2015-2016 et celles des exercices ultérieurs puissent figurer dans les rapports du SGCC, elles ne sont pas exactes.

Noter **qu'il est nécessaire de sélectionner une région** au filtre approprié pour tous les rapports du SGCC afin de pouvoir accéder aux données et utiliser les autres filtres.

4.1 Amendements

Ce rapport présente un résumé de tous les amendements ayant le statut de « Recommandation », « Approuvé » ou « En attente » pour toute la durée de l'entente (du début à la fin) par exercice financier. Les montants de chaque amendement sont indiqués dans le rapport ainsi que le type d'amendement (provenant du « SGCC – Onglet des amendements ») et les commentaires correspondants.

Ce format présente les informations pertinentes pour l'ensemble des modifications apportées à l'entente. Le filtre « Exercice financier » montre tous les amendements effectués jusqu'à l'exercice financier sélectionné. En sélectionnant un exercice financier, vous obtiendrez toutes les modifications qui ont été effectuées pendant cette période.

Note : Ce rapport est présenté par exercice financier ; seuls les exercices financiers pour lesquels une entente est en vigueur et comporte au moins une modification seront affichés. En d'autres termes, si l'exercice 2013 est indiqué, seules les ententes en vigueur en 2012-2013 et qui ont au moins un amendement pour l'ensemble de l'entente seront indiquées dans le filtre « Accord ».
Dans l'exemple ci-dessous, en sélectionnant « Tous les exercices », tous les amendements pour une entente spécifique sont affichés.

Indigenous Services Canada / Services aux Autochtones Canada

Agreement amendments summary in effect in All Fiscal Years

ACCORD - Globale (01-Apr-2011 - 31-Mar-2016)

No	Launched	Recommendation	Officer	Authorization Authority	Amount	Amendment Type	Comments

3	06-Sept-2011	Pending	Tucker,Samara	Regional Director	36,000	02 - Add a Program	SET FUNDING: SNPSJA (+ 36 000 $) Ajout du programme en 2011-2012 pour un nouvel appel de proposition. Répartion des fonds: (33 000 $) pour la proposition revisée (3 000 $) pour la proposition « Atelier P-36 Workshop»
4	21-Dec-2011	Pending	Tucker,Samara	Regional Director	166,436	09 - Notice of Budget Adjustment Form	GLOBALE: PGS: (+ 28 587 $/année, total: 142 935 $) Ajout d'un montant supplémentaire annuel octroyé par Ottawa pour le passage en Globale; (+ 3 500 $) Ajout d'un montant forfaitaire en 2011-2012 pour la mise à jour du plan d'évaluation

4.2. Ententes SGCC

Ce rapport présente un résumé des montants approuvés, payés, engagés et encore disponibles pour la durée de l'entente (du début à la fin) par exercice financier. **Il affiche le montant total du financement à ce jour**, c'est-à-dire le montant initial de l'entente plus la somme de tous les amendements approuvés à ce jour.

Le rapport contient les montants suivants :

1. Montant de l'entente : financement total de l'entente à ce jour (tous les exercices financiers)
2. Approuvé – Total : somme des engagements à ce jour
3. Disponible pour engagement : montant de l'entente (montant total approuvé)
4. Payé à ce jour : engagements réglés (montants engagés pour lesquels une demande de décaissement a été produite à ce jour)
5. Engagement non réglé : différence entre le montant « approuvé » et « payé à ce jour ». (Onglet « engagements financiers » SGCC)
6. Déclaré (suivi de rapports financiers) : montant des sommes versées pour lesquelles un ou plusieurs rapports financiers ont été saisis et approuvés. (Onglet « suivi financier résumé » SGCC)

Sommaire des engagements pour les ententes

Accord	Description	Exercice financier	Début	Fin	Engagement non-réglé	Payé à ce jour	Approuvé - Total	Montant de l'entente	Disponible pour engagement	Déclaré (suivi de rapports financiers)

Notes

1. Comme ce rapport est établi par exercice financier, seuls les exercices pour lesquels un financement existe seront indiqués (pour une entente donnée). En d'autres termes, si l'exercice financier de 2013 est sélectionné, seules les ententes en vigueur en 2012-2013 seront indiquées dans le filtre « Accord ».
2. En sélectionnant « Tous les exercices » dans ce rapport, une vue *à ce jour* est générée pour les montants accumulés sur plusieurs exercices financiers.
3. Pour les accords de transfert (et pour les Ententes de Financement du Canada-Premières Nations - EFCPN), les rapports à recevoir se trouvent dans « Rapports ». Il n'existe pas de montant cumulé dans SGCC au « Suivi de rapports financiers ». Dans ce cas, la colonne « Déclaré (suivi de rapports financiers) » du tableau affichera zéro (0) :
    a. Dans SGCC, pour obtenir les montants « déclarés », les rapports financiers doivent être reçus et approuvés ; pour déclarer les dépenses associées aux montants déboursés, les rapports doivent être enregistrés comme des rapports financiers.
    b. Suivant la même logique, les montants « déclarés » seront également nuls dans les rapports de « programmes ».

4.3. État des rapports SGCC

Il s'agissait d'une lettre officielle bilingue de notification envoyée aux clients du SGCC au sujet des rapports en retard et ceux à recevoir dans moins de quatre-vingt-dix (90) jours. Ce **rapport servait de lettre de rappel et d'avis formel en cas de retard**. Lorsque le SGCC existait, le rapport était automatiquement envoyé par courriel aux abonnés le premier de chaque mois (voir le rapport d'abonnement dans la section suivante). Le rapport équivalent du SGISC est « l'Avis d'état des rapports ».

Le rapport comporte six (6) sections :

1. Coordonnées du client : Contient les coordonnées du client telles qu'elles apparaissent dans le profil de la communauté, le profil des organisations ou « **autres clients** » SGSS.
2. Texte de rappel : Il s'agit du texte de rappel pour expliquer les conditions de l'avis envoyé ; le même message explicatif est envoyé à tous.
3. (Avis 1) Premier avis pour un retard : Cette section contient le premier rappel pour les retards de trente (30) jours ou moins. Le contenu de cette section provient de la « **Liste de rapports SGSS** » en utilisant les variables suivantes : retard; 0-9999 jours, aucun rappel.
4. (AVIS 2) Avis pour un retard déjà signalé ayant maintenant atteint 31 jours ou plus : Cette section contient le deuxième rappel pour les retards de trente et un (31) jours ou plus. Le contenu de cette section provient de la « **Liste de rapports SGSS** » en utilisant les variables suivantes : retard; 31-9999 jours, premier rappel envoyé.
5. Pour votre information : Cette section contient la liste des rapports à soumettre dans les quatre-vingt-dix (90) jours à venir ainsi que leurs dates d'échéance. Le contenu de cette section provient de la « **Liste de rapports SGSS** » en utilisant les variables suivantes : à venir; 0-90 jours, s/o.
6. Contact DGSPNI : Cette section comprend le nom et les coordonnées de la personne responsable à la DGSPNI. Il s'agit, en général, de l'agent de financement assigné au client.

Section 1

Ceci constitue un avis formel

En conformité avec les lignes directrices sur les retenues de fonds pour les accords de contribution de la Direction générale de la Santé des Premières Nations et des Inuits (DGSPNI), cet état de rapports exigibles vous est acheminé selon le calendrier établi.

Nous désirons vous rappeler qu'un rapport est considéré en retard la journée suivant la date d'exigibilité établie dans l'accord de contribution.

Une période de 30 jours est offerte à partir de la date d'exigibilité afin de permettre au bénéficiaire de contacter Santé Canada pour discuter de la situation et ainsi diminuer le risque de devoir effectuer des retenues de paiements.

À partir de la 31e journée, si aucune communication n'a été établie, le bénéficiaire est considéré n'avoir pas respecté ses obligations en matière de reddition de compte.

À ce moment, une retenue de fonds est appliquée, jusqu'à réception du rapport manquant, pouvant aller jusqu'à une récupération totale des contributions en l'absence du rapport.

Sur l'état des rapports ci-dessous, vous retrouverez les rapports faisant l'objet d'un :

(AVIS 1) Premier avis pour un retard

(AVIS 2) Avis pour un retard déjà signalé ayant maintenant atteint 31 jours ou plus

Section 2

Section 3

(AVIS 1) Premier avis pour un retard — Nombre de document(s) : 2

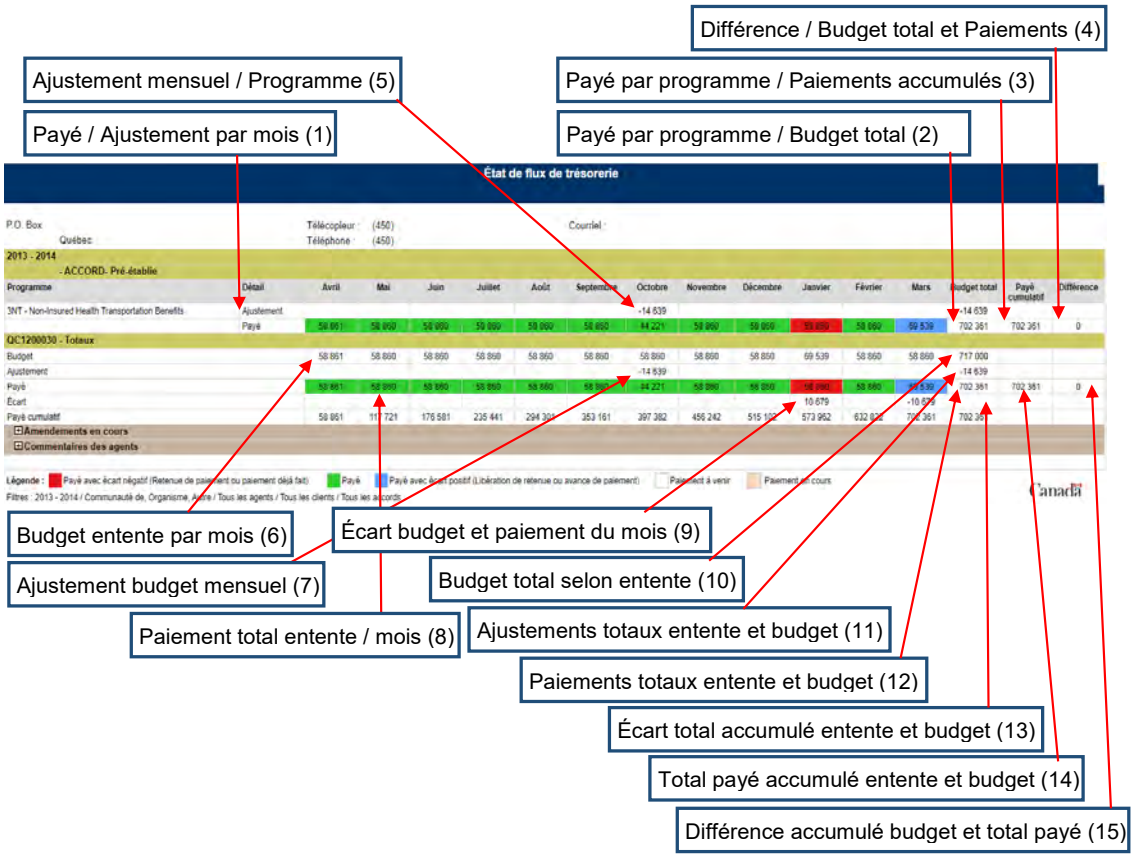
Section 6

4.4 État des flux de trésorerie

Ce rapport contient les informations nécessaires pour le suivi des paiements selon le calendrier des paiements (budget SGCC). Les données sont affichées par mois et surlignées en fonction des paiements effectués en trop ou en moins par rapport au budget prévu. L'exercice financier en cours est affiché par défaut. Le rapport présente également **le budget** du SGCC et les **paiements** extraits de SAP.

Voici un exemple du rapport de l'état des flux de trésorerie pour l'année 2009-2010



Le tableau suivant affiche les différents éléments, sources de données et calculs pour tous les paramètres dans l'exemple ci-dessus. Le numéro sur chaque ligne fait référence aux numéros entre parenthèses ci-dessus.

Appendix CC. SIA Community Profiles Database Guide *(continued)*

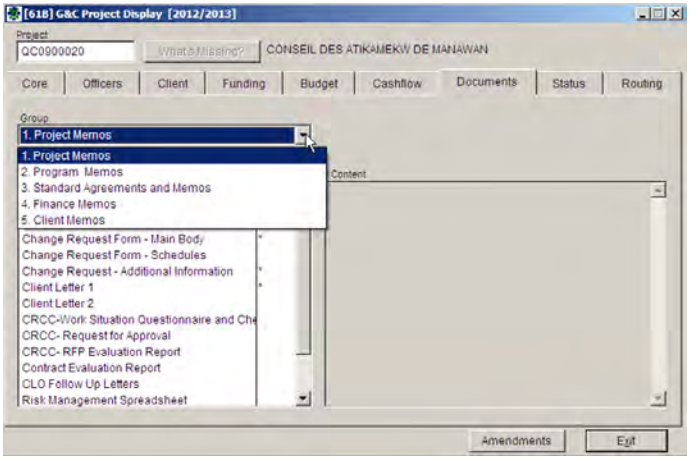
	PROGRAM		Sans ajustement	Avec ajustement
1	**Payé / Ajustement par mois**	**Montant du budget ou montant SAP**	On utilise le montant payé selon SAP KZ. S'il n'existe pas de paiement dans SAP KZ, on affichera zéro (0) pour les mois avant le cycle actuel, et le budget planifié pour les mois du cycle actuel et suivants.	On affichera le montant payé selon SAP KZ. S'il n'y a pas de paiement dans SAP, on affiche zéro (O) pour les mois avant le cycle actuel et le montant « Demandé**= budget + ajustement » pour les mois du cycle actuel et suivants.
2	**Payé par programme / Budget total**	**Budget**	Somme du budget mensuel (flux de trésorerie planifié au début)	Somme du budget mensuel plus les ajustements*
3	**Payé par programme / Paiements accumulés**	**Montant SAP**	Somme des montants payés par programme selon SAP KZ	Somme des montants payés par programme selon SAP KZ
4	**Différence / Budget total et Paiements**	**Montant SAP**	Budget total – somme payée = solde à payer pour le programme (les déviations concernant les dates ne sont pas maintenues)	Budget total demandé - somme payée = solde à payer au bénéficiaire ou pour le programme (les déviations concernant les dates ne sont pas maintenues)
5	**Ajustement mensuel / Programme**	**Budget (Plan d'ajustements)**	Nul (=0)	Montant négatif = plan d'ajustements
6	**Budget entente par mois**	**Budget**	Flux de trésorerie planifié - Budget total du programme selon l'entente, présenté par mois	Flux de trésorerie planifié - Budget total du programme selon l'entente, présenté par mois
7	**Ajustement* budget mensuel**	**Plan d'ajustements**	Nul (=0)	Somme des ajustements faits au programme
8	**Paiement total entente par mois**	**Montant du budget ou montant SAP**	On affiche ici la somme des montants payés aux programmes selon SAP KZ. S'il n'existe pas de paiement dans SAP KZ pour un programme donné, on affichera zéro (0) pour les mois avant le cycle actuel, et le budget planifié pour les mois du cycle actuel et suivants.	On affiche ici la somme des montants payés aux programmes selon SAP KZ. S'il n'existe pas de paiement dans SAP KZ pour un programme donné, on affichera zéro (0) pour les mois avant le cycle actuel et le montant « Demandé** = budget + ajustement » pour les mois du cycle actuel et suivants.
9	**Écart budget et paiement du mois**	**Plan d'ajustements**	Écart - (total entente) = ajustement Écarts des paiements = (Budget + paiement ajusté – payé). Note: Il ne devrait pas y avoir d'écarts pour les mois après le cycle de paiement actuel.	Écart - (total entente) = ajustement Écarts des paiements = (Budget + paiement ajusté – payé). Note: Il ne devrait pas y avoir d'écarts pour les mois après le cycle de paiement actuel.
10	**Budget total selon entente**	**Budget**	Flux de trésorerie planifié : total **annuel** pour les programmes composant l'entente = somme du budget (Total - entente) par mois.	Flux de trésorerie planifié : total **annuel** pour les programmes composant l'entente = somme du budget (Total - entente) par mois.
11	**Ajustements totaux entente et budget**	**Plan d'ajustements**	Nul (= 0)	Somme annuelle des ajustements **mensuels** faits aux programmes.
12	**Paiements totaux entente et budget**	**Montant du budget ou montant SAP**	Somme annuelle payée – (total entente) – paiements mensuels.	Somme annuelle payée – (total entente) – paiements mensuels.
13	**Écart total accumulé entente et budget**		Somme annuelle des écarts (total entente) – paiements mensuels.	Somme annuelle des écarts (total entente) – paiements mensuels.
14	**Total payé accumulé entente et budget**	**Montant SAP**	Somme annuelle des montants payés selon SAP KZ.	Somme annuelle des montants payés selon SAP KZ.
15	**Différence accumulée budget et total payé**		Budget total payé – paiement cumulatif payé = solde à payer pour l'entente (les déviations concernant les dates sont maintenues).	Budget total payé – paiement cumulatif payé = solde à payer pour l'entente (les déviations concernant les dates sont maintenues).

* Les ajustements ou autres sommes récupérées sont affichés comme montants négatifs.
** Demande = montant net provenant de la « demande de paiement » à être versé au bénéficiaire/programme = colonne « demandé » dans l'outil « Access »

4.5 Autres documents SGCC – Liste

Ce rapport affiche tous les documents annexés à l'entente dans SGCC **(autres que les documents financiers, des activités ou de reddition de comptes[1])** sous les sections correspondantes au « Groupe de documents » dans l'onglet « Documents » de SGCC :

Par exemple, pour les documents du projet :

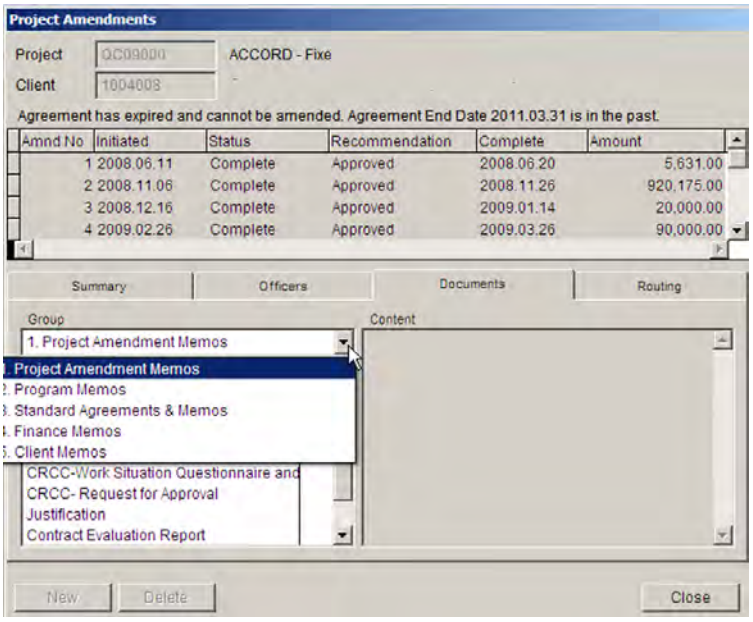


Tous les documents suivants peuvent être trouvés dans **« Autres documents SGCC – Liste »:**

SGCC Groupe de documents	Pour le filtre 6 (au rapport)
Documents 1. Notes - Projet	**PRJ – Documents** 1. Notes - Projet
Documents 2. Notes - Programme	**PHB – Documents** 2. Notes - Programme
Documents 3. Types d'ententes et notes	**PHC – Documents** 3. Type d'ententes et notes
Documents 4. Notes - Finances	**PHD – Documents** 4. Notes - Finances
Documents 5. Notes clients	**CLN – Documents** 5. Notes clients

[1] Pour les rapports des activités ou financiers, le calendrier détaillé des rapports et le répertoire des rapports sont utilisés pour faire le suivi des rapports reçus, en retard, etc.

La même logique est utilisée pour les documents – Amendements au projet :



Dans **« Autres documents SGCC – Liste »** :

SGCC Groupe de documents	Pour le filtre 7 (au rapport)
Amendements | Documents 1. Notes d'ordre général	**PAA - Amendements | Documents** 1. Notes d'ordre général
Amendements | Documents 2. Notes - Programme	**PAB - Amendements | Documents** 2. Notes - Programme
Amendements | Documents 3. Types d'ententes et notes	**PAC - Amendements | Documents** 3. Types d'ententes et notes
Amendements | Documents 4. Notes - Finances	**PAD - Amendements | Documents** 4. Notes - Finances
Amendements | Sommaire Commentaires – Modifications	**PRA - Amendements | Sommaire** Commentaires – Modifications
Amendements | Acheminement Acheminement - Modification	**PAT - Amendements | Acheminement** Acheminement – Modification

La liste des **Autres documents SGCC** permet d'accéder à tous les documents joints à une entente spécifique ou à toutes les ententes signées avec un client donné. Il sera également possible de voir les ententes en vigueur pour un exercice financier spécifique en activant le filtre à cet effet.

Le rapport comprend deux (2) sections. La première section contient les **« Documents 5. Notes clients »**, qui sont spécifiques au client lui-même contrairement à une entente particulière. La ligne de l'entente dans cette section affichera le titre « Non spécifique ».

Appendix CC. SIA Community Profiles Database Guide *(continued)*

La deuxième section présente les documents spécifiques à chaque entente. La ligne de l'entente dans cette section indique le numéro de l'entente (par exemple QC0900077 (01-Avr-2001 – 31-Mars-2010)) en plus du type de financement (par exemple l'entente de financement Canada/Premières nations).

Pour chaque section le rapport indique le nombre des documents qui le composent, par exemple « nombre de documents : 321 ».

Écran SGCC	p.ex.: Documents
Document group	p.ex.: 3. Types d'ententes et notes
Document	p.ex.: Sommaire de l'entente 1
No.	Numéro d'amendement (dans le cas où un amendement a eu lieu)
Contenu du mémo /	Texte (mémo et commentaires) ou lien hypertexte vers le document **joint**

Le codage couleur est également utilisé pour indiquer que le document existe et est requis (vert), existe mais n'est pas requis (blanc), est requis et manquant (rouge) :

Une série de règles est utilisée pour déterminer quels documents sont requis[2].
Note: Les documents « Non requis » figurent au tableau mais ne sont pas requis par les règles.

[2] Voir section suivante pour « Autres documents SGCC – Règles », pour en connaître davantage sur les règles.

4.6 Liste d'avis 1 et 2 SGCC

Ce rapport était utilisé pour les rappels mensuels envoyés par courrier (état des rapports). Il contenait un avis formel envoyé aux clients pour les rapports en retard lorsque le SGCC était actif. Il affichait la liste suivante :

- Des clients ayant reçu **le premier avis de rapports en retard**. (L'avis 1 : pour les rapports en retard de trente (30) jours ou moins et non reçus à la DGSPNI)
- Des clients ayant reçu **l'avis de deuxième niveau de rapports en retard**. (L'avis 2 : pour les rapports en retard de trente et un (31) jours ou plus et non reçus à la DGSPNI)

Le rapport était envoyé automatiquement le premier de chaque mois à partir d'une boîte de messageries générique simultanément avec l'***État des rapports SGCC***.

Ce rapport peut également être généré de façon ponctuelle. Les paramètres sont les mêmes que ceux de la ***Liste des rapports SGCC***. Pour une description détaillée, voir la section 4.7 de ce document.

Ci-dessous se trouve la liste des avis 1 et 2 (selon les paramètres du SGCC) :

Client – État des rapports : Nom du client, tel qu'il apparaît dans l'***État des rapports*** (nom officiel de la Bande ou nom de l'organisation) afin de trouver facilement les adresses électroniques des clients qui recevront des avis de retard (liste des avis 1 et 2);

Client – Profils : Nom du client, tel qu'il apparaît dans les ***Profils des communautés*** ou les ***Profils des organisations***;

Exercice financier : L'exercice financier pour lequel le rapport est requis (même définition que la ***Liste des rapports SGCC***);

Entente : Numéro de l'entente (même définition que la ***Liste des rapports SGCC***);

Rapport : Rapport d'activités ou rapport financier (même définition que la ***Liste des rapports SGCC***);

Programme : Programme pour lequel le rapport est requis (même définition que la ***Liste des rapports SGCC***);

Date d'échéance : Date d'échéance du prochain rapport (même définition que la ***Liste des rapports SGCC***);

En retard : Nombre de jours de retard (même définition que la ***Liste des rapports SGCC***);

Avis : Numéro de l'avis (1 ou 2). Dans la ***Liste des rapports SGCC*** : nombre de rappels. (Filtre : Type d'actions)

4.7 Liste des rapports SGCC

La ***Liste des rapports SGCC*** est un outil conçu pour aider à préparer une *liste de chose à faire* dans le cas où les délais prescrits ne sont pas respectés.

Plusieurs options et filtres sont disponibles :

Filtres :	*1. Région*	*2. Agent*
	3. Type de client	*4. État*
	5. Client	*6. Programme*
	7. Exercice financier	*8. Type de rapport*
	9. Rapport	*10. Accord*
Options:	*« Type d'action »*	
	Nb de jours minimum	
	Nb de jours maximum	

Le filtre **« type de rapport »** permet de choisir entre les rapports d'activités (ACT), les rapports financiers (FIN) ou les rapports de reddition de comptes (ART). Le nombre de jours **minimum** et **maximum** dépend de l'état choisi au filtre (4). Le nombre de jours permet de limiter la recherche à une période spécifique. Les différentes façons d'utiliser le ***nombre des jours*** selon l'***état*** du rapport seront expliquées davantage dans les pages suivantes.

Pour chaque exercice financier, le nombre de rapports disponibles apparaîtra dans le coin supérieur droit de chaque section. Celui-ci est déterminé par l'***état*** du rapport. Ci-dessous, il y a un (1) rapport disponible pour 2012-2013 et cinq (5) rapports disponibles pour 2006-2007.

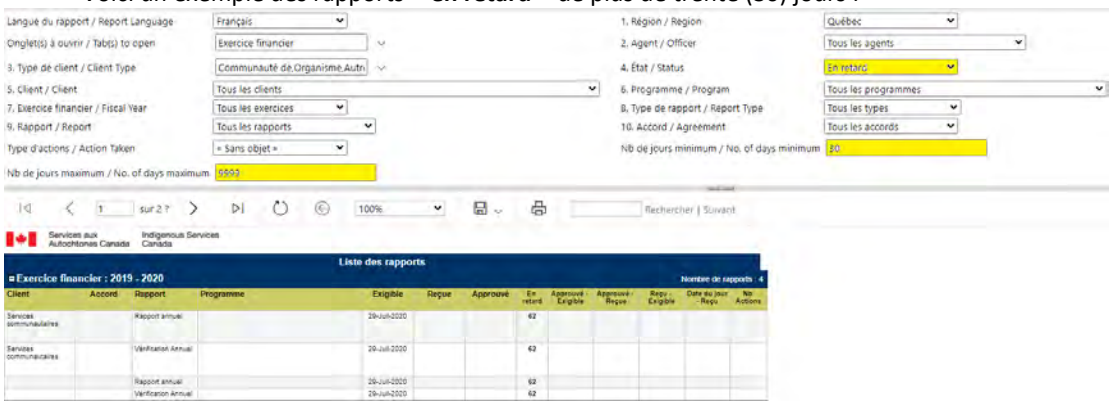
ROSAIRE BOULANGER	QC0700068	Rapport d'évaluation du marché	3XX - SPNI - contrats de service	30-Juin-2008		11-Juil-2008		11				

La ***Liste des rapports SGCC*** présente le nombre de jours calculés depuis la date **« Exigible », « Reçue »** et **« Approuvé »** en concordance avec l'option choisie au filtre (4) « État » du rapport. À noter qu'il y a cinq (5) choix d'état, donc cinq (5) résultats possibles :

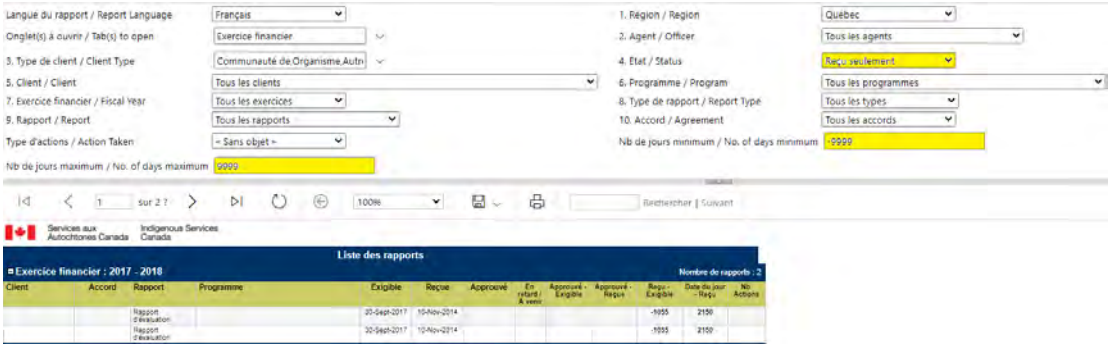
A. **4. État « en retard »** : nombre de jours entre la date **« d'aujourd'hui »** et la date **« exigible »** du rapport. Comme le nombre de jour doit être supérieur ou égal à zéro (0), le ***nombre de jours minimum*** sera égal à zéro (0) et le ***nombre de jours maximum*** sera supérieur à zéro (0). Possibilité d'entrer jusqu'à neuf mille neuf cent quatre-vingt-dix-neuf (9999) jours maximum.

- Les autres colonnes calculées (approuvé-Exigible; approuvé-reçu; reçu-exigible et date du jour-reçu) seront vides.
- Voici un exemple des rapports **« en retard »** de plus de trente (30) jours :



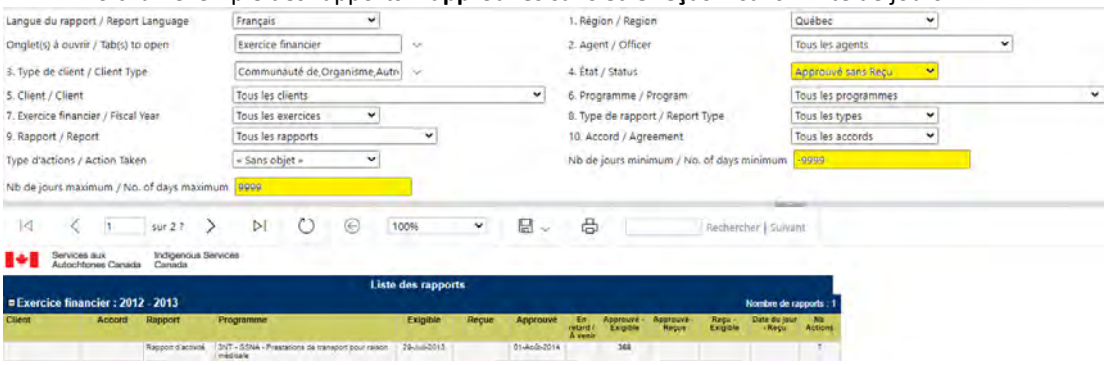
B. **4. État « reçu seulement » :** deux calculs seront affichés. En premier, le nombre de jours entre la date **« d'aujourd'hui »** et la date à laquelle il a été **« reçu »**. En deuxième, le nombre de jours entre la date à laquelle il a été **« reçu »** et la date **« exigible »**. Le nombre de jours peut être égal ou supérieur à zéro (0) ou inférieur à zéro (0) si le rapport a été reçu avant la date exigible. Conseil : inscrire **-9999** à la case du ***nombre de jours minimum*** et **9999** à la case du ***nombre de jours maximum***.

- Note: L'objectif étant d'identifier les rapports qui ont été **« reçus »** mais qui n'ont pas encore été **« approuvés »**, tout problème sera affiché dans la colonne **« Date du jour - Reçu »** indiquant ainsi un délai dans l'approbation par la DGSPNI depuis la réception du rapport.
- Les autres colonnes calculées (*en retard/à venir*; *approuvé-exigible* et *approuvé-reçu*) seront vides.
- Voici un exemple des rapports ***reçus seulement*** sans limite de jours :



C. **4. État « approuvé sans reçu »** : un seul calcul sera affiché : le nombre de jours entre la date approuvée et la date d'échéance. Le nombre de jours peut être supérieur ou égal à zéro (0), ou inférieur à zéro (0) si le rapport a été approuvé avant la date d'échéance.
Conseil : inscrire **-9999** à la case du ***nombre de jours minimum*** et **9999** à la case du ***nombre de jours maximum***.

- Note: L'objectif étant d'identifier **les rapports qui ont été approuvés sans avoir été reçus**, les problèmes apparaîtront dans la colonne **« approuvé-exigible »**. Ceci dénote cependant une erreur car le rapport devrait avoir été reçu.
- Les autres colonnes calculées (*en retard/à venir*; *approuvé-exigible* et *date du jour-reçu*) seront vides.
- Voici un exemple des rapports **« approuvés sans être reçus »** sans limite de jours :

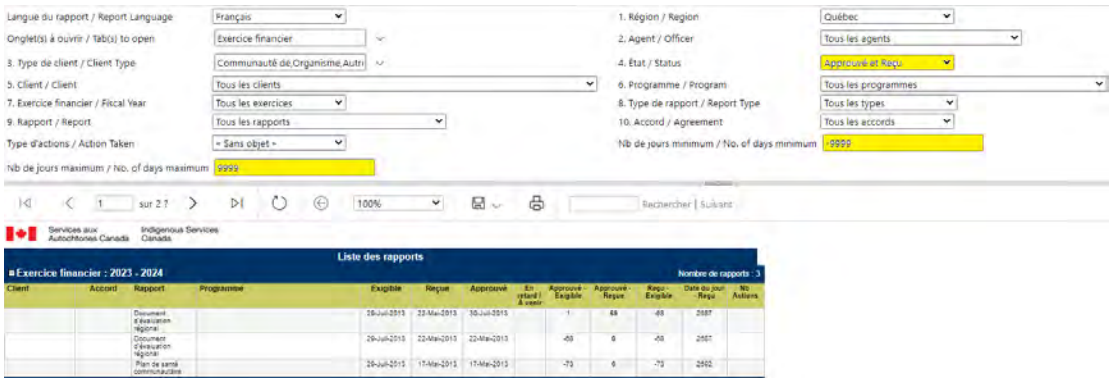


D. **4. État « approuvé »** : quatre (4) calculs affichés :
- **Approuvé-exigible**
- **Approuvé-reçu**
- **Reçu-exigible**

- **Date du jour-reçu**

Comme le nombre de jours pour les trois (3) premiers calculs peut être **>= 0** ou **< 0**, **le nombre de jours minimum** peut être < 0 et le **nombre de jours maximum** peut être **> 0**.
Conseil : inscrire **-9999** à la case du nombre de jours minimum et **9999** à la case du nombre de jours maximum.

- Note : L'objectif étant de calculer des statistiques, les résultats seront affichés aux colonnes **« approuvé-reçu »** et **« reçu-exigible »**. Les résultats peuvent être utilisés comme des indicateurs de performance autant pour les clients (acteurs externes) que pour la DGSPNI (acteurs internes) dans l'accomplissement des activités requises et à la fréquence à laquelle celles-ci sont complétées en retard ou à échéance.
- Ici, « **approuvé-exigible** » représente le nombre total de jours entre la date exigible et la date à laquelle le rapport a été approuvé, c.-à-d., **« approuvé-reçu » + « reçu-exigible ».**
- La seule colonne restante est **En retard/À venir**, elle est vide.
- Voici un exemple des rapports **« approuvé-reçu »** sans limite de jours.



E. **4. État « à venir »** : un calcul sera affiché sous la colonne ***En retard/À venir***. Comme le nombre de jours doit être égal ou supérieur à zéro (0), **le nombre de jours minimum sera égal à zéro (0)**, et **le nombre de jours maximum sera plus grand que zéro (0)**; Possibilité d'entrer jusqu'à neuf mille neuf cent quatre-vingt-dix-neuf (9999) jours maximum.

- Note: l'objectif de cette dernière option est d'avoir un outil pour gérer de façon proactive les rapports à venir. Par exemple, pour voir **la liste des rapports exigibles dans les cent vingt (120) prochains jours**, il suffit d'inscrire ***120*** **à la case « nb de jours maximum »**.
- Les autres colonnes calculées (*approuvé-exigible*; *approuvé-reçu*; *reçu-exigible*; et *date du jour-reçu*) seront vides.
- Voici un exemple des rapports **« à venir »** avec une limite maximum de cent vingt (120) jours :

Note: Lors de la création du guide, aucune donnée n'a été trouvée pour ce scénario spécifique.

4.8 Activités des programmes GL SGCC

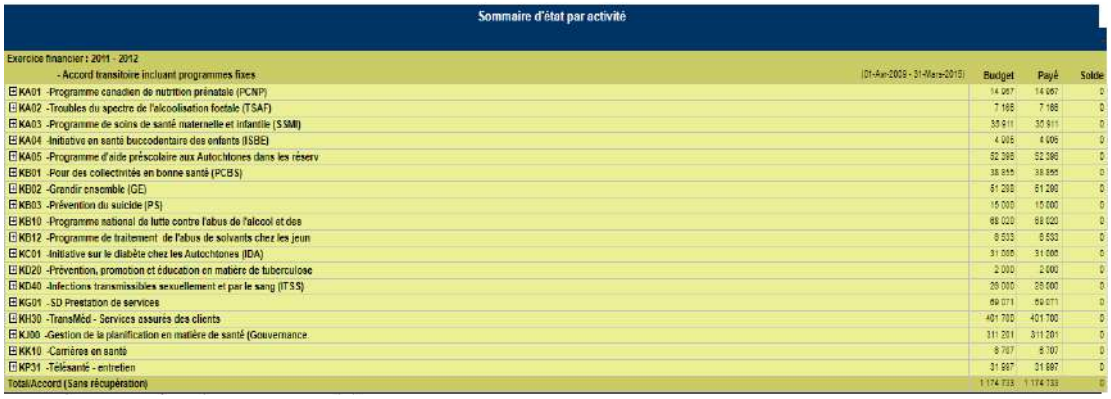
Activités des programmes GL : résumé d'état par activité

Ce rapport présente un résumé de l'état des dépenses encourues par activité de programme, par type d'entente ou par exercice financier. Les montants budgétés et payés sont indiqués ainsi que le solde (différence entre le budget et le montant payé) pour toutes les activités. Les centres de coût (CC), le numéro du grand livre (GL) et les programmes SGCC associés à toutes les activités budgétées et payées apparaîtront dans la vue détaillée du rapport.

Vue d'ensemble : La vue d'ensemble s'affiche par défaut. Elle pourra être sélectionnée en choisissant l'option « **aucun** » au filtre « **onglet à ouvrir** ». Cette vue inclut les paramètres suivants :

Activité = activité de programme, p.ex., KA01 – Programme canadien de nutrition prénatale (PCNP)

- Budget: allocation monétaire pour cette activité (le montant est tiré directement du SGCC, spécifiquement du « **rapport financier résumé** »)
- Payé : engagements acquittés, ou engagements pour lesquels une demande de paiement a été faite et complétée.
- Solde : engagements non acquittés, ou budget – payé



Sommaire d'état par activité

Exercice financier : 2011 - 2012

- Accord transitoire incluant programmes fixes (01-Avr-2008 - 31-Mars-2013)	Budget	Payé	Solde
KA01 -Programme canadien de nutrition prénatale (PCNP)	14 957	14 957	0
KA02 -Troubles du spectre de l'alcoolisation foetale (TSAF)	7 166	7 166	0
KA03 -Programme de soins de santé maternelle et infantile (SSMI)	30 911	30 911	0
KA04 -Initiative en santé buccodentaire des enfants (ISBE)	4 005	4 005	0
KA05 -Programme d'aide préscolaire aux Autochtones dans les réserv	52 398	52 398	0

KC01 -Initiative sur le diabète chez les Autochtones (IDA)	31 000	31 000	0
KD20 -Prévention, promotion et éducation en matière de tuberculose	2 000	2 000	0
KD40 -Infections transmissibles sexuellement et par le sang (ITSS)	28 000	28 000	0
KG01 -SD Prestation de services	69 071	69 071	0
KH30 -TransMéd - Services assurés des clients	401 700	401 700	0
KJ00 -Gestion de la planification en matière de santé (Gouvernance	311 201	311 201	0
KK10 -Carrières en santé	8 707	8 707	0
KP31 -Télésanté - entretien	31 997	31 997	0
Total/Accord (Sans récupération)	1 174 733	1 174 733	0

Vue détaillée : Elle est accessible en cochant l'onglet « **activité** ». Les informations sont présentées en deux (2) sections distinctes : *Budget* et *Paiement*. Les quatre (4) paramètres suivants apparaissent sous chaque section :

Activité – Programme – GL - CC

Budget				Paiement				Montant		
Activité	Programme	GL	CC	Activité	Programme	GL	CC	Budget	Payé	Solde

Si un ou plus des quatre (4) paramètres diffèrent entre les sections principales « **budget** » et « **paiement** » une ligne s'ajoutera pour mettre en évidence la différence dans la codification.

4.9 Autres documents SGCC - Règles

Ce rapport comprend les règles applicables à tous les documents joints aux ententes, autres que les documents financiers, d'activités et de reddition de comptes.[3] Ces documents sont créés et annexés pendant le cycle de vie de l'entente.

Le rapport sur les règles relatives aux autres documents du SGCC est divisé en deux (2) sections :

La première section contient les documents du groupe CLN – 5 (Notes clients), qui ne sont pas spécifiques à un type d'entente de financement, mais spécifiques au client. L'entête de cette section indiquera « **pour chaque entente** ».

La deuxième section contient les documents spécifiques à un certain type de financement (filtre 1). L'entête indiquera le type de financement.

Dans chacune des sous-sections suivantes se trouvent des documents pour chaque groupe de documents (filtre 2). Les colonnes suivantes contiennent des informations sur les documents :

Groupe de document, code et nom	P.ex.: code « PHC documents » **3. Types d'ententes et notes**
Document/Mémo (code et nom)	P.ex.: code « PROF » nom **Entente**
Client (à qui la règle s'applique)	P.ex.: « tous »; « organismes » ou « communauté de »
Amendement	P.ex.: « au moins un (1) document si amendement »; « pour chaque amendement » ou « n.a »
Redressement	P.ex.: « en redressement » ou « n.a »
Écran SGCC	P.ex.: documents

[3] Les exigences pour les rapports de reddition de comptes, d'activités et financiers ne sont pas inclus dans les règles ici présentées.

4.10 Documents de référence

Ce rapport fournit une liste des documents de référence du SGCC tels que les documents relatifs aux programmes, les rapports d'activités et les rapports financiers. Les rapports sont répertoriés par programme, par groupe de documents et par type d'entente selon l'exercice financier. Le document est accessible en cliquant sur le titre souligné en bleu.

5. Autres rapports

5.1 Tableau de répartition des agents responsables

Ce rapport fournit la liste des agents responsables travaillant avec chaque communauté ou organisme dans les « Profils ». Pour chaque communauté ou organisme, une liste des différents rôles des agents est affichée sur la ligne supérieure du tableau. Si un agent est actuellement assigné à cette communauté ou organisation, son nom, numéros de téléphone et courriel apparaîtront. Les communautés sont listées à la page 1 du rapport et les organisations à la page 2. La date de la mise a jur de chaque colonne est en haut de chaque colonne. Cliquez sur le lien a gauche pour acceder au donnees historiques des agents.

Note : Seuls les rôles d'agents les plus couramment utilisés apparaîtront dans ce rapport et il est possible que le **Rapport général** contienne plus d'informations pour une communauté ou une organisation donnée.

5.2 Agent(e)s responsables antérieur(e)s

Pour chaque communauté et organisation, le rapport affiche une liste des agents responsables qui ont actuellement ou ont eu le client dans leur portfolio. Pour chaque agent, le rôle, le courriel, les numéros de téléphone, les extensions, la date de début et le date de fin sont fournis s'ils sont connus.

Section 3 – Scénarios d'utilisation – cas pratiques

Comment bien se servir des « Profils »

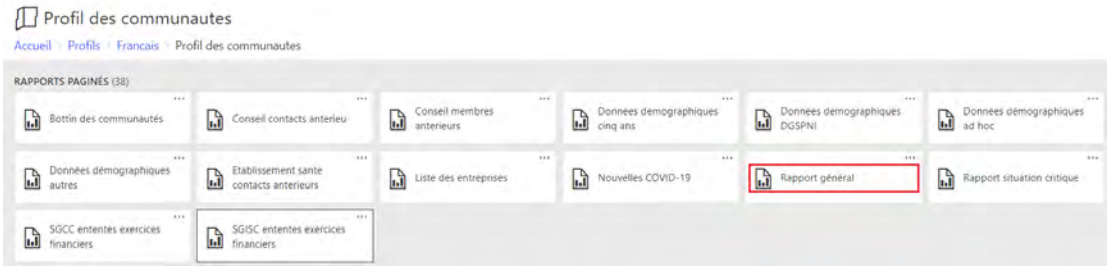
Cas # 1 : Recherche par nom de contact

(Chefs, conseillers, tierces parties, etc.), à l'intérieur d'une communauté en particulier p.ex. : Québec; communauté de Kanesatake

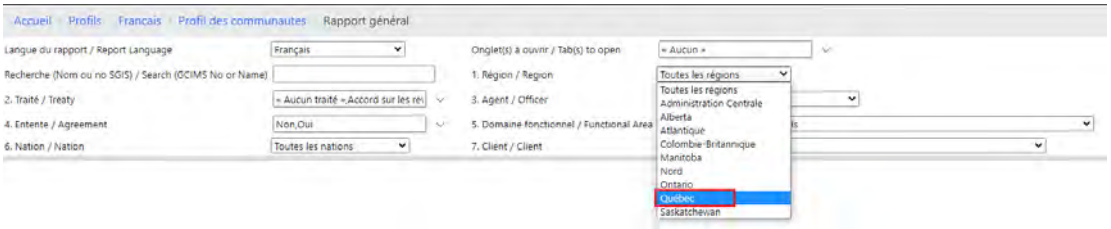
Objectif: Accéder rapidement aux contacts principaux dans une communauté spécifique.

Étape 1.1 : Sélectionner le dossier « **Profil des communautés** » :

Étape 1.2 : Sélectionner le dossier « **Rapport général** » :

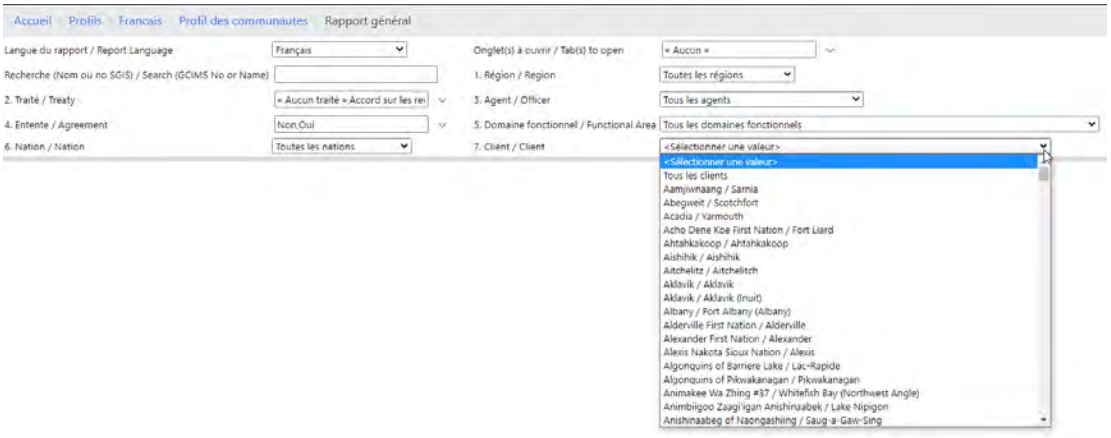


Étape 1.3a : Sélectionner « **Québec** » au filtre « **Région** » :



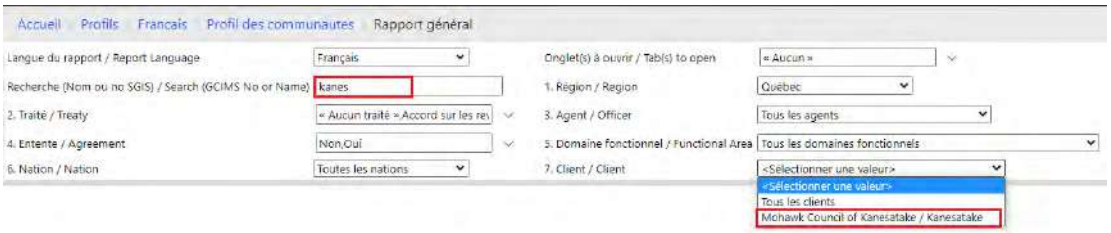
Appendix CC. SIA Community Profiles Database Guide *(continued)*

Puisque chaque filtre a une incidence sur le suivant, la liste des clients n'affichera que les communautés de la région sélectionnée.



Étape 1.3b : Il est également possible d'écrire le nom de la communauté dans le champ de recherche (ou une partie de celui-ci)

Résultat : La liste des clients sera réduite pour tenir compte du nom écrit :



Étape 1.4 : Sélectionner « **Kanesatake** » de la liste de clients

Étape 1.5 : Sélectionner les filtres appropriés et cliquer sur « **afficher le rapport** »

Résultat : Le rapport affichera les coordonnées de la communauté sélectionnée telles que celles des membres actuels ou des contacts des centres de santé.

Appendix CC. SIA Community Profiles Database Guide *(continued)*

Kanesatake
Région du Québec

Numéro selon AANC	69	**Nation**	Mohawks
Nom selon AANC	Mohawks of Kanesatake	**Langue ancestrale**	Mohawk
Niveau d'isolement AANC	Zone 1*	**Profil de recensement**	Recensement 2016
Niveau d'isolement SGPC	Non isolé	**Profil AANC**	Détails
Traités/Ententes sur l'autonomie gouvernementale : Aucun			
Alias et autres graphies : Kahnasatake

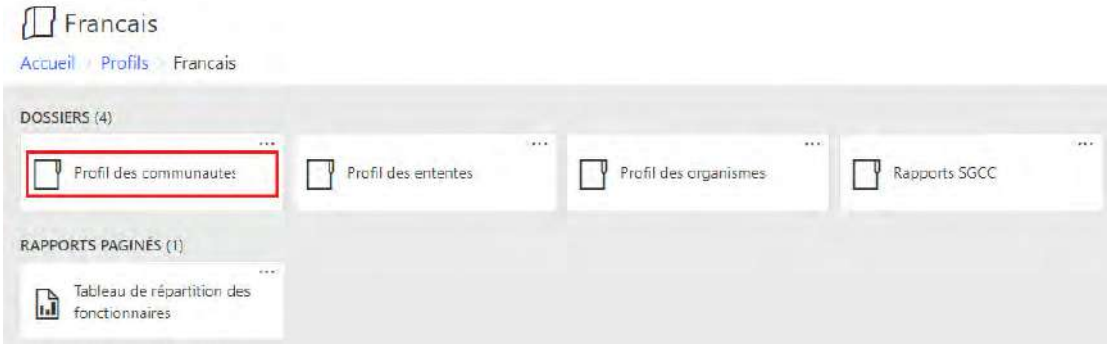
Finance	Ms. Christine Meilleur			15-Mai-2019

Conseil : En choisissant l'option « **sélectionner tout** » au filtre des « **onglet (s) à ouvrir** », toutes les informations pour cette communauté apparaîtront.

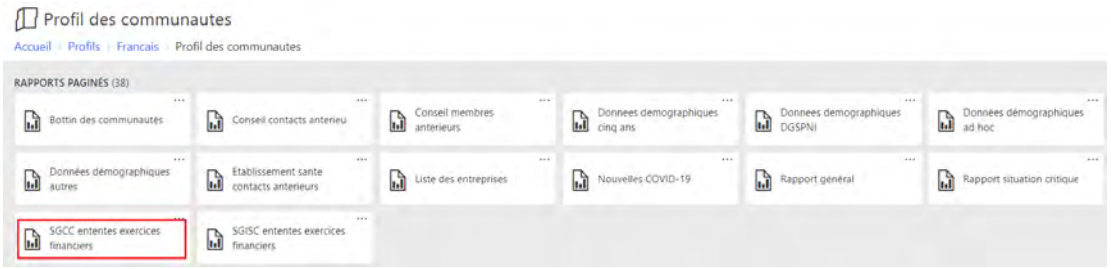
Cas # 2 : Recherche de l'historique des ententes par communauté

Objectif : Afficher la liste des ententes (programmes financés, activités, budget et paiements) incluant les amendements par exercice financier pour la communauté Kitigan Zibi dans la région du Québec.

Étape 2.1 : Sélectionner le dossier « **Profil des communautés** » :



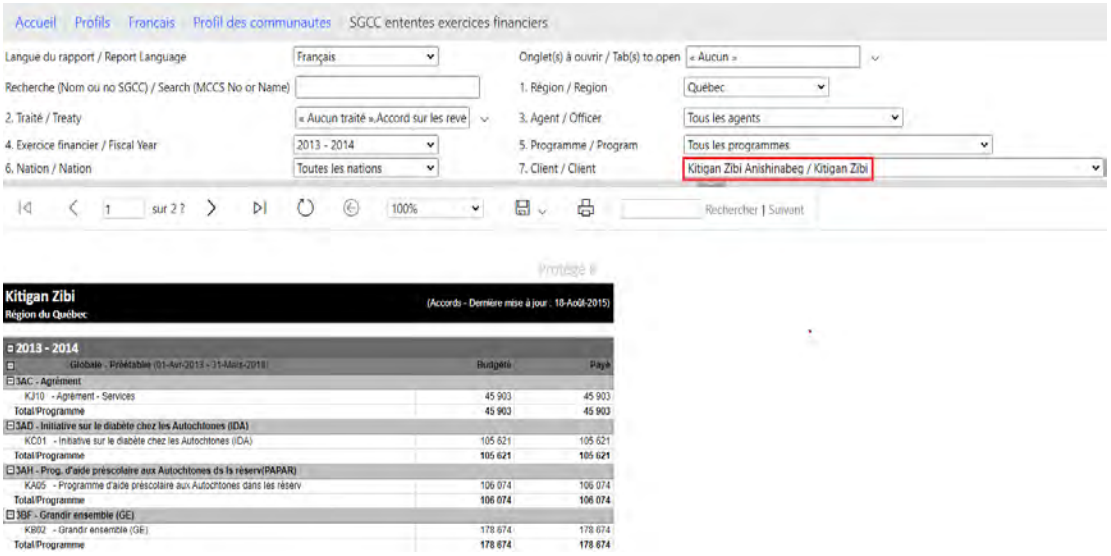
Étape 2.2 : Sélectionner le dossier « **SGCC ententes exercices financiers** » (ce rapport affichera toutes les ententes en vigueur jusqu'à l'exercice financier 2014-2015 seulement) :



Étape 2.3 : Sélectionner les filtres appropriés et cliquer sur « **Afficher le rapport** » :

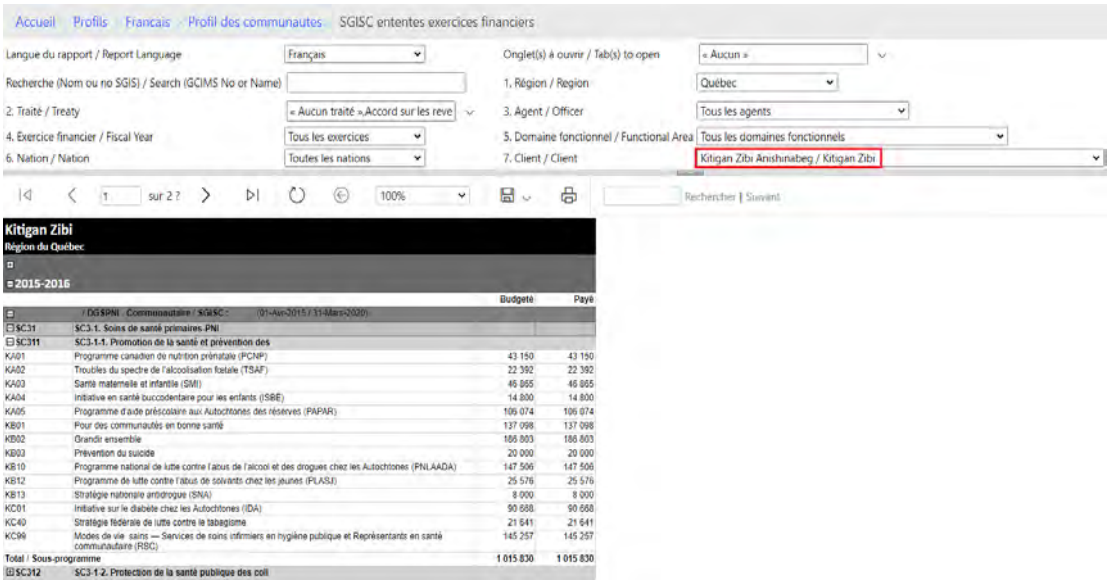
Il est possible d'utiliser l'une des options montrées au cas précédent pour sélectionner un client (rechercher ou réduire la liste en choisissant d'abord la région)

Sélectionner la communauté « **Kitigan Zibi** » et cliquer sur « **Afficher le rapport** »



Résultat : Le rapport affichera l'information financière (*Budgété* et *Payé*) des ententes en vigueur pour la période 2014-2015 seulement.

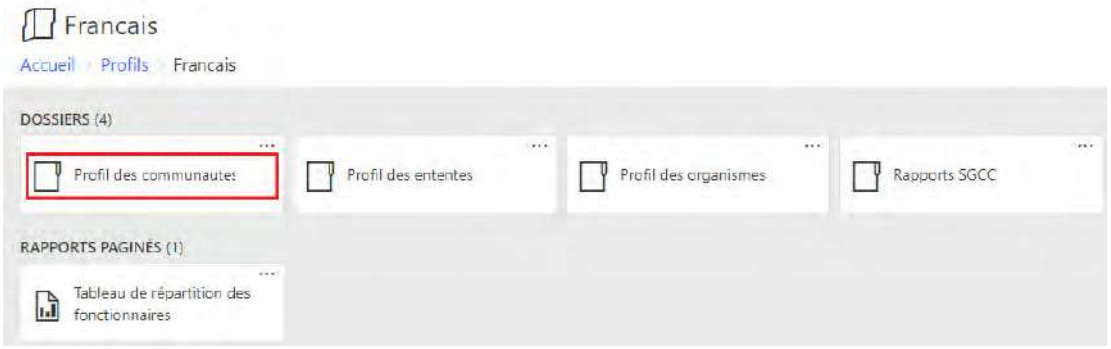
Étape 2.4 : Sélectionner le rapport « **SGISC ententes exercices financiers** » pour chercher la même information pour la même communauté mais pour les exercices financiers 2015-2016 et après.



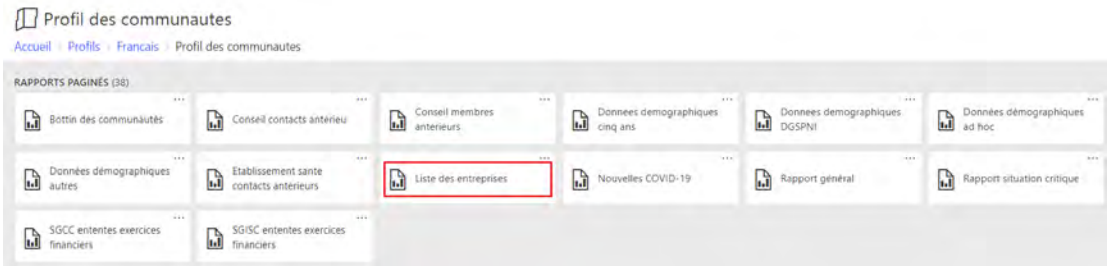
Cas # 3 : Recherche d'hébergement dans une communauté

Objectif : Permettre de visualiser rapidement les options d'hébergement telles que les hôtels, les motels et les autres services d'hébergement disponibles au sein de la communauté de **Kahnawake** au Québec.

Étape 3.1 : Sélectionner le dossier « **Profil des communautés** » :

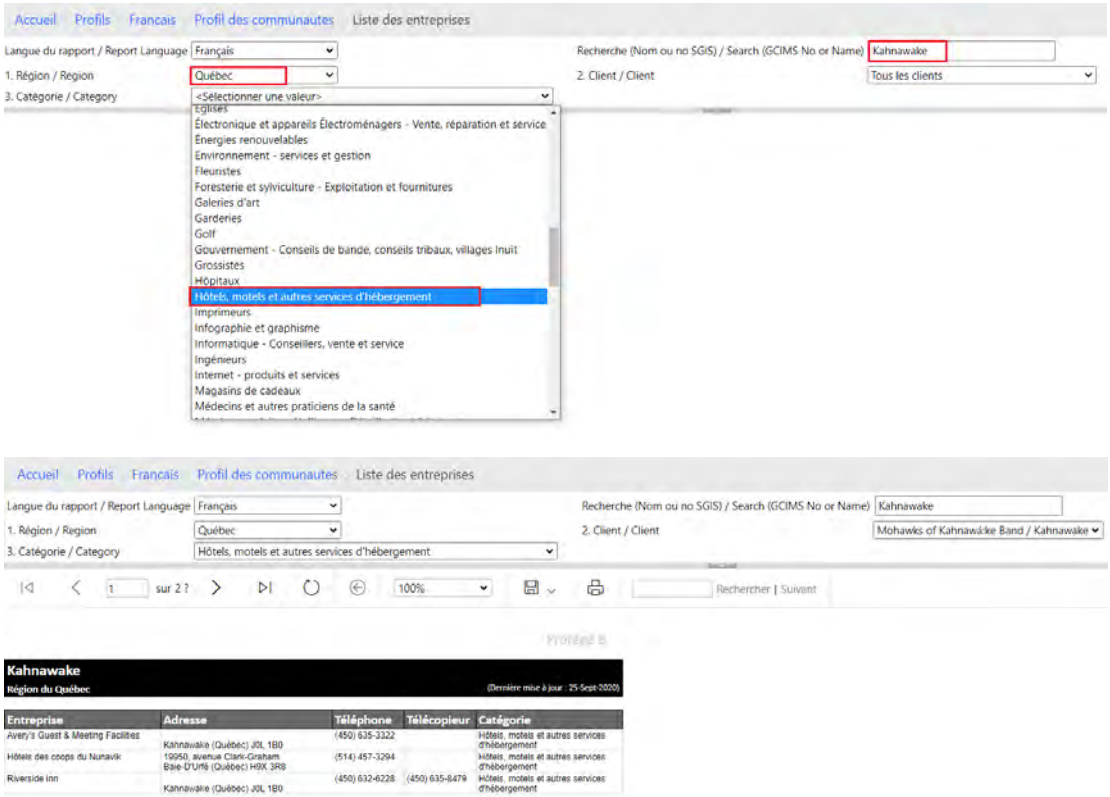


Étape 3.2 : Sélectionner le dossier « **Liste des entreprises** » :



Étape 3.3 : Sélectionner les options appropriées dans les filtres et cliquer sur « **Afficher le rapport** » :

Appendix CC. SIA Community Profiles Database Guide *(continued)*



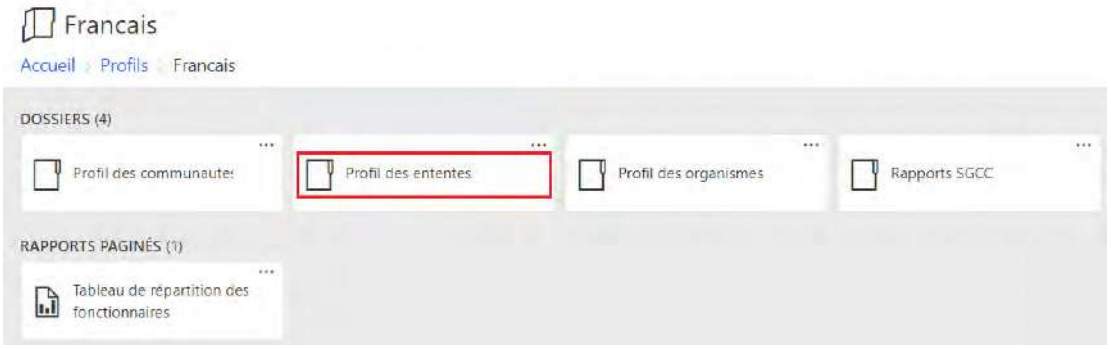
Résultat : Ce rapport affichera la liste des hébergements dans la région avec leurs nom, adresse, numéros de téléphone et fax. Ceci fournit rapidement des informations consolidées sur les différentes entreprises, les logements et les commodités de la communauté.

Cas # 4 : Rechercher les engagements, le budget et l'historique des paiements pour une entente de financement

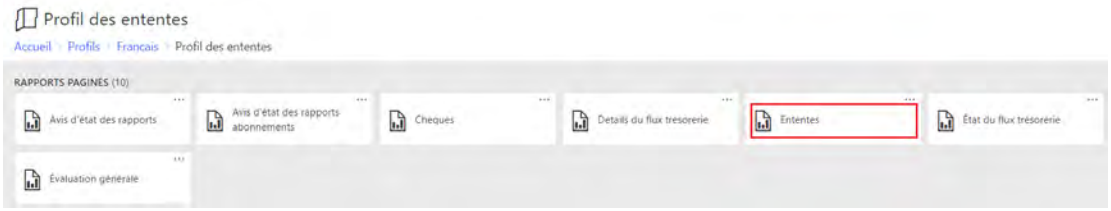
Objectif : Chercher de l'information financière (budget, paiements effectués et solde) par exercice financier.

Pour une entente financière débutant **en 2015-2016 ou après**

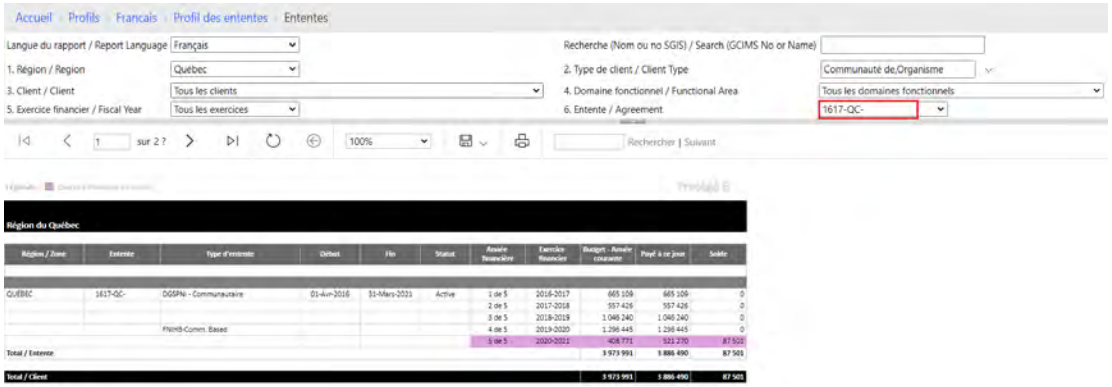
Étape 4.1a : Sélectionner le dossier « **Profil des ententes** » :



Étape 4.2a : Sélectionner le rapport « **Ententes** » qui présente le résumé des ententes par exercice financier :



Étape 4.3a : Sélectionner les options pertinentes dans les filtres et cliquer sur « **Afficher le rapport** » :

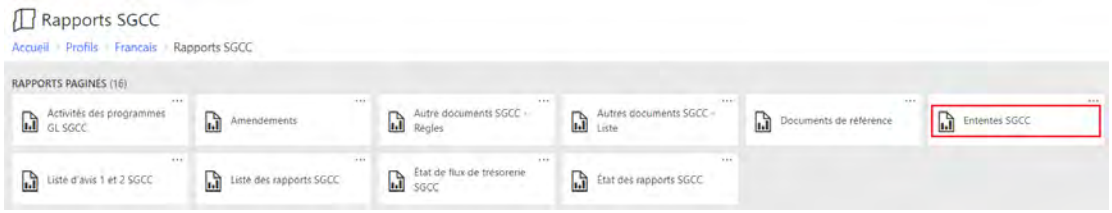


Résultat : Ce rapport affichera un résumé des montants approuvés, payés, engagés et encore disponibles pour la durée de l'entente. Il présentera aussi le **financement total de l'entente.**

<u>Pour une entente de financement débutant **avant 2015-2016**</u>

Étape 4.1b : Sélectionner le dossier « **Rapports SGCC** » :

Étape 4.2b : Sélectionner le rapport « **Ententes SGCC** » qui présente le résumé des ententes par exercice financier :



Étape 4.3b : Sélectionner les options pertinentes dans les filtres et cliquer sur « **Afficher le rapport** » :

Appendix CC. SIA Community Profiles Database Guide *(continued)*

Résultat : Ce rapport présente un résumé des montants approuvés, payés, engagés et encore disponibles pour la durée de l'entente (de la date de début à la date de fin du SGCC). Il présentera aussi le **financement total de l'historique de l'entente selon le SGCC**.

Appendix DD. Overview of Administrative and Survey Sources Documenting Needs

This appendix presents potential data sources that could help identify First Nations children living on and off reserve between December 12 2007 and November 2 2017 who needed an essential service, **but did not submit a request for services**. Specifically, the project team looked for sources of administrative and survey data that document health and non-health needs in Canada between 2007 and 2017. If children with "unmet needs" are eligible for compensation under the recent AIP, these data sources on needs could hypothetically be compared with data sources documenting service provision.

The results of our research showed that none of the data sources examined could systematically identify First Nations children with health and/or non-health needs across Canada between 2007 and 2017. As such, using these databases to identify children with "unmet needs" (i.e., who had a need for essential services, but did not make a request for services), would not be an efficient way of identifying these children.

Health needs (physical and mental health)

Administrative data sources

The table below highlights national administrative data sources that document health needs in Canada along with the limitations to identifying First Nations children with this need between 2007 and 2017.

Appendix DD. Overview of Administrative and Survey Sources Documenting Needs *(continued)*

Table 1 National administrative data sources that document health needs of children and the limitations to identifying potential claimants with "unmet needs"

	Children's Oral Health Initiative (ISC)[i]	Hospital Mental Health Database (CIHI)[ii]	Canadian Chronic Disease Surveillance System (PHAC)[iii]	National autism spectrum disorder Surveillance System (PHAC)[iv]	Canadian Paediatric Surveillance Program (PHAC)[v]	Canadian Tuberculosis Reporting System (PHAC)[vi]	National Epidemiologic Database for the Study of Autism in Canada (CIHR)[vii]	National Ambulatory Care Reporting System[viii]
Information collected	- Early childhood tooth decay prevention program aimed at children aged 0 to 7, their caregivers and pregnant women living on-reserve or accessing on-reserve resources - Data on decayed, missing, and filled teeth	- Data from all provinces and territories in Canada on hospitalizations for mental illness and addiction both in general and psychiatric hospitals - Data from 2003-2004 to 2019-2020 - Collects information on primary diagnosis at separation and secondary diagnosis at separation (see here for data dictionary)	- Collaborative network of provincial and territorial surveillance systems, supported by the PHAC. - Collects data on all residents who are eligible for provincial or territorial health insurance on the following chronic diseases: o Cardiovascular diseases o Chronic respiratory diseases (i.e., Asthma) o Mental illnesses o Diabetes o Musculoskeletal disorders o Neurological conditions - Collect data on health outcomes (i.e., morbidity/mortality, health events/complications and use of health services)	- Collects anonymized case-level data to examine and report Autism Spectrum Disorder (ASD) prevalence, incidence, characteristics, and related outcomes from participating provincial and territorial partners, from administrative records. - Use data from provincial and territorial health, education, and social service sectors.	- Established in 1996 to monitor diseases and conditions in Canadian children that are relatively low in frequency but are of public health importance, with high disability, morbidity, mortality, and economic cost to society. -Gather data from paediatricians and paediatric subspecialists	- National surveillance of new and re-treatment cases of active TB conducted in partnership with all provinces and territories by the Public Health Agency of Canada (PHAC). - Objective of the Canadian Tuberculosis Reporting System (CTBRS), Canada's national case-based surveillance system, is to monitor and report on the number of cases and on the rates of active TB in Canada	- Cycles in 2003/2005/2008/2010, children ages 2-14 - Monitor the number of children diagnosed with ASD in different regions of Canada - Identified children with ASD through agencies which provide services to this population	- Data available from 2001/02 onward - Contains data for hospital and community-based ambulatory care - Includes emergency departments, day surgery, outpatient and community-based clinics.
Limitations to identifying First Nations children with this need between December 2007 and	- Only on-reserve - Only in British Columbia - Data on decayed, missing, and filled teeth likely	- Only collects data on hospitalizations (i.e., does not reflect when a child is not able to access mental health services at	- This refers to a selection of chronic health conditions (missing information on conditions such as autism that are commonly found in children)	- Data collection began in 2015 - Youth 5-17 years - Only captures children/youth with a diagnosis OR who is receiving services for ASD	- Only for rare conditions - Collects non-nominal data - Data is anonymized (only reporting physician is	- Specific to TB, no data on other health conditions. - Tracks First Nations status (both on and off reserve)	- Only identified children receiving services for their ASD diagnosis - Only included Manitoba, South Eastern Ontario, Prince Edward Island, Newfoundland &	- Possibly traceable through health card # - Doesn't appear to include facilities in

Appendix DD. Overview of Administrative and Survey Sources Documenting Needs *(continued)*

November 2017	not systematically collected	a hospital or less serious mental health needs) - Excludes populations under 15 years old (PHAC) - Only collects de-identified demographic information (age, sex, region, etc.) - Does not seem to include First Nations status - May be traceable through health card #	- Specific to residents eligible for provincial or territorial health insurance (i.e., those not eligible for NIHB) - Information seems to be collected annually - Individuals may be identifiable by health card # - Age 1+ -Yukon data excluded before 2010-2011 -Does not seem to include First Nations status.	- Only from participating provinces/territories (missing Ontario, Northwest Territories, Nunavut, Alberta, Manitoba, Saskatchewan) - All data de-identified, no personal information is collected. -Unlikely that we can use this database to find individuals	aware of the patient's identity, CPSP can't link any child to a report)	- Retain all raw data (patients may be identifiable through these) - First Nations status missing from British Columbia data in 2016 - Tracks treatment outcomes	Labrador, British Columbia - In Manitoba excluded children on reserve - Information anonymized, unlikely we can use to track individuals	Northwest Territories or Nunavut - Doesn't include First Nations status

There also exist possible administrative databases from provinces:

- British Columbia's Integrated Case Management System[ixx]
  - Launched in 2008 to integrate systems from Ministry of Social Development and Social Innovation/Ministry of Children and Family Development
  - Improve information sharing and case management, stores data and personal information of 2.5 million individuals
- Manitoba Population Research Data Repository[xi]
  - Developed to describe and explain patterns of healthcare and profiles of health and illness
  - Data come from government administrative databases (health, education, social services, etc.)
  - Data is de-identified (may not be able to track individuals through this database)
- Ontario - Institute for Clinical Evaluative Sciences[xii]
  - Includes numerous databases (i.e., Ontario Paediatric Inflammatory Bowel Disease Dataset, Ontario Diabetes Dataset, Ontario Asthma Dataset)
  - May be traceable by health card # depending on the database

Survey data sources

The table below highlights national survey data sources that document health needs in Canada along with the limitations to identifying First Nations children with this need between 2007 and 2017.

Appendix DD. Overview of Administrative and Survey Sources Documenting Needs *(continued)*

Table 2. National survey data sources that document health needs of children and the limitations to identifying potential claimants with "unmet needs"

	First Nations Regional Health Survey (FNIGC)[xiii]	Canadian Survey on Disability (Statistics Canada)[xiv]	Participation and Activity Limitation Survey (Statistics Canada)[xv]	Aboriginal Peoples Survey 2012 (Statistics Canada)[xvi]
Information collected	- Cross-sectional survey conducted in 2002/03, 2008/09 and 2015/16 of First Nations children, youth and adults living on First Nations reserves and in Northern communities across Canada. - Collects information on health and wellbeing (including dental, disability, chronic conditions) – see table below for full list of indicators -Reports on percentage of individuals with a diagnosed health condition who are not receiving treatment, those who sought treatment for addiction or drug use, etc.	- Survey conducted in 2012 and 2017 of Canadians aged 15 and over whose everyday activities are limited because of a long-term condition or health-related problem - Focuses on activity limitations related to hearing, vision, mobility, flexibility, dexterity, pain, learning, mental health, memory and developmental disabilities - Includes data on the use of aids and assistive devices, daily help received or required by respondents (including unmet needs for accommodation); the use of various therapies and social service supports; the education and employment experiences of persons with disabilities; and methods used to access government services	- National survey conducted 2001 and 2006 that gathers information about Canadian adults and children whose everyday activities may be limited because of a health-related condition or problem - Purpose is to determine the number of Canadians with activity limitations, what type of limitations they experience and most importantly, what barriers they might face. - Questions concern daily activities such as walking, standing, carrying an object, communicating, learning, etc. - Survey two groups: children ages 0-14 and adults 15+ - Does include unmet needs	- A national survey on the social and economic conditions of First Nations people living off reserve, Metis, and Inuit. - The 2012 cycle focused on issues of education, employment, and health. - Access to and use of healthcare services by Aboriginal identity - Includes categories for "unmet needs" (i.e., healthcare required but not received, does not have a doctor – has not tried to contact one)[xvii] - Children ages 6-14 years old
Limitations to identifying First Nations children with this need between December 2007 and November 2017	- 253 of a total of 630 communities participated in last cycle (sample) (i.e., not full general population) - Cycles take place at approximately 5 to 8-year intervals (data missing in 2007 and between 2009-2014 and 2016-2017) - Only concern First Nations children on-reserve (not off-reserve) and in Northern communities -Individuals are likely un-identifiable through this survey as responses are anonymous	- No data on children aged 14 and younger (starts at 15) - Relative subjectivity of the measure of disability - 5-year interval between the 2 surveys (no information on 2007-2011 and 2013-2016) - Based on a subsample of Census data when population indicated that had an 'activity limitation'- so constrained by same limitations as Census (namely high rates of non-response amongst First Nations communities) - Methodological differences between the 2012 and 2017 CSD - Does not include First Nations reserves (PHAC) - Aboriginal Peoples Survey is considered to be the official source of disability rates for Aboriginal persons.	- Populations living on First Nations reserves were excluded - Relative subjectivity of the measure of disability - Based on a subsample of Census data when population indicated that had an 'activity limitation'- so constrained by same limitations as Census (namely high rates of non-response amongst First Nations communities) - Not in years of interest (i.e. 2007 to 2017) - If able to receive participant consent, could possibly access information	- Data has been de-identified, likely no ability to track individuals - 2012 survey was age 6+, but the 2017 survey was changed to only include age 15+

Appendix DD. Overview of Administrative and Survey Sources Documenting Needs *(continued)*

Other (non-health) needs

Examples of non-health needs include: Respite needs, Social needs, Travel needs, Education needs, Infrastructure needs.

Administrative data sources

The project team was unable to find national administrative data sources documenting non-health needs.

Examples of province-specific administrative data sources documenting non-health needs are the following:

- Yukon - Student Information System[xviii]
  - Yukon Department of Education gathers data on students
  - May be able to access this data with permission from the Department
  - Includes data on students receiving IEP, student performance (i.e., which students "aren't meeting standard")
- Nova Scotia - Technology for Improving Education Network (TIENET)[xix]
  - Records all students requiring additional support/programming
- Prince Edward Island – Department of Education & Department of Social Services and Seniors[xx]
  - Not a database – but the Department holds records of students which may be accessible upon request
  - Some databases (i.e., National Epidemiologic Database for the Study of Autism in Canada) reported contacting the Department of Education in PEI to receive the information of children with ASD)
- British Columbia - Edudata[xxi]
  - Holds BC Ministry of Education data from 1991 onwards
  - Data is accessible upon request

Survey data sources

The table below highlights national survey data sources that document non-health needs in Canada along with the limitations to identifying First Nations children with this need between 2007 and 2017.

Table 3 National survey data sources that document non-health needs of children and the limitations to identifying potential claimants with "unmet needs"

Appendix DD. Overview of Administrative and Survey Sources Documenting Needs *(continued)*

Potential national survey data sources	First Nations Community Survey (FNIGC)[xxii]	Participation and Activity Limitation Survey (Statistics Canada)[xxiii]
Information collected	- Founded in 2005, and conducted again in 2008 and 2015, the First Nations Community Survey provides a portrait of 330 randomly selected communities by surveying select community members on a series of themes - These themes include: o External Environment (environmental issues, such as the proximity of mines and chemical plants, water treatment standards, and emergency coordination) o Shelter and Infrastructure which deals with basic physical structures and facilities needed in the community, like roads, plumbing, power, and internet. o Housing which includes questions about waiting lists for homes, maintenance, heating and energy efficiency. o Food and nutrition explores the availability, accessibility, and quality of fresh, nutritious foods. o Employment and Economic Development examines the economic opportunities that exist inside and outside First Nations communities. o Early childhood development includes issues relating to childcare, education, and skills development for young children. o Education looks at enrolment in high-school and post-secondary education, in addition to First Nations-run schools and pre-school programs. JUSTICE AND SAFETY contains questions related to community policing, fire and ambulance services, and emergency response. o Health services explores the availability of health professionals, hospitals, and health services in First Nation communities. o Social services which deals with income support, safe homes, and youth programs. o First Nations identity which includes issues related to First Nations language, cultural programs, repatriation, and membership. o First Nations Governance which explores questions relating to self-government, and groups with designated authority such as economic development corporations or Council representation.	-See Table 2 - Includes unmet educational needs of children with disabilities (i.e., special education, education aides)
Limitations to identifying First Nations children (on and off reserve with this need) between December 2007 and November 2017	- Randomly selected communities - Select community members respond to the survey - Only First Nations on reserve and Northern communities - Survey conducted in 2005, 2008, and 2015 - Data was likely collected anonymously, and individuals can't be tracked	-See Table 2 -Unclear whether First Nations status was collected

Canadian Settlement Processes

Indian Residential Schools Settlement Agreement

Notice Plan

As part of the settlement agreement, the Government was responsible for creating and executing a National Outreach Strategy for the IAP and CEP. One prong of the plan was to provide notice to eligible claimants wherever possible. The Government of Canada funded a "Notice Plan"[1] that was designed and implemented in four phases by Hilsoft Notifications – a legal notification company.[2] According to the Government of Canada, the Notice Plan reached 98% of the target population an average of 14 times.[3]

The notice plan consisted of four phases outlined below:

These included:

- Phase I: Hearing Notice: Affected people residing on reserve, within another Aboriginal community or settlement, or within the general population were targeted for a hearing notice about approval of the settlement. The launch included radio and television advertisements and direct mailings to Band Offices, Tribal Council Offices, and Friendship Centres. In addition, Phase I included the creation of a public website and toll-free information line.[4] All known applicants were mailed CEP and IAP applications.[5]
- Phase II: Provided "more information" to as many eligible claimants as possible about the closure of the opt-out period.
- Phase III CEP Application Deadline Notice: Television, radio, print, and other advertising was purchased to convey that the Common Experience Deadline was September 19, 2011. Both Aboriginal and mainstream outlets were targeted.
- Phase IV: IAP Application Deadline: The intended purpose of this campaign was to raise awareness about the September 2021 IAP application deadline. Every known claimant and "other interested persons" were mailed a cover letter and advised to call a toll-free number to learn about their rights, potential benefits and other application information. Like Phase III, both mainstream and Aboriginal print, radio, television, Internet banner, outdoor transit shelter notices, and Homeless shelter outreach were used to target applications. Additionally, and similar to other campaigns, the notice communications were produced in appropriate languages for each vehicle and targeted many different Indigenous and First Nations communities.

Hilsoft Communications targeted Indigenous peoples over aged 25+ as part of a broader recognition that the target population was "older." Tactics to reach the target community can be divided into two categories: direct mailings and general advertising. Hilsoft directly wrote letters to known individuals who had "come forward and provided their contact information in Phase 1" in addition to "numerous lists provided by the Assembly of First Nations, Inuit, lawyer, and government databases, as well as mailing individual organizations likely to contain eligible recipients of CEP and IAP. General advertising included newspaper advertisements, informational news releases, Indigenous publications, and other multi-channel strategies.

The IRSAS – the Government of Canada's oversight body of the compensation agreement – also developed its own National Outreach Strategy. The purpose of the additional communications campaign was to "provide accurate, relevant information on the IAP and to raise awareness about available support services." [6] The problem was that there was a large gap between the number of CEP recipients and IAP recipients. Therefore, the information program prioritized locations where either there were 200 CEP applicants with fewer than 10% claimants applying to the IAP; and (2) where there had

been less than 1% uptake in the IAP program. The program was, however, unable to reach all communities where there was a gap in applications because of a lack of time and resources. In total, there were 314 IAP information sessions held in various languages. In addition, IRSAS revitalized the content to be "in plain language" and initiated public service announcements in four languages (English, French, Cree, Inuktitut).[7]

Given the large participation of different communities in the process, the outreach of the IRSSA could be characterized as a success. However, given Canada's acknowledgement that the IAP program was misunderstood, largely because of misinformation, claims of success should be tempered.

The Common Experience Payment

Application design

The Common Experience Payment (CEP) provided every eligible claimant with a lump sum payment for attending a recognized residential school.[8] Students received an initial sum of $10,000 for the first year attended, and then an additional $3,000 for each additional year attended (or part thereof).[9] All former students who resided at a recognized "Indian Residential School" and were alive on May 30, 2005 were eligible for CEP. Applicants had five years to apply. The deadline was September 19, 2011.[10] The purpose of the payment was to recognize the experience of residing at a residential school and the impact to culture, language, and other losses.[11]

The burden of proof was mixed. Claimants were required to complete an application that asked for basic biographical information, governmental identification, and information about the time, place, and duration of time spent at a residential school.[12] Applications were required to be notarized and needed to be witnessed.[13] Once the application was completed, the government first evaluated the application using an automated system that used an algorithmic search engine to determine if the claimant was eligible. If the automated system was unable to reach a conclusion, the application was then reviewed manually by the National Research Analysis Unit of INAC.[14]

Claimants could supplement information by seeking reconsideration of their initial application by INAC. After reconsideration was rejected, claimants could appeal their claim to the National Administration Committee (NAC) by submitting an appeals form.[15] Claimants could appeal if their claim was either partially or completely denied.[16] The NAC was a seven-member voting body consisting of five members who represented former students, Canada, and the churches. NAC strove to reach "consensus-based" decisions on appeals, but approved only a small percentage of the

[16] *Ibid.*

appeals they reviewed. If a claimant was deemed ineligible after both reconsideration and appeal, they could petition the Court to consider an appeal of their claim, however, few claimants did.[17]

Providing support to claimants

The Government of Canada, and mainly Indigenous and Northern Affairs Canada (INAC), were responsible for overseeing and administering the CEP program. To support applicants, the Government created a toll-free telephone number to answer application questions and also provide mental health and emotional support services.[18] Additionally, religious and secular organizations were also available to survivors throughout the entire process. No law firm that signed the settlement agreement could charge survivors eligible for CEP with any costs associated with the CEP payment.[19]

Processing of claims

Over 105,000 people applied for CEP, and 75 percent of all CEP claimants received compensation.[20] The average claimant received approximately $19,000.[21] Almost 80,000 claimants were paid at the outset while 23,927 were deemed ineligible. INAC processed more than 27,000 reconsideration requests, while NAC processed 5,000 subsequent appeals. Only approximately 20 percent of NAC appeals were successful.[22] There were slightly over 700 court appeals and only 13 were successful.[23]

Electronic databases with digitized records and algorithmic searching functions were used extensively to process applications for the IRSSA's Common Experience Payment (CEP).[24] The process was completed in three steps. First, claimants submitted their application, and it was recorded in the Single Access Dispute Resolution Enterprise (SADRE). Second, the claimant's information was inputted into the Computer Assisted Research System (CARS). CARS would subsequently search over one million digitized, coded records using over 600 calculations to determine eligibility. If CARS was unable to reach a decision on the claim, the application was reviewed by a member of the National Research Analysis Unit of the Office of Indian and Residential Schools Canada (OIRSC). After a decision was reviewed, the compensation decision was subsequently recorded in the SADRE system. The SADRE database therefore included the ultimate compensation decision and all citations of the summation research used to reach that decision.[25]

CARS was able to process tens of thousands of applications and make automated compensation decisions. In fact, CARS determined a claimants' eligibility in approximately 44 percent of over 110,000 applications. This amounts to approximately 48,000 applications. According to Government of Canada employees, CARS "consistently deployed" the expertise of a trained researcher at a "fraction of the time and cost it took to undertake manual research." Therefore, at its best, CARS could process claims quickly, or at least faster than manual review, determine if a claimant was eligible, and begin the payment process.[26] When accurate data is available, a useful and efficient algorithm benefits claimants too by limiting the time, energy, and effort expended to the initial application.

Appendix EE. Overview of Canadian and International Compensation Schemes *(continued)*

However, the implementation of CARS was imperfect because it was less effective than predicted. CARS had structural, design flaws. It could not identify gaps of time in student claims. The dataset also only consisted of a limited number of years, and therefore the algorithm could not accommodate the unanticipatedly high number of applicants early in the process.[27]

The algorithm was not designed to respond to the volume of applications that the CEP process generated in the first three months. Almost 80 percent of the 105,000 applications were submitted during the first three months. Consequently, delivery of cheques was delayed because the IT systems lacked the capacity to "handle the vast amount of information that had to be collected and processed."[28]

To add to these volume-related issues, CARS was unintegrated with SADRE and other CEP Information Technology (IT) systems. This meant that information across systems and across the departments responsible for validating and assessing claims was un-shareable.[29] Consequently, CARS was "slower, less productive and effective" than suspected. The Government of Canada believes these issues were not as costly because of the "dedication of employees" in meeting goals. However, the lack of integration problems were exacerbated by the three different systems used by OIRSC. These systems were managed by separate units and led "to tensions" because they were developed by different stakeholders.[30] As a result, because CARS and SADRE were unintegrated and used different IT systems, employees had to manually review many more applications than initially forecasted.

CARS was also launched too fast, with too little time to test for bugs, and without the necessary licensing approval. The algorithm was developed one summer prior to the launch of the CEP in just three months. Because of the limited testing window, technicians were unable to resolve issues in a timely manner leading to "glitches [that] effected efficiency in delivery."[31] CARS was therefore far less effective than anticipated because it was inadequately tested. Additionally, CITRIX – a security platform – was not approved for use, therefore, "available researchers were unable to access the system to process applications."

SADRE was also problematic. It "required a high level of management." Recall, SADRE was the system used to notate when an application was received, what the decision was, and the citations and research used to determine eligibility for CEP compensation. Manual data collected in SADRE was "not always consistent" with source documentation. One audit found that 20 percent of files tested in the first sample did not match SADRE information. 1,500 applications were lost because of system updates. Consequently, eight percent of *all applications* did not have mailing addresses, because of a system conversion necessitated by the volume-related issues.[32]

The unintended consequence of these CARS and SADRE issues was that they led to divergences in the level of trust and efficiency between the two offices responsible for processing applications. Put simply, CARS was used less and less effectively by one office than another office. Two OIRSC offices were responsible for processing claims: the National Capital Region office and a Vancouver office. To respond to problems processing the higher-than-anticipated volume of CEP claims, the National Capital Region "standardized its processes" in centralizing files to deploy CARS more effectively and developing and using a standardized process to input data manually. The Vancouver office did not, leading to slower processing times between the offices. These inefficiencies created undesirable perversions for claimants. Compensation was therefore predicated on who processed the claimant's application, not whether the claim was meritorious.[33]

As a result of delays and inconsistencies processing claims, there was a negative reaction to the CEP. Claimants were frustrated by the delays in processing checks. Survivors went public with "many of their complaints," explaining how long delays were retraumatizing. These complaints generated negative reports and, ultimately, Minister-level intervention. Although the problems were resolved because multiple technicians were deployed to fix the volume-related challenges, the public's view of the project soured, and political intervention was required to expedite fixes.

Appendix EE. Overview of Canadian and International Compensation Schemes *(continued)*

Long delays continue to cause problems in the implementation of other major compensation frameworks, namely the Federal Indian Schools and Sixties Scoop settlement agreement. For IRSSA, this meant that they had to hire workers – while the process had started – to "redesign the IT system" and even explored "going back to manual research."[34]

The Independent Assessment Process

Application design

The Independent Assessment Process (IAP) was a non-adversarial, out-of-court process to resolve claims of sexual abuse, serious physical abuse, and other wrongful acts that caused serious psychological harm.[35] Victims received a lump sum payment between $5,000 and $430,000, that depended on the "level of abuse."[36]

Claimants were required to have suffered from sexual and/or physical assaults resulting from a residential school's operation either occurring on premises, by an employee, or by a church entity.[37] Second, sexual or physical assaults committed by one student against another.[38] Finally, any other wrongful act or acts committed by adult employees by the government or church entity which has "proven to result in serious psychological harm."[39]

Assessors used a point system to rank the level of abuse and, in turn, the amount of compensation the claimant would receive.[40] For example, sexual intercourse or interference received the most points, while child pornography received fewer points. The more points a claimant received, the higher the amount of IAP compensation.[41] On the right, is a compensation table used by assessors in the IAP which illustrates how points were assigned. The more points a claimant received, the higher the amount of compensation.

Claimants bore the burden of proof and were encouraged to hire a lawyer to navigate the complex process. The civil standard of proof – "balance of probabilities" – was used to determine if the claim was more likely true than false.[42] The Government contributed to legal fees but did not cover IAP fees.[43] All applicants were asked "who abused you," and subjectively assessed what harm category they fell into. Survivors named, dated, and described the type and frequency of

II: COMPENSATION RULES

	Acts Proven	Compensation Points
SL5	• Repeated, persistent incidents of anal or vaginal intercourse. • Repeated, persistent incidents of anal/vaginal penetration with an object.	45-60
SL4	• One or more incidents of anal or vaginal intercourse. • Repeated, persistent incidents of oral intercourse. • One or more incidents of anal/vaginal penetration with an object.	36-44
SL3	• One or more incidents of oral intercourse. • One or more incidents of digital anal/vaginal penetration. • One or more incidents of attempted anal/vaginal penetration (excluding attempted digital penetration). • Repeated, persistent incidents of masturbation.	26-35
PL	• One or more physical assaults causing a physical injury that led to or should have led to hospitalization or serious medical treatment by a physician; permanent or demonstrated long-term physical injury, impairment or disfigurement; loss of consciousness; broken bones; or a serious but temporary incapacitation such that bed rest or infirmary care of several days duration was required. Examples include severe beating, whipping and second-degree burning.	11-25
SL2	• One or more incidents of simulated intercourse. • One or more incidents of masturbation. • Repeated, persistent fondling under clothing.	11-25
SL1	• One or more incidents of fondling or kissing. • Nude photographs taken of the Claimant. • The act of an adult employee or other adult lawfully on the premises exposing themselves. • Any touching of a student, including touching with an object, by an adult employee or other adult lawfully on the premises which exceeds recognized parental contact and violates the sexual integrity of the student.	5-10
OWA	• Being singled out for physical abuse by an adult employee or other adult lawfully on the premises which was grossly excessive in duration and frequency and which caused psychological consequential harms at the H3 level or higher. • Any other wrongful act committed by an adult employee or other adult lawfully on the premises which is proven to have caused psychological consequential harms at the H4 or H5 level.	5-25

abuse.[44]Additionally, written applications asked how and if the abuse affected them, if they planned or wished to get supplemental treatment, and if they had received traditional counselling or psychological assessments.[45]

If an applicant rated their abuse above a certain level, from Level 3 – 5, they were required to provide specific types of evidence. This evidence included: hospital, treatment, and psychological records. Additionally, if they claimed that their abuse had caused a "loss of opportunity," they were required to supply income tax, workmen's compensation, and educational attainment records.[46] If there was other contemporaneous or circumstantial proof of the abuse – like a journal entry or testimony against the abuser – the IAP applicant was recommended to produce that information prior to their hearing.

Processing of claims

IAP application review was a multi-step process. The Assessor first categorized the application based on complexity into: a standard issue, a complex issue, or court track (for the most complex claims.)[47] Most claimants proceeded via the standard track.[48] Once a standard track application was submitted, the parties would have a pre-claim conference to discuss a potential settlement and determine the timing and/or necessity of an accelerated hearing. If the claimant chose to proceed with a hearing an independent adjudicator would be assigned. The independent adjudicator's function was to ensure a uniform process, set compensation, and determine the "actual income" lost by the complainant.[49] At any point where a claimant did not wish to proceed with their claim, they could negotiate a settlement.[50]

Hearings were intended to be "culturally sensitive and safe."[51] They were private, held within the claimant's community (if requested), could begin with a traditional prayer, and up to two support persons could be available – including an elder or religious person.[52] Breaks were provided as needed, and claimants were not required to

[52] *Ibid.*

face their accused abuser.[53] An IAP information line was available for all claimants and their counsel to answer questions about the process prior to the hearing. [54]

Claimants unsatisfied with their decision had the right to appeal, and, generally, had two grounds for appeal. First, claimants could claim that the adjudicator made a "palpable and overriding error." This is a high bar and is the *de facto* legal standard of appellate review. The claimant bears the burden of showing that there was a "clear and telling error." For example, if the adjudicator said that the appellant suffered abuse for two years, but they actually suffered abuse for five years, that would be grounds for overturning the decision on a palpable and overriding error standard.[55] Second, a claimant could appeal if they believed that the adjudicator applied the point system incorrectly by, for example, assigning a lower number of points than the claimant deserved despite correctly understanding the facts.[56]

The Independent Assessment Process was popular, despite the relatively high procedural and emotional barriers to entry for claimants. The IAP process received 38,276 applications, and 89 percent of claims were successful with an average amount of compensation of $91,466.40. The total amount of compensation paid out was over $3.2 billion.[57]

Sixties Scoop Settlement Agreement

Notice Plan

Both the Federal Day School and Sixties Scoop Settlement Agreements have also included similar strategies to reach claimants. These include publicly accessible websites, videos informing claimants about their rights, and hotlines for mental health supports and assistance processing claims. The Sixties Scoop Settlement Agreement retained Argyle PR on May 26, 2020 to provide notice to claimants on eligible claims.[58] Argyle's mandate is broad, consisting of a number of responsibilities including:

- Messaging around key milestones.
- Media engagement, including providing accurate information to the media.
- Developing organic (e.g., Facebook and Twitter) and earned (e.g., print and television) to engage the public and raise awareness about the Sixties Scoop process.
- Drafting advertising and direct communications copy in both French and English.

The notice plan was intended to provide "the best notice practicable under the circumstances."[59] Repeatedly, in the Settlement Agreement, it states that there is a notice plan attached to Schedule B, however, the full executed agreement does not contain that information.

Consequently, it appears that there was no notice plan executed until Argyle PR[60] was engaged to support the Administrators' and Class Counsel with communications outreach, and after there were multiple complaints about Collectiva's role in the administration of the settlement agreement.[61]

Since this process is ongoing, there is no data about how effective it was at implementing the agreement. Anecdotal information suggests that there have been communication breakdowns, especially since claimants have found receiving responses to their requests and answers to questions difficult to ascertain.

Application design

The amount of compensation varies by the number of claimants. If there are 20 million or fewer claimants the amount of compensation will be between $500 million and $750 million divided by the number of claimants, but no more than $50,000 per claimant. According to the Government of Canada, eligible class members will receive an estimated $25,000 per claimant.[62] Canada, like both the IRSSA and Day Schools settlements, also financed ongoing education projects to promote reconciliation and healing.[63] Emotional and mental health supports were available 24-7 via a phoneline.[64]

Claimants are required to complete an application form and bear partially the burden of proof, by providing biographical information, Indian or Inuit status forms, records of adoption, and have the option to write their personal story and experience.[65] Different law firms are available to assist claimants with completion of their applications free-of-charge, depending on where the claimant is based.[66]

Processing of claims

The Claims Administrator – Collectiva – is then responsible for confirming: 1) whether the applicant was adopted and 2) that the individual is a registered Indian or Inuit. The Administrator can confirm that the applicant is eligible, send a Notice of Intent to Reject (indicating that they need more information to reach a conclusion) or send an Official Rejection denying the application.[67] If an application is officially rejected, the applicant has 30 days to file a reconsideration request.

The applicant's request is reviewed by the reconsideration officer – Dr. James Igloliotore, a former Newfoundland and Labrador judge – who makes a final decision.[68] When reviewing an application, Collectiva and Dr. Igloiotore are expected to draw all favorable inferences to the applicant.[69] In some circumstances, and like the other processes, the Exceptions Committee, consisting of the parties and an Indigenous community member, is responsible for determining an application sent to them. The Exceptions Committee is generally responsible for implementing the agreement, overseeing the process, and making policies on accepting and reviewing applications.

Federal Indian Schools Settlement Agreement (Day Schools)

Notice Plan

The Day School process was different than both the IRSSA implementation and the Sixties Scoop implementation. The notice plan provides an estimate that there 140,000 class members alive at the commencement of the *Mclean* claim that led to the settlement agreement. Unlike the IRSSA process, Gowlings WLG took responsibility for contacting a large group of class members directly, given the size of the registered class. Gowlings had contact information for approximately 80,000 members of the class. Therefore, they conducted direct outreach to class members, Band Offices and other on-reserve points of contacts, the Assembly of First Nations, and Tribal Councils, in addition to other forms of communication.

Like the Sixties Scoop Settlement agreement, Argyle PR was retained to develop and upload media services and create a communications strategy targeting Indigenous and mainstream earned and paid media, using English, French, and four

other Indigenous languages.[70] Since the beginning of the process there have been close to 100,000 applications, or approximately 70% of the total estimated size of the community.

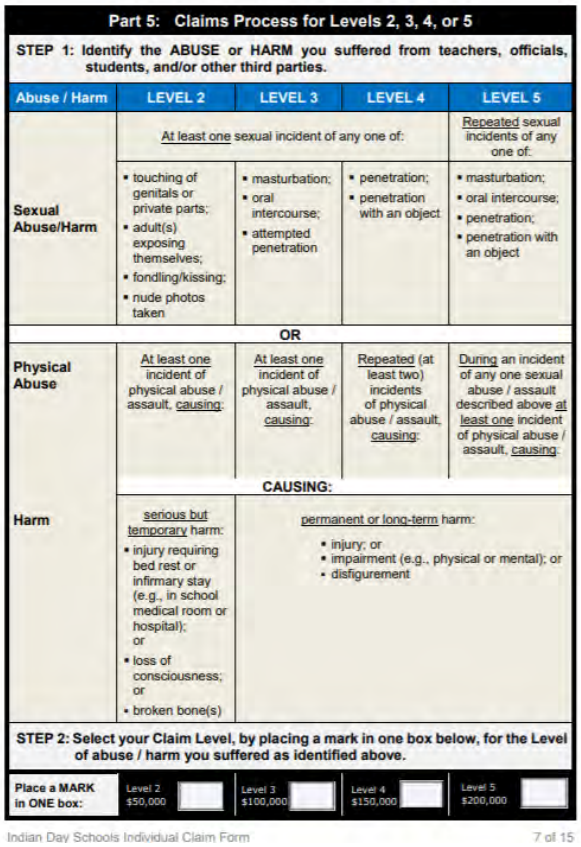
Application design

Applicants must complete a form that provides biographical information, proof of attendance, and outlines the type of abuse suffered. Like the IAP settlement process, the amount of compensation offered depends on the type of abuse suffered and the severity of abuse.

The burden of proof is on the applicant, and they must self-identify, subjectively, the level of harm incurred.[71] Although claimants have the burden of proof, the agreement intends to "minimize the burden" on them and "mitigate any likelihood of retraumatization."[72] This process, however, differed from the IAP because there were no oral hearings required.

The claimant must provide a complete narrative of sexual, physical, and other abuse and also supply evidence of the school attended. Their statement must be sworn.[73] The amount of documentation also varied by the type of harm claimed. For higher levels of harm (like Level 4 or 5), claimants were required to provide friend and family narratives, medical, dental, nursing, and therapy records. Whereas, for Levels 2-3, all that was required was evidence of the school attended, family, and a personal narrative.[74]

The level of compensation varies by the type of harm. Claimants are eligible for Level 1 if they were mocked, denigrated, threatened with violence, unreasonably or disproportionately punished, or received sexual comments or provocations from teachers, students, officials or third parties. Level 2-5 represented more egregious forms of physical or sexual abuse and is outlined in the chart above. Compensation is tiered based on the assessed from Level 1 ($10,000) to Level 5 ($200,000).



Part 5: Claims Process for Levels 2, 3, 4, or 5

STEP 1: Identify the ABUSE or HARM you suffered from teachers, officials, students, and/or other third parties.

Abuse / Harm	LEVEL 2	LEVEL 3	LEVEL 4	LEVEL 5
Sexual Abuse/Harm	At least one sexual incident of any one of: ▪ touching of genitals or private parts; ▪ adult(s) exposing themselves; ▪ fondling/kissing; ▪ nude photos taken	▪ masturbation; ▪ oral intercourse; ▪ attempted penetration	▪ penetration; ▪ penetration with an object	Repeated sexual incidents of any one of: ▪ masturbation; ▪ oral intercourse; ▪ penetration; ▪ penetration with an object
	OR			
Physical Abuse	At least one incident of physical abuse / assault, causing:	At least one incident of physical abuse / assault, causing:	Repeated (at least two) incidents of physical abuse / assault, causing:	During an incident of any one sexual abuse / assault described above at least one incident of physical abuse / assault, causing:
	CAUSING:			
Harm	serious but temporary harm: ▪ injury requiring bed rest or infirmary stay (e.g., in school medical room or hospital); or ▪ loss of consciousness; or ▪ broken bone(s)	permanent or long-term harm: ▪ injury; or ▪ impairment (e.g., physical or mental); or ▪ disfigurement		

STEP 2: Select your Claim Level, by placing a mark in one box below, for the Level of abuse / harm you suffered as identified above.

Place a MARK in ONE box:	Level 2 $50,000	Level 3 $100,000	Level 4 $150,000	Level 5 $200,000

Indian Day Schools Individual Claim Form 7 of 15

Processing of claims

After completing the written application, applications were reviewed by Deloitte, the Claims Administrator for all Level 1 claims.[75] For self-identified Level 2-5 claims, Canada has between 60 and 90 days to review the application.[76] During Canada's review of the application, they can provide the Claims Administrator with supplemental factual information regarding eligibility, however, they can only provide that supplemental information in a limited number of cases. Once Canada's review is complete, the Claims Administrator – Deloitte – reviews the claim and has three options. Either the

[76] *Ibid.*

claimant met, exceeded, or did not meet their self-identified criteria. If the claim did not meet the self-identified criteria, the Claims Administrator could reject the claim entirely or reassign the claim to a lower level. Applicants can request, however, that the Claims Administrator review their application.

Deloitte's – the Claims Administrator – decision is not final;[77] applicants had the right to elect Third Party review after the Claims Administrator's decision, within 120 days of receiving the initial decision.[78] The intent was to provide claimants who received downward classification with recourse for their claims. The Third-Party Assessor Reva E. Devins, an arbitrator and mediator focusing on human rights matters, *inter alia*, was responsible for reviewing all reconsideration requests.[79] The Third-Party Assessor could request additional audio or video statements from claimants to supplement the claimants' application. The Third-Party Assessor's determination was final, however, the they could refer cases to the Exceptions Committee – a body consisting of the parties, including an eligible class member, that was responsible for overseeing and monitoring the Claims Assessment process. [80]

The claims administration process is ongoing. Deloitte has received 110,864 claims and has paid slightly more than 60 percent of claims. Over 30,000 claims are still in process. 10,000 claims are required to have more information. [81]

Overall, many of the issues identified in IRSSA were changed in the Sixties Scoop & Day School Settlement. These included:

1. Survivors can work free-of-charge with lawyers to complete claims forms. In the IRSSA process, survivors only received full funding of legal fees for CEP, not for IAP.
2. Although the compensation tiered structure remained, survivors no longer had to attend in-person hearings with a lawyer. Only if additional information was requested would claimants have the option, not requirement, to share their story.
3. The Day School form somewhat improves the IRSSA form because it includes a much clearer disclaimer about retraumatization and clearly articulates that legal counsel is available free-of-charge.
4. The burden on claimants was partially alleviated. The Government bore the burden of producing documentation to prove the claim. However, claimants were still required to produce documents of abuse for more serious claims. This process was less of a burden than the IAP process, where claimants were expected to work with lawyers to complete applications.
5. The Exceptions Committee - a body consisting of the parties, including an eligible class member, that was responsible for overseeing and monitoring the Claims Assessment process - included members of the class, rather than merely including class agents (e.g., lawyers).
6. Unlike the IRSSA, claimants had the option to submit a "sworn declaration" where if they did not have all the documents, they could merely swear that their application was complete.

Motherisk

Notice Plan

The Motherisk team had a triaged approach to identifying claimants and reviewing cases that differed based on priority. Phase I involved identifying cases where decisions about the future of children via custody order, Crown wardship, or adoption had been made. Phase II involved reviewing publicly available court FRANK (Ontario Court Tracking System) files where adoption orders had been made. To identify claimants, the Motherisk Commission leveraged governmental directives, public calls for action, and database references. They referred to several sources of information as there was no central database. These information sources included test results from SickKids databases containing the names of people and birth dates (although these tests were out-of-date, unreliable, and difficult to use), files from the Ministry of the Attorney General, and Children's Aid Society files where drug testing had been requested. Additional resources from the Ministry were included where Children's Aid Societies did not have sufficient resources. They disseminated information regarding

the process on social media, radio, print media, and through presentations and outreach to legal, child welfare, education, advocacy, community, government and "other organizations".

International Settlement Processes

Canada's harmful past of Indigenous peoples is not anomalous. Other jurisdictions – namely Australia and New Zealand – have similar legacies of systemic mistreatment via the removal of children from their families. Their approach has differed. Many similar issues – both philosophical and practical – remain. This section focuses on the approaches taken in Australia, New Zealand, and between Germany and Israel while briefly discussing some other jurisdictions' approaches to articulate some lessons learned and determine whether these models are scalable in Canada.

Australia Compensation Regimes

Tasmanian Compensation Regime

In 2006, the state of Tasmania's legislature established a $5 million fund to compensate members of the Stolen Generation. The Act became operational at the beginning of 2007, and in total there were 151 claims received, and 86 claimants were eligible. 84 members received slightly over $58,000, while two deceased members of the Stolen Generation received either $5000 or $4000. The fund was the first of its kind in Australia.

Notice Plan

Advertisements appeared in the Australian, Mercury, Examiner, Advocate, Koori Mail, and the National Indigenous Times.

- The Act was also promoted through the Circular Head Chronicle, Cygnet and Channel Classifieds, Flinders Island News, Huon News, Kentish Chronicle, King Island Courier, and the North Eastern Advertiser, and articles were placed in Indigenous media.
- Aboriginal organizations received correspondence regarding the process and were asked to inform members and contacts. Information packages were widely distributed through Service Tasmania and other government outlets. Information sessions were held in all major Tasmanian centres for potential applicants, attracting over 70 participants.
- A website was established and received in excess of 1000 visitors before the close of applications in July 2007 as well as through the phone line.

Application design

To be eligible, claimants needed to 1) self-identify as Aboriginal, 2) have Aboriginal ancestry, and 3) there must be communal recognition of the applicant as Aboriginal.[82] Compensation depended on whether the applicant was a Category 1, Category 2, or Category 3 claimant. This criterion consisted of: [83]

- Category 1: Aboriginal persons who were removed from their families between 1935 and 1975 under the Tasmanian Infants Welfare Act 1935 or the Child Welfare Act 1960.[84]
    - Additional Conditions: Children must have been removed for a continuous period of 12 months or more and must not have been in the care of an Aboriginal family. Additionally, the child needed to be removed without the approval of parents *or* undue duress or influence was applied by the State Agency to bring the removal.[85]
- Category 2: applied to Aboriginal people who were living on 16 October 2006, and who were removed while under the age of 18 years from their family between 1935 and 1975 as a result of the active intervention of a State Government agency. The same additional conditions apply to Category 2. [86]
- Category 3: Any living biological children of a deceased Aboriginal person who would have otherwise been eligible under Category 1 or 2 of the Act. [87]

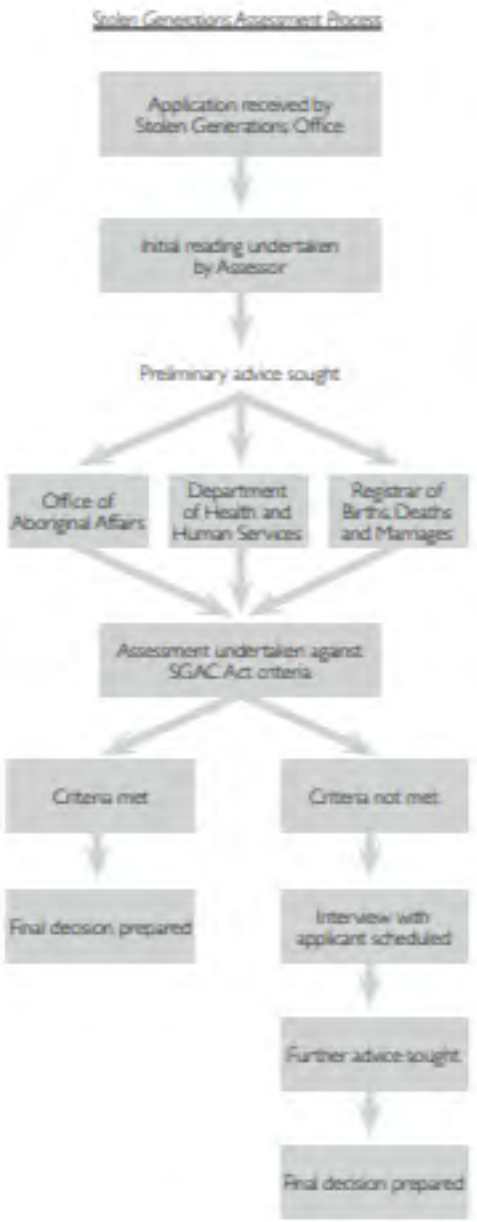
Appendix EE. Overview of Canadian and International Compensation Schemes *(continued)*

Unlike Canadian processes, an Independent Assessor – appointed to determine each of the claims - had broad discretion to review applications and develop a process as the Act did not "set out detailed procedures to be followed."[88] Claimants only had 12 months to apply, once applications opened.[89] An independent assessor was appointed to review all of the applications, and bore the burden of searching for government records to corroborate the claimants' claim. Applicants, however, were required to complete a form and supplied various levels of proof ranging from "only the essential information" (e.g., proof of Aboriginal status and birth/identity information) to "significant amounts of supporting information" including welfare records, family trees, and detailed written statements.



Processing of claims

Once the application was received, the Independent Assessor sought information from three governmental departments and then assessed the application. If the criteria were met, no further action was needed, and the claim was processed. If, however, the Independent Assessor determined the criteria was not met, the applicant was informed about deficiencies in their application and "afforded an opportunity to meet informally with an assessor to discuss those issues" and supplement the information provided to "overcome deficiencies." [90] The meetings were intended to be friendly and cooperative, with both parties sometimes agreeing to make further inquiries to determine eligibility. However, it occasionally became obvious that the claimant would not meet the eligibility criteria. There was no formal appeals process, but the Minister was responsible for ultimately approving or rejecting claims – although they deferred almost exclusively to the Independent Assessor's recommendations.

The standard of proof, applied by the assessor, was that on a balance of probabilities the claimant was more likely than not to be Aboriginal and removed by a Tasmanian state authority. Claims were rejected for five prominent reasons – mostly relating to the eligibility criteria. The most common reasons for rejection were that there was no Tasmanian state agency intervention to place the individual in a residential home, or aboriginality could not be confirmed. However, claims were also rejected because the placement occurred after 1975 or claimants were not removed from their family for 12 months.[91]

Claimants who were removed from their family as a result of criminal conviction were excluded. The Assessor's reflections, if read by a community member who was removed, could easily retraumatize victims. Unlike Canada's settlement agreements, the Assessor's language is equivocal and acknowledges, on multiple occasions, that the individuals who removed children were well-intentioned and meant to "integrate." This is not a complete recognition of the cultural genocide and serious harm caused to Australia's Indigenous community.

Tasmania's compensation framework is unlikely to be applicable in Canada due to the different scale of potential applicants. Tasmania's compensation framework only attracted 151 claimants, whereas Canadian compensation regimes have attracted tens of thousands of applicants However, many of the challenges of implementing the compensation

[91] *Ibid.*

scheme illustrate how narrow eligibility criteria can impede the goals of most settlement agreements: to recognize, repair, and heal Indigenous people's relationships with settler governments.

New South Wales & South Australia

The New South Wales and South Australian processes began in 2017 and 2015, respectively. They were very similar to one another – and had similar features to the Tasmanian agreement because it required applicants to be Aboriginal and removed from their family before 1975.

The application process closely resembled the Tasmanian process, with applicants providing biographical information and documents to prove their identity, and the independent assessor making application assessments and providing recommendations to the Minister who decided whether or not to approve settlements. However, there are differences between these processes and the Tasmanian process. Compared with the Tasmanian compensation scheme, the New South Wales and South Australian processes placed more of the burden on the government to source documents and less of a burden on claimants. Rather than having claimants provide varying amounts of source documents and proof, claimants merely signed a release enabling the government to search for documents to provide proof of the claim. Further, claimants were almost always given an opportunity to meet with the assessor, and most did meet with him. The independent assessor's decisions were final, and there was no meaningful opportunity to petition for reconsideration in either process.

The amount of compensation was much lower for the South Australian scheme (~$20,000) and higher for the New South Wales scheme (~$75,000). Additionally, the New South Wales process also included a healing fund and a longer timeline, running for five years. The length of time for the application process, twelve months, was the same for the South Australian and Tasmanian scheme but was a five-year process for the New South Wales scheme.[92]

Other Australian Settlement Agreements

Territories

In 2021, approximately 800 survivors of the stolen generation in the Northern Territory of Australia filed a class action settlement demanding similar compensation for being taken away from their families. Previously, the Federal government had refused to compensate victims in the Northern Territory.[93] Shortly thereafter, the federal government announced that they were compensating victims for the first time. Eligibility includes "the Stolen Generations survivors who were forcibly removed in the Northern Territory and the Australian Capital Territory prior to their respective self-government, and in the Jervis Bay Territory (collectively known as the territories)."[94]

The scheme will compensate individuals with $75,000 AUD for causing the forced removal from their homes and families and also provide an additional $7,000 to support healing. The compensation will be a one-time payment. In addition, Australia's federal government will create a ~$380 million fund that will provide payment and run for four years.[95]

Unlike other compensation regimes, survivors will be able to share their stories "face-to-face" with senior government officials or receive written apologies.[96] Individuals are responsible for assisting with the healing of this trauma for the Stolen Generations survivors who were forcibly removed in the Northern Territory and the Australian Capital Territory prior to their respective self-government, and in the Jervis Bay Territory (collectively known as the territories). Details on application processes are forthcoming and the application will begin on March 1, 2022.[97]

Victoria

In addition, in January 2021 the Victoria Government announced that they would give $6 million to the Koorie Heritage Trust and Connecting Home Limited with assistance.[98] Unlike other programs, it will provide a range of compensation options instead of merely one-time payments. The scheme will cover an expected 1,200 residents of Victoria and includes payments, counselling, and a funeral fund.[99]

Lessons Learned from Australia

In sum, Australia has taken a similar approach to Canada, but with some slight variations. Rather than leverage court processes to affect compensation, territorial governments have passed schemes and implemented them. Australia has generally taken a local, rather than national, approach to compensating Aboriginal victims. These schemes have, however, reached a smaller universe of claimants, had narrower compensation criteria, and required victims to have oral hearings, which can often be retraumatizing.

The application process was intended to, and compared with Canadian class action settlement processes was, "low-documentation." However, any Australian compensation regime served only hundreds or a couple thousand of applicants, not tens of thousands of applications like Canada's class action settlements. The compensation scheme has no appeals process, does not provide applicants with legal advice, and there are sparingly few details about counselling and mental health supports – all of which are available in some Canadian compensation frameworks. The assessor's discretionary power has led compensation definitions to be implemented in a narrow manner. In fact, counsel for many Lost Generation survivors have highlighted that Canada has a more inclusionary model.

Members of Australia's "Stolen Generations" have complex – and sometimes contradictory – views on compensation. Some community members have highlighted that the compensation represents justice and acknowledgement of government-sanctioned harm. In addition, compensation has provided people with – anecdotally – the first opportunity in their lives to purchase a home. Compensation constitutes recognition of trauma resulting from forced removal and acknowledges that the forced removal was wrong. However, Stolen Generation survivors also believe that compensation was misguided in different ways. One survivor highlighted that "nothing can be done now" for recognition of compensation to make a material difference. Others believed that "symbolism can be a cop out" and must be linked with positive governmental action, therefore, compensation is intrinsically incomplete. Some claimants compared the amount of compensation to other class action settlements where there was widespread child abuse and highlighted the substantially lower compensation offered to Stolen Generation survivors.[100] Others advocated for alternative remedies, like healing centers or more expanded counselling, to provide compensation.

New Zealand Process

The Waitangi Tribunal

New Zealand takes a different approach to processing claims about Indigenous child removal by creating a "permanent commission of inquiry" designed to make recommendations of claims brought by Māori related to alleged breaches of the Treaty of Waitangi – a major treaty governing Crown-Māori relations in New Zealand.

The Tribunal has three primary powers. First, it makes recommendations on the dispensation of violations of the Waitangi treaty. Although the Tribunal can make recommendations, those recommendations are not binding – a stark difference from compensation decisions in previous regimes. Second, and importantly, the Tribunal is a specialized body that has exclusive jurisdiction over the treaty and its legal effect. Although Tribunal recommendations are not required to be implemented, its interpretation of the treaty is binding. Finally, the Tribunal can make determinations on certain legal issues (e.g., land/water rights) between the Crown and Māori. In sum, the major difference between other compensatory frameworks and the Waitangi Tribunal is its specialized interpretative function and its inability to make binding determinations on compensation processes.

---

[98] *Premier of Victoria. (2021, January 4). Healing For The Stolen Generations. https://www.premier.vic.gov.au/healing-stolen-generations*

[99] *Longmore, J. (2020, March 18). Stolen Generations redress scheme announced in Victoria. ABC News. https://www.abc.net.au/news/2020-03-18/stolen-generations-redress-scheme-announced-in-victoria/12067572*

[100] *Koroff, J. (2021, August 8). Compensation for Stolen Generation members. Creative Spirits. https://www.creativespirits.info/aboriginalculture/politics/stolen-generations/compensation-for-stolen-generation-members#suing-governments-is-brutally-hard*

Procedurally, the process bears multiple similarities to other compensatory processes. Claimants bear the burden of proof and are required to file complaints outlining the Crown's impugned conduct and proposing remedies. However, the body is intended to be bi-cultural and not exclusively operated by legal practitioners. The Tribunal is bi-national, meaning "about half the members are Māori and half are Pākehā, and at any sitting of the Tribunal, at least one Māori member must be present." Another important distinction between the Waitangi Tribunal and other compensation processes is that the process is inquisitorial rather than adversarial. Although the complainant has the burden of describing and producing their claims, a primary function of the commission is to do its own research to make recommendations. Further, the collection of evidence involves taking both Indigenous and settler forms of evidence to shape the evidentiary record.

The claims process is open only to Māori individuals. To lodge a claim, claimants must complete a "claims form."[101] The claims form asks which treaty rights were violated by the Crown (meaning the central New Zealand government) and also asks who to notify about the creation of the claim – meaning the claimant can ensure that the Tribunal directly contacts parties. Legal assistance is not guaranteed; however, legal aid can be provided. The Tribunal does not, therefore, directly call on applicants to begin a claims process; however, if one is commenced relevant parties are notified directly at the discretion of the claimant.

Once a claim is registered, the Tribunal may include the claim as part of a "current inquiry" that the Tribunal is already addressing. The Tribunal classifies its inquiries into different categories. These categories include:

- District Inquiries: Inquiries into the use of land and constitutionality of the Crown's actions on Māori lands.
- Kaupapa Inquires: These are issues not specific to any district in New Zealand. These include, but are not limited to, cultural services, social services, and justice issues that affect Crown-Māori relations and engage the Treaty of Waitangi.

The Waitangi Tribunal gives priority to claims it classifies as urgent (including the child removal issue discussed below) and remedy applications where the Tribunal investigates whether they can make urgent remedies. The Tribunal has discretion to prioritize these claims. Note that for remedy applications, claimants bear the burden of explaining the relationship to other claims so that the Tribunal can hear these claims together, and thereby conveying the claims' urgency.

The documentation required to prove claims is variable – depending on the type of claim lodged. However, the research of the claim can be conducted by all interested parties – including the Tribunal itself. Historical and technical research is often conducted by Tribunal staff and commissioned directly by the Tribunal. One major function of the tribunal is to collect a "casebook." According to the Tribunal, this involves:

"The casebook research of professional or technical evidence involves working in Crown archives or records, libraries, with private papers and other sources of historical records. The research itself can range from a brief of evidence on a specific topic of a few pages to comprehensive historical reports covering issues raised in multiple claims across a whole district which may contain several hundred pages of writing and take a year or more to prepare."

Rather than placing the burden of proof solely on claimants, technical research is conducted with in-person researchers. They work in concert with claimants and the Crown to develop the factual record needed to "build understanding of their claim issues" and "gather advice" on what resources they should use to gather the "casebook."

The evidentiary burden is much lighter than traditional common law systems – and a wide variety of claimant evidence is acceptable. The most important thing to claimants is that the evidence "is directed to helping the Tribunal understand the claimant community." These can include modern evidence-gathering (e.g., PowerPoint presentations) to traditional oral histories.

The Waitangi Tribunal is a unique body in the common law world – and has been lauded as a future model. The Tribunal was created against a backdrop of complete neglect for the treaty by the settler government, and now provides a unique, expert body for mediating claims. The bi-national design of the institution also has been lauded as a model for inclusivity. However, critics have highlighted that the Government often ignores Tribunal recommendations – rendering the commission somewhat feckless and inept.

---

[101] *Government of New Zealand, Waitangi Tribunal. (n.d.). Sample Claim Form.* https://waitangitribunal.govt.nz/assets/Documents/Forms/WT-Sample-claim-form.pdf

Child Removal Issue

Throughout 2020, the Waitangi Tribunal heard claims that a disproportionate number of Māori children (tamariki Māori) had been taken into state care. As of 2017, Māori children constituted more than 60 percent of the children in care, and recently, Māori children were five times more likely to be in state care than their non-Māori counterparts. The inquiry was largely triggered after the Oranga Tamariki took a newborn from a teenage mother at Hawke's Bay Hospital in 2019.

The Tribunal, therefore, explored three questions:

1. Why is there a disparity between Māori and non-Māori taken into state care?
2. To what extent did legislative policy improve?
3. What changes are required to conform the state care regime that are consistent with Waitangi treaty principles?

At the hearings, the tribunal heard multiple stories from parents whose children were taken without their consultation. After hearing submissions by interested parties, claimants of treaty violations, and the Government of New Zealand, the Tribunal released its report in April, 2021, finding and recommending that:

1. The disparity between Māori and non-Māori children in Oranga Tamariki care is unacceptable and there is a "need for essential and radical change to the care and protection system." [102]
2. The Treaty guarantees that Māori have "chief authority" over where and how they live, which includes the right to "care and raise for the next generation." The disproportionate removal of Māori children, therefore, constituted a breach of the treaty. [103]
3. Power and control over the Oranga Tamariki should be returned to the Māori people. The Commission recommended creating a new care and protection system via a Transition Authority that functions to "identify changes necessary to eliminate the state care of tamariki." The Transition Authority will oversee the Oranga Tamariki regime and propose systemic improvements to ensure that the new system is "by Māori for Māori delivery." The primary objective of the transition would be to "design a reformed system" for Māori children in conjunction with the Crown to "ensure a modified system is properly implemented." [104]

Overall, the New Zealand compensation framework provides a comprehensive, and fundamentally distinctive means of managing child removal and remediating harm. The specialized, bi-national body has complete jurisdiction over treaty interpretation. However, it can only recommend – it cannot enforce.

Israel & Germany Compensation Schemes

In the early 1950s, the German government and Jewish organizations, the United States, and Israel, *inter alia*, provided funding for the formation of the Conference on Jewish Material Claims against Germany (the Claims Conference). The Claims Conference is a quasi-private organization responsible for negotiating reparative compensation for Holocaust survivors and memorialization of the Holocaust. The organization's function is two-fold: 1) to obtain funds for the relief, rehabilitation and resettlement of Jewish victims of Nazi persecution, and 2) to aid in rebuilding Jewish communities and institutions that were devastated by the Nazis.[105]

Since the formation of the Claims Conference their role has evolved and expanded – often to obtain compensation for a larger universe of Holocaust survivors and to provide compensation and support for survivors to meet evolving needs. There are three general forms of compensation available to survivors, which include:

1. Indemnification: The payments to Nazi victims are known as indemnification, which is compensation for specific personal losses or damages. The original German indemnification program provided one-time settlements as well as monthly payments, known as pensions, for a variety of persecution-related damages, including harm to a victim's health or loss of professional opportunity.[106]

Appendix EE. Overview of Canadian and International Compensation Schemes *(continued)*

2. Reparations: Reparations are payments in money or materials from one nation to another for damages inflicted during a conflict, and in this case, a genocide. Thus, reparations generally refer to the war-related debts of a defeated aggressor nation, and may entail a punitive element, as well.
3. Restitution: The return or recovery of identifiable assets, including machinery, real estate, business enterprises, and cultural properties that are restored to the original owners—nations, communities, institutions or individuals. (There were parallel claims for compensation in lieu of restitution for assets that could not be restored.) For Nazi-era properties, international Jewish organizations lodged claims after the war only against Germany and Austria for properties that were looted, confiscated, and "Aryanized." Restitution in Western Europe was a domestic matter; the states in the Soviet bloc did not believe in restitution. Since the collapse of communism, there have been claims to recover Jewish properties in Central and Eastern Europe. These have been fraught with legal and economic difficulties because of the difficulties of distinguishing between Nazi- and Soviet-era confiscation.

Over the last 30 years, compensation has focused on reparation – providing ongoing support to survivors for varying needs and recognizing their harm. For example, as the COVID-19 pandemic ravaged the world, the Claims Conference negotiated and funded a compensation program to provide survivors and/or their spouses with compensation to navigate the pandemic.

Application design

There are seven major funds that provide compensation. Compensation structure varies. Some funds provide lifelong support for survivors of concentration camps. Others, provide one-time payments to specific groups of survivors (e.g., children transported to concentration camps from specific countries).

Each fund is described in greater detail below, as well as its eligibility criteria[107]:

Fund Name	Eligibility Criteria
Kindertransport Fund[108]	Age: Under 21 years old. Eligibility: Unaccompanied by their parents and took part in a transport that was not organized by the German government in order to escape potentially threatening persecution by German forces; Eligibility: The individuals were transported from somewhere within the German Reich or from territories that had been annexed or occupied at the time; Time Horizon: Between November 9, 1938 and September 1, 1939 or was approved by the German authorities after November 9, 1938 but before September 1, 1939.
Child Survivor Fund[109]	Eligibility: Jewish Nazi victims who were persecuted as Jews and were born January 1, 1928 or later AND who suffered one of the following types of persecution: (I) were in a concentration camp; or (II) were in a ghetto (or similar place of incarceration in accordance with the German Slave Labor Program); or (III) were in hiding or living under false identity/illegality for a period of at least 4 months in Nazi-occupied or Axis countries; (as defined by the Article 2/CEE Fund agreement); or (IV) were a fetus during the time that their mother suffered persecution as described above.
Hardship Fund[110]	Claimants must satisfy one of these criteria:

[107] *Note: there are two other funds, however, they are mostly duplicative of the eligibility categories discussed here.*

Appendix EE. Overview of Canadian and International Compensation Schemes *(continued)*

	- Suffered deprivation of liberty (such as, ghetto, forced labor, camp, hiding or false identity); or - Fled from the Nazi regime; or - Fled between June 22, 1941 and January 27, 1944 from areas of the Soviet Union that were generally up to 100 kilometers from the most easterly advance of the German army (Wehrmacht) but were not later occupied by the Nazis; or - Stayed in Leningrad at some time between September 1941 and January 1944 or if they fled from there during this period; or - Suffered "restriction of liberty" as defined by the German Government, (such as were forced to wear the Star of David); or - Were restricted in movement, lived under curfew, suffered compulsory registration with limitation of residence, or - Suffered during the period of Nazi persecution in Algeria such as loss of education, loss of property or economic, professional, and social restrictions; or - Were a fetus at the time that their mother suffered persecution described above. - Anybody who received prior compensation.
Central and Eastern European Fund (CEEF)[111]	Nearly identical to the structure and eligibility criteria for the Article 2 Fund. However, the major difference is that the CEEF serves survivors living in "former communist-bloc countries of Eastern Europe or the former Soviet Union."
Spouse of the Holocaust Survivor Fund[112]	Eligibility Criteria: i) Must have been married to the Article 2/CEE Fund beneficiary at the time they passed away (ii) Be alive as of January 1, 2020, or the date of the application, whichever is the latter.
Article 2 Fund[113]	Administration: The Article 2 fund eligibility criteria is established by the German government and administered by the Claims Conference. Eligibility: Eligibility under the Article 2 Fund is limited to Jewish Nazi victims who were persecuted as Jews and who meet the following eligibility criteria: • Were incarcerated in a concentration camp* or labor battalion during specific time periods as defined by the German Ministry of Finance on its website. ; or • Were imprisoned for at least 3 months in a ghetto as defined by the German Ministry of Finance; or • Were imprisoned for at least 3 months in certain "open ghettos" as defined by the German Ministry of Finance; or • Were in hiding for at least 4 months, under inhumane conditions, without access to the outside world in German Nazi-occupied territory or Nazi satellite states (Nazi instigation); or • Lived illegally under false identity or with false papers for at least 4 months under inhumane conditions in German Nazi-occupied territory or Nazi satellite states (Nazi instigation); or • Were a fetus during the time that their mother suffered persecution as described above. Limitations: • The Article 2 fund is subject to income and asset limits.

	• Recipients of other funds (e.g., The German Federal Indemnification Law, Israeli Pensions, Central and Eastern European Fund).
COVID-19 Emergency Fund	Anyone who is alive and has been approved for a Hardship Fund Payment and does not receive a pension as compensation for persecution during the Holocaust.

Dates of compensation scheme & Quantum of Compensation

Kindertransport Fund[114]	Child Survivor Fund[115]	Hardship Fund[116]	COVID-19 Emergency Fund[117]	Article 2 Fund[118]	CEEF[119]	Spousal Survivor Fund[120]
Fixed: One-time payments. Quantum: €2,500	**Fixed:** One-time payments. Quantum: €2,500	**Fixed:** One-time payments. Quantum: €2,556.46	**Fixed:** Two supplemental payments in addition to the hardship fund. **Quantum:** 2,400 EUR total, in two installments.	**Ongoing:** Monthly payments. **Quantum:** 580 EUR per month, paid in aggregate quarterly.	**Ongoing:** Monthly payments. **Quantum:** 580 EUR per month, paid quarterly.	**Ongoing:** recipients receive payments until they pass away. **Quantum:** quarterly payments of $1,539 EUR.

The Compensation Claims committee uses three different forms: Kindertransport, Spousal Survivor, and a general form for all others, including if the claimant does not know which fund to apply to. Claimants bear the burden of proof. They are required – via applications available online – to provide descriptions of the concentration camp, and rough timelines. Claimants are required to produce "documentary proof of their persecution." However, the Claims Conference, relying on Holocaust historians and archival documentary evidence, examines claims to verify their legitimacy.

Processing of claims

Oversight of identifying beneficiaries and the compensation distribution process. The claims committee generally has numerous, multinational oversight bodies that ensure that compensation agreements are correct:

Appendix EE. Overview of Canadian and International Compensation Schemes *(continued)*

- German Federal Audit Office: Has discretionary authority to review how funds are distributed to the Claims Committee by the German government.
- Audit: The Claims Conference is audited by KPMG annually and produces claims conference financial statements.
- Controller: The Claims Committee has a controller that produces periodic reports on funding to specific organizations and oversight of the funds. Furthermore, they make recommendations on expanding coverage in specific places.
- Office of the Ombusdman: The Ombudsman's responsibilities are to assist in reviewing particular cases in which claimants seek clarification or may have a concern or grievance about a claim or application filed with the organization.

Appeals process and procedure for dealing with missing evidence. There is an appeals procedure for claimants whose claims are denied. Claimants can file for an independent review of applications. Currently, that review is conducted by a retired Chief Justice of Israel's National Labor Court and an American Historian. Claimants who are rejected have one year to file an appeal.

The Claims Conference is distinctive – especially vis-à-vis Canadian and Australian settlement processes. First, the Claims Conference is ongoing. Reparative payments to survivors – while smaller than the compensation schemes in Canada and Australia – provide a consistent source of funds for survivors. Second, the evolution of the scheme distinguishes it. From providing COVID-19 relief to expanding the eligibility criteria of some funds to include spouses of survivors, the Claims Conference has attempted to evolve the compensation needs of survivors to meet their needs. Additionally, compensation provides a material benefit – especially for indigent Holocaust survivors. For instance, one survivor was able to afford higher quality food after receiving compensation payments.

This is Exhibit "K" referred to in the Affidavit of William Colish of the City of Montreal, in the Province of Quebec, affirmed before me at the City of Toronto, in the Province of Ontario on September 2, 2022, in accordance with O. Reg. 431/20, Administering Oath or Declaration Remotely.

SETTLEMENT AGREEMENT

THIS AGREEMENT is dated effective as of March 31, 2022 ("**Effective Date**").

BETWEEN:

XAVIER MOUSHOOM, JEREMY MEAWASIGE by his Litigation Guardian, Jonavon Joseph Meawasige, and JONAVON JOSEPH MEAWASIGE

(together, the "**Moushoom Plaintiffs**")

AND:

ASSEMBLY OF FIRST NATIONS, ASHLEY DAWN LOUISE BACH, KAREN OSACHOFF, MELISSA WALTERSON, NOAH BUFFALO-JACKSON by his Litigation Guardian, Carolyn Buffalo, CAROLYN BUFFALO, and DICK EUGENE JACKSON also known as RICHARD JACKSON

(together, the "**AFN Plaintiffs**")

AND:

ASSEMBLY OF FIRST NATIONS and ZACHEUS JOSEPH TROUT

(together, the "**Trout Plaintiffs**")

AND:

HER MAJESTY THE QUEEN IN RIGHT OF CANADA

("**Canada**")

(collectively, "**Parties**")

WHEREAS:

A. On March 4, 2019, the Moushoom Plaintiffs commenced a proposed class action in the Federal Court under Court File Number T-402-19 (the "**Moushoom Action**"), seeking compensation for discrimination dating back to April 1, 1991.

B. On January 28, 2020, the AFN Action Plaintiffs also filed a proposed class action in the Federal Court under Court File Number T-141-20 (the "**AFN Action**") regarding similar allegations dating back to April 1, 1991.

C. On July 7, 2021, the Honourable Justice St-Louis ordered that the Moushoom Action and the AFN Action be consolidated with certain modifications (the "**Consolidated Action**").

D. The parties to the Consolidated Action engaged in mediation in accordance with the Federal Court Guidelines for Aboriginal Law Proceedings (dated April 2016) to resolve all or some of the outstanding issues in the Consolidated Action. The Honourable Leonard Mandamin acted as mediator from November 1, 2020 to November 10, 2021.

E. On July 16, 2021, the Trout Plaintiffs filed a proposed class action in the Federal Court under Court File Number T-1120-21 (the "**Trout Action**") regarding the Crown's discriminatory provision of services and products between April 1, 1991 and December 11, 2007.

F. On September 29, 2021, in reasons indexed at 2021 FC 969, Justice Favel of the Federal Court of Canada upheld the Canadian Human Rights Tribunal (the "**Tribunal**") decision made in Tribunal File: T1340/7008 (the "**CHRT Proceeding**") indexed at 2019 CHRT 39 (the "**Compensation Order**") in which the Tribunal awarded compensation to Children and their caregiving parents or caregiving grandparents impacted by Canada's systemic discrimination in the underfunding of child and family services on reserve and in the Yukon, and its narrow interpretation of Jordan's Principle.

G. On or about November 1, 2021, the parties entered into negotiations outside of the Federal Court mediation process.

H. The parties, by agreement, appointed the Honourable Murray Sinclair to act as chair of the negotiations.

I. The parties worked collaboratively to determine the class sizes of the Consolidated Action and the Trout Action.

J. The parties separately engaged experts ("**Experts**") to prepare a joint report on the estimated size of the Removed Child Class, as defined herein, on which the parties would rely for settlement discussions (the "**Joint Report**").

K. The Experts relied on data provided by Indigenous Services Canada ("**ISC**") in preparing the Joint Report. ISC communicated to the experts and plaintiffs counsel that the data often came from third-party sources and was in some cases incomplete and inaccurate. The Joint Report referred to and took into account these factors.

L. The Experts estimated that there were 106,200 Removed Child Class Members from 1991 to March 2019. The Experts advised that this class size must be adjusted to 115,000 to cover the period from March 2019 to March 2022 (the "**Estimated Removed Child Class Size**"). The Estimated Removed Child Class Size was determined based on the data received from ISC and modelling taking into account gaps in the data.

M. Canada provided to the plaintiffs estimates of the Jordan's Principle Class Size, which were between 58,385 and 69,728 for the period from December 12, 2007 to November 2, 2017 (the "**Jordan's Principle Class Size Estimates**"). The Parties understand that the Jordan's Principle Class Size Estimates were based on a single 2019-2020 quarter.

N. Based on the Jordan's Principle Class Size Estimates, the plaintiffs estimated the size of the Trout Class, as defined below, to be approximately 104,000.

O. Based on the Parliamentary Budget Officer Report, *Compensation For The Delay and Denial of Services to First Nations Children*, dated February 23, 2021, there are 1.5 primary caregivers per First Nations child.

P. On November 26, 2021, the Federal Court granted certification of the Consolidated Action on consent of the parties.

Q. On February 11, 2022, the Federal Court granted certification of the Trout Action on consent of the parties.

R. The Moushoom Plaintiffs, the AFN Plaintiffs and the Trout Plaintiffs (collectively, the "**Representative Plaintiffs**") and Canada concluded an agreement in principle ("**AIP**") on December 31, 2021 which set out the principal terms of their agreement to settle the Consolidated Action and the Trout Action (collectively, the "**Actions**") and which forms the basis of this Agreement.

S. On March 24, 2022, the Tribunal established March 31, 2022, as the end date for compensation to individuals included in the Removed Child Class and the Family of Removed Child Class.

T. In drafting this Agreement, the Parties:

i) Intend a fair, comprehensive and lasting settlement of all claims raised or capable of being raised in the consolidated action, the Trout action and the CHRT proceeding including that:

(a) Canada knowingly underfunded child and family services for First Nations Children living on Reserve and in the Yukon;

(b) Canada's failure to comply with Jordan's Principle, a legal requirement designed to safeguard First Nations Children's existing substantive equality rights guaranteed in the *Canadian Charter of Rights and Freedoms ("**Charter**")*; and

(c) Canada's failure to provide First Nations Children with essential services available to non-First Nations Children or which would have been required to ensure substantive equality under the *Charter*;

ii) Intend that the Claims Process be administered in an expeditious, cost-effective, user-friendly, culturally sensitive, and trauma-informed manner;

iii) Desire to:

(a) safeguard the best interests of the Class Members who are minors and Persons under Disability;

(b) minimize the administrative burden on Class Members; and

(c) ensure culturally informed and trauma-informed mental health and cultural support services, as well as navigational assistance are available to Class Members.

U. This settlement agreement is designed such that some Class Members, or subsets of Class Members, receive direct compensation, while some others indirectly benefit from the settlement agreement without receiving direct compensation.

NOW THEREFORE in consideration of the mutual agreements, covenants, and undertakings set out herein, the Parties agree as follows:

ARTICLE 1 – INTERPRETATION

1.01 Definitions

In this Agreement, the following definitions apply:

"**Abuse**" means sexual abuse or serious physical abuse causing bodily injury, but does not include neglect nor emotional maltreatment.

"**Actions**" has the meaning set out in the Recitals.

"**Actuary**" means the actuary or firm of actuaries appointed by the Court on the recommendation of the Settlement Implementation Committee who is, or in the case of a firm of actuaries, at least one of the principals of which is, a Fellow of the Canadian Institute of Actuaries.

"**Administrator**'' means the administrator appointed by the Court and its successors appointed from time to time pursuant to the provisions of Article 3.

"**AFN**" means the Assembly of First Nations.

"**AFN Supports**" has the meaning set out in Article 8.

"**Age of Majority**" means the age at which a Class Member is legally considered an adult under the provincial or territorial law of the province or territory where the Class Member resides, attached hereto as Schedule D.

"**Agreement**" means this settlement agreement, including the Schedules attached hereto.

"**AIP**" has the meaning set out in the Recitals.

"**Approved Jordan's Principle Class Member**" means a Jordan's Principle Class Member whose Claim has been accepted by the Administrator, or on appeal by the Third-Party Assessor.

"**Approved Jordan's Principle or Trout Family Class Member**" means a Jordan's Principle or Trout Family Class Member whose Claim has been accepted by the Administrator, or on appeal by the Third-Party Assessor.

"**Approved Removed Child Class Member**" means a Removed Child Class Member whose Claim has been accepted by the Administrator, or on appeal by the Third-Party Assessor.

"**Approved Removed Child Family Class Member**" means the Caregiving Parent or Caregiving Grandparent of a Removed Child Class member, whose Claim has been accepted by the Administrator, or on appeal by the Third-Party Assessor.

"**Approved Trout Child Class Member**" means a Trout Child Class Member whose Claim has been accepted by the Administrator, or on appeal by the Third-Party Assessor.

"Assessment Home" means a home designed for an initial short-term placement where the needs of a Child are being assessed in order to match them to a longer term placement.

"**Auditors**" means the auditors appointed by the Court and their successors appointed from time to time pursuant to the provisions of Article 15.

"**Band List**" has the meaning set out in sections 10-12 of the *Indian Act*.

"**Band**" has the meaning set out in the *Indian Act*.

"**Base Compensation**" means the amount of compensation (excluding any applicable Enhancement Payment) approved by the Court as agreed to by the Plaintiffs, or the Settlement Implementation Committee based on advice from the Actuary, as part of the Claims Process, to be paid to an Approved Removed Child Class Member, an Approved Jordan's Principle Class Member, an Approved Trout Child Class Member, an Approved Removed Child Family Class Member, or an Approved Jordan's Principle or Trout Family Class Member. Such Base Compensation may be different for different Classes and may be made in more than one installment as the implementation of the Claims Process may require.

"**Budget**" means each of the Budgets set out in Article 6.

"**Business Day**'' means a day other than a Saturday or a Sunday or a day observed as a holiday under the laws of the province or territory in which the person who needs to take action pursuant to this Agreement is ordinarily resident or a holiday under the federal laws of Canada applicable in the said province or territory.

"**Canada**" has the meaning set out in the preamble.

"**Caregiving Grandparent**" and "**Caregiving Grandparents**" means a biological or adoptive caregiving grandmother or caregiving grandfather who lived with and assumed and exercised parental responsibilities over a Removed Child Class Member at the time of removal of the Child, or a Jordan's Principle Class Member or a Trout Child Class Member at the time of the Child's Confirmed Need for an Essential Service. Relationships

of a foster parent or stepparent to a Child are excluded from giving rise to a Caregiving Grandparent relationship under this Agreement.

"**Caregiving Parent**" and "**Caregiving Parents**" means the caregiving mother or caregiving father, living with, and assuming and exercising parental responsibilities over a Removed Child Class Member at the time of removal of the Child, or a Jordan's Principle Class Member or a Trout Child Class Member at the time of the Child's Confirmed Need for an Essential Service. Caregiving Parent includes biological parents, adoptive parents and Stepparents. A foster parent is excluded as a Caregiving Parent under this Agreement.

"**Certification Orders**" mean collectively the order of the Court dated November 26, 2021, certifying the Consolidated Action as a class proceeding and the order of the Court dated February 11, 2022, certifying the Trout Action as a class proceeding, copies of which are attached hereto as Schedules A and B.

"Child" or **"Children"** for the purposes of the Removed Child Class means a person who was, at the time of removal, under the Age of Majority of the person's place of residence as set out in Schedule D, Provincial and Territorial Ages of Majority, and for the purposes of the Jordan's Principle Class and Trout Child Class means a person under the provincial and territorial Age of Majority of the person's place of residence as set out in Schedule D, Provincial and Territorial Ages of Majority at the time of the existence of the Confirmed Need for an Essential Service.

"**Claim**" means a claim for compensation made by or on behalf of a Class Member.

"**Claimant**" means a person who makes a Claim by completing and submitting a Claims Form to the Administrator, or on whose behalf a Claim is made by such Class Member's Estate Executive, Estate Claimant or Personal Representative.

"**Claims Deadline**" means the date that is:

(a) three (3) years following the delivery of the initial notice of approval of settlement for Class Members who have reached the Age of Majority by the date on which notice is delivered;

(b) for class members under the Age of Majority, three (3) years after reaching the Age of Majority, so long as that date is at least three years from the date in (a); or

(c) a reasonable extension of the Claims Deadline for individual Class Members approved on request by the Administrator on the grounds that the Claimant faced extenuating personal circumstances and was unable to submit a Claim as a result of physical or psychological illness or challenges, including homelessness, incarceration or addiction, or due to unforeseen community circumstances such as epidemics, community internet connectivity, pandemics, natural disasters,

community-based emergencies or service disruptions at a national, regional or community level.

"**Claims Form**" means a written declaration in respect of a Claim by a Class Member with Supporting Documentation or such other form as may be recommended by the Administrator and agreed to by the Settlement Implementation Committee.

"**Claims Process**" means the process, including a distribution protocol, to be further designed and detailed in accordance with this Agreement for the distribution of compensation under this Agreement to eligible Class Members. The Claims Process also includes, but is not limited to, the Incarcerated Class Members Process and such other processes as may be recommended by the Administrator and experts, agreed to by the Plaintiffs and approved by the Court, for the submission of Claims, determination of eligibility, assessment, verification, determination of possible enhancement, payment of compensation to Class Members, and the role of the Third-Party Assessor.

"**Class**" means Jordan's Principle Class, Jordan's Principle Family Class, Removed Child Class, Removed Child Family Class, Trout Child Class, and Trout Family Class, collectively. Reference to a "class" or "classes" with a lower case "c" is to any of the Jordan's Principle Class, Jordan's Principle Family Class, Removed Child Class, Removed Child Family Class, Trout Child Class, or Trout Family Class as may apply within the context of such reference.

"**Class Counsel**" means Sotos LLP, Kugler Kandestin LLP, Miller Titerle + Company, Nahwegahbow Corbiere, and Fasken LLP, collectively.

"**Class Member**" and "**Class Members**" means any one or more individual members of the Class.

"**Confirmed Need**" means the need of a member of the Jordan's Principle Class or Trout Child Class as confirmed by Supporting Documentation as defined for Jordan's Principle Class or Trout Child Class.

"**Court**" means the Federal Court of Canada.

"**Cy-près Fund**" has the meaning set out in Article 7, established to primarily benefit Class Members who may not receive direct compensation under this Agreement.

"**Delay**" means where a member of the Jordan's Principle Class or Trout Child Class requested an Essential Service from Canada and they received a determination on their request beyond a timeline to be agreed to by the Parties and specified in the Claims Process.

"**Denial**" means where a member of the Jordan's Principle Class or Trout Child Class requested an Essential Service from Canada and that request was either denied or the member of the Jordan's Principle Class or Trout Child Class did not receive a response as to acceptance or denial.

"**Eligible Deceased Class Member**" has the meaning set out in Article 13.02.

"**Eligibility Decision**" has the meaning set out in Article 5.02.

"**Enhancement Factor**" means any objective criterion agreed to by the Plaintiffs and approved by the Court that may be used by the Administrator to enhance the Base Compensation of some members of the Removed Child Class, Jordan's Principle Class or Trout Child Class.

"**Enhancement Payment**" means an amount, based on Enhancement Factors, that may be payable to an Approved Removed Child Class Member, an Approved Jordan's Principle Class Member, or a Trout Child Class Member, in addition to a Base Payment.

"**Essential Service**" means a service that was required due to the Child's particular condition or circumstance, the failure to provide which would have resulted in material impact on the Child, as assessed in accordance with the Framework of Essential Services.

"**Estate Administrator**" includes an executor or administrator appointed or designated under federal, provincial or territorial legislation, as applicable under the circumstances.

"**Estate Executor**" means the executor, administrator, trustee or liquidator of an Eligible Deceased Class Member's estate.

"**First Nations**" means:

(a) with respect to the Removed Child Class, Jordan's Principle Class, Trout Child Class, and Stepparents: individuals who are registered pursuant to the Indian Act;

(b) with respect to the Removed Child Class, Jordan's Principle Class, and Trout Child Class: individuals who were entitled to be registered under sections 6(1) or 6(2) of the *Indian Act*, as it read as of February 11, 2022 (the latter date of the Certification Orders);

(c) with respect to the Removed Child Class: individuals who met Band membership requirements under sections 10-12 of the *Indian Act* by February 11, 2022 (the latter date of the Certification Orders) such as where their respective First Nation community assumed control of its own membership by establishing membership rules and the individuals were found to meet the requirements under those membership rules and were included on the Band List;

(d) with respect to the Jordan's Principle Class only: individuals who met Band membership requirements under sections 10-12 of the *Indian Act* pursuant to paragraph (c), above, AND who suffered a Delay, Denial, or Service Gap between January 26, 2016 and November 2, 2017;

(e) with respect to the Jordan's Principle Class only: individuals who were recognized as citizens or members of their respective First Nation by February 11, 2022 (the

latter date of the Certification Orders) as confirmed by First Nations Council Confirmation, whether under final agreement, self-government agreement, treaties or First Nations' customs, traditions and laws, AND who suffered a Delay, Denial, or Service Gap between January 26, 2016 and November 2, 2017.

"**First Nations Council Confirmation**" means a written confirmation, the form and contents of which will be agreed upon amongst the Plaintiffs subject to the Court's approval, from a First Nation designed for the purposes of the Claims Process to the effect that an individual is recognized as a citizen or member of their respective First Nation whether under treaty, agreement or First Nations' customs, traditions or laws.

"**Framework of Essential Services**" is an approach to Essential Services to be agreed to by the Plaintiffs for the purposes of the Claims Process, with assistance from experts, in order to assess those Essential Services that, if subject to Delay, Denial or a Service Gap, would have resulted in material impact on the Child.

"**Group Home**" means a staff operated home funded by ISC where several Children are living together. Some Group Homes are parent-operated, where a couple with professional youth care training operate a Group Home together.

"**Implementation Date**" means the later of:

(a) the day following the last day on which a Class Member may appeal or seek leave to appeal the Settlement Approval Order; or

(b) the date on which the last of any appeals of the Settlement Approval Order is finally determined.

"**Incarcerated Class Members Process**" means the process for notice and claims specific to Class Members incarcerated in federal penitentiaries, provincial prisons, and other penal and correctional institutions.

"***Income Tax Act***" means the *Income Tax Act*, R.S.C. 1985, c. 1 (5th Supp).

"***Indian Act***" means the *Indian Act*, R.S.C. 1985, c. 1-5.

"**Investment Committee**" means an advisory body constituted in accordance with this Agreement and Schedule G, Investment Committee Guiding Principles.

"**ISC**" has the meaning in the Recitals and includes any predecessor or successor department.

"**Jordan's Principle Class**" or "**Jordan's Principle Class Member**" means First Nations individuals who, during the period between December 12, 2007 and November 2, 2017 (the "**Jordan's Principle Class Period**"), did not receive from Canada (whether by reason of a Denial or a Service Gap) an Essential Service relating to a Confirmed Need, or whose receipt of said Essential Service relating to a Confirmed Need was delayed by Canada, on grounds, including but not limited to, lack of funding or lack of jurisdiction, or

as a result of a Service Gap or jurisdictional dispute with another government or governmental department while they were under the Age of Majority.

"**Jordan's Principle Family Class**" means all persons who are the brother, sister, mother, father, grandmother or grandfather of a member of the Jordan's Principle Class at the time of Delay, Denial or Service Gap. Amongst the Jordan's Principle Family Class, only the Caregiving Parents or Caregiving Grandparents may receive direct compensation if otherwise eligible under this Agreement.

"**Jordan's Principle**" means a child-first substantive equality principle named after the late Jordan River Anderson that applies equally to all First Nations Children whether resident on or off reserve, including the Northwest Territories.

"**Non-kin Foster Home**" means any family-based care funded by ISC.

"**Non-paid Kin or Community Home**" means an informal placement that has been arranged within the family support network; the child welfare authority does not have temporary custody and the placement is not funded by ISC.

"**Northern or Remote Community**" means a community as agreed upon by the Plaintiffs and set out in the Claim Process.

"**Notice Plan**" means the Notice Plan as recommended by the Administrator and agreed by the Parties, subject to the Court's approval.

"**Ongoing Fees**" has the meaning set out in Article 16.03.

"**Opt-Out**" means: (a) the delivery by a Class Member to the Administrator of an opt-out form or a written request to be removed from the Actions before the Opt-Out Deadline; or (b) after the Opt-Out Deadline, a Class Member obtaining leave of the Court to opt out of the Actions in accordance with this Agreement.

"**Opt-Out Deadline**" means the one hundred eightieth (180th) day following the publication of the notice of certification, after which Class Members may no longer Opt-Out of the Actions, except with leave from the Court.

"**Ordinarily Resident on Reserve**" means:

(a) a First Nations individual who lives in a permanent dwelling located on a First Nations Reserve at least 50% of the time and who does not maintain a primary residence elsewhere;

(b) a First Nations individual who is living off-Reserve while registered full-time in a post-secondary education or training program who is receiving federal, Band or Aboriginal organization education/training funding support and who:

a. would otherwise reside on-Reserve;

b. maintains a residence on-Reserve;

c. is a member of a family that maintains a residence on-Reserve; or

d. returns to live on-Reserve with parents, guardians, caregivers or maintainers when not attending school or working at a temporary job.

(c) a First Nations individual who is temporarily residing off-Reserve for the purpose of obtaining care that is not available on-Reserve and who, but for the care, would otherwise reside on-Reserve;

(d) a First Nations individual who is temporarily residing off-Reserve for the primary purpose of accessing social services because there is no reasonably comparable service available on-Reserve and who, but for receiving said services, would otherwise reside on-Reserve;

(e) a First Nations individual who at the time of removal met the definition of ordinarily resident on reserve for the purpose of receiving child welfare and family services funding pursuant to a funding agreement between Canada and the province/territory in which the individual resided (including, but not limited to, ordinarily resident on reserve individuals funded through the cost-shared model under the Canada-Ontario 1965 Indian Welfare Agreement).

"**Out-of-home Placement**" means a distinct location where a Removed Child Class Member has been placed pursuant to a removal, such as an Assessment Home, Non-kin Foster-home, Paid Kinship-home, Group Home, a Residential Treatment Facility, or other similar placement funded by ISC.

"**Paid Kinship Home**" means a formal placement that has been arranged within the family support network and paid for by ISC, where the child welfare authority has temporary or full custody.

"**Parties**" means the Plaintiffs and Canada;

"**Person Under Disability**" means:

(a) a person under the Age of Majority under the legislation of their province or territory of residence; or

(b) an individual who is unable to manage or make reasonable judgments or decisions in respect of their affairs by reason of mental incapacity including those for whom a Personal Representative has been appointed, or designated by operation of the law, pursuant to the applicable provincial, territorial or federal legislation.

"**Personal Representative**" means the Person appointed, or designated by operation of the law, pursuant to the applicable provincial, territorial or federal legislation to manage or make reasonable judgments or decisions in respect of the affairs of a Person Under Disability who is an eligible claimant and includes an administrator for property.

"**Plaintiffs**" means collectively the Moushoom Plaintiffs, the AFN Plaintiffs and the Trout Plaintiffs.

"**Professional**" means a professional with expertise relevant to a Child's Confirmed Need(s), for example: a medical professional or other registered professionals available to a Class Member in their place of residence and community (particularly in a Northern or Remote Community where there may not have been, or be, access to specialists, but there may have been access to community health nurses, social support workers, and mental health workers), or an Elder or Knowledge Keeper who is recognized by the Child's specific First Nations community.

"**Recitals**" means the recitals to this Agreement.

"**Removed Child Class**" or "**Removed Child Class Member**" means First Nations individuals who, at any time during the period between April 1, 1991 and March 31, 2022 (the "**Removed Child Class Period**"), while they were under the Age of Majority, were removed from their home by child welfare authorities or voluntarily placed into care, and whose placement was funded by ISC, such as an Assessment Home, a Non-kin Foster Home, a Paid Kinship Home, a Group Home, or a Residential Treatment Facility or another ISC-funded placement while they, or at least one of their Caregiving Parents or Caregiving Grandparents, were Ordinarily Resident on a Reserve or were living in the Yukon, but excluding children who lived in a Non-paid Kin or Community Home through an arrangement made with their caregivers and excluding individuals living in the Northwest Territories at the time of removal.

"**Removed Child Family Class**" means all persons who are the brother, sister, mother, father, grandmother or grandfather of a member of the Removed Child Class at the time of removal.

"**Reserve**" means a tract of land, as defined under the *Indian Act*, the legal title to which is vested in the Crown and has been set apart for the use and benefit of a Band.

"**Residential Treatment Facility**" means a treatment program for several Children living in the treatment facility with 24 hours a day trained staff, including locked or secure and unlocked residences, funded by ISC.

"**Service Gap**" means each of the Essential Services that are identified as a Service Gap in accordance with the Framework of Essential Services.

"**Settlement Approval Hearing**" means a hearing of the Court to determine a motion to approve this Agreement.

"**Settlement Approval Order**" means the draft order submitted to the Court regarding the approval of this Agreement, the form and content of which will be agreed upon amongst the Parties.

"**Settlement Funds**" means a total of $20,000,000,000 ($20 billion), which Canada will pay to settle the claims of the Class in accordance with this Agreement.

"**Settlement Implementation Committee**" or "**Settlement Implementation Committee and its Members**" means a committee established pursuant to Article 12.

"**Settlement Implementation Report**" has the meaning set out in Article 12.03.

"**Spell in Care**" means a continuous period in care, which starts when a Child is taken into out-of-home care and ends when the Child is discharged from care, by returning home, moving into another arrangement in a Non-paid Kin or Community Home, being adopted, or living independently at the Age of Majority. ISC data considers a Spell in Care by the start and end dates of each continuous period of Out-of-home Placement.

"Stepparent" means a person who is a First Nations spouse of the biological parent of a Removed Child Class Member, Jordan's Principle Class Member, or Trout Child Class Member, and lived with that Child's biological parent and contributed to the support of the Child for at least three (3) years prior to the removal of the Child, or the occurrence of the Delay, Denial or the Service Gap.

"**Supporting Documentation**" means:

(a) for the Removed Child Class: such documentation as may be required to be submitted by a Removed Child Class Member in accordance with this Agreement to substantiate eligibility and compensation under the applicable Claims Form;

(b) for the Jordan's Principle Class and Trout Child Class: such documentation as may be required to be submitted by a member of the Jordan's Principle Class and Trout Child Class in accordance with this Agreement to substantiate eligibility and compensation under the applicable Claims Form;

(c) for the Removed Child Family Class: such documentation as may be required to be submitted by a member of the Removed Child Family Class in accordance with this Agreement to substantiate eligibility and compensation under the applicable Claims Form;

(d) for the Jordan's Principle Family Class: such documentation as may be required to be submitted by a member of the Jordan's Principle Family Class in accordance with this Agreement to substantiate eligibility and compensation, if any, under the applicable Claims Form;

(e) for the Trout Family Class: the documentation to be required to be submitted by a member of the Trout Family Class in accordance with this Agreement to substantiate eligibility and compensation, if any, under the applicable Claims Form; and

(f) for Eligible Deceased Class Members: the documentation to be required to be submitted in accordance with this Agreement to substantiate eligibility and compensation, if any, under the applicable Claims Form.

"**Time in Care**" means the total amount of time that a Removed Child Class Member spent in care regardless of the number of Spells in Care.

"**Third-Party Assessor**" means the person or persons appointed by the Court to carry out the duties of the Third-Party Assessor as stated in this Agreement, to be particularized in the Claims Process and their successors appointed from time to time, as approved by the Court.

"**Trout Child Class**" or "**Trout Child Class Member**" means First Nations individuals who, during the period between April 1, 1991 and December 11, 2007 (the "**Trout Child Class Period**"), while they were under the Age of Majority, did not receive from Canada (whether by reason of a Denial or a Service Gap) an Essential Service relating to a Confirmed Need, or whose receipt of said Essential Service was delayed by Canada, on grounds, including but not limited to, lack of funding or lack of jurisdiction, or as a result of a Service Gap or jurisdictional dispute with another government or governmental department.

"**Trout Family Class**" means all persons who are the brother, sister, mother, father, grandmother or grandfather of a member of the Trout Child Class at the time of Delay, Denial or Service Gap. Amongst the Trout Family Class, only the Caregiving Parents or Caregiving Grandparents may receive direct compensation if otherwise eligible under this Agreement.

"**Trust**" means the trust established pursuant to Article 14.

"**Trust Fund**" has the meaning set out in Article 4.

"**Trustee**" means the trustee appointed by the Court pursuant to Article 14 for the purposes of this Agreement.

1.02 Headings

The division of this Agreement into paragraphs and the use of headings are for convenience of reference only and do not affect the construction or interpretation of this Agreement.

1.03 Extended Meanings

In this Agreement, words importing the singular number include the plural and vice versa, and words importing any gender or no gender include all genders. The term "including" means "including without limiting the generality of the foregoing". Any reference to a

government ministry, department or position will include any predecessor or successor government ministry, department or position.

1.04 Interpretation

The Parties acknowledge that they have reviewed and participated in settling the terms of this Agreement and they agree that there will be no presumptive rule of construction to the effect that any ambiguity in this Agreement is to be resolved in favour of any particular Party.

1.05 Statutory References

In this Agreement, unless something in the subject matter or context is inconsistent therewith or unless otherwise herein provided, a reference to any statute is to that statute as enacted on the date of such reference and not as the statute may from time to time be amended, re-enacted, or replaced, and the same applies to any regulations made thereunder.

1.06 Business Day

Where the time on or by which any action required to be taken hereunder expires or falls on a day that is not a Business Day, such action may be done on the next succeeding day that is a Business Day.

1.07 Currency

All references to currency herein are to lawful money of Canada.

1.08 Compensation Inclusive

The amounts payable to Class Members under this Agreement are inclusive of any prejudgment or post-judgment interest.

1.09 Schedules

The following Schedules to this Agreement are incorporated into and form part of this Agreement:

Schedule A: Consolidated Action Certification Order

Schedule B: Trout Action Certification Order

Schedule C: Framework for Supports for Claimants in Compensation Process

Schedule D: Provincial and Territorial Ages of Majority

Schedule E: Summary Chart of Jordan’s Principle / Trout Approach

Schedule F: Examples Chart of Removed Child Family Class Approach

Schedule G: Investment Committee Guiding Principles

1.10 Benefit of the Agreement

This Agreement will inure to the benefit of and be binding upon the Parties, and for Canada and Class Members, upon their estates, heirs, Estate Executors, Estate Claimants, and Personal Representatives, subject to eligibility criteria herein.

1.11 Applicable Law

This Agreement will be governed by the laws of Canada, together with the laws of the province or territory where the Class Member is ordinarily resident, as applicable, save where otherwise specified in this Agreement.

1.12 Counterparts

This Agreement may be executed electronically and in any number of counterparts, each of which will be deemed to be an original and all of which taken together will be deemed to constitute one and the same Agreement.

1.13 Official Languages

As soon as practicable after the execution of this Agreement Class Counsel will arrange for the preparation of an authoritative French version. The French version will be of equal weight and force at law.

1.14 Ongoing Supervisory Role of the Court

Notwithstanding any other provision of this Agreement, the Court will maintain jurisdiction to supervise the implementation of this Agreement in accordance with its terms, including the adoption of protocols and statements of procedure, and the Parties attorn to the jurisdiction of the Court for that purpose. The Court may give any directions or make any orders that are necessary for the purposes of this Article.

ARTICLE 2 - EFFECTIVE DATE OF AGREEMENT

2.01 Date when Binding and Effective

On the Implementation Date, this Agreement will become binding on all Class Members who have not Opted-Out in accordance with Article 11.

2.02 Effective Upon Approval

None of the provisions of this Agreement will become effective unless and until the Court approves this Agreement.

2.03 Legal Fees Severable

Class Counsel's fees for prosecuting the Actions have been or will be negotiated separately from this Agreement and remain subject to approval by the Court. The Court's decision on Class Counsel's fees will have no effect on the implementation of this

Agreement. If the Court refuses to approve the fees of Class Counsel, the remainder of the provisions of this Agreement will remain in full force and effect and in no way will be affected, impaired or invalidated.

ARTICLE 3 – ADMINISTRATION

3.01 Designation of Administrator

Initially on the recommendation of the Plaintiffs based on advice received from experts, the Court will appoint an Administrator to administer the Claims Process with such powers, rights, duties and responsibilities as are set out in Article 3 and such other powers, rights, duties and responsibilities as are determined by the Settlement Implementation Committee and approved by the Court. Following the establishment of the Settlement Implementation Committee and on the recommendation of the Settlement Implementation Committee, the Court may replace the Administrator at any time.

3.02 Duties of the Administrator

1) The Administrator's duties and responsibilities include the following:

   (a) in consultation with the Settlement Implementation Committee, developing, installing, and implementing systems, forms, information, guidelines and procedures for processing Claims and appeals of the decisions of the Administrator to the Third-Party Assessor in accordance with this Agreement and the Claims Process;

   (b) in consultation with the Settlement Implementation Committee, developing, installing, and implementing systems and procedures for making payments of compensation in accordance with this Agreement and the Claims Process;

   (c) receiving funds from the Trust and the Trustee to make payments to Class Members in accordance with this Agreement and the Claims Process;

   (d) ensuring adequate staffing for the performance of its duties under this Agreement, and training and instructing personnel;

   (e) ensuring, in consultation with the Settlement Implementation Committee, First Nations participation and the reflection of First Nations perspectives, appropriate cultural knowledge, use of proper experts, and a trauma-informed approach to the Class;

   (f) keeping or causing to be kept accurate accounts of its activities and its administration and preparing annual audited financial statements, as well as reports, and records as are required by the Settlement Implementation Committee, the Auditors and the Court;

   (g) reporting to the Settlement Implementation Committee on a monthly basis

respecting:

i) Claims received and determined;

ii) Claims deemed ineligible and the reason(s) for that determination; and

iii) appeals from the Administrator's decisions and the outcomes of those appeals.

(h) identifying and reporting to the Settlement Implementation Committee systemic issues in the implementation of the Agreement and the Claims Process as such issues arise and in any event no later than on a quarterly basis, and working with the Settlement Implementation Committee and any experts as may be required to find a resolution to such systemic issues—a systemic issue being an issue that affects more than one Class Member;

(i) responding to inquiries from Claimants respecting Claims and Claims Forms;

(j) providing navigational supports to Class Members in the Claims Process as outlined out in Schedule C: Framework for Supports for Claimants in Compensation Process, including assistance with the filling out and submission of Claims Forms, assistance with obtaining Supporting Documentation, and assistance with appeals to the Third-Party Assessor pursuant to this Agreement, reviewing Claims Forms, Supporting Documentation, and First Nations Council Confirmations, and determining a Claimant's eligibility for compensation in the Class;

(k) maintaining a database with all information necessary to permit the Settlement Implementation Committee and the Actuary to assess the financial sufficiency of the Trust Fund;

(l) in appropriate circumstances, requiring further Supporting Documentation in relation to a claimed Confirmed Need from a different Professional. In case of doubt, the Administrator will consult with the Settlement Implementation Committee for direction;

(m) communicating with Claimants in either English or French, as the Claimant elects, and if a Claimant expresses the desire to communicate in a language other than English or French, making best efforts to accommodate such Claimant;

(n) annually report to the Court on the Administrator's above tasks;

(o) determining requests for the extension of the Claims Deadline by individual Class Members facing extenuating personal circumstances, such as where a Claimant was unable as a result of physical or psychological illness or challenges, including homelessness, incarceration or addiction, or due to unforeseen

circumstances such as epidemics, community internet connectivity, pandemics, natural disasters, community based emergencies or service disruptions at a national, regional, or community level, to submit a Claim before the Claims Deadline, subject to further direction on such circumstances from the Settlement Implementation Committee; and

(p) such other duties and responsibilities as the Court or the Settlement Implementation Committee may from time to time direct.

2) In carrying out its duties and responsibilities outlined in this Agreement, the Administrator will:

(a) act in accordance with the principles governing the administration of Claims set out in this Article, in particular that the Claims Process intends to be cost-effective, user-friendly, culturally sensitive, trauma-informed, and non-traumatizing to Class Members;

(b) ensure quality assurance processes are documented and transparent;

(c) comply with the service standards established by the Parties; and

(d) perform other duties and responsibilities as the Court or the Settlement Implementation Committee may from time to time direct.

3) Except as otherwise provided in this Agreement and the Claims Process, the Administrator will request on a monthly basis such funds from the Trustee as may be necessary to pay approved Claims. The Trustee will provide such funds to the Administrator, and the Administrator will pay such funds to the Class Members in accordance with this Agreement and the Claims Process.

3.03 Appointment of the Third-Party Assessor

On the recommendation of the Parties until the approval of this Agreement and of the Settlement Implementation Committee thereafter, the Court will appoint as necessary from time to time one or more Third-Party Assessors composed of experts, including First Nations experts, with demonstrated knowledge of, and experience in, First Nations child and family services and Jordan's Principle. On the recommendation of the Settlement Implementation Committee, the Court may replace a Third-Party Assessor at any time. The Third-Party Assessor will perform the duties of the Third-Party Assessor set out in this Agreement and the Claims Process.

3.04 Responsibility for Costs

1) Canada will pay:

(a) the reasonable costs of giving notice in accordance with the Notice Plans to be developed by the Parties, including Canada and the Settlement Implementation Committee, as approved and ordered by the Court;

(b) the reasonable costs and disbursements of the Administrator, the Third-Party Assessor, the Trustee, the Auditor, and any experts, advisors or consultants retained by the Settlement Implementation Committee for the purpose of implementing this Agreement;

(c) the costs of the administration of the Trust;

(d) legal fees pursuant to Article 16;

(e) the costs of the supports for Class Members throughout the Claims Process as outlined in Schedule C: Framework for Supports for Claimants in Compensation Process; and

(f) the costs of the Dispute Resolution Process in accordance with Article 17.

2) The Settlement Implementation Committee will provide a forecast of the costs and disbursements of the administration of this Agreement to Canada on an annual basis, on or before December 1 of each year regarding the year ahead, which forecast may be revised due to unforeseen circumstances. In such case, the Settlement Implementation Committee will advise Canada in writing. Canada may dispute the reasonableness of the forecast or any revision of it.

3) None of the costs payable by Canada pursuant to this Article will be deducted from the Settlement Funds.

ARTICLE 4 - TRUST FUND

4.01 Establishment of the Trust Fund

1) As soon as practicable after the appointment and settlement of the Trust in accordance with Article 14, the Trustee will establish investment trust account(s) at a Schedule 1 Canadian Bank for the purposes of paying compensation to eligible Class Members.

2) No later than thirty (30) Business Days following the Implementation Date, and in accordance with the terms of Article 1.01, Canada will make a contribution to the Trust of Settlement Funds in the amount of $20 billion.

4.02 Distribution of the Trust Fund

The Trustee will periodically, on request based on approved Claims, pay the Administrator from the trust account(s) under Article 4.01 for the purpose of distributing the Trust Fund for the benefit of the Class Members in accordance with this Agreement, including by paying compensation in accordance with Article 6 through the Claims Process.

ARTICLE 5 - CLAIMS PROCESS

5.01 Principles Governing Claims Administration

1) The design and implementation of the distribution protocol within the Claims Process will be within the sole discretion of the Plaintiffs, subject to the approval of the Court. The Plaintiffs will establish the Claims Process and may seek input from the First Nation Child and Family Caring Society, as well as from experts and First Nations stakeholders as the Plaintiffs deem in the best interests of the Class Members. The Plaintiffs will finalize the distribution protocol within the Claims Process in accordance with this Agreement, and will submit same for approval of the Court at a hearing scheduled for December 20, 2022.

2) Notwithstanding Article 5.01(1), Canada will have standing to make submissions on the distribution protocol at the hearing on the motion to approve same before the Court.

3) The Claims Process is intended to be expeditious, cost-effective, user-friendly, culturally sensitive, trauma-informed, and non-traumatizing to participants. The Administrator will identify and implement service standards for the Claims Process no later than 30 days after the Implementation Date.

4) The Administrator and the Third-Party Assessor will, in the absence of reasonable grounds to the contrary, presume that a Claimant is acting honestly and in good faith with respect to any Claim.

5) In considering a Claims Form, Supporting Documentation, or a First Nations Council Confirmation, the Administrator and the Third-Party Assessor will draw all reasonable inferences that can be drawn in favour of the Claimant.

6) The Administrator will make reasonable efforts to obtain verification of each Claim within six months of the receipt of the completed Claim, with all required elements. If the Administrator identifies systemic issues with its ability to verify Claims in accordance with the Claims Process within six months, the Administrator will refer the matter to the Settlement Implementation Committee to determine whether a different service standard should be applied to the Class.

7) In designing the Claims Process, the Administrator and the Plaintiffs will develop standards relating to the processing of Claims in compliance with Article 6.06 of this Agreement, insofar as it recognizes that Class Members' circumstances may require flexibility in the type of documentation necessary to support the Claims Forms due to challenges such as, but not limited to, the Child's age or developmental status at the time of the events, the disappearance of records over time, retirement or death of professionals involved in a Child's case, systemic barriers to accessing professionals, and therefore, for example, allows for Supporting Documentation that is contemporaneous or current.

8) The Claims Process regarding the determination of Claims from members of the Jordan's Principle Class and the Trout Child Class will include a review for the purpose of making a recommendation on eligibility and compensation to the Administrator by an individual with specific culturally appropriate health and social training on Jordan's Principle, Essential Services, Confirmed Needs, Professionals, and Supporting Documentation.

5.02 Eligibility Decisions and Enhanced Compensation Decisions

1) The Administrator will make the decision on eligibility and compensation.

2) The Administrator will review each Claims Form, Supporting Documentation, First Nations Council Confirmation, recommendation under Article 5.01(8), and such other information as the Administrator considers relevant to determine whether each Claimant is eligible for compensation.

3) A First Nations Council Confirmation is required for Jordan's Principle Class and Trout Child Class Claimants who solely meet the definition of First Nation as defined in Article 1 based on having been recognized as a member or citizen by their respective First Nations under agreement, treaties or First Nations' customs, traditions and laws by February 11, 2022 (the latter date of the Certification Orders).

4) Within six months of the receipt of a completed Claim with all required elements, the Administrator will provide written reasons to a Claimant in any case of:

    (a) an Eligibility Decision;

    (b) a decision that a member of the Removed Child Family Class is not entitled to receive compensation due to indication of Abuse;

    (c) a decision that a Claimant is not entitled to an Enhancement Payment available to that Class; or

    (d) a decision to refuse to extend the Claims Deadline with respect to a Class Member.

5) Only a Claimant approved by an Eligibility Decision may be entitled to compensation pursuant to Article 6.

6) A Claimant will have 30 days to commence an appeal to the Third-Party Assessor in accordance with the Claims Process after receiving:

    (a) an Eligibility Decision that a Claimant is not a Class Member;

    (b) a decision that a Claimant is not entitled to an Enhancement Payment as defined in the Claims Process;

    (c) a refusal to extend the Claims Deadline with respect to an individual Class Member; or

    (d) a dispute amongst Approved Removed Child Family Members receiving a pro rata share of a Base Compensation under Article 6.04.01.

7) The Third-Party Assessor's decision on an appeal pursuant to Article 5.02(6) will be final and not subject to judicial review, further appeal or any other remedy by legal action.

8) The Third-Party Assessor will comply with the procedure and timeline standards established in the Claims Process for an appeal from a decision of the Administrator.

9) There will be no right of appeal by a Class Member who belongs to a category, such as brothers and sisters, that is not entitled to receive direct payment under this Agreement.

ARTICLE 6 - COMPENSATION

6.01 General Principles Governing Compensation

1) The Plaintiffs will design a Claims Process with the goal of minimising the risk of causing trauma to Class Members.

2) No member of the Removed Child Class, Jordan's Principle Class or Trout Child Class will be required to submit to an interview, examination or other form of *viva voce* evidence taking.

3) The Plaintiffs will agree to require fair and culturally appropriate Supporting Documentation in accordance with this Agreement tailored to each different class for the purposes of the Claims Process.

4) A Class Member may claim compensation starting one year before they reach the Age of Majority, provided that no compensation is paid to that Class Member until after the Age of Majority. A Class Member may only receive compensation under the terms of this Agreement after the Age of Majority, except in the case of an Exceptional Early Payment in accordance with Article 6.07.01. The Claims Process will include a means by which a Child may register with the Administrator at any time in order to receive updates on the implementation of this Agreement.

5) Enhancement Factors have been selected as appropriate proxies for harm, based on expert opinion, and are designed to enable proportionate compensation to the Removed Child Class, the Jordan's Principle Class, and the Trout Child Class.

6) Compensation under this Agreement will take the form of either direct payment to eligible Class Members who have claimed through the Claims Process and been approved by the Administrator or indirect benefit to the Class through the Cy-près Fund.

7) A Class Member who qualifies for compensation as a member of more than one class will receive the higher amount for which the Class Member qualifies amongst the applicable classes, and compensation under the classes will not be combined, with the following exception: a Class Member who qualifies as a member of the Removed Child Class and the Removed Child Family Class will be entitled to a combined amount of compensation as a member of both of those classes.

6.02 Governing Principles on Removed Children

1) This Agreement seeks to adopt a trauma-informed and culturally sensitive approach to compensating the Removed Child Class and the Caregiving Parents or Caregiving Grandparents of the Removed Child Class.
2) To the extent possible and based on objective criteria, the Agreement seeks to bring proportionality to the compensation process such that members of the Removed Child Class who suffered the most harm may receive higher compensation in the Claims Process.
3) For the Removed Child Class, eligibility for compensation and Enhancement Factors will be based on objective criteria and data primarily from ISC and Supporting Documentation as the case may be.

6.03 Removed Child Class Compensation

1) Base Compensation payable to an Approved Removed Child Class Member will not be multiplied by the number of Spells in Care.
2) An Approved Removed Child Class Member will be entitled to receive Base Compensation of $40,000.
3) An Approved Removed Child Class Member may be entitled to an Enhancement Payment based on the following Enhancement Factors ("**Removed Child Enhancement Factors**"):
    (a) the age at which the Removed Child Class Member was removed for the first time;
    (b) the Time in Care;
    (c) the age of a Removed Child Class Member at the time they exited the child welfare system;
    (d) whether a Removed Child Class Member was removed to receive an Essential Service relating to a Confirmed Need;
    (e) whether the Removed Child Class Member was removed from a Northern or Remote Community; and
    (f) the number of Spells in Care for a Removed Child Class Member and/or, if possible, the number of Out-of-home Placements applicable to a Removed Child Class Member who spent more than one (1) year in care.
4) The Plaintiffs will design a system of weighting the Removed Child Enhancement Factors for the Removed Child Class based on the input of experts that will reflect the relative importance of each Enhancement Factor as a proxy for harm.
5) The Plaintiffs have estimated a Budget of $7.25 billion for the Removed Child Class.

6.04 Caregiving Parents or Caregiving Grandparents of Removed Child Class

1) Amongst the Removed Child Family Class, only the Caregiving Parents or Caregiving Grandparents may receive direct compensation if otherwise eligible under this Agreement. Brothers and sisters are not entitled to direct compensation but may benefit indirectly from this Agreement through the Cy-près Fund.

2) A foster parent is not entitled to compensation under this Agreement and is not entitled or permitted to claim compensation on behalf of a Child under this Agreement.

3) The Base Compensation of an Approved Removed Child Family Class Member will not be multiplied based on the number of removals or Spells in Care for a Child or the number of Children in care. No Approved Removed Child Family Class Member will receive more than one Base Compensation.

4) A Caregiving Parent or Caregiving Grandparent who has committed Abuse that has resulted in the Removed Child Class member's removal is not eligible for compensation in relation to that Removed Child. However, a Caregiving Parent or Caregiving Grandparent is not barred from receiving compensation if the Caregiving Parent or Caregiving Grandparent is otherwise eligible for compensation as a member of another class defined under this Agreement.

5) The Plaintiffs have estimated a Budget of $5.75 billion for the Removed Child Family Class.

6) If a Child lived with a Caregiving Grandparent at the time of removal, such a Caregiving Grandparent may be eligible to seek compensation.

7) A maximum compensation amount of two Base Compensation payments per Child among Caregiving Parents and Caregiving Grandparents of a Child, regardless of number of Spells in Care or removals, may be distributed under this Agreement, if otherwise eligible, according to the following priority list:

    (a) Category A: Caregiving Parents who are biological parents; then

    (b) Category B: Caregiving Parents who are adoptive parents or Stepparents, if applicable; then

    (c) Category C: Caregiving Grandparent(s).

8) The Parties have budgeted the Base Compensation for an Approved Removed Child Family Class Member to be $40,000.

9) An Approved Removed Child Family Class Member may receive an increased Base Compensation in the event that more than one Child of the Approved Removed Child Family Class Member has been removed. Such Base Compensation is budgeted to be $60,000.

10) If the Settlement Implementation Committee has allocated a Trust Fund Surplus to Approved Removed Child Family Class Members pursuant to Article 6.08(5), the Settlement Implementation Committee may determine that the maximum combined amount of base and additional compensation to be awarded to an Approved Removed Child Family Class Member who has had more than one Child removed may be greater than $60,000.

11) The final quantum of Base Compensation to be paid to each Approved Removed Child Family Class Member will be determined by the Settlement Implementation Committee in consultation with the Actuary, having regard to the number of Approved Removed Child Family Class Members and the Budget for the Removed Child Family Class under this Article, subject to Court approval.

12) Payments to Approved Removed Child Family Class Members who may be entitled to receive compensation under this Article before the expiration of the Claims Deadline may be staggered into installments in order to ensure sufficient funds exist to pay like amounts to like Claimants regardless of when they submitted their Claim.

6.04.01 Priorities in Compensation for Removed Child Family Class Members

1) Where one or two Category A Caregiving Parents have submitted a Claim, the Administrator will determine their Claim in accordance with the timelines specified in Article 5.02(4), and if they are determined to be Approved Removed Child Family Class Members, the Administrator will pay their compensation in accordance with the timelines specified in Article 6.11, subject to all other applicable limitations under this Agreement.

2) The Administrator will not pay any Claims by adoptive or Stepparent Caregiving Parents (Category B) or Caregiving Grandparents (Category C) until after the expiration of the Claims Deadline in order to determine:

   (a) whether more than two Caregiving Parents or Caregiving Grandparents have submitted a Claim with respect to the same Child; and

   (b) the amount of compensation, if any, payable to each such Claimant in accordance with this Article.

3) Where two Category A Caregiving Parents have submitted Claims that have been approved (including if separated with joint custody of the Removed Child Class member), Category B adoptive or Stepparent Caregiving Parents and Category C Caregiving Grandparents of one Removed Child Class Member will not receive a Base Compensation under this Agreement.

4) In the following situations, the Category B adoptive or Stepparent Caregiving Parents and the Category C Caregiving Grandparents of one Removed Child Class Member will share pro rata the Base Compensation available:

(a) Category C Caregiving Grandparents will share pro rata two times the Base Compensation where all the following conditions are met:

i) greater than two Category C Caregiving Grandparents are approved for compensation; and

ii) no Category A biological Caregiving Parent or Category B adoptive or Stepparent Caregiving Parent has been approved for compensation.

(b) Category C Caregiving Grandparents will share pro rata one Base Compensation where all the following conditions are met:

i) no Category A biological Caregiving Parent has been approved for compensation;

ii) Only one Category B adoptive or Stepparent Caregiving Parent has been approved for compensation; and

iii) greater than one Category C Caregiving Grandparents is approved for compensation.

(c) Category B adoptive or Stepparent Caregiving Parents or Category C Caregiving Grandparents will share pro rata one Base Compensation where all the following conditions are met:

i) only one Category A biological Caregiving Parent is approved for compensation; and

ii) greater than one Category B adoptive or Stepparent Caregiving Parent or greater than one Category C Caregiving Grandparent is approved for compensation.

(d) Category B adoptive or Stepparent Caregiving Parents will share pro rata two times the Base Compensation where all the following conditions are met:

i) no Category A biological Caregiving Parent is approved for compensation; and

ii) more than two Category B adoptive and Stepparent Caregiving Parents are approved for compensation.

5) The Claims Process may include provisions for exceptional circumstances to the following effect: The Administrator may determine a Claim by an adoptive or Stepparent Caregiving Parent (Category B) or a Caregiving Grandparent (Category C) before the expiration of the Claims Deadline in accordance with the timelines specified in Article 5.02(4), and if they are determined to be Approved Removed Child Family Class Members, the Administrator will pay their compensation in accordance with the timelines specified in Article 6.11, subject to all other applicable limitations under this Agreement only if the

Claimant has submitted Claims Forms and Supporting Documentation substantiating that all other biological parent(s), adoptive parent(s), Stepparent(s), if applicable, and grandparent(s) of the Child have become deceased or have expressly renounced their entitlement to make a Claim under this Agreement.

6) Any dispute amongst Caregiving Parents or Caregiving Grandparents will be subject to a summary adjudicative determination by the Third-Party Assessor in accordance with the Claims Process.

7) A summary of this Article as an interpretive aid is attached as Schedule F: Examples Chart of Removed Child Family Class Approach. In the case of a conflict, the Articles in this Agreement will govern.

6.05 Governing Principles Regarding Jordan's Principle and Trout Classes

1) To the extent possible, this Agreement applies the same methodology to the Jordan's Principle Class and Trout Child Class.

2) This Agreement intends to:

   (a) be trauma-informed regarding the Jordan's Principle Class and the Trout Child Class;

   (b) avoid subjective assessments of harm, individual trials, or other cumbersome methods of making Eligibility Decisions with respect to this class; and

   (c) use objective criteria to assess Class Members' needs and circumstances as a proxy for the significant harm inflicted on such Class Members in a discriminatory system.

3) The Base Compensation of an Approved Jordan's Principle Class Member or an Approved Trout Child Class Member will not be multiplied based on the number of Essential Services that have been confirmed to have been needed by the Child.

6.06 Jordan's Principle and Trout

1) The Plaintiffs will design the portion of the Claims Process with respect to members of the Jordan's Principle Class, Jordan's Principle Family Class, the Trout Child Class, and the Trout Family Class in accordance with this Article. A summary of the approach in this Article as an interpretive aid is attached as Schedule E: Summary Chart of Jordan's Principle / Trout Approach. In the case of a conflict, the Articles in this Agreement will govern.

2) Eligibility for compensation for members of the Jordan's Principle Class and the Trout Child Class will be determined based on those Class Members' Confirmed Need for an Essential Service if:

   (a) a Class Member's Confirmed Need was not met because of a Denial of a requested Essential Service;

(b) a Class Member experienced a Delay in the receipt of a requested Essential Service for which they had a Confirmed Need; or

(c) a Class Member's Confirmed Need was not met because of a Service Gap even if the Essential Service was not requested.

3) The Framework of Essential Services will establish a method to assess two categories of Essential Services based on advice from experts relating to objective criteria:

(a) Essential Services relating to Children whose circumstances, based on an Essential Service that they are confirmed to have needed, are expected to have included significant impact ("**Significant Impact Essential Service**"); and

(b) Essential Services that are not expected to have necessarily related to significant impact ("**Other Essential Service**").

4) The Plaintiffs will follow the following timeline in collaborating to create the Framework of Essential Services:

(a) The Plaintiffs will confer with experts to review the Framework of Essential Services by June 15, 2022, or such other date as agreed to by the Parties.

(b) The Plaintiffs will prepare a final Framework of Essential Services by August 5, 2022.

(c) The Plaintiffs will have an expert report in support of the finalized Framework of Essential Services by August 19, 2022.

5) A Claimant will be considered to have established a Confirmed Need if the Claimant has provided Supporting Documentation and has been approved by the Administrator.

6) Supporting Documentation will include proof of a recommendation by a Professional consistent with the following principles:

(a) Permissible proof includes contemporaneous and/or current proof of assessment, referral or recommendation to account for the difficulties in retaining and obtaining historic records during the Trout Child Class Period and Jordan's Principle Class Period.

(b) Permissible proof includes proof of assessment, referral or recommendation from a Professional within that Professional's expertise as may be available to the Class Member in their place of residence, including those in a Northern and Remote Community.

(c) In order to establish a Confirmed Need, the proof from a Professional must specify in all cases the Essential Service that the Claimant needed, and the reason for the need, and when the need existed.

(d) A Claimant may establish that they requested an Essential Service from Canada during the Trout Child Class Period or Jordan's Principle Class Period by way of a statutory declaration. Proof of a request for an Essential Service is the only instance where a statutory declaration may be adduced as Supporting Documentation for the purposes of the Trout Child Class, Jordan's Principle Class, Jordan's Principle Family Class, and the Trout Family Class.

7) If the Administrator, or the Third-Party Assessor on appeal, determines that a Class Member has provided Supporting Documentation establishing a Confirmed Need for an Essential Service, the Administrator, or the Third-Party Assessor on appeal, will determine whether the Claimant faced a Denial, Delay or a Service Gap.

8) Where a Class Member has provided Supporting Documentation establishing a Confirmed Need for an Essential Service and where the Administrator has determined that the Class Member experienced a Denial, Delay or a Service Gap, that Class Member will be:

(a) an Approved Jordan's Principle Class Member if the Claimant's Confirmed Need occurred within the Jordan's Principle Class Period; or

(b) an Approved Trout Child Class Member if the Claimant's Confirmed Need occurred within the Trout Child Class Period.

9) The Plaintiffs have estimated a Budget of $3.0 billion dollars for the Jordan's Principle Class, subject to Articles 6.08, 6.09 and 6.10 ("**Jordan's Principle Budget**").

10) The Plaintiffs have estimated a Budget of $2.0 billion dollars for the Trout Child Class, subject to Articles 6.08, 6.09 and 6.10 ("**Trout Child Budget**").

11) An Approved Jordan's Principle Class Member will receive a minimum of $40,000 in compensation if:

(a) They have established a Confirmed Need for a Significant Impact Essential Service; or

(b) They have established a Confirmed Need for an Other Essential Service and have suffered higher levels of impact than other Jordan's Principle Claimants with a Confirmed Need for an Other Essential Service including, but not limited to, impact by reason of conditions and circumstances such as an illness, disability or impairment. Such impact is to be measured based on objective factors assessed through culturally sensitive Claims Forms and a questionnaire designed in consultation with experts. Subject to the Court's approval, the selection of which Claimants qualify under this category will be based on objective factors such as the severity of impact on the Child and the number of eligible Claimants.

12) An Approved Trout Child Class Member will receive a minimum of $20,000 in compensation if:

(a) They have established a Confirmed Need for a Significant Impact Essential Service; or

(b) They have established a Confirmed Need for an Other Essential Service and have suffered higher levels of impact than other Trout Child Claimants with a Confirmed Need for an Other Essential Service including, but not limited to, impact by reason of conditions and circumstances such as an illness, disability or impairment. Such impact is to be measured based on objective factors assessed through culturally sensitive Claims Forms and a questionnaire designed in consultation with experts. Subject to the Court's approval, the selection of which Claimants qualify under this category will be based on objective factors such as the severity of impact on the Child and the number of eligible Claimants.

13) An Approved Jordan's Principle Class Member who has shown a Confirmed Need for Other Essential Services and has not established a claim under Article 6.06(11)(b) will receive up to but not more than $40,000 in compensation based on a pro rata share of the Jordan's Principle Budget after deducting the total estimated amount of compensation to be paid to Approved Jordan's Principle Class Members who have established a claim under Article 6.06(11).

14) An Approved Trout Child Class Member who has shown a Confirmed Need for Other Essential Services and has not established a claim under Article 6.06(12)(b) will receive up to but not more than $20,000 in compensation having regard to the Trout Child Class Budget, based on a pro rata share of the Trout Child Budget after deducting the total amount of compensation to be paid to Approved Trout Child Class Members who have established a claim under Article 6.06(12).

15) In the event of a Trust Fund Surplus pursuant to Article 6.08 based on advice from the Actuary after approved Claims under Article 6.06(13) and Article 6.06(14) are paid, the Approved Jordan's Principle Class Members and Approved Trout Child Class Members who have established a claim under Article 6.06(11) and Article 6.06(12) may be entitled to an Enhancement Payment.

16) Only Caregiving Parents or Caregiving Grandparents of the Approved Jordan's Principle Class Members and Approved Trout Child Class Members who have established a Claim under Article 6.06(11), Article 6.06(12), Article 6.07(3) or Article 6.07(4) may be entitled to compensation (i.e. "Approved Jordan's Principle and Trout Family Class"). All other Caregiving Parents or Caregiving Grandparents of the Approved Jordan's Principle Class Members and Approved Trout Child Class Members will not receive direct compensation under this Agreement.

17) The Approved Jordan's Principle and Trout Family Class will receive a fixed amount of $2.0 billion dollars in compensation under this Agreement ("**Jordan's Principle and**

Trout Family Budget"). There will be no reallocation to these classes of any surpluses or revenues.

6.07 Safety Clause for Exceptional Jordan's Principle and Trout Cases

1) The non-inclusion of a service on the Framework of Essential Services may not be grounds for the exclusion of a Claimant from eligibility if the following circumstances are established in accordance with this Agreement:

   (a) The Claimant has submitted Supporting Documentation identifying a service and establishing a Confirmed Need for that service during the Class Period;

   (b) The service identified in Article 6.07(1)(a) does not qualify as an Essential Service according to the Framework of Essential Services;

   (c) The Supporting Documentation satisfactorily establishes the reason(s) why the service identified in Article 6.07(1)(a) was essential to the Claimant as a Child; and

   (d) The Claimant requested the service identified in Article 6.07(1)(a) from Canada but the request was subject to a denial or unreasonable delay taking into consideration the context and the Child's needs.

2) Where a Claimant has met all the conditions in Article 6.07(1), that Claimant will be:

   (a) an Approved Jordan's Principle Class Member if the Claimant's Confirmed Need occurred within the Jordan's Principle Class Period; or

   (b) an Approved Trout Child Class Member if the Claimant's Confirmed Need occurred within the Trout Child Class Period.

3) An Approved Jordan's Principle Class Member under this Article will receive a minimum of $40,000 in compensation if they have established a Confirmed Need in accordance with Article 6.07(1), and have suffered higher levels of impact than Class Members in Article 6.06(13) including, but not limited to, impact by reason of conditions and circumstances such as an illness, disability or impairment. Such impact is to be measured based on objective factors assessed through culturally sensitive Claims Forms and a questionnaire designed in consultation with experts. Subject to the Court's approval, the selection of which Claimants qualify under this category will be based on objective factors such as the severity of impact on the Child and the number of eligible Claimants.

4) An Approved Trout Child Class Member under this Article will receive a minimum of $20,000 in compensation if they have established a Confirmed Need in accordance with Article 6.07(1), and have suffered higher levels of impact than Class Members in Article 6.06(14) including, but not limited to, impact by reason of conditions and circumstances such as an illness, disability or impairment. Such impact is to be measured based on objective factors assessed through culturally sensitive Claims Forms and a questionnaire designed in consultation with experts. Subject to the Court's approval, the selection of

which Claimants qualify under this category will be based on objective factors such as the severity of impact on the Child and the number of eligible Claimants.

5) An Approved Jordan's Principle Class Member who has not met the conditions in Article 6.07(3), will receive up to but not more than $40,000 in compensation based on a pro rata share of the Jordan's Principle Budget after deducting the total estimated amount of compensation to be paid to Approved Jordan's Principle Class Members who have established a claim under Article 6.06(11) and Article 6.07(3), collectively.

6) An Approved Trout Child Class Member who has not met the conditions in Article 6.07(4), will receive up to but not more than $20,000 in compensation having regard to the Trout Child Class Budget, based on a pro rata share of the Trout Child Budget after deducting the total amount of compensation to be paid to Approved Trout Child Class Members who have established a claim under Article 6.06(12) and Article 6.07(4), collectively.

6.07.01 Exceptional Early Payment of Compensation Funds

1) Notwithstanding Article 6.01(4), the Administrator may exceptionally approve the payment of compensation prior to a Claimant having reached the Age of Majority in accordance with this Article.

2) An individual under the Age of Majority may be eligible to receive an amount of compensation to fund or reimburse the cost of a life-changing or end-of-life wish experience (the "**Exceptional Early Payment**"), if they provide Supporting Documentation establishing that:

   (a) they meet the requirements, other than age, to be an Approved Removed Child Class Member or an Approved Jordan's Principle Class Member; and

   (b) they are suffering from a terminal or non-curable life-threatening condition that has placed their life in jeopardy.

3) An individual who establishes eligibility for an Exceptional Early Payment in accordance with this Article must provide reasonable proof of a chosen life-changing or end-of-life wish experience and the approximate cost of that experience.

4) The Administrator will assess a Claimant's eligibility for an Exceptional Early Payment to fund or reimburse the cost in an amount up to, but no more than $40,000.

5) The Administrator will determine the Claim for an Exceptional Early Payment in the best interests of the Child and on an expedited basis. The Administrator will require such documentation in good faith as is required to assess:

   (a) the Claimant's eligibility;

   (b) the Claimant's terminal or non-curable life-threatening condition;

   (c) the validity of the Claimant's life-changing or end-of-life experience request;

(d) the age and circumstances of the Child and whether the Child needs any protection; and

(e) the approximate cost of the life-changing or end-of-life wish experience.

6) Where a Class Member has received an Exceptional Early Payment and later submits a Claim for compensation, the amounts paid as Exceptional Early Payment will be deducted from that Claimant's total entitlement, if any, to compensation under this Agreement.

6.08 Priorities in Distribution of Surplus

1) On the advice of the Actuary or a similar advisor, the Settlement Implementation Committee may determine at any time or from time to time that there are unallocated or surplus funds on the Settlement Funds in the Trust Fund (a "**Trust Fund Surplus**").

2) The Settlement Implementation Committee may propose that a Trust Fund Surplus be designated and that there be a distribution of any Trust Fund Surplus for the benefit of the Class Members in accordance with this Article and the Claims Process, subject to the approval of the Court.

3) The Settlement Implementation Committee, having proposed that a surplus be designated and that there be a distribution of such Trust Fund Surplus, will bring motions before the Court for approval of the designation of a surplus and the proposed distribution of any Trust Fund Surplus. The designation and any allocation of a Trust Fund Surplus will be effective on the later of:

(a) the day following the last day on which an appeal or a motion seeking leave to appeal of either of the approval orders in respect of such designation and allocation may be brought under the *Federal Courts Rules*, SOR /98-106; and

(b) the date on which the last of any appeals of either of the approval orders in respect of such designation and allocation is finally determined.

4) In no event will any amount from the Trust Fund, including any Trust Fund Surplus, revert to Canada, and Canada will not be an eligible recipient of any Trust Fund Surplus.

5) In allocating the Trust Fund Surplus, the Settlement Implementation Committee will have due regard to the order of priorities set out below:

i) Approved Removed Child Class Members;

ii) Approved Jordan's Principle Class Members;

iii) Approved Trout Child Class Members;

iv) Approved Removed Child Family Class Members.

6.09 Reallocation of Budgets

1) The Settlement Implementation Committee will adopt the budgets with respect to compensation allocated to different classes (each, a "**Budget**") in accordance with the amounts listed in Article 6.03, 6.04, and 6.06.

2) The Settlement Implementation Committee will arrange for an actuarial review of the Trust Fund to be conducted at least once every three years and more frequently if the Settlement Implementation Committee considers it appropriate. The actuarial review will be conducted by the Actuary in accordance with accepted actuarial practice in Canada. The actuarial review will determine:

    (a) the value of the assets available to meet all outstanding and future expected Claims;

    (b) the present value of all outstanding and future expected Claims using where necessary such reasonable assumptions as determined by the Actuary to be appropriate;

    (c) an actuarial buffer to provide a reasonable margin of protection due to adverse deviations from the assumptions utilised; and

    (d) the actuarial surplus and/or the actuarial deficit of funds in a Budget.

3) If based on the Actuary's advice the total compensation to be paid to the number of approved Class Members within a class is, or is expected to be, below the Budget, the Settlement Implementation Committee may transfer some amount from that Budget to another Budget, which, on the Actuary's advice, has a higher than estimated total compensation to be paid to approved Class Members.

4) If more than one (1) Budget has a higher than estimated total compensation to be paid to the number of approved Class Members, the Settlement Implementation Committee may make such transfer of funds in accordance with the following order of priorities, subject to Court approval:

    i) Approved Removed Child Class Members;

    ii) Approved Jordan's Principle Class Members;

    iii) Approved Trout Child Class Members;

    iv) Approved Removed Child Family Class Members.

6.10 Income on Trust Fund

The Settlement Implementation Committee may allocate income earned by the Trust Fund to any class, in its discretion, in accordance with the following order of priorities, favouring those classes where higher than estimated total compensation to be paid to the approved Class Members exists:

i) Approved Removed Child Class Members;

ii) Approved Jordan's Principle Class Members;

iii) Approved Trout Child Class Members;

iv) Approved Removed Child Family Class Members.

6.11 Option to invest compensation funds

1) The Administrator will provide payment to Approved Removed Child Class Members and Approved Jordan's Principle Class Members within nine (9) months of the approval of the Class Member's Claim, but in all cases, only after taking the following steps:

   (a) At least six months prior to issuing payment, the Administrator will contact the Approved Class Member to ask whether the Class Member wishes to maintain or direct a portion or all of the amount to which the Class Member is entitled to an investment vehicle.

   (b) The form of notice to the Class Member will be determined by the Settlement Implementation Committee.

   (c) If the Class Member indicates their desire that a certain amount be invested, the funds will be held or directed to a separate account for the benefit of the Class Member.

   (d) Once the Class Member's investment account is established, the fees, costs and taxes payable on the investment capital or returns will be borne by the Class Member's individual investment, as applicable.

6.12 Adjustment for Time Value of Compensation Money

The compensation payable to an Approved Removed Child Class Member or an Approved Jordan's Principle Class Member who has not reached Age of Majority by delivery of the notice of approval of settlement may be adjusted having regard to the period of time that passes before the Class Member reaches the Age of Majority. The Settlement Implementation Committee, upon the advice of the Investment Committee and the Actuary will determine a consistent method for calculating the adjustment subject to the Court's approval.

ARTICLE 7 – CY-PRÈS FUND

7.01 Governing Principles

1) The Plaintiffs will design a Cy-près Fund with the assistance of experts, subject to the Court's approval.

2) The Cy-près Fund's purpose is primarily to benefit Class Members who do not receive direct payment under this Agreement.

3) Upon formation or selection of an existing entity and after the Implementation Date, the Trustee will endow the Cy-près Fund with $50 million from the Trust Fund.

4) The Cy-près Fund will be First Nations led.

5) The objective of the Cy-près Fund is to provide culturally sensitive and trauma-informed supports to the Class, including, but not limited to, the following:

    (a) Establish a fund, foundation or other similar vehicle whose leadership may include First Nations youth and children in care, formerly in care, their allies and those who experienced a Delay, Denial or Service Gap under Jordan's Principle, to offer grant-based supports to facilitate access to culture-based, community-based and healing-based programs, services and activities to Class Members and the Children of First Nations parents who experienced a Delay, Denial or Service Gap under Jordan's Principle.

        i) Such grant-based supports may include, but are not limited to funding the following:

            (1) Family and community unification, reunification, connection and reconnection for youth in care and formerly in care:

                i. facilitating First Nations youth in care and formerly in care to identify birth family and their First Nation, which may include accessing records or files, meeting family members or travelling to their First Nation;

                ii. accessing holistic wellness supports for First Nations youth in care and formerly in care during the family and community reunification and reconnection process; and

                iii. reducing the costs associated with travel and accommodations to visit community and family, including for First Nations youth in care and formerly in care, support person(s) or family members.

            (2) Cultural access:

                i. facilitating access to cultural programs, activities and supports, including, but not limited to: youth groups, ceremony, language, Elders and Knowledge Keepers, mentors, land-based activities, and culturally-based arts and recreation.

            (3) Transition and Navigation supports:

                i. Facilitating access for First Nations youth in care and formerly in care to transition supports for First Nations youth in care and formerly in care

who are either not eligible for post-majority care and services under the reformed First Nations Child and Family Services Program or that are not covered elsewhere, in their transition to adulthood, including, but not limited to: safe and accessible housing, life skills and independent living, financial literacy, planning and services, continuing education, health and wellness supports.

ii. Facilitating access to navigational supports for Class Members and the children of First Nations parents who experienced a Delay, Denial or Service Gap under Jordan's Principle who are not eligible to receive post-majority services under Jordan's Principle or are not covered elsewhere.

iii. Facilitating access to a scholarship for the Jordan's Principle Class and the children of First Nations parents who experienced a Delay, Denial or Service Gap in the provision of services under Jordan's Principle. The scholarship will be designed to acknowledge the adverse effects associated with the experience of a Delay, Denial or Service Gap under Jordan's Principle.

(b) A National First Nations Youth In/From Care Network may also be established through the grants, or through the formation of a fund, foundation or similar organization, which may include a national network and regional networks. The networks would share best practices and updates, provide advocacy, discuss and make recommendations on policy. The structure, scope and membership of the networks is to be determined by First Nations Youth In/From Care.

ARTICLE 8 – SUPPORTS TO CLASS IN CLAIMS PROCESS

1) The Parties will agree to culturally sensitive health, information, and other supports to be provided to Class Members in the Claims Process, as well as funding for health care professionals to deliver support to Class Members who suffer or may suffer trauma for the duration of the Claims Process, consistent with Schedule C: Framework for Supports for Claimants in Compensation Process, and the responsibilities of the Administrator in providing navigational and other supports under Article 3.02.

2) Canada will provide funding to the AFN in the amount of $2,550,000 to provide supports to First Nations claimants for a five (5) year term beginning April 1, 2024, and ending March 31, 2029. This Process will include administering a help desk with AFN line liaisons and providing culturally safe assistance to Claimants in completing relevant Claims Forms if not covered by the supports available to Class Members by the Administrator (the "**AFN Supports**"). By April 2028, the AFN may approach the Settlement Implementation

Committee for an extension of the funding for the AFN Supports. Subject to the Settlement Implementation Committee's approval to an extension of the AFN Supports, Canada will provide further block funding to the AFN to continue the AFN Supports for a period agreeable to the AFN, the Settlement Implementation Committee, and Canada.

3) Canada will fund the enhancement of the Hope for Wellness Line to include training to their call operators and counsellors on the Actions and promote this service to Class Members as soon as possible and prior to the approval of the Settlement. The Parties will recommend that the Court will appoint a third-party Indigenous organization funded by Canada, to provide a culturally-safe, youth-specific support line that would provide counselling services for youth and young adult class members and to refer to post-majority care services when appropriate.

4) Without limitation to the foregoing, Canada will pay for mental health, and cultural supports, navigators to promote communications and provide referrals to health services, help desk with AFN line liaisons, reasonable costs incurred by First Nations service providers in providing access to records to support Claimant eligibility from provinces, territories, and agencies, and professional services (taxonomy and actuarial services), and reasonable fees relating to a structured settlement (if applicable) to be agreed. Canada will fund mental health and cultural supports based on evolving needs of the Class, with over half of the Class Members being adults expected to access compensation in the first five years, and transitioning to a focus on young adults in the remaining years of implementation of the Agreement, building on the existing suite of First Nations mental wellness services. Canada will work with the Parties to also adapt supports to include innovative, First Nations-led mental health and wellness initiatives.

5) The costs of supports pursuant to this Article are payable by Canada and will not be deducted from the Settlement Funds.

6) Canada will provide annual reports to the Settlement Implementation Committee on the health supports, trauma-informed mental supports set out in Schedule C: Framework for Supports for Claimants in Compensation Process.

ARTICLE 9 - EFFECT OF AGREEMENT

9.01 Releases

1) The Settlement Approval Order issued by the Court will declare that, except as otherwise agreed to in this Agreement and in consideration for Canada's obligations and liabilities under this Agreement, each Class Member or their Estate Executor, Estate Claimant, or Personal Representative on behalf of such Individual Class Member or their estate and each First Nation Class Member (hereinafter collectively the "**Releasors**") has fully, finally and forever released Canada and its servants, agents, officers and employees,

predecessors, successors, and assigns (hereinafter collectively the "**Releasees**"), from any and all actions, causes of action, claims, and demands of every nature or kind available, whether or not known or anticipated, which the Releasers had, now have or may in the future have against the Releasees in respect of the claims asserted or capable of being asserted in the Actions, including any claim with regard to the costs referred to under Article 12.02(3).

2) It is understood that Class Members retain their rights to make claims against third parties for the physical, sexual or emotional abuse they suffered, restricted to whatever liability such third party may have severally, not including any liability that the third party may have jointly or otherwise with Canada, such that the third party will have no basis to seek contribution, indemnity or relief over by way of equitable subrogation, declaratory relief or otherwise against Canada for the physical, sexual or emotional abuse they suffered. No compensation paid to a Class Member under this settlement will be imputed to payment for injuries suffered as a result of physical, sexual abuse or emotional abuse.

3) For greater certainty, each Releasor is deemed to agree that, if they make any claim or demand or take any action or proceeding against another person, persons or entity in which any claim could arise against Canada for damages or contribution or indemnity and/or other relief over, whether by statute, common law, or Quebec civil law, in relation to allegations and matters set out in the Actions, including for physical, sexual or emotional abuse they suffered while in care, the Releasor will expressly limit their claim so as to exclude any portion of Canada's responsibility, and in the event Canada is found to have any such liability, the Releasors will indemnify Canada to the full extent of any such liability including any liability as to costs.

4) Upon a final determination of a Claim made under and in accordance with the Claims Process, the Releasors are also deemed to fully and finally release the Parties, counsel for the Parties, Class Counsel, counsel for Canada, the Settlement Implementation Committee and its Members, the Administrator, and the Third-Party Assessor with respect to any claims that have arisen, arise or could arise out of the implementation of the Claims Process, including any claims relating to the calculation of compensation, the sufficiency of the compensation received, and the allocation and distribution of a Trust Fund Surplus.

9.02 Continuing Remedies

1) The Parties acknowledge and agree that, notwithstanding any provision of this Agreement, Class Members do not release, and specifically retain, their claims or causes of action for any breach by Canada of its ongoing obligations under this Agreement, including:

   (a) failing to pay the Settlement Funds in their entirety;

   (b) funding reasonable notice and other administration fees involved in carrying out this Agreement, including, but not limited to, information and notice to the Class

Members about certification, this Agreement, settlement approval, and the Claims Process, as well as third-party administration costs;

(c) paying reasonable legal fees to Class Counsel, over and above the Settlement Funds;

(d) communicating with provincial and territorial Deputy Ministers responsible for child and family services, health, and education, as well as other relevant Deputy Ministers regarding taxation, Children's Special Allowance, social assistance payments, post-majority care or other provincial/territorial benefits "claw backs" without affecting funding received through a Jordan's Principle request, whether pending or approved;

(e) proposing a public apology by the Prime Minister;

(f) working toward the intention of the Parties that the Settlement Funds, including any income earned on the Settlement Funds awaiting distribution, will be distributed to Class Members as compensation, as opposed to "income" subject to taxation; and

(g) jointly seeking an order from the Tribunal declaring that the Order for compensation has been fully satisfied.

2) The Parties agree that, subject to the *Crown Liability and Proceedings Act*, R.S.C. 1985, c. C-50, the Parties will be entitled to seek relief to prevent breaches or threatened breaches of this Agreement, and to enforce compliance with the terms of this Agreement, without any requirement for the securing or posting of any bond in connection with the obtaining of any such injunctive or other equitable relief allowed by law, this being in addition to damages and any other remedy to which the Parties may be entitled at law or in equity for any breach of this Agreement.

9.03 Canadian Income Tax and Social Benefits

1) Canada will make best efforts to ensure that any Class Member's entitlement to federal social benefits or social assistance benefits will not be negatively affected in any manner by the Class Member's receipt, directly or indirectly, of any payment in accordance with this Agreement, and that no such payment will be considered taxable income within the meaning of the *Income Tax Act*.

2) The Parties agree that the payments to Class Members, including payments of any income earned on the Settlement Funds, are in the nature of personal injury damages and are not taxable income and Canada will make best efforts to obtain a technical interpretation to the same effect from the Income Tax Rulings Directorate of the Canada Revenue Agency.

3) Upon approval of this Agreement by the Court, Canada will write to all provincial and territorial Deputy Ministers responsible for child and family services, health, and

education, as well as other relevant Deputy Ministers, to encourage them to collaborate in:

(a) exempting Class Member claims payouts under this Agreement from taxation, including payments of any income earned on the Settlement Funds, the Children's Special Allowance, social assistance payments, post-majority care or other provincial/territorial benefits "claw backs"; and

(b) ensuring that receipt of any compensation under this Agreement will in no way affect funding received through a Jordan's Principle request, whether pending or approved.

4) Canada will not in any way consider receipt of compensation under this Agreement as a factor in deciding any pending, approved or future requests pursuant to Jordan's Principle or with respect to individual entitlements under ISC programs where ISC makes a decision with respect to an individual's eligibility for funding.

ARTICLE 10 - IMPLEMENTATION OF THIS AGREEMENT

10.01 Settlement Approval Order

1) This Agreement is conditional upon the Tribunal confirming the satisfaction of its Compensation Order and the Compensation Framework Order (2021 CHRT 7), as well as the approval by the Court of this Agreement.

2) Prior to seeking the Settlement Approval Order from the Court, the AFN and Canada will jointly seek an order from the Tribunal declaring that the Compensation Order has been fully satisfied. The Parties will take all reasonable steps to support the application before the Tribunal, including filing such evidence and submissions as may be required.

3) The AFN agrees to act as the lead applicant before the Tribunal in seeking the above order, and to take all reasonable steps to publicly promote and defend the Agreement.

4) The Representative Plaintiffs, or any of them, in the Consolidated Action and the Trout Action may seek interested party status and/or standing to make representations before, and to answer questions posed by, the Tribunal in respect of the satisfaction of the Compensation Order and Canada consents to them obtaining such standing.

5) The Parties will consent to the issuance of the Settlement Approval Order.

6) The Parties will take all reasonable measures to cooperate in requesting that the Court issue the Settlement Approval Order and related orders on notice of certification, Settlement Approval Hearing, and any other orders required for the implementation of this Agreement.

7) The Parties will schedule the Settlement Approval Hearing as soon as practicable considering the requirements of the Notice Plan, the decision required from the Tribunal

and the Court's availability, noting that such hearing is currently scheduled for five days beginning on September 19, 2022.

8) The Parties will consider seeking orders from provincial superior courts to obtain relevant data from provinces and territories should that become necessary and agree to cooperatively approach the provinces and territories to encourage their compliance.

9) The Parties will take all reasonable measures to cooperate in seeking federal, provincial and territorial privacy legislation exemptions and consents as may be needed to implement the Agreement.

10.02 Notice Plan

The Parties will seek approval from the Court of the Notice Plan as the means by which Class Members will be provided with notice of settlement and settlement approval, and of the Opt-Out Period, as applicable.

ARTICLE 11 - OPTING OUT

11.01 Opting Out

A Class Member may Opt-Out of the Actions by:

(a) delivery to the Administrator of an Opt-Out form or a written request to be removed from the Actions before the Opt-Out Deadline; or

(b) after the Opt-Out Deadline, by obtaining leave of the Court to Opt-Out of the Actions if the Claimant was unable, as a result of physical or psychological illness or challenges, including homelessness or addiction, or other significant obstacles as found by the Court, to take steps to Opt-Out within the Opt-Out Deadline.

11.02 Automatic Exclusion for Individual Claims

A Class Member will be excluded from the Actions if the Class Member does not, before the expiry of the Opt-Out Deadline, discontinue a proceeding brought by the Class Member against Canada to the extent that the separate proceeding raises the common questions set out in the Certification Orders.

ARTICLE 12 - SETTLEMENT IMPLEMENTATION COMMITTEE

12.01 Composition of Settlement Implementation Committee

1) A Settlement Implementation Committee will be formed in accordance with this Article, subject to approval by the Court.

2) The Settlement Implementation Committee will consist of five (5) members as follows:

(a) Two First Nations members ("**Non-Counsel SIC Members**"); and

(b) Three Counsel members ("**Counsel SIC Members**").

3) All Non-Counsel SIC Members and all Counsel SIC Members are subject to the Court's order appointing them as such.

4) No person will serve for more than two (2) five-year terms, consecutive or cumulative, as one of the Non-Counsel SIC Members and/or of the Counsel SIC Members.

5) The terms of the five members of the Settlement Implementation Committee will be staggered such that the end of their terms does not occur all at the same time. For that purpose, the first term of one (1) Non-Counsel SIC Members and one (1) Counsel SIC Members will not exceed three (3) years, which terms may be renewed for a subsequent term of five (5) years. The first term of the balance of the members of the Settlement Implementation Committee will be for five years.

6) The two Non-Counsel SIC Members will be First Nations individuals only, as defined in Article 1.

7) The two Non-Counsel SIC Members will be selected through a solicitation for applications conducted by the AFN Executive Committee.

8) For the first round of nominations prior to the establishment of the Settlement Implementation Committee, the AFN Executive Committee will recommend to the Court for approval two Non-Counsel SIC Members selected in accordance with this Article, one for an initial term of three years and one for an initial term of five years.

9) After the establishment of the Settlement Implementation Committee, the AFN Executive Committee will recommend to the Settlement Implementation Committee any necessary replacement Non-Counsel SIC Members as those positions become vacant from time to time under this Article for the purposes of seeking the Court's approval of the appointment of such members.

10) The three Counsel SIC Members will consist of one (1) lawyer appointed by Sotos LLP, one (1) lawyer appointed by Kugler Kandestin LLP, and one (1) lawyer appointed by the AFN Executive Committee.

11) For the first round of nominations prior to the establishment of the Settlement Implementation Committee, Sotos LLP, Kugler Kandestin LLP, and the AFN Executive Committee will each recommend one lawyer to the Court for approval in accordance with this Article. One of these three lawyers will be nominated for an initial term of three years and the other two for an initial term of five years in accordance with this Article. If Sotos LLP, Kugler Kandestin LLP, and the AFN Executive Committee cannot agree on which lawyer will be recommended to the Court for an initial term of three years, they will ask the Court to select any one of the three recommended lawyers for a term of three years in the Court's full discretion.

12) After the establishment of the Settlement Implementation Committee, Sotos LLP, Kugler Kandestin LLP, and the AFN Executive Committee will recommend to the Settlement

Implementation Committee the necessary number of replacement Counsel SIC Members separately for each of their respective counsel as those positions become vacant from time to time in accordance with this Article for the purposes of seeking the Court's approval of the appointment of such members.

13) A member of the Settlement Implementation Committee may be removed prior to the expiry of their term with a special majority vote of four (4) members of the Settlement Implementation Committee. Such a removal is not effective unless and until approved by the Court.

14) The Court may substitute any member of the Settlement Implementation Committee in accordance with this Article in the best interests of the Class.

15) A meeting of the Settlement Implementation Committee may be held if at least four (4) members are present. In making decisions under this Agreement, the Settlement Implementation Committee will make reasonable efforts to reach consensus. If consensus is not possible, the Settlement Implementation Committee will decide by majority vote unless specified otherwise in this Agreement.

16) If any member of the Settlement Implementation Committee believes that the majority of the Settlement Implementation Committee has taken a decision that is not in the best interests of the Class, that Member may refer the decision to confidential mediation in accordance with the ADR Chambers Mediation Rules. If the members of the Settlement Implementation Committee cannot agree on a mediator, they may ask the Court to appoint one. The reasonable costs of the mediation will be a disbursement of the Settlement Implementation Committee payable in accordance with Article 3.04(1). If the matter cannot be resolved at mediation, the matter may be referred to the Court for determination.

17) For the first two (2) years following the Implementation Date of this Agreement, the Settlement Implementation Committee will meet monthly, either in-person or virtually, and thereafter, the Settlement Implementation Committee will meet quarterly, unless the Settlement Implementation Committee believes that more frequent meetings are required. Notwithstanding this Article, the Settlement Implementation Committee may deal with administrative and urgent issues, if and when necessary.

18) The Settlement Implementation Committee, all Non-Counsel SIC Members, and all Counsel SIC Members will at all times act solely in the best interests of the Class, and not in the interests of any other party, stakeholder or entity.

19) In the event that either Sotos LLP or Kugler Kandestin LLP merges with another law firm, this Agreement will be binding on the successor firm.

20) If after the Implementation Date, Sotos LLP, Kugler Kandestin LLP or the AFN Executive Committee determine in their respective sole and unfettered discretion that they no longer

need or want to nominate members to the Settlement Implementation Committee in accordance with this Article, they will advise the Settlement Implementation Committee in writing. In that event, the Court will determine a prospective replacement for such members in the best interests of the Class on the recommendation of the Settlement Implementation Committee.

12.02 Settlement Implementation Committee Fees

1) Canada's liability for the fees of Counsel SIC Members and any other counsel to whom work is delegated will be negotiated by the Parties by way of the process identified in Article 16, Legal Fees.

2) Counsel SIC Members may delegate the legal work reasonably necessary for the fulfillment of the Settlement Implementation Committee's responsibilities under this Agreement among Class Counsel or retain other counsel as Counsel SIC Members consider necessary.

3) Canada will pay a total of $750,000, separate and in addition to any other amounts in this Agreement to be paid at the direction of the AFN Executive Committee to fund an honorarium of $200 per hour to each of the Non-Counsel SIC Members for reasonable participation in the work of the Settlement Implementation Committee, up to a maximum of $1000 per day, subject to the Court's approval. The Settlement Implementation Committee may propose, and the Court may implement a change in the quantum of such honoraria from time to time.

12.03 Settlement Implementation Committee Responsibilities

1) In addition to matters specified elsewhere in this Agreement, the Settlement Implementation Committee's responsibilities will include the following:

   (a) monitoring the work of the Administrator and the Third-Party Assessor, and the Claims Process overall;

   (b) receiving and considering reports from the Administrator, including on administrative costs;

   (c) engaging experienced practitioners as needed who are familiar with family and child welfare documents and records in each province and territory to assist with the work of the Administrator and the Third-Party Assessor, where necessary to substantiate allegations of Abuse or conduct isolated audits of some Claims Forms where ISC data is insufficient or lacking;

   (d) giving such process directions to the Administrator or the Third-Party Assessor as may be necessary in accordance with the mandate of the Settlement Implementation Committee and the provisions of this Agreement;

(e) proposing for the Court's approval such protocols as may be necessary for the implementation of this Agreement, including any amendments to the Claims Process and distribution protocol as may be necessary;

(f) addressing any other matter referred to the Settlement Implementation Committee by the Court;

(g) receiving, through the Investment Committee, and seeking Court approval on advice from the Actuary and investment experts on the investment of the Trust Fund;

(h) recommending to the Court any change of the Administrator;

(i) setting Terms of Reference for the Investment Committee regarding investment objectives and strategy (the "**Investment Committee Terms of Reference**") in accordance with the principles set out in Schedule G: Investment Committee Guiding Principles;

(j) engaging experts as reasonably needed including, but not limited to, experts in First Nations data governance, trauma, community relations, health and social services, and actuaries to assist with the Claims Process;

(k) receiving annual reports from Canada on the health supports, trauma-informed mental supports, and Claims Process supports provided to Class Members;

(l) providing an annual Settlement Implementation Report to the Court, which includes updates on the implementation of the Agreement, actuarial reporting on the Trust Fund and distribution, annual audited financial reporting, any issues with the Trust, any systemic issues in implementation and proposed or approved resolution to such issues, etc.; and

(m) providing the AFN Executive Committee with a concurrent copy of the annual Settlement Implementation Report.

2) The Settlement Implementation Committee may retain experts and consultants as reasonably required for the implementation of this Agreement. The fees and disbursements of such experts and consultants will be a disbursement of the Settlement Implementation Committee payable by Canada in accordance with Article 3.04.

3) The Settlement Implementation Committee may bring or respond to whatever motions or institute whatever proceedings it considers necessary to advance its responsibilities under this Agreement and the interests of Class Members.

12.04 Investment Committee

1) The Investment Committee will adhere to the Investment Committee Terms of Reference as set by the Settlement Implementation Committee.

2) The Investment Committee will be constituted of up to two (2) members that are not investment professionals but have relevant board experience regarding the management of funds and one (1) independent investment professional (the "**Investment Professional Member**").

3) The Investment Committee members will be nominated by the Settlement Implementation Committee to five (5) year renewable terms, subject to approval by the Court.

4) The reasonable fees of the Investment Committee, including the Investment Professional Member, will be payable by Canada to a maximum of four quarterly meetings per annum and will be subject to Court approval. The reasonable fees of any investment consultant retained by the Investment Committee will be payable by Canada, subject to Court Approval. Canada will not be responsible for the payment of fees for investment managers retained by the Investment Committee.

5) The Investment Committee will meet quarterly, or more frequently as required, during the first five (5) years following its establishment. In subsequent years, the Investment Committee will meet at least once annually, or more frequently if required and approved by the Settlement Implementation Committee. The Investment Committee will periodically, and no less than annually, review the viability of the investment strategy of the Trust Fund and submit such a review to the Settlement Implementation Committee.

ARTICLE 13 - PAYMENTS FOR DECEASED INDIVIDUAL CLASS MEMBERS AND PERSONS UNDER DISABILITY

13.01 Persons Under Disability

If a Claimant who submitted a Claim to the Administrator within the Claims Deadline is or becomes a Person Under Disability prior to their receipt of compensation, the Personal Representative of the Claimant will be paid the compensation to which the Claimant would have been entitled under the Claims Process.

13.02 General Principles for Compensation if Deceased

Only the Estates of the deceased members of the Removed Child Class, Jordan's Principle Class or Trout Child Class may be eligible for compensation under this Agreement ("**Eligible Deceased Class Member**" or "**Eligible Deceased Class Members**"). The Estates of the Removed Child Family Class, the Jordan's Principle Family Class or the Trout Family Class are not eligible for compensation, unless a complete Claim was submitted by the member of the Removed Child Family Class, the Jordan's Principle Family Class or the Trout Family Class prior to death.

13.03 Compensation if Deceased: Grant of Authority or the Like

1) Where an Estate Executor or Estate Administrator of an Eligible Deceased Class Member has been appointed under the *Indian Act* or under the governing provincial or territorial legislation, the Estate Executor or Estate Administrator may submit a Claim for compensation in accordance with this Agreement.

2) In support of a Claim made pursuant to Article 13.01, the Estate Executor or Estate Administrator for an Eligible Deceased Class Member will submit to the Administrator, in each case in a form acceptable to the Administrator:

   (a) A Claims Form (if a Claims Form was not submitted by such Eligible Deceased Class Member or their Personal Representative prior to their death);

   (b) Evidence that such Eligible Deceased Class Member is deceased and the date on which such Eligible Deceased Class Member died;

   (c) Evidence in the following form identifying such representative as having the legal authority to receive compensation on behalf of the estate of the Eligible Deceased Class Member:

      i) If the claim to entitlement to receive compensation on behalf of a decedent estate is based on a will or other testamentary instrument or on intestacy, a copy of a grant of probate or a grant and letters testamentary or other document of like import, or a grant of letters of administration or other document of like import, issued by any court or authority in Canada; or

      ii) If in Quebec, a notarial will, a probated holograph will, a probated or other document of like import made in the presence of witnesses in accordance with the *Civil Code of Quebec* and the *Indian Act*.

13.04 Compensation if Deceased: No Grant of Authority or the Like

1) For the purpose of this Article a “spouse” means a person who:

   (a) is legally married;

   (b) persons who are not married, but:
      i) have a common law relationship for a period of not less than one year, the time prescribed in accordance with the *Indian Act*, at the time of death; or
      ii) have a relationship of some permanence if they are the parents of a child.

2) If a Claims Form is submitted to the Administrator on behalf of an Eligible Deceased Class Member without proof of a will or the appointment of an Estate Executor or Estate Administrator, the Administrator may, upon receiving Supporting Documentation, treat the Eligible Deceased Class Member’s Claim in accordance with

the priority level of heirs under the *Indian Act* in respect of distribution of property on intestacy as follows:

(a) The spouse of the Eligible Deceased Class Member at the time of death.

(b) Where the Eligible Deceased Class Member has no spouse, the Child or Children of the eligible Deceased Class Member. Any Child of the Eligible Deceased Class Member will be able to submit a Claim to the Administrator if so entitled pursuant to the priorities herein. The compensation will be divided pro rata amongst all the Children of the Eligible Deceased Class Member who are living at the time when the Claim is received by the Administrator.

(c) Where the Eligible Deceased Class Member has no spouse and no child/children, the Caregiving Parents or Caregiving Grandparents of the Eligible Deceased Class Member, as applicable. Any surviving Caregiving Parent or Caregiving Grandparent of the Eligible Deceased Class Member may advance a claim to the Administrator if so entitled pursuant to the priorities herein. The compensation will be divided pro rata between the Caregiving Parents or Caregiving Grandparents of the Eligible Deceased Class Member who are alive when the Claim is received by the Administrator.

(d) Where an Eligible Deceased Class Member leaves no spouse, child, or Caregiving Parent or Caregiving Grandparent, the sibling(s) of the Eligible Deceased Class Member. Any sibling of the Eligible Deceased Class Member may advance a Claim to the Administrator if so entitled pursuant to the priorities herein. The compensation will be distributed equally among the siblings of the Eligible Deceased Class Member who are alive when the claim is received by the Administrator.

3) Subject to sections 4(3) and 42 to 51 of the *Indian Act*, Canada, as represented by the Minister of Indigenous Services Canada, may administer or appoint administrators for the estates of Eligible Deceased Class Members who are under Canada's jurisdiction and who have or are entitled to receive direct compensation under this Agreement.

4) Canada may consult with the Settlement Implementation Committee to utilize the existing ISC framework for the administration of the estates of Eligible Deceased Class Members consistent with the exercise of Ministerial discretion considering individual circumstances. Canada will conduct the administration process in a trauma-informed manner and with a view to ensuring that it is as expeditious, cost-effective, user-friendly, and culturally sensitive as possible. This may include:

(a) where Canada is advised that an Estate Executor or Estate Administrator has not already been appointed on behalf of the estate of an Eligible Deceased Class Member, Canada may appoint an Estate Administrator as needed who will act in accordance with their fiduciary and statutory duties, which may include submitting a Claim on behalf of such Class Member; and

(b) where Canada administers an estate of an Eligible Deceased Class Member, there will be no cost recovery against the estate for doing so and, except in exceptional circumstances, Canada will seek to minimize or eliminate any related third-party costs.

5) Subject to issues that may arise in individual cases, Canada may, but is not obligated to, exercise its discretion under the *Indian Act* to assume jurisdiction over the administration of the estates referred to above. Nothing in this Article should be taken to extend the jurisdiction under the *Indian Act* over the administration of estates.

13.05 Canada, Administrator, Class Counsel, Third-Party Assessor, Settlement Implementation Committee, and Investment Committee Held Harmless

Canada and its counsel, the Administrator, Class Counsel, AFN in-house counsel, the Third-Party Assessor, the Settlement Implementation Committee and its members, and the Investment Committee will be held harmless from any and all claims, counterclaims, suits, actions, causes of action, demands, damages, penalties, injuries, setoffs, judgments, debts, costs, expenses (including legal fees and expenses) or other liabilities of every character whatsoever by reason of or resulting from a payment or non-payment to or on behalf of a Eligible Deceased Class Member or a Person Under Disability, or to an Estate Executor, estate, or Personal Representative pursuant to this Agreement, and this Agreement will be a complete defence.

ARTICLE 14 - TRUSTEE AND TRUST

14.01 Trust

1) Subject to advice received by third-party professionals, the Parties agree to the following provisions.

2) No later than thirty (30) days following the appointment by the Court of the Trustee, Canada will settle a single trust (the "**Trust**") with ten dollars ($10), to be held by the Trustee in accordance with the terms of this Agreement.

3) The Plaintiffs will submit the initial investment strategy created with help from experts to the Court for approval together with this Agreement.

14.02 Trustee

1) The Court will appoint the Trustee to act as the trustee of the Trust, with such powers, rights, duties, and responsibilities as the Court orders. Without limiting the generality of the foregoing, the duties and responsibilities of the Trustee will include:

   (a) to hold the Trust Fund;

   (b) to invest the Settlement Funds in accordance with the Statement of Investment Policies and Procedures as instructed by the Investment Committee, having regard to the best interests of Class Members and the ability of the Trust to meet its financial obligations, subject to the Court's ongoing supervision;

   (c) upon instructions from the Administrator and approval of the Settlement Implementation Committee in accordance with the policies of the Settlement Implementation Committee, to provide such amounts from the Trust to the Administrator and any other person as described in Article 3.02, Article 4.02, Article 7.01, and Article 17(3), as required from time to time in order to give effect to any provision of this Agreement, including the payment of compensation to Approved Class Members in the Claims Process;

   (d) to engage, upon consultation with and approval of the Settlement Implementation Committee, the services of professionals to assist in fulfilling the Trustee's duties;

   (e) to exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances;

   (f) to keep such books, records and accounts as are necessary or appropriate to document the assets held in the Trust, and each transaction of the Trust;

   (g) to take all reasonable steps and actions required under the *Income Tax Act* as set out in the Agreement;

   (h) to report to the Administrator, Canada and the Settlement Implementation Committee on a quarterly basis the assets held in the Trust at the end of each such quarter, or on an interim basis if so requested; and

   (i) to do such other acts and things as are incidental to the foregoing, and to exercise all powers that are necessary or useful to carry on the activities of the Trust or to carry out the provisions of this Agreement.

14.03 Trustee Fees

Canada will pay the reasonable fees, disbursements, and other costs of the Trustee relating to the management of the Trust Fund.

14.04 Nature of the Trust

1) The Trust will be established for the following purposes:

(a) to acquire the Settlement Funds payable by Canada;

(b) to hold the Settlement Funds in the Trust;

(c) to pay compensation in accordance with this Agreement;

(d) to invest cash in investments in the best interests of Class Members, as provided in this Agreement; and

(e) to do such other acts and things as are incidental to the foregoing, and to exercise all powers that are necessary or useful to carry out the provisions of this Agreement.

14.05 Legal Entitlements

The legal ownership of the assets of the Trust, including the Trust Fund, and the right to conduct the activities of the Trust, including the activities with respect to the Trust Fund, will be, subject to the specific limitations and other terms contained herein, vested exclusively in the Trustee, and the Class Members or any other beneficiaries of the Trust have no right to compel or call for any partition, division or distribution of any of the assets of the Trust or a rendering of accounts. No Class Member or any other beneficiary of the Trust will have or is deemed to have any right of ownership in any of the assets of the Trust.

14.06 Records

The Trustee will keep such books, records, and accounts as are necessary or appropriate to document the assets of the Trust and each transaction of the Trust. Without limiting the generality of the foregoing, the Trustee will keep at its principal office records of all transactions of the Trust and a list of the assets held in trust, including each Fund, and a record of each Fund's account balance from time to time.

14.07 Quarterly Reporting

The Trustee will deliver to the Administrator, Canada, and the Settlement Implementation Committee, within thirty (30) days after the end of each calendar quarter, a quarterly report setting forth the assets held as at the end of such quarter in the Trust and each Fund (including the term, interest rate or yield and maturity date thereof) and a record of the Trust's account balance during such quarter.

14.08 Annual Reporting

The Auditors will deliver to the Administrator, the Trustee, Canada, the Settlement Implementation Committee, the AFN Executive Committee and the Court, within sixty (60) days after the end of each anniversary of the date that the Trust was funded, which date will be the fiscal year-end for the Trust:

(a) the audited financial statements of the Trust for the most recently completed fiscal year, together with the report of the Auditors thereon;

(b) a report setting forth a summary of the assets held in trust as at the end of the fiscal year for each Fund and the disbursements made by the Trust during the preceding fiscal year; and

(c) the audited financial statements of the Administrator.

14.09 Method of Payment

The Trustee will have sole discretion to determine whether any amount paid or payable out of the Trust is paid or payable out of the income of the Trust or the capital of the Trust.

14.10 Additions to Capital

Any income of the Trust not paid out in a fiscal year will at the end of such fiscal year be added to the capital of the Trust.

14.11 Tax Elections

For each taxation year of the Trust, the Trustee will file any available elections and designations under the *Income Tax Act* and equivalent provisions of the *Income Tax Act* of any province or territory and take any other reasonable steps such that the Trust and no other person is liable to taxation on the income of the Trust, including the filing of an election under the *Income Tax Act* and equivalent provisions of the *Income Tax Act* of any province or territory for each taxation year of the Trust and the amount to be specified under such election will be the maximum allowable under the *Income Tax Act* or the *Income Tax Act* of any province or territory, as the case may be.

14.12 Canadian Income Tax

1) Canada will make best efforts to exempt any income earned by the Trust from federal taxation, and Canada will take into account the measures that it took in similar circumstances for the class action settlements addressed in section 81 (1) (g.3) of the *Income Tax Act*.

2) The Parties agree that the payments to Class Members, including payments of any income earned on the Settlement Funds, are in the nature of personal injury damages and are not taxable income and Canada will make best efforts to obtain a technical interpretation to the same effect from the Income Tax Rulings Directorate of the Canada Revenue Agency.

ARTICLE 15 – AUDITORS

15.01 Appointment of Auditors

On the recommendation of the Settlement Implementation Committee, the Court will appoint Auditors with such powers, rights, duties and responsibilities as the Court directs. On the recommendation of the Parties, or of their own motion, the Court may replace the

Auditors at any time. Without limiting the generality of the foregoing, the duties and responsibilities of the Auditors will include:

(a) to audit the accounts for the Trust in accordance with generally accepted auditing standards on an annual basis;

(b) to provide the reporting set out in Article 14.08;

(c) to audit the financial statements of the Administrator in relation to the administration of this Agreement; and

(d) to file the financial statements of the Trust together with the Auditors' report thereon with the Court and deliver a copy thereof to Canada, the Settlement Implementation Committee, the Administrator, and the Trustee within sixty (60) days after the end of each financial year of the Trust.

15.02 Payment of Auditors

Canada will pay the reasonable fees, disbursements, and other costs of the Auditors in accordance with Article 3.04, as approved by the Court.

ARTICLE 16 - LEGAL FEES

16.01 Class Counsel Fees

1) Canada will pay Class Counsel the amount approved by the Court, plus applicable taxes, in respect of their legal fees and disbursements for the prosecution of the Actions to the date of the Settlement Approval Hearing, together with advice to Class Members regarding the Agreement and Acceptance, over and above the Settlement Funds. Subject to Article 12.02(1), Canada will also pay the reasonable legal fees of Class Counsel for their work on or for the Settlement Implementation Committee and the Investment Committee. A disagreement between the Parties over legal fees will not prevent the Parties from signing this Agreement. Canada and Class Counsel will participate in mediation if they are unable to agree upon the legal fees, to be presided over by a mediator to be agreed upon by and between Canada and Class Counsel or, failing agreement, appointed by the Court. In the event that Canada and Class Counsel are not able to agree upon legal fees during mediation, fees will be subject to the approval of the Court, subject to appeal. Canada will have standing to make submissions to the Court regarding such fees.
2) No such amounts will be deducted from the Settlement Funds.
3) Class Counsel will not charge individual Class Members any amounts for legal services rendered in accordance with this Agreement. Such assistance to Class Members will not be considered to constitute or be cause for a conflict.

16.02 Ongoing Legal Services

1) Following the Implementation Date, responsibility for representing the interests of the Class as a whole (as distinct from assisting a particular Class Member or Class Members, as reasonably requested) will pass from Class Counsel to the Settlement Implementation Committee, and Class Counsel will have no further obligations in that regard.

2) In addition to the legal services provided to the Settlement Implementation Committee in Article 12, Counsel SIC Members may also respond to legal inquiries from Class Members about this Agreement that are beyond the training and/or competence of the navigational support services provided by the Administrator. Legal fees for such services are subject to Article 12.02(1).

16.03 Ongoing Fees

1) The Settlement Implementation Committee will maintain appropriate records of payment, fees and disbursements for Ongoing Legal Services.

2) The Settlement Implementation Committee may submit the bills relating to Counsel SIC Members to Canada for payment on a monthly basis, subject to Article 12.02(1).

3) The Settlement Implementation Committee will seek approval of its accounts from the Court on an annual basis.

ARTICLE 17 - GENERAL DISPUTE RESOLUTION

1) Where a dispute arises regarding any right or obligation under this Agreement ("**Dispute**"), the parties to the Dispute will refer the Dispute to confidential mediation in accordance with the ADR Chambers Mediation Rules. If the parties to the Dispute cannot agree on a mediator, they may ask the Court to appoint one (the "**Dispute Resolution Process**").

2) If the Dispute cannot be resolved through the Dispute Resolution Process, it can be referred to the Court for determination.

3) The costs of dispute resolution amongst members of the Settlement Implementation Committee, in accordance with the Dispute Resolution Process, or by referral to the Court, may be paid out of the Trust Fund in circumstances where deemed appropriate by the mediator or the Court.

4) Where Canada is a party to a matter referred to the Dispute Resolution Process, the mediator will have the discretion to award costs of the mediation against any party.

5) For greater certainty, this Article will not apply to disputes regarding Claimants in the Claims Process, including eligibility for membership in the Class, extension of the Claims Deadline for an individual Class Member or compensation due to any Class Member.

ARTICLE 18 - TERMINATION AND OTHER CONDITIONS

18.01 Termination of Agreement

1) Except as set forth in Article 18.01(2), this Agreement will continue in full force and effect until all obligations under this Agreement are fulfilled and the Court orders that the Agreement has terminated.

2) Notwithstanding any other provision in the Agreement, the following provisions will survive the termination of this Agreement:

    (a) Article 9.01 – Releases

    (b) Article 20 – Confidentiality

    (c) Article 22 – Immunity

18.02 Amendments

Except as expressly provided in this Agreement, no amendment may be made to this Agreement unless agreed to by the Parties in writing, and if the Court has issued the Settlement Approval Order, then any amendment will only be effective once approved by the Court. A material amendment to the Schedules hereto will require the Court's approval.

18.03 Non-Reversion of Settlement Funds

No amount or earned interest that remains after the distribution of the Settlement Funds will revert to Canada. Such amounts will instead be further distributed in accordance with the distribution protocol designed and approved for the Claims Process.

18.04 No Assignment

1) No compensation payable under this Agreement to a Class Member can be assigned, charged, pledged, hypothecated and any such assignment, charge, pledge, or hypothecation is null and void except as expressly provided for in this Agreement.

2) No portion of the Settlement Funds or amounts accrued thereon that remain will be charged to a Claimant for completing Claims Forms or providing Supporting Documentation.

3) Any payment to which a Claimant is entitled will be made to such Claimant in accordance with the direction that such Claimant provides to the Administrator unless a court of competent jurisdiction has ordered otherwise.

4) Any payments in respect of a Deceased Class Member or a Person Under Disability will be made in accordance with Article 13.

5) In the absence of fraud, any amount paid pursuant to this Agreement is not refundable in the event that it is later determined that the Claimant was not entitled to receive or be paid all or part of the amount so paid, but the Claimant may be required to account for any amount that they were not entitled to receive against any future payments that they would otherwise be entitled to receive pursuant to this Agreement.

ARTICLE 19 – WARRANTIES AND REPRESENTATIONS ON SIZE OF THE CLASS

1) The Parties acknowledge that, in preparing the Joint Report, the Experts relied on data from ISC to determine the Estimated Removed Child Class Size. Both the Plaintiffs and Canada were aware that parts of this data came from third parties, was incomplete and, in some cases, inaccurate. The Parties, including Canada, took account of the nature of this data in entering into this Agreement.
2) Canada warrants and represents that it provided to the Experts all of the data in Canada's possession relating to the Estimated Removed Child Class Size. However, Canada does not represent or warrant the accuracy of the data it provided nor the accuracy of the Joint Report of the Experts.

ARTICLE 20 – CONFIDENTIALITY

20.01 Confidentiality

Any information provided, created, or obtained in the course of implementing this Agreement will be kept confidential and will not be used for any purpose other than this Agreement unless otherwise agreed by the Parties.

20.02 Destruction of Class Member Information and Records

1) Subject to Article 20.02(2), two years after completing the payment of all compensation under this Agreement, the Administrator will destroy all Class Member information and documentation in its possession, unless a Class Member or their Estate Executor or Estate Claimant specifically requests the return of such information within the two-year period. Upon receipt of such request, the Administrator will forward the Class Member information as directed. Before destroying any information or documentation in accordance with this Article, the Administrator will prepare an anonymized statistical analysis of the Class in accordance with the Claims Process.
2) Prior to destruction of the records, the Administrator will create and provide to Canada a list showing the Approved Class Member's: (i) name (ii) Indian registration number, (iii) Band or First Nation affiliation, (iv) birthdate, (v) class membership, and (vi) amount and date of payment with respect to each compensation payment made. Notwithstanding anything else in this Agreement, this list must be retained by Canada in strict confidence

and can only be used in a legal proceeding or settlement where it is relevant to demonstrating that a claimant received a payment under this Agreement.

3) The destruction of records in the possession or control of Canada is subject to the application of any relevant provincial or federal legislation such as the *Privacy Act*, the *Access to Information Act*, the *Personal Information Protection and Electronic Documents Act* and the *Library and Archives of Canada Act*.

20.03 Confidentiality of Negotiations

Save as may otherwise be agreed between the Parties, the undertaking of confidentiality as to the discussions and all communications, whether written or oral, made in and surrounding the negotiations leading to the AIP and this Agreement continues in force. The Parties expressly agree that the AIP and the materials and discussions related to it are inadmissible as evidence to determine the meaning and scope of this Agreement, which supersedes the AIP.

ARTICLE 21 – COOPERATION

21.01 Cooperation on Settlement Approval and Implementation

Upon execution of this Agreement, the Representative Plaintiffs in the Actions, the AFN, Class Counsel, and Canada will make best efforts to obtain approval of this Agreement by the Court and to support and facilitate participation of Class Members in all aspects of this Agreement. If this Agreement is not approved by the Court, the Parties will negotiate in good faith to attempt to cure any defects identified by the Court but will not be obligated to agree to any material amendment to the Agreement executed by the Parties.

21.02 Public Announcements

Upon the issuance of the Settlement Approval Order, the Parties will release a joint public statement announcing the settlement in a form to be agreed by the Parties and, at a mutually agreed time, will make public announcements in support of this Agreement. The Parties will continue to speak publicly in favour of the Agreement as reasonably requested by any Party.

ARTICLE 22 – IMMUNITY

Canada and its counsel, Class Counsel, AFN and its in-house counsel, the Administrator, the Settlement Implementation Committee and its Members and counsel, the Investment Committee, and the Third-Party Assessor will be released from, be immune to, and be held harmless from any and all claims, counterclaims, suits, actions, causes of action, demands, damages, penalties, injuries, setoffs, judgments, debts, costs, expenses (including legal fees and expenses) or other liabilities of every character whatsoever by

any reason, except fraud relating to the Actions and to this Agreement, and this Agreement will be a complete defence.

ARTICLE 23 – PUBLIC APOLOGY

Upon execution of this Agreement, Canada will propose to the Office of the Prime Minister that the Prime Minister make a public apology for the discriminatory conduct underlying the Class Members' claims and the past and ongoing harm it has caused.

ARTICLE 24 – COMPLETE AGREEMENT

This Agreement constitutes the entire agreement among the Parties with respect to the subject matter hereof and cancels and supersedes any prior or other understandings and agreements between or among the Parties with respect thereto, including the AIP. There are no representations, warranties, terms, conditions, undertakings, covenants or collateral agreements, express, implied or statutory between or among the Parties with respect to the subject matter hereof other than as expressly set forth or referred to in this Agreement.

Schedule A - Consolidated Action Certification Order

(provided in English and French)

Federal Court Cour fédérale

Date: 20211126

Docket: T-402-19
T-141-20

Citation: 2021 FC 1225

Ottawa, Ontario, November 26, 2021

PRESENT: The Honourable Madam Justice Aylen

CLASS PROCEEDING

BETWEEN:

XAVIER MOUSHOOM, JEREMY MEAWASIGE (by his litigation guardian, JONAVON JOSEPH MEAWASIGE) AND JONAVON JOSEPH MEAWASIGE

Plaintiffs

and

THE ATTORNEY GENERAL OF CANADA

Defendant

BETWEEN:

ASSEMBLY OF FIRST NATIONS, ASHLEY DAWN LOUISE BACH, KAREN OSACHOFF, MELISSA WALTERSON, NOAH BUFFALO-JACKSON (by his litigation guardian, CAROLYN BUFFALO), CAROLYN BUFFALO AND DICK EUGENE JACKSON also known as RICHARD JACKSON

Plaintiffs

and

HER MAJESTY THE QUEEN

AS REPRESENTED BY THE ATTORNEY GENERAL OF CANADA

Defendant

ORDER AND REASONS

UPON MOTION by the Plaintiffs, on consent and determined in writing pursuant to Rule 369 of the *Federal Courts Rules*, for an order:

(a) Granting the Plaintiffs an extension of time to make this certification motion past the deadline in Rule 334.15(2)(b);

(b) Certifying this proceeding as a class proceeding and defining the class;

(C) Stating the nature of the claims made on behalf of the class and the relief sought by the class;

(d) Stipulating the common issues for trial;

(e) Appointing the Plaintiffs specified below as representative plaintiffs;

(f) Approving the litigation plan; and

(g) Other relief;

CONSIDERING the motion materials filed by the Plaintiffs;

CONSIDERING that the Defendant has advised that the Defendant consents in whole to the motion as filed;

CONSIDERING that the Court is satisfied, in the circumstances of this proceeding, that an extension of time should be granted to bring this certification motion past the deadline prescribed in Rule 334.15(2)(b);

CONSIDERING that while the Defendant's consent reduces the necessity for a rigorous approach to the issue of whether this proceeding should be certified as a class action, it does not relieve the Court of the duty to ensure that the requirements of Rule 334.16 for certification are met [see *Varley v Canada (Attorney General)*, 2021 FC 589];

CONSIDERING that Rule 334.16(1) of the *Federal Courts Rules* provides:

Subject to subsection (3), a judge shall, by order, certify a proceeding as a class proceeding if	Sous réserve du paragraphe (3), le juge autorise une instance comme recours collectif si les conditions suivantes sont réunies :
(a) the pleadings disclose a reasonable cause of action;	a) les actes de procédure révèlent une cause d'action valable;
(b) there is an identifiable class of two or more persons;	b) il existe un groupe identifiable formé d'au moins deux personnes;
(c) the claims of the class members raise common questions of law or fact, whether or not those common questions predominate over questions affecting only individual members;	c) les réclamations des membres du groupe soulèvent des points de droit ou de fait communs, que ceux-ci prédominent ou non sur ceux qui ne concernent qu'un membre;
(d) a class proceeding is the preferable procedure for the just and efficient resolution of the common questions of law or fact; and	d) le recours collectif est le meilleur moyen de régler, de façon juste et efficace, les points de droit ou de fait communs;
(e) there is a representative plaintiff or applicant who	e) il existe un représentant demandeur qui :
(i) would fairly and adequately represent the interests of the class,	(i) représenterait de façon équitable et adéquate les intérêts du groupe,

(ii) has prepared a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members as to how the proceeding is progressing,	(ii) a élaboré un plan qui propose une méthode efficace pour poursuivre l'instance au nom du groupe et tenir les membres du groupe informés de son déroulement,
(iii) does not have, on the common questions of law or fact, an interest that is in conflict with the interests of other class members, and	(iii) n'a pas de conflit d'intérêts avec d'autres membres du groupe en ce qui concerne les points de droit ou de fait communs,
(iv) provides a summary of any agreements respecting fees and disbursements between the representative plaintiff or applicant and the solicitor of record.	(iv) communique un sommaire des conventions relatives aux honoraires et débours qui sont intervenues entre lui et l'avocat inscrit au dossier.

CONSIDERING that, pursuant to Rule 334.16(2), all relevant matters shall be considered in a determination of whether a class proceeding is the preferable procedure for the just and efficient resolution of the common questions of law or fact, including whether: (a) the questions of law or fact common to the class members predominate over any questions affecting only individual members; (b) a significant number of the members of the class have a valid interest in individually controlling the prosecution of separate proceedings; (c) the class proceeding would involve claims that are or have been the subject of any other proceeding; (d) other means of resolving the claims are less practical or less efficient; and (e) the administration of the class proceeding would create greater difficulties than those likely to be experienced if relief were sought by other means;

CONSIDERING that:

(a) The conduct of the Crown at issue in this proposed class action proceeding, as set out in the Consolidated Statement of Claim, concerns two alleged forms of

discrimination against First Nations children: (i) the Crown's funding of child and family services for First Nations children and the incentive it has created to remove children from their homes; and (ii) the Crown's failure to comply with Jordan's Principles, a legal requirement that aims to prevent First Nations children from suffering gaps, delays, disruptions or denials in receiving necessary services and products contrary to their *Charter*-protected equality rights.

(b) As summarized by the Plaintiffs in their written representations, at its core, the Consolidated Statement of Claim alleges that:

(i) The Crown has knowingly underfunded child and family services for First Nations children living on Reserve and in the Yukon, and thereby prevented child welfare service agencies from providing adequate Prevention Services to First Nations children and families.

(ii) The Crown has underfunded Prevention Services to First Nations children and families living on Reserve and in the Yukon, while fully funding the costs of care for First Nations children who are removed from their homes and placed into out-of-home care, thereby creating a perverse incentive for First Nations child welfare service agencies to remove First Nations children living on Reserve and in the Yukon from their homes and place them in out-of-home care.

(iii) The removal of children from their homes caused severe and enduring trauma to those children and their families.

(iv) Not only does Jordan's Principle embody the Class Members' equality rights, the Crown has also admitted that Jordan's Principle is a "legal requirement" and thus an actionable wrong. However, the Crown has disregarded its obligations under Jordan's Principle and thereby denied crucial services and products to tens of thousands of First Nations children, causing compensable harm.

(v) The Crown's conduct is discriminatory, directed at Class Members because they were First Nations, and breached section 15(1) of the *Charter*, the Crown's fiduciary duties to First Nations and the standard of care at common and civil law.

(c) With respect to the first element of the certification analysis (namely, whether the pleading discloses a reasonable cause of action), the threshold is a low one. The question for the Court is whether it is plain and obvious that the causes of action are doomed to fail [see *Brake v Canada (Attorney General)*, 2019 FCA 274 at para 54]. Even without the Crown's consent, I am satisfied that the Plaintiffs have pleaded the necessary elements for each cause of action sufficient for purposes of this motion, such that the Consolidated Statement of Claim discloses a reasonable cause of action.

(d) With respect to the second element of the certification analysis (namely, whether there is an identifiable class of two or more persons), the test to be applied is whether the Plaintiffs have defined the class by reference to objective criteria such that a person can be identified to be a class member without reference to the merits

of the action [see *Hollick v Toronto (City of)*, 2001 SCC 68 at para 17]. I am satisfied that the proposed class definitions for the Removed Child Class, Jordan's Class and Family Class (as set out below) contain objective criteria and that inclusion in each class can be determined without reference to the merits of the action.

(e) With respect to the third element of the certification analysis (namely, whether the claims of the class members raise common questions of law or fact), as noted by the Federal Court of Appeal in *Wenham v Canada (Attorney General)*, 2018 FCA 199 at para 72, the task under this part of the certification determination is not to determine the common issues, but rather to assess whether the resolution of the issues is necessary to the resolution of each class member's claim. Specifically, the test is as follows:

> The commonality question should be approached purposively. The underlying question is whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis. Thus an issue will be "common" only where its resolution is necessary to the resolution of each class member's claim. It is not essential that the class members be identically situated vis-à-vis the opposing party. Nor is it necessary that common issues predominate over non-common issues or that the resolution of the common issues would be determinative of each class member's claim. However, the class members' claims must share a substantial common ingredient to justify a class action. Determining whether the common issues justify a class action may require the court to examine the significant of the common issues in relation to individual issues. In doing so, the court should remember that it may not always be possible for a representative party to plead the claims of each class member with the same particularity as would be required in an individual suit. (*Western Canadian Shopping Centres*, above at para 39; see also *Vivendi Canada Inc. v. Dell'Aniello*, 2014 SCC 1, [2014] 1 S.C.R. 3 at paras 41 and 44-46.)

Having reviewed the common issues (as set out below), I am satisfied that the issues share a material and substantial common ingredient to the resolution of each class

member's claim. Moreover, I agree with the Plaintiff that the commonality of these issues is analogous to the commonality of similar issues in institutional abuse claims which have been certified as class actions (such as the Indian Residential Schools and the Sixties Scoop class action litigation). Accordingly, I find that the common issue element is satisfied.

(f) With respect to the fourth element of the certification analysis (namely, whether a class proceeding is the preferable procedure for the just and efficient resolution of the common questions of fact and law), the preferability requirement has two concepts at its core: (i) whether the class proceeding would be a fair, efficient and manageable method of advancing the claim; and (ii) whether the class proceeding would be preferable to other reasonably available means of resolving the claims of class members. A determination of the preferability requirement requires an examination of the common issues in their context, taking into account the importance of the common issues in relation to the claim as a whole, and may be satisfied even where there are substantial individual issues [see *Brake*, *supra* at para 85; *Wenham*, *supra* at para 77 and *Hollick*, *supra* at paras 27-31]. The Court's consideration of this requirement must be conducted through the lens of the three principle goals of class actions, namely judicial economy, behaviour modification and access to justice [see *Brake*, *supra* at para 86, citing *AIC Limited v Fischer*, 2013 SCC 69 at para 22].

(g) Having considered the above-referenced principles and the factors set out in Rule 334.16(2), I am satisfied a class proceeding is the preferable procedure for the just

and efficient resolution of the common questions of fact and law. Given the systemic nature of the claims, the potential for significant barriers to access to justice for individual claimants and the Plaintiffs' stated concerns regarding the other means available for resolving the claims of class members, I am satisfied that the proposed class action would be a fair, efficient and manageable method of advancing the claims of the class members.

(h) With respect to the fifth element of the certification analysis (namely, whether there are appropriate proposed representatives), I am satisfied, having reviewed the affidavit evidence filed on the motion together with the detailed litigation plan, that the proposed representative plaintiffs (as set out below) meet the requirements of Rule 334.16(1)(e);

CONSIDERING that the Court is satisfied that all of the requirements for certification are met and that the requested relief should be granted;

THIS COURT ORDERS that:

1. The Plaintiffs are granted an extension of time, *nunc pro tunc*, to bring this certification motion past the deadline in Rule 334.15(2)(b) of the *Federal Courts Rules*.

2. For the purpose of this Order and in addition to definitions elsewhere in this Order, the following definitions apply and other terms in this Order have the same meaning as in the Consolidated Statement of Claim as filed on July 21, 2021:

(a) **"Class"** means the Removed Child Class, Jordan's Class and Family Class, collectively.

(b) **"Class Counsel"** means Fasken Martineau Dumoulin LLP, Kugler Kandestin LLP, Miller Titerle + Co., Nahwegahbow Corbiere and Sotos LLP.

(c) **"Class Members"** mean all persons who are members of the Class.

(d) **"Class Period"** means:

(i) For the Removed Child Class members and their corresponding Family Class members, the period of time beginning on April 1, 1991 and ending on the date of this Order; and

(ii) For the Jordan's Class members and their corresponding Family Class members, the period of time beginning on December 12, 2007 and ending on the date of this Order.

(e) **"Family Class"** means all persons who are brother, sister, mother, father, grandmother or grandfather of a member of the Removed Child Class and/or Jordan's Class.

(f) **"First Nation"** and **"First Nations"** means Indigenous peoples in Canada, including the Yukon and the Northwest Territories, who are neither Inuit nor Métis, and includes:

(i) Individuals who have Indian status pursuant to the *Indian Act*, R.S.C., 1985, c.I-5 [*Indian Act*];

(ii) Individuals who are entitled to be registered under section 6 of the *Indian Act* at the time of certification;

(iii) Individuals who met band membership requirements under sections 10-12 of the *Indian Act* and, in the case of the Removed Child Class members, have done so by the time of certification, such as where their respective First Nation community assumed control of its own membership by establishing membership rules and the individuals were found to meet the requirements under those membership rules and were included on the Band List; and

(iv) In the case of Jordan's Class members, individuals, other than those listed in sub-paragraphs (i)-(iii) above, recognized as citizens or members of their respective First Nations whether under agreement, treaties or First Nations' customs, traditions and laws.

(g) **"Jordan's Class"** means all First Nations individuals who were under the applicable provincial/territorial age of majority and who during the Class Period were denied a service or product, or whose receipt of a service or product was delayed or disrupted, on grounds, including but not limited to, lack of funding or lack of jurisdiction, or as a result of a jurisdictional dispute with another government or governmental department.

(h) **"Removed Child Class"** means all First Nations individuals who:

(i) Were under the applicable provincial/territorial age of majority at any time during the Class Period; and

(ii) Were taken into out-of-home care during the Class Period while they, or at least one of their parents, were ordinarily resident on a Reserve.

(i) **"Reserve"** means a tract of land, as defined under the *Indian Act*, the legal title to which is vested in the Crown and has been set apart for the use and benefit of an Indian band.

3. This proceeding is hereby certified as a class proceeding against the Defendant pursuant to Rule 334.16(1) of the *Federal Courts Rules*.

4. The Class shall consist of the Removed Child Class, Jordan's Class and Family Class, all as defined herein.

5. The nature of the claims asserted on behalf of the Class against the Defendant is constitutional, negligence and breach of fiduciary duty owed by the Crown to the Class.

6. The relief claimed by the Class includes damages, *Charter* damages, disgorgement, punitive damages and exemplary damages.

7. The following persons are appointed as representative plaintiffs:

(a) For the Removed Child Class: Xavier Moushoom, Ashley Dawn Louise Bach and Karen Osachoff;

(b) For the Jordan's Class: Jeremy Meawasige (by his litigation guardian, Jonavon Joseph Measwasige) and Noah Buffalo-Jackson (by his litigation guardian, Carolyn Buffalo); and

(c) For the Family Class: Xavier Moushoom, Jonavon Joseph Meawasige, Melissa Walterson, Carolyn Buffalo and Dick Eugene Jackson (also known as Richard Jackson),

all of whom are deemed to constitute adequate representative plaintiffs of the Class.

8. Class Counsel are hereby appointed as counsel for the Class.

9. The proceeding is certified on the basis of the following common issues:

(a) Did the Crown's conduct as alleged in the Consolidated Statement of Claim [Impugned Conduct] infringe the equality right of the Plaintiffs and Class Members under section 15(1) of the *Canadian Charter of Rights and Freedoms*? More specifically:

(i) Did the Impugned Conduct create a distinction based on the Class Members' race, or national or ethnic origin?

(ii) Was the distinction discriminatory?

(iii) Did the Impugned Conduct reinforce and exacerbate the Class Members' historical disadvantages?

(iv) If so, was the violation of section 15(1) of the *Charter* justified under section 1 of the *Charter*?

(v) Are *Charter* damages an appropriate remedy?

(b) Did the Crown owe the Plaintiffs and Class Members a common law duty of care?

(i) If so, did the Crown breach that duty of care?

(c) Did the Crown breach its obligations under the *Civil Code of Québec*? More specifically:

(i) Did the Crown commit fault or engage its civil liability?

(ii) Did the Impugned Conduct result in losses to the Plaintiffs and Class Members and if so, do such losses constitute injury to each of the Class Members?

(iii) Are Class Members entitled to claim damages for the moral and material damages arising from the foregoing?

(d) Did the Crown owe the Plaintiffs and Class Members a fiduciary duty?

(i) If so, did the Crown breach that duty?

(e) Can the amount of damages payable by the Crown be determined partially under Rule 334.28(1) of the *Federal Courts Rules* on an aggregate basis?

(i) If so, in what amount?

(f) Did the Crown obtain quantifiable monetary benefits from the Impugned Conduct during the Class Period?

(i) If so, should the Crown be required to disgorge those benefits?

(ii) If so, in what amount?

(g) Should punitive and/or aggravated damages be awarded against the Crown?

(i) If so, in what amount?

10. The Plaintiffs' Fresh as Amended Litigation Plan, as filed November 2, 2021 and attached hereto as Schedule "A", is hereby approved, subject to any modifications necessary as a result of this Order and subject to any further orders of this Court.

11. The form of notice of certification, the manner of giving notice and all other related matters shall be determined by separate order(s) of the Court.

12. The opt-out period shall be six months from the date on which notice of certification is published in the manner to be specified by further order of this Court.

13. The timetable for this proceeding through to trial shall also be determined by separate order(s) of the Court.

14. Pursuant to Rule 334.39(1) of the *Federal Courts Rules*, there shall be no costs payable by any party for this motion.

"Mandy Aylen"
Judge

I. DEFINITIONS

1. The definitions below will be used throughout this Litigation Plan. Any term defined in the Consolidated Statement of Claim that is also used in this Litigation Plan has the same meaning as that included in the Consolidated Statement of Claim or as otherwise defined by the Court.

Aggregate Damages Distribution Process means the system directed by the Court for the **Class Action Administrator** to distribute aggregate damages to **Approved Class Members**;

Approved Class Member(s) means **Approved Removed Child Class Member(s)** and/or **Approved Jordan's Class Member(s)** and/or **Approved Family Class Members**;

Approved Family Class Member(s) means a Family Class Member who has been approved by the **Class Action Administrator** as meeting the criteria for being a Family Class Member, including the brother, sister, mother, father, grandmother or grandfather of an Approved Removed Child Class Member (regardless of whether the Approved Removed Child Class Member is alive) and whose approval as a Family Class Member has not been successfully challenged;

Approved Jordan's Class Member(s) means a Jordan's Class Member who has been approved by the **Class Action Administrator** as meeting the criteria for being a Jordan's Class Member and whose approval as a Jordan's Class Member has not been successfully challenged;

Approved Removed Child Class Member(s) means a Removed Child Class Member who has been approved by the **Class Action Administrator** as meeting the criteria for being a Removed Child Class Member and whose approval as a Removed Child Class Member has not been successfully challenged;

Certification Notice means the information set out in Schedule A to this Litigation Plan, as may be subsequently amended and as approved by the Court;

CHRT Decision means the decision of the **CHRT** in the **CHRT Proceeding** dated January 26, 2016, bearing citation 2016 CHRT 2;

CHRT means the Canadian Human Rights Tribunal;

CHRT Proceeding means the proceeding before the **CHRT** under file number T1340/7008;

Claim Form means the form set out in Schedule C to this Litigation Plan used by the Removed Child Class Members and/or the Jordan's Class Members and/or the Family Class Members to submit a claim, as may be subsequently amended and as approved by the Court;

Class Action Administrator means any settlement administrator or other appropriate firm appointed by the Court to assist in the administration of the class proceeding;

Class Counsel means the consortium of law firms acting as co-counsel in this class proceeding, with the firms of Sotos LLP, Kugler Kandestin LLP, Miller Titerle + Company, Nahwegahbow, Corbiere and Faskens LLP as Solicitors of Record;

Class Member(s) means an individual who falls within the definition of the Removed Child Class and/or the Jordan's Class and/or the Family Class, as pleaded in the Consolidated Statement of Claim and as approved by the Court;

Common Issues means the issues listed in the Notice of Motion for Certification, or as found by the Court, as may be subsequently amended and as approved by the Court;

Common Issues Notice means the information set out in the notice regarding the **Common Issues** to be certified by the Court at Certification, as may be subsequently amended and as approved by the Court;

Crown Class Member Information means information to be provided by the Crown, at the request of the plaintiffs and/or as ordered by the Court, to the **Class Action Administrator** and/or **Class Counsel** regarding the names and last known contact information of all individuals who meet the criteria of Class Members as set out in the Consolidated Statement of Claim or as otherwise defined by the Court, including: (a) a list of all known Class Members' names and last known addresses using the information in the Crown's possession or under its control[1] as well as all individuals who received a product or service pursuant to Jordan's Principle following the CHRT Decision (estimated by the Crown in its representations to the CHRT to be individuals having received over 165,000 services under Jordan's Principle as of October 2018).

Individual Damage Assessment Form means the form set out in Schedule D to this Litigation Plan, as may be subsequently amended and as approved by the Court, to be used by **Approved Class Member(s)** to elect an individual assessment of their damages and commence an individual damage assessment under the **Individual Damage Assessment Process**;

Individual Damage Assessment Process means the procedure and system to be approved by the Court following the **Common Issues** trial to be used to assess and distribute damages to **Approved Class Member(s)** who have requested an individual damage assessment by submitting an **Individual Damage Assessment Form**;

Notice Program means the process, set out in the Litigation Plan, for communicating the **Certification Notice** and/or the **Common Issues Notice** to **Class Members**, as may be subsequently amended and as approved by the Court;

---

[1] Where Class Members are known to be represented by counsel, only their name should be provided along with their counsel's name and address.

Opt Out Form means the form set out in Schedule B to this Litigation Plan used by Class Members to opt out of the class proceeding, as may be subsequently amended and as approved by the Court;

Opt Out Period means the deadline, proposed by the plaintiffs as six months from the date on which notice of certification to the Class is published in the manner to be specified by the Court or as otherwise determined by the Court, to opt out of the class proceeding;

Opt Out Procedures means the procedures, set out in the Litigation Plan, for Class Members to opt out of this class proceeding, as may be subsequently amended and as approved by the Court; and

Special Opt Out Procedures means the procedures, set out in the Litigation Plan, for Class Members who have already commenced a civil proceeding in Canada or who are known by the Crown to have already retained legal counsel to opt out of this class proceeding, as may be subsequently amended and as approved by the Court.

II. OVERVIEW

2. The plaintiffs have commenced this action on behalf of First Nations individuals who allege that the Crown has engaged in the discriminatory underfunding of child and family services and breached the equality obligations underlying Jordan's Principle. The class action advances the rights of tens of thousands of First Nations children, former children and family members.

3. This Litigation Plan is advanced as a workable method of advancing the proceeding on behalf of the Class and of notifying Class Members as to how the class proceeding is progressing, pursuant to rule 334.16(1)(e)(ii) of the *Federal Court Rules*. The Litigation Plan is modelled on the class action relating to the Indian Residential Schools.[2]

4. This Litigation Plan sets out a detailed plan for the common stages of this litigation, and sets out, on a without prejudice basis, an early plan for how the individual stage of the action may progress. Given the early stage of the litigation, the plan is necessarily subject to substantial revisions as the case progresses.

5. The plaintiffs are mindful that the CHRT has awarded statutory compensation to a subset of the Class Members pursuant to the CHRA (*First Nations Child & Family Caring Society of Canada et al. v. Attorney General of Canada (representing the Minister of Indigenous and Northern Affairs Canada)*, 2019 CHRT 39). If CHRT compensation is paid to any Class Members, the plaintiffs will seek a determination from the Court as to whether the Crown is entitled to a set-off or deduction of damages in this action for such amounts.

---

[2] See *Baxter v Canada (Attorney General)*, 2006 CanLII 41673 (Ont Sup Ct), and subsequent orders of the Court. See also information available on the website of the Indian Residential Schools Adjudication Secretariat, online <http://www.iap-pei.ca/home-eng.php>.

III. PRE-CERTIFICATION PROCESS

A. The Parties

i. The Plaintiffs

6. The plaintiffs have proposed three classes:

   (a) the Removed Child Class, represented by Xavier Moushoom, Ashley Dawn Louise Bach, and Karen Osachoff;

   (b) the Family Class, represented by Xavier Moushoom, Jonavon Joseph Meawasige, Melissa Walterson, Carolyn Buffalo, and Dick Eugene Jackson also known as Richard Jackson; and

   (c) the Jordan's Class, represented by Jeremy Meawasige, by his litigation guardian, Jonavon Joseph Meawasige; and Noah Buffalo-Jackson, by his litigation guardian, Carolyn Buffalo.

ii. The Defendant

7. The defendant is the Crown.

B. The Pleadings

i. Consolidated Statement of Claim

8. The plaintiffs have delivered a Consolidated Statement of Claim issued with leave of the Honourable Justice St-Louis dated July 7, 2021.

ii. Statement of Defence

9. The Crown has not delivered a Statement of Defence.

iii. Third Party Claim

10. The Crown has not issued any Third Party Claim.

C. Pre-Certification Communication Strategy

i. Responding to Inquiries from Putative Class Members

11. Both before and since the commencement of this class proceeding, Class Counsel have received many communications from Class Members affected by this class proceeding.

12. With respect to each inquiry, the individual's name, address, email and telephone number is added to a confidential database. Class Members are asked to register on the websites of Class Counsel. Once registered, they receive regular updates on the progress of the class proceeding in French and English. Any individual Class Members who contact Class Counsel are responded to in their preferred language.

ii. Pre-Certification Status Reports

13. In addition to responding to individual inquiries, Class Counsel have created a webpage concerning the class proceeding in English and French (see: https://sotosclassactions.com/cases/current-cases/first-nations-youth/). The most current information on the status of the class proceeding is posted and is updated regularly in English and French.

14. Copies of the publicly filed court documents and court decisions are accessible from the webpage. In addition, phone numbers for Class Counsel in Quebec and Ontario as well as email contact information are provided.

15. Class Counsel send update reports to Class Members who have provided their contact information and have indicated an interest in being notified of further developments in the class proceeding.

iii. Pre-certification outreach

16. Class Counsel have presented the proposed class action to a council of First Nations social services delivery personnel for the Province of Québec and the region of Labrador, as well as the First Nations youth directors forum in British Columbia. Class Counsel are in the process of arranging similar presentations to affected communities in Québec and elsewhere in Canada.

D. Settlement Conference

i. Pre-Certification Settlement Conference

17. The plaintiffs have participated in a pre-Certification mediation to determine whether any or all of the issues arising in the class proceeding can be resolved. Mediation is ongoing and may require that some of the targeted timelines in this Litigation Plan be amended on agreement of the parties or as otherwise ordered by the Court to allow negotiations to advance.

E. Timetable

IV. POST-CERTIFICATION PROCESS

A. Timetable

i. Plaintiffs' Timetable for the Post-Certification Process

18. The plaintiffs intend to proceed to trial on an expedited basis or a hybrid summary judgment/*viva voce* trial. It is anticipated that all of the documentary evidence produced by the Crown in the CHRT Proceeding will be relevant and producible in this class proceeding. Because of the extensive documentary production in the CHRT Proceeding, the plaintiffs expect few, if any, disputes as to documentary productions in this case relating to the time period covered by the CHRT Proceeding (*i.e.*, 2006-present). Furthermore, in light of the extensive testimony given at the CHRT Proceeding, it is anticipated that oral discovery can proceed quickly after certification and can be completed in a limited period of time. The plaintiffs have less clarity at this time regarding productions pertaining to the 1991-2006 period.

19. The plaintiffs propose that the following post-Certification process timetable, as explained in detail below:

Certification Notice to Class Members commences	at a date to be determined by the Court after certification
Exchange Affidavits of Documents within	90 days after Certification Notice to Class Members

Motions for Production of Documents, Multiple Examinations of Crown representatives or for Examinations of Non-Parties to be conducted within	120 days after Certification Notice to Class Members
Examinations for Discovery to be conducted within	150 days after Certification Notice to Class Members
Certification Notice to Class Members completed within	60 days from a date to be determined by the Court
Trial Management Conference re: Expert Evidence	180 days after Certification Notice to Class Members
Motions arising from Examinations for Discovery within	180 days after Certification Notice to Class Members
Undertakings answered within	200 days after Certification Notice to Class Members
Further Examinations, if necessary, within	240 days after Certification Notice to Class Members
Common Issues Pre-Trial to be conducted	290 days after Certification Notice to Class Members
Opt Out Period deadline	Six months after Notice of Certification to Class Members
Common Issues Trial or Hybrid Trial to be conducted within	330 days after Certification Notice to Class Members

B. Certification Notice, Notice Program and Opt Out Procedures

i. Certification Notice

20. The Certification Notice and all other notices to Class Members provided by the plaintiffs will, once finalized and approved by the Court, be translated into French. The plaintiffs will explore whether it will be necessary to translate the Certification Notice and/or other notices into some First Nations languages, subject to Court approval.

21. The Certification Notice will, subject to further amendments, be in the form set out in Schedule A hereto.

ii. Notice Program

22. The plaintiffs propose to communicate the Certification Notice to Class Members through the following Notice Program.

23. The plaintiffs will provide Certification Notice to Class Members by arranging to have the Certification Notice (and its translated versions whenever possible) communicated/published in the following media starting on a date to be determined by the Court, as frequently as may be reasonable or as directed by the Court under rule 334.32 of the *Federal Courts Rules*. In particular, the plaintiffs propose the following means of providing Certification Notice:

(a) A press release on the start date of notice of certification to the Class to be determined by order of the Court;

(b) Direct communication with Class Members:

(i) by email or regular mail to the last known contact information of Class Members provided by the Crown (*i.e.*, Crown Class Member Information);

(ii) by email or regular mail to all Class Members who have provided their contact information to Class Counsel, including through the Class Proceeding's webpage;

(iii) by regular mail to the last known addresses of all Status Card holders in Canada born on or after April 1, 1991;

(c) Distribution by the Assembly of First Nations to its membership of First Nations bands across Canada;

(d) Email to First Nations children's aid societies across Canada;

(e) Circulation through the following media:

(i) Aboriginal newspapers/publications such as First Nations Drum, The Windspeaker, Mi'kmaq Maliseet Nations News, APTN National News;

(ii) radio outlets, such as Aboriginal radio CFWE, CBC national and CBC regional;

(iii) television outlets, such as on The Aboriginal Peoples Television Network; and / or

(iv) social media outlets, such as Facebook and Instagram.

iii. Opt Out Procedures

24. The plaintiffs propose Opt Out Procedures for Class Members who do not wish to participate in the class proceeding.

25. The Certification Notice will include information about how to Opt Out of the class proceeding and will provide information about how to obtain and submit the appropriate Opt Out Forms to the Class Action Administrator and/or Class Counsel.

26. There will be one standard Opt Out Form for all Class Members.

27. Class Members will be required to file the Opt Out Form with the Class Action Administrator and/or Class Counsel within the Opt Out Period.

28. The Class Action Administrator or Class Counsel shall, within 30 days after the expiration of the Opt Out Period, deliver to the Court and the Parties an affidavit listing the names of all persons who have opted out of the Class Action.

iv. Special Opt Out Procedures

29. The plaintiffs propose Special Opt Out Procedures for Class Members who are either named party plaintiffs in a civil proceeding in Canada or who are known by the Crown to have retained legal counsel in respect of the subject matter of this action with the express purpose of starting a separate action against the Crown.

30. Ongoing civil actions by Class Members who do not opt out of the Class Action should be dealt with in a manner to be determined by this Court or by the Court in which such proceedings are brought.

C. Identifying and Communicating with Class Members

i. Identifying Class Members

31. As stated above, the plaintiffs intend to request the Crown Class Member Information.

ii. Database of Class Members

32. Class Counsel will maintain a confidential database of all Class Members who contact Class Counsel. The database will include each individual's name, address, telephone number, and/or email address where available.

iii. Responding to Inquiries from Class Members

33. Class Counsel and their staff respond to each inquiry by Class Members.

34. Class Counsel have a system in place to allow for responses to inquiries by Class Members in their language of choice whenever possible.

iv. Post Certification Status Reports

35. In addition to responding to individual inquiries, Class Counsel will continually update the webpage dedicated to this class action with information concerning the status of the class proceeding.

36. Class Counsel will send update reports to Class Members who have provided their contact information. These update reports will be sent as necessary or as directed by the Court.

D. Documentary Production

i. Affidavit/List of Documents

37. The plaintiffs will be required to deliver an Affidavit of Documents within 90 days after after notice of certification is given to Class Members. The Crown will similarly be required to deliver a List of Documents within 90 days after notice of certification is given to Class Members.

38. The Parties are expected to serve Supplementary Affidavits (or Lists) of Documents as additional relevant documents are located.

ii. Production of Documents

39. All Parties are expected to provide, at their own expense, electronic copies of all Schedule "A" productions at the time of delivering their Affidavit of Documents. All productions are to be made in electronic format.

40. Documentary productions are to include, but not be limited to, all documents produced and exhibits tendered in the CHRT Proceedings.

iii. Motions for Documentary Production

41. Any motions for documentary production shall be made within 120 days after certification notice is given to Class Members.

iv. Document Management

42. The Parties will each manage their productions with a compatible document management system, or as directed by the Court. All documents are to be produced in OCR format.

43. All productions should be numbered and scanned electronically to enable quick access and efficient organization of documents.

E. Examinations for Discovery

44. Examinations for Discovery will take place within 150 days after certification notice is given to Class Members.

45. The plaintiffs expect to request the Crown's consent to examine more than one Crown representative. In the event that a dispute arises in this regard, the plaintiffs propose to bring a motion within 120 days after certification notice is given to Class Members.

46. The plaintiffs anticipate that the Examination for Discovery of a properly selected and informed officer of the Crown will take approximately 10 days, subject to refusals and undertakings.

47. The plaintiffs anticipate that the Examination for Discovery of the representative plaintiffs will take approximately one day, subject to refusals and undertakings.

F. Interlocutory Matters

i. Motions for Refusals and Undertakings

48. Specific dates for motions for undertakings and refusals that arise from the Examinations for Discovery will be requested upon Certification. Motions for refusals and undertakings will be heard within 180 days after certification notice is given to Class Members.

ii. Undertakings

49. Undertakings are to be answered within 200 days after certification notice is given to Class Members.

iii. Re-attendances and Further Examinations for Discovery

50. Any re-attendances or further Examinations for Discovery required as a result of answers to undertakings or as a result of the outcome of the motions for refusals and undertakings should be completed within 240 days after certification notice is given to Class Members.

G. Expert Evidence

i. Identifying Experts and Issues

51. A Trial Management Conference will take place following Examinations for Discovery at which guidelines for identifying experts and their proposed evidence at trial will be determined.

H. Determination of the Common Issues

i. Pre-Trial of the Common Issues

52. Upon Certification, the Court will be asked to assign a date for a Pre-Trial relating to the Common Issues trial.

53. The plaintiffs expect that a full day will be required for a Pre-Trial and will request that the Pre-Trial be held within 290 days after certification notice is given to Class Members and, in any event, at least 90 days before the date of the Common Issues trial.

ii. Trial of the Common Issues

54. Upon Certification, the Court will be asked to assign a date for the Common Issues trial.

55. The plaintiffs propose that the trial of the Common Issues be held 330 days after certification notice is given to Class Members.

56. The length of time required for the Common Issues trial will depend on many factors and will be determined at the Trial Management Conference.

V. POST COMMON ISSUES DECISION PROCESS

A. Timetable

i. Plaintiffs' Timetable for the Post-Common Issues Decision Process

57. The plaintiffs propose that the following timetable be imposed by the Court following the Court's judgment on the Common Issues:

Common Issues Notice provided	Within 90 days of Common Issues decision
Individual Issue Hearings, if any, begin	120 days after decision
Individual Damage Assessments, if any, begin	240 days after decision
Deadline to Submit Claim Forms (as of right)	Within 1 year of decision
Deadline to Submit Claim Forms (as of right in prescribed circumstances or with leave of the Court)	1 year after decision

B. Common Issues Notice

i. Notifying Class Members

58. The Common Issues Notice will, subject to further amendments, be substantially in the form approved by the Court at the Common Issues trial. The Common Issues Notice may contain, amongst others, information on any aggregate damages awarded and any issues requiring individual determination, as approved by the Court.

59. The plaintiffs propose to circulate the Common Issues Notice within 90 days after the Common Issues judgment.

60. The Common Issues Notice will be circulated in the same manner as set out above dealing with the Certification Notice or as directed by the Court.

C. Claim Forms

i. Use of Claim Forms

61. The Court will be asked to approve under rule 334.37 the use of standardized Claim Forms by Class Members who may be entitled to a portion of the aggregate damage award or who may be entitled to have an individual assessment.

ii. Obtaining and Filing Claim Forms

62. The procedure for obtaining and filing Claim Forms will be set out in the Common Issues Notice.

63. The plaintiffs propose to use a single standard Claim Form, substantially in the form attached as Schedule C, for all three classes, subject to further amendments and as approved by the Court.

64. The plaintiffs propose that counselling be made available to Class Members in need of support and assistance when completing the Claim Forms. Where necessary, a process for appointing a guardian or trustee to assist the Class Members will be developed.

65. Before completing a Claim Form, Class Members will be able to review information about them in the possession of Canada relevant to their claim (the Crown Class Member Information). That information may include:

(a) any records relating to the Class Member's voluntary or involuntary placement in out-of-home care during the Class Period;

(b) any records relating to a need by the Class Member for a service or product;

(c) any records relating to a request made by the Class Member for a service or product;

(d) any records relating to the denial of a service or product to the Class Member;

(e) any records relating to any service(s) or product(s) provided by the Crown to the Class Member; and/or

(f) any records relating to the family status or family relationship between a Family Class Member and a Removed Child Class Member or a Jordan's Class Member.

66. Class Members will be required to file the appropriate Claim Form with the Class Action Administrator and/or Class Counsel within the deadlines set out below or as directed by the Court.

67. The Class Action Administrator will be responsible for receiving all Claim Forms.

iii. Deadline for Filing Claim Forms

68. Class Members will be advised of the deadline for filing Claim Forms in the Common Issues Notice.

69. The plaintiffs propose that Class Members be given one year, or such period as set out by the Court, after the Common Issues judgment to file Claim Forms as of right.

70. The plaintiffs propose that Class Members be entitled to file Claim Forms more than one year after the Court's judgment on the Common Issues in certain circumstances prescribed by the Court (*i.e.*, lack of awareness of entitlement, etc.) or with leave of the Court (*i.e.*, based on mental or physical health issues, etc.).

D. Determining and Categorizing Class Membership

i. Approving Removed Child Class Members

71. The Class Action Administrator will determine whether an individual submitting a Claim Form as a Removed Child Class Member properly qualifies as a Class Member.

72. In addition, the Class Action Administrator will determine and categorize the duration of the Removed Child Class Member's presence in out-of-home care. The Class Action Administrator will also determine the number of out-of-home care locations that the Removed

Child Class Member was placed in, as well as whether such locations were on or off Reserve and whether such locations were within the community of the Class Member.

73. The Class Action Administrator will make these determinations by referring to the information set out in the Claim Form as well as the Crown Class Member Information.

74. The Class Action Administrator will, where appropriate and necessary, request in writing further information from the individual filing the Removed Child Class Claim Form or the Crown to make these determinations.

ii. Approving Jordan's Class Members

75. The Class Action Administrator will determine whether an individual submitting a Claim Form as a Jordan's Class Member properly qualifies as a Class Member.

76. The Class Action Administrator will make these determinations following guidelines determined by the Court at the Common Issues trial in part by referring to the information set out in the Claim Form. Such guidelines may include: (a) whether the Class Member needed a service or product at any point during the Class Period; (b) whether the Class Member was denied that service or product; (c) whether the Class Member's receipt of a service or product was delayed or disrupted; (d) whether such denial, delay or disruption was based on lack of funding, lack of jurisdiction or a jurisdictional dispute between governments or government departments; and/or (e) whether such denial, disruption or delay happened while the Class Member was under the applicable provincial/territorial age of majority.

77. The Class Action Administrator will also make these determinations in part by referring to the Crown Class Member Information regarding the number of Class Members who have received a service or product under Jordan's Principle since the CHRT Decision.

78. The Class Action Administrator will, where appropriate and necessary, request in writing further information from the individual submitting the Jordan's Class Claim Form or the Crown to make these determinations.

iii. Approving Family Class Members

79. The Class Action Administrator will determine whether an individual submitting a Family Class Claim Form properly qualifies as a Family Class Member.

80. These determinations will be made by the Class Action Administrator by referring to Crown Class Member Information and the information set out in the Claim Form with respect to the relationship of the proposed Family Class Member with an Approved Removed Child Class Member.

81. The Class Action Administrator will, where appropriate and necessary, request in writing further information from the individual filing the Claim Form to make these determinations.

iv. Deceased Class Members

82. The estate of a deceased Class Member may submit a Claim Form if the deceased Class Member died on or after April 1, 1991.

83. If the deceased Class Member would otherwise have qualified as an Approved Class Member, the estate will be entitled to be compensated in accordance with the Aggregate Damages Distribution Process. The estate will not have the option to proceed under the Individual Damage Assessment Process except with leave of the Court.

v. Notifying Class Members, Challenging and Recording Decisions

84. Within 30 days of receipt of a Claim Form, the Class Action Administrator will notify the individual of its decision on whether the individual is an Approved Class Member. Individuals

who are not approved as Class Members will be provided with information on the procedures to follow to challenge the decision of the Class Action Administrator. The plaintiffs propose that these procedures include an opportunity to resubmit an amended Claim Form with supporting documentation capable of verifying that the individual is a Class Member.

85. All interested parties will be provided with the ability to appeal a decision by the Class Action Administrator to the Court or in a manner to be prescribed. Class Counsel may challenge the decision on behalf of affected individuals.

86. The Class Action Administrator will keep records of all Approved Class Members and their respective Claim Forms and will provide this information to Class Counsel, the Crown and other interested parties on a monthly basis. Class Counsel and/or other interested parties will have 30 days after receiving this information to challenge the Class Action Administrator's decision by advising the Class Action Administrator and the other affected parties in writing of the basis for their challenge. The responding party will be given 30 days thereafter to respond in writing to the challenge at which time the Class Action Administrator will reconsider its decision and advise all parties.

E. Aggregate Damages Distribution Process

i. Distribution of Aggregate Damages

87. The Class Action Administrator will distribute the aggregate damages to all Approved Class Members in the manner directed by the Court.

88. The plaintiffs will propose that Approved Class Members be entitled to a proportion of the aggregate damages as determined by the Class Action Administrator based on factors to be approved by the Court, including but not limited to: (a) the duration of the Class Member's

presence in out-of-home care; (b) the number of out-of-home care locations where the Class Member was placed as a child; (c) the duration of deprivation from a service or product as a result of a delay, denial or disruption contrary to Jordan's Principle; and (d) the family relationship of the Family Class Member to a given Removed Child Class Member.

89. The Class Action Administrator, upon advising Approved Class Members of its decision on their membership as set out above, will within a reasonable period of time to be determined by the Court, advise the Approved Class Members of the proportion of aggregate damages owing to each Approved Class Member under the Aggregate Damages Distribution Process to be approved by the Court.

90. In addition, if applicable, the Class Action Administrator will provide Approved Class Members with a package of materials including: information on how to collect their aggregate damage awards, information on Class Members' ability to proceed through the Individual Damage Assessment Process, copies of the Individual Damage Assessment Form along with a guide on how to complete the form, and contact information for obtaining independent legal advice and counselling. Such information is to be provided in a culturally responsive and appropriate style, making full use of interactive media, including video tutorials.

ii. Seeking an Individual Damage Assessment

91. Approved Class Members, when notified of their entitlement to aggregate damages, may be given information on their right to have their compensation individually assessed under the Individual Damage Assessment Process set out below.

F. Individual Damage Assessment Process

i. Individual Damage Assessment Forms

92. When Approved Class Members are notified of their aggregate damage entitlement and information on their right to proceed under the Individual Damage Assessment Process, they will be provided with an Individual Damage Assessment Form as set out in Schedule D.

93. If applicable, the plaintiffs propose that a request for individual damages be made by sending an Individual Damage Assessment Form to the Class Action Administrator, and that only those individuals who wish to proceed through the Individual Damage Assessment Process be required to submit Individual Damage Assessment Forms.

ii. Individual Damage Assessments

94. The Court may be asked to approve the use of an Individual Damage Assessment Process after a judgment on the Common Issues or otherwise as directed by the Court.

95. The Individual Damage Assessment Process would be available to all Approved Class Members except those who are found by the Court not to be entitled to individual damages following the Common Issues trial.

iii. Individual Issue Hearings

96. The Court will be asked to provide directions, or to appoint persons to conduct references under rule 334.26 of the *Federal Courts Rules* or appoint a judge to conduct test cases involving selected Approved Class Members who are proceeding under the Individual Damage Assessment Process to assist with the matters that may or may not remain in issue after the determination of the Common Issues, such as:

(a) Hearing rules for individual assessments;

(b) A compensation matrix for individual damages;

(c) Assistance in resolving disputes relating to the definitions of key terms such as "cultural and language loss", "pain and suffering", "physical abuse", and "sexual abuse"; and

(d) Other matters raised by the Court or the parties during the Common Issues litigation.

G. Class Proceeding Funding and Fees

i. Plaintiffs' Legal Fees

97. The plaintiffs' fees are to be paid on a contingency basis, subject to the Court's approval under rule 334.4 of the *Federal Courts Rules*.

98. The agreement between the representative plaintiffs and Class Counsel states that legal fees and disbursements to be paid to Class Counsel shall be on the following basis:

(a) Aggregate damages recovery: 20% of the first two hundred million dollars ($200,000,000) in recovery by settlement or judgment, plus 10% of any amounts recovered by settlement or judgment beyond the first two hundred million dollars; and

(b) Individual damages recovery: 25% of settlement or judgment.

ii. Funding of Disbursements

99. Funding of legal disbursements for the representative plaintiffs has been, and will continue to be, available through Class Counsel, unless the plaintiffs and Class Counsel subsequently deem it to be in the best interests of the Class to obtain third-party funding. Class Counsel will advise the Court of such third-party funding and seek approval thereof.

H. Settlement Issues

i. Settlement Offers and Negotiations

100. The plaintiffs have been conducting settlement negotiations with the Crown with a view to achieving a fair and timely resolution.

ii. Mediation and Other Non Binding Dispute Resolution Mechanisms

101. The plaintiffs have been participating in mediation and negotiations in an effort to try to resolve the dispute or narrow the issues in dispute between the Parties.

I. Review of the Litigation Plan

i. Flexibility of the Litigation Plan

102. This Litigation Plan will be reconsidered on an ongoing basis and may be revised under the continued case management authority of the Court before or after the determination of the Common Issues or as the Court sees fit.

FIRST NATIONS YOUTH CARE (THE MILLENNIUM SCOOP) CLASS ACTION

PROPOSED NOTICE OF CERTIFICATION

THIS NOTICE MAY AFFECT YOUR RIGHTS. PLEASE READ CAREFULLY.

The Nature of the Lawsuit

In March 2019, Sotos LLP, Kugler Kandestin LLP and Miller Titerle + Co. (collectively "Class Counsel") commenced an action on behalf of First Nations plaintiffs in the Federal Court of Canada in Montreal, against the Attorney General of Canada (the "Crown").

The lawsuit claims that starting in 1991 the Crown instituted discriminatory funding policies across Canada that led to First Nations children being removed from their homes and communities and placed in out-of-home care. The lawsuit also claims that the Crown delayed, disrupted or denied the delivery of needed public services and products to First Nations youth contrary to Jordan's Principle.

The action was brought on behalf of a Class of:

(a) all First Nations youths who were taken into out-of-home care since April 1, 1991, while they or at least one of their parents were ordinarily resident on a Reserve;

(b) all First Nations youths who were denied a public service or product, or whose receipt of a public service or product was delayed or disrupted, on the grounds of lack of funding or lack of jurisdiction, or as a result of a jurisdictional dispute with another government or governmental department (contrary to Jordan's Principle);

(c) family members of the Class Members cited in (a) above.

By order dated [**INSERT DATE**], The Honourable Justice St-Louis certified the action as a class proceeding, appointing Xavier Moushoom and Jeremy Meawasige (by his litigation guardian, Maurina Beadle) as representative plaintiffs for the class.

The Court found that the following issues affecting the Class will be tried at a Common Issues trial:

- [**INSERT CERTIFIED COMMON ISSUE**]
- …

Participation in the Class Action

If you fall within the class definition, you are automatically included as a member of the Class, unless you choose to opt out of the Class Action, as explained below. All members of the Class will be bound by the judgment of the Court, or any settlement reached by the parties and approved by the Court.

At this juncture, the Court has not taken a position as to the likelihood of recovery for the representative plaintiffs or the Class, or with respect to the merits of the claims or defences asserted by the Crown.

Fees and Disbursements

You do not need to pay any legal fees out of your own pocket. A retainer agreement has been entered into between the representative plaintiffs and Class Counsel with respect to legal fees. The agreement provides that the law firms have been retained on a contingency fee basis, which means they will only be paid their fees in the event of a successful result in the litigation or a Court-approved settlement.

You will not be responsible for Defendant's legal costs if the class action is unsuccessful. Any fee paid to lawyers for the Class is subject to the Court's approval.

Opt Out

If you are a class member and wish to exclude yourself from this class proceeding ("opt out"), you must complete and return the "Class Member Opt Out" form by no later than [**INSERT DATE**]. The Opt Out form may be downloaded at: [**INSERT WEBSITE ADDRESS**].

Class members who choose to opt out within the above noted deadline will not recover any monies if the representative plaintiffs are successful in this action. If class members do not choose to opt out by the deadline, they will be bound by any judgment ultimately obtained in this class action, whether favourable or not, or any settlement if approved by the Court.

Contact Information

If you have any questions or concerns about the matters in this Notice or the status of the class action, you may contact Class Counsel in a number of ways.

INDIVIDUAL DAMAGE ASSESSMENT FORM

TO:
[CLASS ACTION ADMINISTRATOR TO BE APPOINTED]
[Address]
[Email]
[Fax]
[Phone number]

ATTN: [CLASS ACTION ADMINISTRATOR TO BE APPOINTED]

I, _____ [insert full name(s), including maiden name if applicable], have been notified that I am an Approved Removed Child Class Member or Approved Jordan's Class Member. My claim number is _____ [insert assigned claim number].

I have been provided with a package of information outlining and explaining my option to request an individual damage assessment in accordance with the Individual Damage Assessment Process.

I am also aware that I can obtain independent legal advice with respect to this request and can obtain assistance to complete this form at no charge to me by contacting [insert assigned contact #].

Below is information relating to my experience in out-of-home care and the impacts and harms that resulted from my experience:

[The Individual Damage Assessment Form will be designed after a Court decision on the Common Issues. The goal of the Individual Damage Assessment Form though will be to obtain, amongst others, the following information from Approved Class Members:

- *Information relating to the Class Member's age at apprehension, the foster households where the Class Member was placed, duration of out-of-home care;*
- *Information relating to any abuse on the Class Member, including each incident of a compensable harm/wrong, such as the dates, places, times of the incidents and information about the alleged perpetrator for each incident;*
- *Information relating to compensable impacts, including cultural and language impacts;*
- *A narrative relating to the experience of the individual while in care;*
- *The reason(s) for apprehension;*
- *Whether expert evidence will be provided to support a claim for certain consequential harms such as past and future income loss;*

- *Information on the treatment records including records of customary or traditional counsellors or healers they will be submitting to assist in proving either the abuse or the harm suffered or both;*
- *Authorizations for the Crown to obtain documents; and*
- *Such further and other information that is deemed necessary and appropriate.]*

Below is information relating to my experience with the denial/delay/disruption of the receipt of a public service or product and the impacts and harms that resulted from my experience:

[The Individual Damage Assessment Form will be designed after a Court decision on the Common Issues. The goal of the Individual Damage Assessment Form though will be to obtain, amongst others, the following information from Approved Class Members:

- *Any conditions or circumstances that required a public service or product;*
- *Reasons for denial of a public service or product;*
- *Department(s) of contact;*
- *Authorizations for the Crown to obtain documents; and*
- *Such further and other information that is deemed necessary and appropriate.]*

Dossier : T-402-19
T-141-20

Référence : 2021 CF 1225

[TRADUCTION FRANÇAISE]

Ottawa (Ontario), le 26 novembre 2021

En présence de madame la juge Aylen

RECOURS COLLECTIF

ENTRE :

XAVIER MOUSHOOM, JEREMY MEAWASIGE (représenté par son tuteur à l'instance, JONAVON JOSEPH MEAWASIGE) ET JONAVON JOSEPH MEAWASIGE

demandeurs

et

LE PROCUREUR GÉNÉRAL DU CANADA

défendeur

ENTRE :

ASSEMBLÉE DES PREMIÈRES NATIONS, ASHLEY DAWN LOUISE BACH, KAREN OSACHOFF, MELISSA WALTERSON, NOAH BUFFALO-JACKSON (représenté par sa tutrice à l'instance, CAROLYN BUFFALO), CAROLYN BUFFALO ET DICK EUGENE JACKSON, également connu sous le nom de RICHARD JACKSON

demandeurs

et

SA MAJESTÉ LA REINE
REPRÉSENTÉE PAR LE PROCUREUR GÉNÉRAL DU CANADA

défenderesse

ORDONNANCE ET MOTIFS

VU LA REQUÊTE déposée par les demandeurs, sur consentement et à l'égard de laquelle la décision a été prise uniquement sur la base de prétentions écrites conformément à l'article 369 des *Règles des Cours fédérales*, en vue d'obtenir une ordonnance :

a) accordant aux demandeurs une prorogation du délai pour qu'ils puissent déposer la présente requête en autorisation après le délai prévu à l'alinéa 334.15(2)b);

b) autorisant la présente instance comme recours collectif et définissant le groupe;

c) énonçant la nature des réclamations présentées au nom du groupe et les réparations demandées par le groupe;

d) précisant les points de droit et de fait communs en litige;

e) nommant les demandeurs indiqués ci-après à titre de représentants demandeurs;

f) approuvant le plan de déroulement de l'instance;

g) accordant toute autre réparation;

VU les documents relatifs à la requête déposés par les demandeurs;

VU que la défenderesse donne son consentement à l'ensemble de la requête déposée;

VU que la Cour est convaincue que, dans les circonstances de l'espèce, une prorogation du délai doit être accordée pour que la présente requête en autorisation puisse être déposée après le délai prévu à l'alinéa 334.15(2)b);

VU que, même si le consentement de la défenderesse rend moins nécessaire une approche rigoureuse quant à la question de savoir si la présente instance devrait être autorisée comme recours collectif, il ne dispense toutefois pas la Cour de l'obligation de veiller au respect des exigences relatives à l'autorisation prescrites à l'article 334.16 [voir *Varley c Canada (Procureur général)*, 2021 CF 589];

VU que le paragraphe 334.16(1) des *Règles des Cours fédérales* prévoit ce qui suit :

Sous réserve du paragraphe (3), le juge autorise une instance comme recours collectif si les conditions suivantes sont réunies :	Subject to subsection (3), a judge shall, by order, certify a proceeding as a class proceeding if
a) les actes de procédure révèlent une cause d'action valable;	(a) the pleadings disclose a reasonable cause of action;
b) il existe un groupe identifiable formé d'au moins deux personnes;	(b) there is an identifiable class of two or more persons;
c) les réclamations des membres du groupe soulèvent des points de droit ou de fait communs, que ceux-ci prédominent ou non sur ceux qui ne concernent qu'un membre;	(c) the claims of the class members raise common questions of law or fact, whether or not those common questions predominate over questions affecting only individual members;

d) le recours collectif est le meilleur moyen de régler, de façon juste et efficace, les points de droit ou de fait communs;	(d) a class proceeding is the preferable procedure for the just and efficient resolution of the common questions of law or fact; and
e) il existe un représentant demandeur qui :	(e) there is a representative plaintiff or applicant who
(i) représenterait de façon équitable et adéquate les intérêts du groupe,	(i) would fairly and adequately represent the interests of the class,
(ii) a élaboré un plan qui propose une méthode efficace pour poursuivre l'instance au nom du groupe et tenir les membres du groupe informés de son déroulement,	(ii) has prepared a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members as to how the proceeding is progressing,
(iii) n'a pas de conflit d'intérêts avec d'autres membres du groupe en ce qui concerne les points de droit ou de fait communs,	(iii) does not have, on the common questions of law or fact, an interest that is in conflict with the interests of other class members, and
(iv) communique un sommaire des conventions relatives aux honoraires et débours qui sont intervenues entre lui et l'avocat inscrit au dossier.	(iv) provides a summary of any agreements respecting fees and disbursements between the representative plaintiff or applicant and the solicitor of record.

VU que conformément au paragraphe 334.16(2), pour décider si le recours collectif est le meilleur moyen de régler les points de droit ou de fait communs de façon juste et efficace, tous les facteurs pertinents sont pris en compte, notamment les suivants : a) la prédominance des points de droit ou de fait communs sur ceux qui ne concernent que certains membres; b) la proportion de membres du groupe qui ont un intérêt légitime à poursuivre des instances séparées; c) le fait que le recours collectif porte ou non sur des réclamations qui ont fait ou qui font l'objet d'autres instances; d) l'aspect pratique ou l'efficacité moindres des autres moyens de régler les réclamations; et e) les difficultés accrues engendrées par la gestion du recours collectif par rapport à celles associées à la gestion d'autres mesures de redressement;

VU que :

a) La conduite de la Couronne en cause dans le présent recours collectif envisagé, telle qu'elle est exposée dans la déclaration commune, porte sur deux formes de discrimination alléguées à l'égard d'enfants des Premières Nations : i) le financement par la Couronne des services à l'enfance et à la famille destinés aux enfants des Premières Nations et l'incitation ainsi créée à retirer les enfants de leur milieu familial; ii) le fait que la Couronne n'ait pas respecté le principe de Jordan, qui est une obligation juridique visant à éviter les lacunes, les retards, les interruptions ou les refus dans les services et les produits que doivent recevoir les enfants des Premières Nations, ce qui serait contraire à leurs droits à l'égalité garantis par la Charte.

b) Comme les demandeurs l'ont résumé dans leurs observations écrites, la déclaration commune contient essentiellement les allégations suivantes :

   i) La Couronne a sciemment sous-financé les services à l'enfance et à la famille destinés aux enfants des Premières Nations vivant sur une réserve et au Yukon, ce qui a empêché les organismes de services d'aide à l'enfance d'offrir des services de prévention adéquats aux enfants et aux familles des Premières Nations.

   ii) La Couronne a sous-financé les services de prévention destinés aux enfants et aux familles des Premières Nations vivant sur une réserve et au Yukon, alors qu'elle finançait intégralement les coûts liés aux soins des enfants des

Premières Nations qui étaient retirés de leur milieu familial et placés dans des foyers d'accueil, ce qui a produit un effet pervers en incitant les organismes de services d'aide à l'enfance des Premières Nations à retirer les enfants des Premières Nations vivant sur une réserve et au Yukon de leur milieu familial et à les placer dans des foyers d'accueil.

iii) Le retrait des enfants de leur milieu familial a causé à ces enfants et à leur famille de graves traumatismes persistants.

iv) Non seulement le principe de Jordan incarne les droits à l'égalité des membres du groupe, mais la Couronne a également reconnu que ce principe est une [TRADUCTION] « obligation juridique » et donc une faute donnant ouverture à un droit d'action. Cependant, la Couronne a manqué à ses obligations découlant du principe de Jordan et a ainsi privé de services et de produits essentiels des dizaines de milliers d'enfants des Premières Nations, ce qui leur a causé un préjudice indemnisable.

v) La conduite de la Couronne est discriminatoire, vise les membres du groupe, car ils sont membres des Premières Nations, et contrevient au paragraphe 15(1) de la Charte, aux obligations fiduciaires de la Couronne envers les Premières Nations et à la norme de diligence en common law et en droit civil.

c) En ce qui a trait à la première condition de l'analyse concernant l'autorisation (à savoir si les actes de procédure révèlent une cause d'action valable), les exigences

minimales ne sont pas élevées. La Cour doit trancher la question de savoir s'il est manifeste et évident que les causes d'action sont vouées à l'échec [voir *Brake c Canada (Procureur général)*, 2019 CAF 274 au para 54]. Même sans le consentement de la Couronne, je suis persuadée que les demandeurs ont suffisamment plaidé les éléments nécessaires pour chaque cause d'action aux fins de la présente requête, de sorte que la déclaration commune révèle une cause d'action raisonnable.

d) Pour ce qui est de la deuxième condition de l'analyse concernant l'autorisation (à savoir s'il existe un groupe identifiable formé d'au moins deux personnes), le critère à appliquer consiste à établir si les demandeurs ont défini le groupe en recourant à un critère objectif, c'est-à-dire que l'on peut décider si une personne est membre du groupe sans se référer au fond de l'action [voir *Hollick c Toronto (Ville)*, 2001 CSC 68 au para 17]. Je suis convaincue que les définitions proposées pour le groupe des enfants inutilement pris en charge, le groupe des enfants lésés par le non-respect du principe de Jordan et le groupe des familles touchées (énoncées ci-après) présentent des critères objectifs et que l'inclusion dans chaque groupe peut être déterminée sans se référer au fond de l'action.

e) Quant à la troisième condition de l'analyse concernant l'autorisation (à savoir si les réclamations des membres du groupe soulèvent des points de droit ou de fait communs), comme l'a indiqué la Cour d'appel fédérale au paragraphe 72 de l'arrêt *Wenham c Canada (Procureur général)*, 2018 CAF 199, l'objectif de cette étape de la détermination de l'autorisation n'est pas de déterminer les points communs, mais

plutôt d'évaluer si la résolution des points est nécessaire pour régler les réclamations de chaque membre du groupe. Plus précisément, les exigences sont les suivantes :

> Il faut aborder le sujet de la communauté en fonction de l'objet. La question sous-jacente est de savoir si le fait d'autoriser le recours collectif permettra d'éviter la répétition de l'appréciation des faits ou de l'analyse juridique. Une question ne sera donc « commune » que lorsque sa résolution est nécessaire pour le règlement des demandes de chaque membre du groupe. Il n'est pas essentiel que les membres du groupe soient dans une situation identique par rapport à la partie adverse. Il n'est pas nécessaire non plus que les questions communes prédominent sur les questions non communes ni que leur résolution règle les demandes de chaque membre du groupe. Les demandes des membres du groupe doivent toutefois partager un élément commun important afin de justifier le recours collectif. Pour décider si des questions communes motivent un recours collectif, le tribunal peut avoir à évaluer l'importance des questions communes par rapport aux questions individuelles. Dans ce cas, le tribunal doit se rappeler qu'il n'est pas toujours possible pour le représentant de plaider les demandes de chaque membre du groupe avec un degré de spécificité équivalant à ce qui est exigé dans une poursuite individuelle. (*Western Canadian Shopping Centres*, précité, au paragraphe 39; voir aussi *Vivendi Canada Inc. c. Dell'Aniello*, 2014 CSC 1, [2014] 1 R.C.S. 3, aux paragraphes 41 et 44 à 46.)

Après avoir examiné les points communs (énoncés ci-après), je suis convaincue que les points partagent un élément commun important au règlement des réclamations de chaque membre du groupe. De plus, je conviens avec les demandeurs que ces points communs s'apparentent aux points communs similaires soulevés dans les demandes fondées sur des cas d'abus institutionnel qui ont été autorisées comme recours collectifs (par exemple, les recours collectifs liés aux pensionnats autochtones et à la rafle des années soixante). Je conclus donc que la condition liée aux points communs est remplie.

f) Pour ce qui est de la quatrième condition de l'analyse concernant l'autorisation (à savoir si le recours collectif est le meilleur moyen de régler, de façon juste et efficace, les points de droit ou de fait communs), le critère du meilleur moyen comporte deux concepts fondamentaux : i) la question de savoir si le recours collectif serait un moyen juste, efficace et pratique de faire progresser l'instance; ii) la question de savoir si le recours collectif serait préférable à tous les autres moyens raisonnables offerts pour régler les réclamations des membres du groupe. Pour statuer sur le critère du meilleur moyen, il faut examiner les points communs dans leur contexte, en tenant compte de l'importance de ceux-ci par rapport à l'instance dans son ensemble. Il peut être satisfait à ce critère même lorsqu'il y a d'importantes questions individuelles [voir *Brake*, précité, au para 85; *Wenham*, précité, au para 77, et *Hollick*, précité, aux para 27-31]. La Cour doit effectuer l'analyse de ce critère à la lumière des trois principaux objectifs du recours collectif : l'économie des ressources judiciaires, la modification des comportements et l'accès à la justice [voir *Brake*, précité, au para 86, citant *AIC Limitée c Fischer*, 2013 CSC 69 au para 22].

g) Après avoir examiné les principes mentionnés précédemment et les facteurs prévus au paragraphe 334.16(2), je suis convaincue que le recours collectif est le meilleur moyen de régler les points de droit ou de fait communs de façon juste et efficace. Compte tenu de la nature systémique des réclamations, des obstacles majeurs à l'accès à la justice auxquels pourrait être confronté chacun des réclamants ainsi que des préoccupations exprimées par les demandeurs à l'égard des autres moyens qui existent pour régler les réclamations des membres du groupe, je suis persuadée que

le recours collectif envisagé est un moyen juste, efficace et pratique de faire progresser l'instance des membres du groupe.

h) En ce qui a trait à la cinquième condition de l'analyse concernant l'autorisation (à savoir s'il y a des représentants proposés adéquats), après avoir examiné la preuve par affidavit produite à l'appui de la requête ainsi que le plan de déroulement de l'instance détaillé, je considère que les représentants demandeurs proposés (indiqués ci-après) satisfont aux exigences énoncées à l'alinéa 334.16(1)e);

VU que la Cour est convaincue que toutes les conditions d'autorisation sont remplies et que les réparations demandées doivent être accordées;

LA COUR ORDONNE :

1. Les demandeurs ont droit à une prorogation du délai pour pouvoir déposer la présente requête en autorisation après le délai prévu à l'alinéa 334.15(2)b) des *Règles des Cours fédérales.*

2. Aux fins de la présente ordonnance et en plus des définitions figurant ailleurs dans la présente ordonnance, les définitions suivantes s'appliquent et d'autres termes utilisés dans la présente ordonnance ont le même sens que dans la déclaration commune déposée le 21 juillet 2021 :

a) **« avocats du groupe »** s'entend de Fasken Martineau Dumoulin LLP, Kugler Kandestin LLP, Miller Titerle + Co., Nahwegahbow Corbiere et Sotos LLP;

b) **« groupe »** s'entend collectivement du groupe des enfants inutilement pris en charge, du groupe des enfants lésés par le non-respect du principe de Jordan et du groupe des familles touchées;

c) **« groupe des enfants inutilement pris en charge »** s'entend de tous les membres des Premières Nations qui :

i) n'avaient pas atteint l'âge de la majorité de la province ou du territoire concerné à tout moment pendant la période visée par le recours collectif;

ii) ont été placés dans des foyers d'accueil pendant la période visée par le recours collectif alors qu'ils résidaient ordinairement sur une réserve ou qu'au moins un de leurs parents y résidait ordinairement;

d) **« groupe des enfants lésés par le non-respect du principe de Jordan »** s'entend de tous les membres des Premières Nations qui n'avaient pas atteint l'âge de la majorité de la province ou du territoire concerné et qui, pendant la période visée par le recours collectif, ont été privés d'un service ou d'un produit ou dont le service ou le produit reçu a été retardé ou interrompu en raison notamment d'un manque de financement ou d'un défaut de compétence ou par suite d'un conflit de compétence avec un autre gouvernement ou ministère;

e) **« groupe des familles touchées »** s'entend de toutes les personnes qui sont le frère, la sœur, la mère, le père, la grand-mère ou le grand-père d'un membre du groupe des enfants inutilement pris en charge et/ou du groupe des enfants lésés par le non-respect du principe de Jordan;

f) **« membres du groupe »** s'entend de toutes les personnes qui sont membres du groupe;

g) **« période visée par le recours collectif »** s'entend :

i) pour les membres du groupe des enfants inutilement pris en charge et les membres du groupe des familles touchées correspondants, de la période commençant le 1er avril 1991 et se terminant à la date de la présente ordonnance;

ii) pour les membres du groupe des enfants lésés par le non-respect du principe de Jordan et les membres du groupe des familles touchées correspondants, de la période commençant le 12 décembre 2007 et se terminant à la date de la présente ordonnance;

h) **« Première Nation »** et **« Premières Nations »** s'entendent des peuples autochtones du Canada, y compris au Yukon et dans les Territoires du Nord-Ouest, qui ne sont ni Inuits ni Métis et comprennent :

i) les personnes qui possèdent le statut d'Indien en vertu de la *Loi sur les Indiens*, LRC 1985, c I-5;

ii) les personnes qui ont droit à l'inscription en vertu de l'article 6 de la *Loi sur les Indiens* au moment de l'autorisation;

iii) les personnes qui ont satisfait aux critères d'appartenance à une bande prévus aux articles 10 à 12 de la *Loi sur les Indiens* et qui, dans le cas des

membres du groupe des enfants inutilement pris en charge, ont satisfait à ces exigences au moment de l'autorisation, par exemple lorsque leur communauté de Première Nation respective a décidé de l'appartenance à ses effectifs en fixant les règles et que les personnes ont été considérées comme ayant satisfait aux exigences prévues par ces règles d'appartenance et que leur nom a été consigné dans la liste de bande;

iv) dans le cas des membres du groupe des enfants lésés par le non-respect du principe de Jordan, les personnes, outre celles visées aux alinéas i) à iii) ci-dessus, qui sont reconnues comme citoyens ou membres de leur Première Nation respective en vertu d'ententes ou de traités, de coutumes, de traditions et de lois autochtones;

i) **« réserve »** s'entend d'une parcelle de terrain, au sens de la *Loi sur les Indiens*, dont la Couronne est propriétaire et qui a été mise de côté à l'usage et au profit d'une bande d'Indiens.

3. L'instance est donc autorisée comme recours collectif contre la défenderesse en vertu du paragraphe 334.16(1) des *Règles des Cours fédérales*.

4. Le groupe est composé du groupe des enfants inutilement pris en charge, du groupe des enfants lésés par le non-respect du principe de Jordan et du groupe des familles touchées, tous au sens défini dans la présente ordonnance.

5. Les réclamations présentées au nom du groupe à l'encontre de la défenderesse sont de nature constitutionnelle et ont trait à la négligence et au manquement à l'obligation fiduciaire de la Couronne envers le groupe.

6. La réparation demandée par le groupe comprend des dommages-intérêts, des dommages-intérêts fondés sur la Charte, la restitution, des dommages-intérêts punitifs et des dommages-intérêts exemplaires.

7. Les personnes suivantes sont nommées à titre de représentants demandeurs :

   a) Pour le groupe des enfants inutilement pris en charge : Xavier Moushoom, Ashley Dawn Louise Bach et Karen Osachoff;

   b) Pour le groupe des enfants lésés par le non-respect du principe de Jordan : Jeremy Meawasige (représenté par son tuteur à l'instance, Jonavon Joseph Measwasige) et Noah Buffalo-Jackson (représenté par sa tutrice à l'instance, Carolyn Buffalo);

   c) Pour le groupe des familles touchées : Xavier Moushoom, Jonavon Joseph Meawasige, Melissa Walterson, Carolyn Buffalo et Dick Eugene Jackson (également connu sous le nom de Richard Jackson),

   qui sont tous réputés constituer des représentants demandeurs adéquats du groupe.

8. Les avocats du groupe sont nommés avocats pour le groupe.

9. L'instance est autorisée sur la base des points communs suivants :

a) La conduite de la Couronne telle qu'elle est alléguée dans la déclaration commune [la conduite reprochée] a-t-elle porté atteinte aux droits à l'égalité garantis aux demandeurs et aux membres du groupe par le paragraphe 15(1) de la *Charte canadienne des droits et libertés*? Plus précisément :

   i) La conduite reprochée a-t-elle créé une distinction fondée sur la race ou l'origine nationale ou ethnique des membres du groupe?

   ii) La distinction était-elle discriminatoire?

   iii) La conduite reprochée a-t-elle renforcé ou accentué les désavantages historiques subis par les membres du groupe?

   iv) Dans l'affirmative, la violation du paragraphe 15(1) de la Charte était-elle justifiée au regard de l'article premier de la Charte?

   v) Les dommages-intérêts fondés sur la Charte constituent-ils une réparation appropriée?

b) La Couronne avait-elle une obligation de diligence prévue par la common law envers les demandeurs et les membres du groupe?

   i) Dans l'affirmative, la Couronne a-t-elle manqué à cette obligation de diligence?

c) La Couronne a-t-elle manqué à ses obligations prévues au *Code civil du Québec*? Plus précisément :

i) La Couronne a-t-elle commis une faute ou engagé sa responsabilité civile?

ii) La conduite reprochée a-t-elle donné lieu à des pertes pour les demandeurs et les membres du groupe et, dans l'affirmative, ces pertes constituent-elles un préjudice pour chacun des membres du groupe?

iii) Les membres du groupe ont-ils le droit de demander des dommages-intérêts pour les dommages moraux et matériels découlant de ce qui précède?

d) La Couronne avait-elle une obligation fiduciaire envers les demandeurs et les membres du groupe?

i) Dans l'affirmative, la Couronne a-t-elle manqué à cette obligation?

e) Le montant des dommages-intérêts payables par la Couronne peut-il être partiellement déterminé de façon globale en vertu du paragraphe 334.28(1) des *Règles des Cours fédérales*?

i) Dans l'affirmative, quel devrait en être le montant?

f) La Couronne a-t-elle tiré des avantages pécuniaires quantifiables de la conduite reprochée pendant la période visée par le recours collectif?

i) Dans l'affirmative, la Couronne devrait-elle être tenue de restituer ces avantages?

ii) Dans l'affirmative, quel devrait en être le montant?

g) La Couronne devrait-elle être condamnée à verser des dommages-intérêts punitifs et/ou majorés?

i) Dans l'affirmative, quel devrait en être le montant?

10. Le nouveau plan de déroulement de l'instance modifié des demandeurs, déposé le 2 novembre 2021 et ci-joint à titre d'annexe A, est approuvé, sous réserve des modifications devant y être apportées par suite de la présente ordonnance et de toute autre ordonnance rendue par la Cour.

11. La forme de l'avis d'autorisation, les modalités de l'avis ainsi que toutes les autres questions connexes seront déterminées par la Cour dans une ou des ordonnances distinctes.

12. Le délai d'exclusion sera de six mois à compter de la date à laquelle l'avis d'autorisation est publié selon les modalités énoncées dans une autre ordonnance de la Cour.

13. Le calendrier procédural jusqu'au moment du procès sera également fixé par la Cour dans une ou des ordonnances distinctes.

14. Conformément au paragraphe 334.39(1) des *Règles des Cours fédérales*, aucuns dépens ne seront adjugés à l'une ou l'autre des parties pour la présente requête.

I. DÉFINITIONS

1. Les mots et expressions définis ci-dessous seront utilisés tout au long du présent Plan de Poursuite. Les mots et expressions définis à l'Acte introductif d'instance et qui se retrouvent également au présent Plan de Poursuite doivent, s'ils n'ont pas autrement été définis par la Cour, se voir attribuer le sens qui leur est donné à l'Acte introductif d'instance.

Administrateur du Recours Collectif (« *Class Action Administrator* ») : tout administrateur du règlement ou toute autre firme compétente désigné(e) par la Cour en vue d'assurer l'administration du recours collectif;

Avis de Certification (« *Certification Notice* ») : les informations se trouvant à l'Annexe A du présent Plan de Poursuite, telles qu'elles pourront ultérieurement être modifiées et telles qu'elles auront été approuvées par la Cour;

Avis de Détermination des Questions Communes (« *Common Issues Notices* »): les informations figurant à l'avis portant sur les **Questions Communes** devant être certifié par la Cour à l'étape de la Certification, tel qu'il pourrait être ultérieurement modifié et tel qu'il aura été approuvé par la Cour;

Décision du TCDP (« *CHRT Decision* ») : décision rendue par le **TCDP** dans le cadre du Dossier du TCPD datée du 26 janvier 2016 (et portant la référence 2016 TCDP 2);

Dossier du TCDP (« *CHRT Proceeding* »): dossier du **TCDP** portant le numéro T1340/7008;

Formulaire de Détermination de Compensation Individuelle (« *Individual Damage Assessment Form* »): formulaire se trouvant à l'Annexe D du présent Plan de Poursuite (tel qu'il pourrait ultérieurement être modifié et tel qu'il aura été approuvé par la Cour) et devant être utilisé par les **Membres du Groupe Approuvés** en vue de permettre l'évaluation de leurs dommages et d'amorcer le **Processus de Détermination de Compensation Individuelle**;

Formulaire d'Exclusion (« *Opt out Form* »): formulaire se trouvant à l'Annexe B du présent Plan de Poursuite et utilisé par les Membres du Groupe souhaitant s'exclure du recours collectif (tel qu'il pourrait ultérieurement être modifié et tel qu'il aura été approuvé par la Cour);

Formulaire de Réclamation (« *Claim Form* ») : formulaire se trouvant à l'Annexe C du présent Plan de Poursuite et utilisé par les Membres du Groupe des Enfants retirés de leurs foyers et/ou les Membres du Groupe Jordan et/ou les Membres du Groupe des Familles en vue de soumettre une réclamation (tel qu'il pourrait être ultérieurement amendé et tel qu'il aura été approuvé par la Cour);

Informations de la Couronne (« ***Crown Class Member Information*** »): informations devant être communiquées par la Couronne à l'**Administrateur du Recours Collectif** et/ou aux **Procureurs du Groupe**, à la demande des demandeurs et/ou suivant une ordonnance de la Cour), au sujet des noms et des coordonnées les plus récentes de toutes les personnes répondant à la définition de Membres du Groupe (telle qu'elle figure à l'Acte introductif d'instance ou telle qu'elle aura autrement été déterminée par la Cour), y compris : (a) une liste des noms et coordonnées de tous les Membres du Groupe connus (provenant des informations que la Couronne a en sa possession ou sous son contrôle[1]), de même qu' une liste de toutes les personnes ayant reçu un produit ou un service en vertu du Principe de Jordan tel qu'il a été appliqué dans le cadre de la **Décision du TCDP** (la Couronne, lors de ses représentations au **TCDP**, estimait que plus de 165,000 services avaient ainsi été rendus en date d'octobre 2018);

Membre Approuvé du Groupe des Enfants retirés de leurs foyers (« ***Approved Removed Child Class Member(s)*** ») : tout Membre du Groupe des Enfants retirés de leurs foyers ayant été approuvé par l'**Administrateur du Recours Collectif** puisqu'il rencontre les critères pour être un Membre du Groupe des Enfants retirés de leurs foyers, pour autant qu'une telle approbation n'ait pas été contestée avec succès;

Membre Approuvé du Groupe des Familles (« ***Approved Family Class Member(s)*** »): tout Membre du Groupe des Familles ayant été approuvé par l'**Administrateur du Recours Collectif** puisqu'il rencontre les critères pour être un Membre Approuvé du Groupe des Familles incluant le frère , la sœur, le père, la grand-mère ou le grand-père d'un **Membre Approuvé du Groupe des Enfants retirés de leurs foyers** – que ce dernier soit toujours vivant ou non – pour autant qu'une telle approbation n'ait pas été contestée avec succès;

Membre Approuvé du Groupe Jordan (« ***Approved Jordan's Class Member(s)*** »): tout Membre du Groupe Jordan ayant été approuvé par l'**Administrateur du Recours Collectif** puisqu'il rencontre les critères pour être un Membre Approuvé du Groupe Jordan, pour autant qu'une telle approbation n'ait pas été contestée avec succès;

Membre du Groupe (« ***Class Member(s)*** »): toute personne répondant à la définition d'un Membre du Groupe des Enfants retirés de leurs foyers et/ou d'un Membre du Groupe des Familles et/ou d'un Membre du Groupe Jordan, tel qu'allégué à l'Acte introductif d'instance et approuvé par la Cour;

Membre du Groupe Approuvé (« ***Approved Class Member(s)*** »): tout **Membre Approuvé du Groupe des Enfants retirés de leurs foyers** et/ou **Membre Approuvé du Groupe des Familles** et/ou **Membre Approuvé du Groupe Jordan**;

Période d'Exclusion (« ***Opt Out Period*** »): la date limite pour s'exclure du recours collectif, que les demandeurs proposent de fixer à six (6) mois suivant la date à laquelle l'avis de certification à l'intention du Groupe est publié selon la procédure à être déterminée par la

---

[1] Lorsqu'un Membre du Groupe est représenté par un procureur, seuls son nom et le nom et l'adresse de son procureur devraient être communiqués.

Cour, ou la date limite pour s'exclure du recours collectif telle qu'autrement déterminée par la Cour;

Procédures d'Exclusions (« *Opt Out Procedures* »): les procédure, telles que définies au Plan de Poursuite, permettant à des **Membres du Groupe** de s'exclure du présent recours collectif, telle qu'elles pourraient être ultérieurement modifiées et telles qu'elles auront été approuvées par la Cour;

Procédures d'Exclusions Particulières (« *Special Opt Out Procedures* »): les procédures, telles que définies au Plan de Poursuite, applicables aux **Membres du Groupe** ayant déjà entrepris des recours civils au Canada ou ayant déjà, à la connaissance de la Couronne, retenu les services d'un procureur en vue de s'exclure du présent recours collectif, telles qu'elles pourront ultérieurement être modifiées et telles qu'elles auront été approuvées par la Cour;

Processus de Détermination de Compensation Individuelle (« *Individual Damage Assessment Process* »): la procédure et la méthodologie devant être approuvées par la Cour à l'issue de l'audition portant sur les **Questions Communes,** et qui seront utilisées pour quantifier et distribuer les dommages aux **Membres du Groupe Approuvés** ayant demandé une détermination de compensation individuelle en soumettant un **Formulaire de Détermination de Compensation Individuelle**;

Processus de Distribution des Dommages (« *Aggregate Damages Distribution Process* »): système établi par la Cour en vertu duquel l'**Administrateur du Recours Collectif** doit distribuer l'ensemble des dommages aux **Membres du Groupe Approuvés**.

Procureurs du Groupe (« *Class Counsel* »): le regroupement de cabinets juridiques agissant en tant que procureurs au dossier dans le cadre du présent recours collectif, c'est-à-dire Sotos LLP, Kugler Kandestin LLP, Miller Titerle + Company, Nahwegahbow Corbiere, et Fasken LLP.

Méthode de Notification (« *Notice Program* »): la procédure, telle que définie au Plan de Poursuite, pour la communication de l'**Avis de Certification** et/ou l'**Avis de Détermination des Questions Communes** aux **Membres du Groupe**, tel qu'elle pourrait être ultérieurement modifiée et telle qu'elle aura été approuvée par la Cour;

Questions Communes (« *Common Issues* ») : les questions énumérées à l'Avis de Demande de Certification (ou à quel qu'autre document exigé ou émis par la Cour), telles qu'elles pourraient être ultérieurement modifiées et telles qu'approuvées par la Cour;

TCDP (« *CHRT* »): le Tribunal Canadien des Droits de la Personne.

7

II. SOMMAIRE

2. Les demandeurs ont introduit la présente action en justice au nom de membres de Premières Nations qui allèguent que la Couronne a, de manière discriminatoire, sous-financé certains services destinés aux familles et aux enfants et, par voie de conséquence, a contrevenu à l'obligation d'égalité qui sous-tend le Principe de Jordan. De fait, le présent recours collectif vise l'avancement des droits fondamentaux de dizaines de milliers de familles, d'enfants et d'anciens enfants des Première Nations.

3. Le présent Plan de Poursuite (qui s'inspire en grande partie de l'action collective portant sur les pensionnats indiens[2]) se veut un échéancier régissant l'évolution des procédures et mettant de l'avant certaines méthodes de communication avec les Membres du Groupe conformément aux dispositions du sous-paragraphe 334.16(1)(e)(ii) des *Règles des cours fédérales*.

4. Le présent Plan de Poursuite définit en détail les principales étapes des procédures à venir et établit d'entrée de jeu, quoique sous toutes réserves, de quelle manière ces étapes se dérouleront. Étant donné que le dossier en est à ses débuts, il est entendu que le Plan fera l'objet de révisions substantielles au fur et à mesure que le dossier progressera.

5. Les demandeurs sont conscients que le TCDP a déjà octroyé une indemnisation statutaire à une portion des Membres du Groupe conformément aux dispositions de la Loi canadienne sur les droits de la personne (*First Nations Child & Family Caring Society of Canada et als. c. Procureur Général du Canada (représentant le Ministre des Affaires Autochtones et du Nord*

---

[2] Voir *Baxter c. Canada (Procureur Général)*, 2006 CanLII 41673 (Cour supérieure de l'Ontario), de même que les ordonnances rendues subséquemment par la Cour. Veuillez consulter également les informations disponibles sur le site web du *Secrétariat d'Adjudication des Pensionnats Indiens* (SAPI) : www.iap-pei.ca/home-eng.php.

Canada), 2019 CHRT 39). S'il s'avère qu'une indemnité est payée par le TCDP à quelque Membre du Groupe, les demandeurs demanderont à la Cour de déterminer si la Couronne a droit à une déduction ou autre forme de réduction correspondant au montant déjà reçu.

III. PROCÉDURES PRÉ-CERTIFICATION

A. Les Parties

i. Les demandeurs

6. Les demandeurs ont suggéré que le Groupe soit divisé en trois (3) sous-groupes :

   (a) le **Groupe des Enfants retirés de leurs foyers**, représenté par Xavier Moushoom, Ashley Dawn Louise Bach et Karen Osachoff;

   (b) le **Groupe des Familles**, représenté par Xavier Moushoom, Jonavon Joseph Meawasige, Melissa Walterson, Carolyn Buffalo et Dick Eugene Jackson (aussi connu sous le nom de Richard Jackson); et

   (c) le **Groupe Jordan**, représenté par Jeremy Meawasige (lui-même représenté par son tuteur à l'instance, Jonavon Joseph Meawasige) et Noah Buffalo-Jackson (lui-même représenté par sa tutrice à l'instance, Carolyn Buffalo).

ii. La défenderesse

7. La Couronne est la défenderesse en la présente instance.

B. Les prétentions

i. L'acte introductif d'instance

8. Les demandeurs ont produit un Acte introductif d'instance conformément au jugement rendu par l'Honorable juge St-Louis le 7 juillet 2021.

ii. Énoncé des moyens de défense

9. La Couronne n'a produit aucun Énoncé des moyens de défense.

iii. Réclamation d'un tiers

10. La Couronne n'a produit aucune Réclamation d'un tiers

C. Stratégie de communication préalable à la certification

i. Demandes formulées par des membres potentiels du groupe

11. Les Procureurs du Groupe ont, tant avant que depuis l'introduction du présent recours collectif, reçu diverses communications de la part de Membres du Groupe concernés par les procédures.

12. Le nom, l'adresse, le numéro de téléphone et l'adresse courriel de chaque Membre Potentiel du Groupe ayant contacté les Procureurs du Groupe ont été ajoutés à une base de données confidentielle. De fait, chaque Membre du Groupe est invité à s'enregistrer sur l'un ou l'autre des sites web des Procureurs du Groupe. Une fois enregistrés, les Membres du Groupe reçoivent, sur une base régulière et tant en français qu'en anglais, des mises à jour au sujet de l'évolution du recours collectif. Tout Membre du Groupe qui contacte les Procureurs du Groupe se voit répondre dans la langue qu'il préfère.

ii. Rapports d'Évolution Préalables à la Certification

13. En plus de répondre aux demandes individuelles qui leur sont adressées, les Procureurs du Groupe ont mis sur pied une page web, accessible tant en anglais qu'en français, portant spécifiquement sur le présent recours collectif : https://sotosclassactions.com/cases/current-cases/first-nations-youth/). Toutes les informations relatives à l'état du dossier sont postées et mises à jour régulièrement, tant en français qu'en anglais.

14. Des copies des documents de Cour produit publiquement et de toutes les décisions rendues par la Cour sont disponibles sur le site web. Les numéros de téléphone et les adresses courriel des Procureurs du Groupe se trouvant au Québec et en Ontario sont également affichés.

15. Les Procureurs du Groupe transmettent des rapports d'évolution aux Membres du Groupe ayant fourni leurs coordonnées et manifesté leur désir d'être tenus informés des développements survenant dans le cadre du recours collectif.

iii. Démarches de sensibilisation préalables à la certification

16. Les Procureurs du Groupe ont soumis les grandes lignes du recours collectif envisagé au personnel d'un centre de services sociaux d'un Conseil des Premières Nations siégeant au Québec et au Labrador, ainsi qu'à une assemblée des Directeurs de la Jeunesse de Premières Nations de la Colombie-Britannique. Les Procureurs du Groupe organisent présentement d'autres présentations similaires auprès de communautés concernées du Québec et d'autres provinces et territoires.

D. Conférence de Règlement

i. Conférence de Règlement Préalable à la Certification

17. Les demandeurs ont participé à un processus de médiation préalable à la Certification en vue de déterminer si une ou plusieurs des questions soulevées dans le cadre du recours collectif pouvaient être résolues. Le processus de médiation demeure pendant, ce qui pourrait faire en sorte que certaines des échéances indiquées au présent Plan de Poursuite doivent être modifiées d'un commun accord entre les Parties ou conformément à d'éventuelles ordonnances de la Cour, afin de permettre aux négociations d'avancer.

E. Échéancier

IV. PROCÉDURES POST-CERTIFICATION

A. Échéancier

i. Échéancier soumis par les demandeurs pour les démarches postérieures à la certification

18. Les demandeurs entendent tenir le procès soit selon une formule accélérée, soit en fonction d'une combinaison hybride de jugement sommaire et de la tenue d'un procès *viva voce*. Il est prévu

que toute la preuve documentaire soumise par la Couronne dans le cadre du Dossier du TCDP sera pertinente et recevable dans le cadre du présent recours collectif. Puisque la preuve documentaire produite dans le cadre du Dossier du TCDP est volumineuse, les demandeurs prévoient très peu – ou pas - d'objections à la production d'une telle preuve dans le présent recours collectif quant à la période couverte par le Dossier du TCDP (c'est-à-dire de 2006 à aujourd'hui). Par ailleurs, à la lumière des nombreux témoignages rendus dans le Dossier du TCDP, il est prévu qu'une fois la certification accordée, les interrogatoires préalables oraux procéderont rapidement et seront complétés à l'intérieur de délais relativement courts. À l'heure actuelle, les demandeurs ne peuvent se prononcer avec la même certitude eu égard à la preuve documentaire couvrant les années 1991 à 2006.

19. Les demandeurs suggèrent que l'échéancier "post-Certification" ci-dessous soit retenu:

Début du processus de notification de la Certification aux Membres du Groupe	Date à être fixée par la Cour une fois la Certification obtenue
Échange des déclarations assermentées	Dans les 90 jours suivant la Notification de la Certification aux Membres du Groupe
Requêtes portant sur la production de documents, les interrogatoires des nombreux représentants de la Couronne, ou les interrogatoires de tiers	Dans les 120 jours suivant la Notification de la Certification aux Membres du Groupe
Interrogatoires préalables	Dans les 150 jours suivant la Notification de la Certification aux Membres du Groupe
Fin du processus de notification de la Certification aux Membres du Groupe	Dans les 60 jours de la date fixée par la Cour
Conférence de gestion de l'instance portant sur la présentation de la preuve d'experts	180 jours après la Notification de la

	Certification aux Membres du Groupe
Requêtes présentées à la suite de la tenue des interrogatoires préalables	Dans les 180 jours suivant la Notification de la Certification aux Membres du Groupe
Transmission des engagements	Dans les 200 jours suivant la Notification de la Certification aux Membres du Groupe
Tenue d'interrogatoires additionnels, si nécessaire	Dans les 240 jours suivant la Notification de la Certification aux Membres du Groupe
Tenue de l'audition préliminaire portant sur les Questions Communes	290 jours après la Notification de la Certification aux Membres du Groupe
Expiration du délai d'exclusion	Six (6) mois après la Notification de la Certification aux Membres du Groupe
Audition portant sur les Questions Communes ou procès hybride	330 jours après la Notification de la Certification aux Membres du Groupe

B. Avis de Certification, Méthode de Notification et Procédures d'Exclusions

i. Avis de Certification

20. L'Avis de Certification et tous les autres avis devant être transmis par les demandeurs aux Membres du Groupe seront traduits en français une fois finalisés et approuvés par la Cour. Les demandeurs verront, toujours sous réserve de l'approbation de la Cour, s'il est nécessaire de traduire l'Avis de Certification et/ou quelque autre avis dans un ou plusieurs langage(s) des Premières Nations.

21. Sous réserve de modifications subséquentes, l'Avis de Certification sera émis en la forme présentée à l'Annexe A du présent Plan de Poursuite.

ii. Méthode de Notification

22. Les demandeurs prévoient transmettre l'Avis de Certification conformément à la Méthode de Notification définie ci-dessous.

23. Les demandeurs communiqueront et/ou publieront l'Avis de Certification (de même que toute version traduite de celui-ci aussitôt que disponible) dans les médias suivants à compter de la date fixée par la Cour, et ce aussi fréquemment qu'il s'avèrera raisonnable de le faire selon les ordonnances rendues par la Cour en vertu de l'article 334.32 des *Règles des Cours Fédérales*. Les demandeurs prévoient, à cette fin, retenir les Méthodes de Notification suivantes :

(a) Un communiqué de presse adressé aux Membres du Groupe, dûment approuvé par la Cour et publié le premier jour de la période de notification;

(b) Communications directes avec les Membres du Groupe :

(i) transmises par courrier ordinaire ou électronique aux coordonnées les plus récentes des Membres du Groupe fournies par la Couronne (i.e. Informations de la Couronne);

(ii) transmises par courrier ordinaire ou électronique à tous les Membres du Groupe ayant fourni leurs coordonnées aux Procureurs du Groupe (notamment par l'entremise de la page web portant sur le recours collectif);

(iii) transmises par courrier ordinaire à tous les détenteurs d'une Carte de Statut émise au Canada nés le ou après le 1er avril 1991;

(c) Informations distribuées par l'Assemblée des Premières Nations à l'échelle de toutes les bandes membres des Premières Nations situées au Canada;

(d) Informations transmises par courrier électronique aux sociétés d'aide aux enfants de Premières Nations situées au Canada;

(e) Informations circulées au moyen des médias suivants:

(i) Journaux et autres périodiques indiens tels que *First Nations Drum*, *The Windspeaker*, *Mi'kmaq Maliseet Nations News* et *APTN National News*;

(ii) Chaînes de radio telles que CFWE et CBC (de portés régionale et nationale);

(iii) Chaînes de télévision telles que *The Aboriginal Peoples Television Network*; et/ou

(iv) Réseaux sociaux en ligne tels que *Facebook* et *Instagram*.

iii. Procédures d'Exclusions

24. Les demandeurs suggèrent que les Procédures d'Exclusions définies ci-dessous s'appliquent aux Membres du Groupe qui ne souhaitent pas être liés par le recours collectif.

25. L'Avis de Certification indiquera aux Membres du Groupe de quelle manière il leur est possible de s'exclure du recours collectif en produisant un Formulaire d'Exclusion auprès de l'Administrateur du Recours Collectif et/ou des Procureurs du Groupe.

26. Un seul Formulaire d'Exclusion standard s'appliquera à tous les Membres du Groupe.

27. Tout Membre du Groupe désirant s'exclure du recours collectif devra obligatoirement soumettre un Formulaire d'Exclusion à l'Administrateur du Recours Collectif et/ou aux Procureurs du Groupe à l'intérieur de la Période d'Exclusion.

28. L'Administrateur du Recours Collectif ou les Procureurs du Groupe devront, dans les trente (30) jours suivant l'expiration de la Période d'Exclusion, produire de la Cour et des Parties une déclaration assermentée contenant la liste de toutes les personnes ayant choisi de s'exclure du recours collectif.

iv. Procédures d'Exclusions Particulières

29. Les demandeurs suggèrent que les Procédures d'Exclusions Particulières définies ci-dessous s'appliquent à tous les Membres du Groupe désignés comme une partie demanderesse à quelque action civile introduite au Canada ou ayant déjà (à la connaissance de la Couronne) retenu les services d'un procureur en vue d'introduire à l'encontre de la Couronne une action civile distincte fondées sur les faits et les circonstances faisant l'objet du recours collectif.

30. Toute action civile introduite par un Membres du Groupe n'ayant pas eu recours aux procédures d'exclusions devra être gérée de la manière établie par la Cour ou par le tribunal saisi d'une telle action civile.

C. Identification des (et communication avec les) Membres du Groupe

i. Identification des Membres du Groupe

31. Tel qu'indiqué plus haut, les demandeurs entendent exiger les informations que la Couronne détient au sujet des Membres du Groupe.

ii. Base de données relative aux Membres du Groupe

32. Les Procureurs du Groupe maintiendront à jour une base de données confidentielle au sujet de tous les Membres du Groupe qui les auront contactés. Une telle base de données contiendra, s'ils sont disponibles, le nom, l'adresse, le numéro de téléphone et/ou l'adresse courriel de chaque individu concerné.

iii. Réponses aux demandes formulées par les Membres du Groupe

33. Les Procureurs du Groupe, et le personnel de leur cabinet, répondront à toutes les demandes soumises par des Membres du Groupe.

34. Les Procureurs du Groupe ont mis en place une structure leur permettant de répondre aux demandes soumises par les Membres du Groupe dans la langue de leur choix, dans la mesure du possible.

iv. Rapports d'évolution postérieurs au Processus de Certification

35. En plus de répondre aux demandes soumises par les Membres du Groupe, les Procureurs du Groupe mettront régulièrement à jour la page web dédiée au recours collectif en y indiquant le stade d'avancement des procédures.

36. Les Procureurs du Groupe transmettront des rapports d'évolution à tous les Membres du Groupe ayant communiqué leurs coordonnées, et ce aussi souvent que nécessaire ou selon les ordonnances de la Cour.

D. Production des documents

i. Affidavits et listes de documents

37. Les demandeurs devront produire un Affidavit de Documents dans les quatre-vingt-dix (90) jours de la publication de l'Avis de Certification adressé aux Membres du Groupe. La

Couronne, pour sa part, devra produire une Liste de Documents dans les quatre-vingt-dix (90) jours de la publication de l'Avis de Certification adressé aux Membres du Groupe.

38. Il est à prévoir que les Parties produiront des Affidavits (ou des Listes) de Documents additionnels au fur et à mesure que de nouveaux documents seront identifiés.

ii. Production de documents

39. Chacune des Parties devra à ses frais, au moment de transmettre ses Affidavits de Documents, fournir des copies électroniques de tous les documents produits en vertu de l'Annexe A (qui devront eux-mêmes être soumis sous forme électronique).

40. Les documents produits dans le cadre du présent recours collectif devront comprendre (notamment et sans s'y limiter) les actes de procédure et les pièces versés au Dossier du TCDP.

iii. Requêtes portant sur la production de documents

41. Toute requête portant sur la production de documents devra être présentée au cours des cent-vingt (120) jours suivant la publication de l'Avis de Certification adressé aux Membres du Groupe.

iv. Gestion des documents

42. Chaque Partie assurera la gestion des documents qu'elle produit au moyen d'un système de gestion compatible ou en conformité avec les directives émises par la Cour. Tous les documents devront être produits en format « reconnaissance optique de caractères » (ROC).

43. Chaque production de documents devrait être numérotée et numérisée en vue de permettre le repérage et la classification rapide de la documentation.

E. Interrogatoires préalables

44. Tous les Interrogatoires Préalables devront se tenir dans les cent cinquante (150) jours suivant la publication de l'Avis de Certification adressée aux Membres du Groupe.

45. Les demandeurs prévoient demander à la Couronne de consentir à l'interrogatoire de plus d'un représentant. Dans l'éventualité où un désaccord survenait à ce sujet, les demandeurs suggèrent de présenter une requête dans les cent vingt (120) jours de la publication de l'Avis de Certification adressée aux Membres du Groupe.

46. Les demandeurs prévoient que, sous réserve des objections et des engagements, l'Interrogatoire Préalable d'un officier de la Couronne adéquatement sélectionné et informé requerra plus ou moins dix (10) jours.

47. Les demandeurs prévoient que sous réserve des objections et des engagements, l'Interrogatoire Préalable des représentants du Groupe requerra plus ou moins une (1) journée.

F. Considérations interlocutoires

i. Requêtes portant sur des objections ou des engagements

48. Les dates d'audition des requêtes portant sur les Objections ou les Engagements soulevés au cours d'Interrogatoires Préalables seront demandées une fois la Certification obtenue. De telles requêtes devront être présentées dans les cent-quatre-vingts (180) jours suivant la publication de l'Avis de Certification adressé aux Membres du Groupe.

ii. Engagements

49. Tous les engagements souscrits devront être communiqués dans les deux cents (200) jours suivant la publication de l'Avis de Certification adressé aux Membres du Groupe.

iii. Nouvelles comparutions et interrogatoires préalables additionnel

50. Les nouvelles comparutions ou Interrogatoires Préalables additionnels requis à la suite de la communication des réponses aux engagements ou en raison de jugements rendus sur les requêtes portant sur des objections et/ou des engagements devront avoir lieu au cours des deux cent quarante (240) jours suivant la publication de l'Avis de Certification adressée au Membres du Groupe.

G. Preuve d'experts

i. Désignation des experts et identification des questions à l'étude

51. Une fois les Interrogatoires Préalables dûment complétés, une Conférence de Gestion de l'Instance devra être tenue au sujet des experts devant participer au procès et à la preuve qu'ils seront appelés à y présenter.

H. Détermination des Questions Communes

i. Audition préliminaire portant sur les Questions Communes

52. Une fois la Certification accordée, il sera demandé à la Cour de fixer la date de l'Audition Préliminaire portant sur les Question Communes.

53. Les demandeurs prévoient qu'une (1) journée complète d'audition sera requise dans le cadre de l'Audition Préliminaire. Ils suggéreront que l'Audition Préliminaire ait lieu dans les deux cent quatre-vingt-dix (290) jours suivant la publication de l'Avis de Certification adressé aux Membres du Groupe, ou au moins quatre-vingt-dix (90) jours avant la tenue de l'audition portant sur les Questions Communes.

ii. Audition portant sur les Questions Communes

54. Une fois la Certification obtenue, il sera demandé à la Cour de fixer la date de l'audition portant sur les Questions Communes.

55. Les demandeurs suggèrent que l'audition portant sur les Questions Communes ait lieu trois cent trente (330) jours après la publication de l'Avis de Certification adressé aux Membres du Groupe.

56. Parce qu'elle variera en fonction d'une multitude de facteurs, la durée de l'audition portant sur les Questions Communes sera déterminée au cours de la Conférence de Gestion d'Instance.

V. PROCÉDURES POSTÉRIEURES À LA DÉTERMINATION DES QUESTIONS COMMUNES

A. Échéancier

i. Échéancier des demandeurs

57. Les demandeurs suggèrent à la Cour d'ordonner que l'échéancier ci-dessous s'appliquera suite au jugement portant sur les Questions Communes :

Émission de l'Avis de Détermination des Questions Communes	Dans les 90 jours de la décision portant sur les Questions Communes
Début des auditions portant sur les Questions Individuelles, le cas échéant	Débute 120 jours après que la décision ait été rendue
Début du Processus de détermination de compensations individuelles	Débute 240 jours après que la décision ait été rendue
Expiration (de plein droit) du délai de production des Formulaires de Réclamation	Un (1) an après que la décision ait été rendue
Expiration (de plein droit en certaines circonstances ou en vertu d'une permission de la Cour) du délai de production des Formulaires de Réclamation	Un (1) an après que la décision ait été rendue

B. Avis de détermination des Questions Communes

i. Notification aux Membres du Groupe

58. Sous réserve de modifications subséquentes, l'Avis de Détermination des Questions Communes sera substantiellement dans la forme approuvée par la Cour lors de l'audition portant sur les Questions Communes. Il pourra contenir, entre autres choses et sous réserve de

l'approbation de la Cour, certaines informations au sujet de dommages accordés et de circonstances justifiant la détermination de compensations individuelles.

59. Les demandeurs soumettent que l'Avis de Détermination des Questions Communes devrait circuler dans les quatre-vingt-dix (90) jours suivant le jugement portant sur les Questions Communes.

60. L'Avis de Détermination des Questions Communes sera mis en circulation de la même manière que l'Avis de Certification, ou de la façon déterminée par la Cour.

C. Formulaires de réclamation

i. Utilisation des formulaires de réclamation

61. Il sera demandé à la Cour d'approuver (conformément aux dispositions de l'article 334.37 des *Règles des Cours Fédérales*) l'utilisation d'un Formulaire de Réclamation standardisé par tout Membre du Groupe susceptible d'avoir droit à une portion des dommages octroyés ou à quelque forme de compensation individuelle.

ii. Obtention et production d'un formulaire de réclamation

62. La procédure d'obtention et de production d'un Formulaire de Réclamation sera décrite en détail à l'Avis de Détermination des Questions Communes.

63. Sous réserve de modifications subséquentes et de l'approbation de la Cour, les demandeurs suggèrent qu'un seul et même Formulaire de Réclamation standardisé (respectant le gabarit se trouvant à l'Annexe C) s'applique aux trois (3) sous-groupes du Groupe.

64. Les demandeurs suggèrent également que les Membres du Groupe ayant besoin d'aide ou de soutien au moment de compléter un Formulaire de Réclamation puissent bénéficier de conseils

adéquats. Si nécessaire, un processus visant à désigner un tuteur ou un fiduciaire chargé d'apporter de l'aide ou du soutien aux Membres du Groupe sera mis sur pied.

65. Avant de compléter un Formulaire de Réclamation, le Membre du Groupe pourra passer en revue les renseignements détenus par Canada pertinents à sa réclamation (autrement dit, les Informations de la Couronne), qui pourront inclure :

(a) tous les dossiers en lien avec le placement volontaire ou forcé du Membre du Groupe au sein d'un environnement hors-foyer au cours de la Période du Recours Collectif;

(b) tous les dossiers indiquant que le Membre du Groupe a eu besoin d'un produit ou d'un service;

(c) tous les dossiers confirmant que le Membre du Groupe a requis un produit ou un service;

(d) tous les dossiers relatif au fait que le produit ou le service public demandé par le Membre du Groupe lui a été refusé;

(e) tous les dossiers relatifs aux produits et/ou aux services que la Couronne a effectivement fournis au Membre du Groupe; et/ou

(f) tous les dossiers faisant état d'une quelconque relation familiale entre un Membre du Groupe des Familles et un Membre du Groupe des Enfants retirés de leurs foyers ou un Membre du Groupe Jordan.

66. Tous les Membres du Groupe devront produire le Formulaire de Réclamation prescrit auprès de l'Administrateur du Recours Collectif et/ou des Procureurs du Groupe à l'intérieur des délais indiqués ci-dessous, ou tels que déterminés par la Cour.

67. Il sera de la responsabilité de l'Administrateur du Recours Collectif de recueillir tous les Formulaires de Réclamation.

iii. Délai de Production des Formulaires de Réclamation

68. Les Membres du Groupe seront informés du délai de production des Formulaires de Réclamation par le biais de l'Avis de Détermination des Questions Communes.

69. Les demandeurs soumettent que les Membres du Groupe devraient bénéficier d'un délai d'un an à compter jugement portant sur les Questions Communes afin de déposer un Formulaire de Réclamation de plein droit, ou selon le délai déterminé par la Cour.

70. Les demandeurs soumettent également que les Membres du Groupe devraient, en certaines circonstances particulières définies par la Cour (par exemple : le fait qu'ils n'étaient pas au courant de leurs droits) ou avec la permission de la Cour (par exemple : en raison de l'état de santé physique ou mentale), avoir le droit de produire un Formulaire de Réclamation plus d'un an après le jugement sur les Questions Communes.

D. Détermination et classification des Membres du Groupe

i. Approbation des Membres du Groupe des Enfants retirés de leurs foyers

71. Il reviendra à l'Administrateur du Recours Collectif de déterminer si la personne qui soumet un Formulaire de Réclamation en tant que Membre du Groupe des Enfants retirés de leurs foyers se qualifie effectivement comme Membre du Groupe.

72. L'Administrateur du Recours Collectif déterminera et classifiera également la durée que le Membre du Groupe des Enfants retirés de leurs foyers a passé au sein d'un emplacement hors-foyer. L'Administrateur du Recours Collectif déterminera aussi le nombre d'emplacements hors-foyer au sein desquels le Membre du Groupe des Enfants retirés de leurs foyers a été placé, et il déterminera aussi si de tels emplacements étaient, d'une part, situés à l'intérieur ou à l'extérieur de sa Réserve, et d'autre part, situés à l'intérieur ou à l'extérieur de la communauté habituelle du Membre du Groupe.

73. L'Administrateur du Recours Collectif procédera aux déterminations dont il est question au paragraphe 72 sur les renseignements figurant au Formulaire de Réclamation et sur les Informations qu'aura fournies la Couronne au sujet du Membre du Groupe.

74. L'Administrateur du Recours Collectif devra, lorsque cela s'avèrera nécessaire et adéquat, requérir par écrit que la Couronne et/ou le Membre du Groupe des Enfants retirés de leurs foyers ayant soumis un Formulaire de Réclamation lui communique(nt) davantage d'informations.

ii. Approbation des Membres du Groupe Jordan

75. Il reviendra à l'Administrateur du Recours Collectif de déterminer si la personne qui soumet un Formulaire de Réclamation en tant que Membre du Groupe Jordan se qualifie effectivement comme Membre du Groupe.

76. L'Administrateur du Recours Collectif fondera la détermination dont il est question au paragraphe 75 sur les informations figurant au Formulaire de Réclamation et sur les directives émises par la Cour lors de l'Audition portant sur les Questions Communes. De telles directives pourront, entre autres choses, répondre aux questions suivantes: (a) si le Membre du Groupe a eu besoin d'un produit ou d'un service à quelque moment que ce soit de la Période du Recours Collectif; (b) si le Membre du Groupe s'est vu refuser le produit ou service en question; (c) si la livraison du produit ou service requis s'est vue retardée ou perturbée; (d) si un(e) tel(le) refus, retard ou perturbation était attribuable à un manque de fonds, à une absence de juridiction ou à un conflit de compétence entre paliers ou départements gouvernementaux; et/ou (e) si un(e) tel(le) refus, retard ou perturbation est survenu(e) après que le Membre du Groupe eût atteint l'âge de la majorité applicable au sein de la province ou du territoire pertinent.

77. L'Administrateur du Recours Collectif procédera également à ces déterminations en fonction des Informations de la Couronne relatives au nombre de Membres du Groupe ayant reçu un produit ou un service en vertu du Principe Jordan (depuis le prononcé de la Décision du TCDP).

78. L'Administrateur du Recours Collectif devra, lorsque cela s'avèrera nécessaire et adéquat, requérir par écrit que la Couronne et/ou le Membre du Groupe Jordan ayant soumis un Formulaire de Réclamation lui communique(nt) davantage d'informations.

iii. Approbation des Membres du Groupe des Familles

79. Il reviendra à l'Administrateur du Recours Collectif de déterminer si la personne qui soumet un Formulaire de Réclamation en tant que Membre du Groupe des Familles se qualifie effectivement comme Membre du Groupe des Familles.

80. L'Administrateur du Recours Collectif procédera à la détermination dont il est question au paragraphe 79 sur les renseignements figurant au Formulaire de Réclamation et sur les Informations qu'aura fournies la Couronne au sujet de la relation existant entre le potentiel Membre du Groupe des Familles et un Membre Approuvé du Groupe des Enfants retirés de leurs foyers.

81. L'Administrateur du Recours Collectif devra, lorsque cela s'avèrera nécessaire et adéquat, requérir par écrit que le Membre du Groupe Jordan ayant soumis un Formulaire de Réclamation lui communique davantage d'informations.

iv. Membres du Groupe décédés

82. La succession de tout Membre du Groupe décédé le ou après le 1er avril 1991 peut soumettre un Formulaire de Réclamation dans le cadre du présent recours collectif.

83. S'il appert que le Membre du Groupe Décédé se serait qualifié en tant que Membre du Groupe Approuvé, sa succession aura le droit d'être indemnisée conformément au Processus de Distribution des Dommages. À moins qu'elle n'y soit explicitement autorisée par la Cour, aucune succession ne pourra être indemnisée en vertu du Processus d'Évaluation de Compensations Individuelles.

v. Notification des Membres du Groupe / Enregistrement et Contestation des Décisions

84. Dans les trente (30) jours de la réception d'un Formulaire de Réclamation, l'Administrateur du Recours Collectif devra aviser le requérant de sa décision de le reconnaître ou de le rejeter en tant que Membre du Groupe Approuvé. Les personnes dont le statut de Membre du Groupe n'aura pas été reconnu se verront expliquer de quelle manière elles peuvent contester la décision rendue par l'Administrateur du Recours Collectif. Les demandeurs suggèrent que la procédure de contestation inclut la possibilité de soumettre un Formulaire de Réclamation modifié, accompagné de pièces justificatives permettant de démontrer que le requérant est bel et bien un Membre du Groupe.

85. Toutes les parties intéressées auront l'opportunité d'en appeler de toute décision rendue par l'Administrateur du Recours Collectif devant la Cour, ou selon une façon à être déterminée. Les Procureurs du Groupe pourront interjeter appel d'une décision pour et au nom des personnes concernées.

86. L'Administrateur du Recours Collectif conservera tous les dossiers des Membres du Groupe Approuvés ainsi que les Formulaires de Réclamation qu'ils auront soumis, et il communiquera une fois par mois ces informations aux Procureurs du Groupe, à la Couronne et à toute autre partie intéressée. Les Procureurs du Groupe et/ou toute partie intéressée pourront, dans

les trente (30) jours de la réception des informations, contester la décision rendue par l'Administrateur du Recours Collectif en transmettant à ce dernier (et à toute autre partie concernée) un exposé de leurs motifs de contestation. La partie répondante aura alors trente (30) jours pour répliquer par écrit à la demande de contestation, à l'expiration desquels l'Administrateur du Recours Collectif devra reconsidérer la décision qu'il a prise et assurer un suivi auprès de toutes les parties.

E. Processus de distribution des dommages

i. Distribution des dommages

87. L'Administrateur distribuera de la manière déterminée par la Cour les dommages obtenus au bénéfice de tous les Membres du Groupe Approuvés.

88. Les demandeurs proposeront que les Membres du Groupe Approuvés aient droit à une certaine proportion des dommages déterminée par l'Administrateur du Recours Collectif en fonction de critères à être approuvés par la Cour, lesquels comprennent, sans s'y limiter : (a) le temps qu'un Membre du Groupe a passé au sein d'un emplacement hors-foyer; (b) le nombre d'emplacements hors-foyer au sein desquels le Membre du Groupe des Enfants retirés de leurs foyers a été placé alors qu'il était enfant; (c) la période de temps au cours de laquelle le Membre du Groupe a été privé d'un produit ou d'un service en raison d'un refus, d'un délai ou d'une perturbation (le tout en contravention du Principe de Jordan); et (d) la relation familiale existant entre un Membre du Groupe des Familles et un Membre du Groupe des Enfants retirés de leurs foyers .

89. Une fois qu'il les aura informés de la décision qu'il a prise au sujet de leur appartenance à un groupe ou à un autre, l'Administrateur du Recours Collectif devra, à l'intérieur d'un délai raisonnable que la Cour aura fixé, aviser les Membres du Groupe Approuvés de la proportion de

dommages à laquelle chacun a droit en vertu du Processus de Distribution des Dommages approuvé par la Cour.

90. L'Administrateur du Recours Collectifs devra également, le cas échéant, transmettre à chaque Membre du Groupe Approuvé une série de documents comprenant : de l'information quant à la façon de percevoir les dommages auquel il a droit; de l'information quant à l'opportunité pour le Membre du Groupe de recourir au Processus d'Évaluation de Compensations Individuelles; des copies du Formulaire d'Évaluation de Compensation Individuelle accompagnées d'un guide indiquant comment compléter le Formulaire en question; et les coordonnées de ressources susceptibles de fournir des conseils juridiques indépendants. De telles informations seront communiquées selon une forme et un style appropriés à la culture des interlocuteurs, au moyen de médiums interactifs tels que des capsules vidéo d'apprentissage.

ii. Évaluation individuelle des dommages

91. Une fois informés de leur droit au paiement de dommages, les Membres du Groupe Approuvés pourraient être avisés de l'opportunité de bénéficier d'une compensation individuelle établie conformément au Processus d'Évaluation de Compensations Individuelles, tel que défini ci-après.

F. Processus d'Évaluation de Compensations Individuelles

i. Formulaire d'Évaluation de Compensation Individuelle

92. Lorsqu'un Membre du Groupe Approuvé est informé de son droit de percevoir des dommages et de recourir au Processus d'Évaluation de Compensations Individuelles, il recevra un exemplaire du Formulaire d'Évaluation de Compensation Individuelle se trouvant à l'Annexe D.

93. Les demandeurs suggèrent qu'une demande de dommages individuels soit valablement formée par l'envoi d'un Formulaire d'Évaluation de Compensation Individuelle à l'attention de

l'Administrateur du Recours Collectif, étant entendu et convenu que seules les personnes désirant recourir au Processus d'Évaluation de Compensations Individuelles seront tenues de produire un Formulaire d'Évaluation de Compensation Individuelle.

ii. Évaluation des Compensations Individuelles

94. Il pourrait être demandé à la Cour d'approuver la structure d'un Processus d'Évaluation de Compensations Individuelles une fois rendu le jugement portant sur les Questions Communes, ou au moment autrement déterminé par la Cour.

95. Un tel Processus d'Évaluation de Compensations Individuelles serait mis à la disposition de tous les Membres du Groupe Approuvés, à l'exception de ceux qui, de l'avis de la Cour à l'issue de l'audition portant sur les Questions Communes, n'ont pas droit à une Compensation Individuelle.

iii. Auditions portant sur les Points Individuels

96. Il sera demandé à la Cour d'émettre des directives, ou de désigner certaines personnes devant lui faire rapport en vertu de l'article 334.26 des *Règles des Cours Fédérales*, ou encore de nommer un juge chargé de réaliser un échantillonnage de test impliquant des Membres du Groupe Approuvés sélectionnés et qui ont choisi de recourir au Processus d'Évaluation de Compensations Individuelles, et cela en vue d'éclaircir les points qui pourraient demeurer pertinents à la suite de la détermination des Questions Communes – par exemple :

(a) Règles d'audition régissant les évaluations individuelles;

(b) Grille de compensations individuelles;

(c) Résolution de différends portant sur la définition de concepts essentiels tels que "perte de la culture et du langage", "peine et souffrance", "maltraitance physique" et "exploitation sexuelle"; et

(d) Toute autre question soulevée par la Cour ou une partie au cours des débats entourant la détermination des Questions Communes.

G. Coût et financement des procédures

i. Frais juridiques des demandeurs

97. Les frais juridiques encourus par les demandeurs seront payés suivant une formule à pourcentage, sujet à l'approbation de la Cour conformément à l'article 334.4 des *Règles des Cours Fédérales*.

98. L'entente intervenue entre les Représentants du Groupe et les Procureurs du Groupe stipule que les honoraires et déboursés payables à ces derniers seront établis de la manière suivante :

(a) Recouvrement collectifs: vingt pour cent (20%) des premiers deux cent millions de dollars ($200,000.000) recueillis par voie de règlement ou en vertu d'un jugement, plus dix pour cent (10%) de tout montant recueilli en excédent de la somme de deux cent millions de dollars ($200,000,000) par voie de règlement ou en vertu d'un jugement; ET

(b) Recouvrement individuels: vingt-cinq pour cent (25%) des montants recueillis par voie de règlements ou en vertu d'un jugement.

ii. Financement des dépenses et débours

99. Tous les dépenses et débours de nature juridique encourus par les Représentants du Groupe ont été (et continueront à être) financés par les Procureurs du Groupe – à moins que les Représentants du Groupe et les Procureurs du Groupe n'en viennent éventuellement à la conclusion qu'il est dans le meilleur intérêt du Groupe d'obtenir du financement auprès de

tierces parties. En pareil cas, les Procureurs du Groupe aviseraient la Cour de la situation et requerraient son approbation.

H. *Règlement*

i. Négociations et offres de règlement

100. Les demandeurs ont entretenu des négociations avec la Couronne en vue de parvenir à un règlement équitable du litige, dans un délai raisonnable.

ii. Médiation et autres modes de résolution de conflits volontaires

101. Les demandeurs ont participé à des séances de médiation et d'autres négociations en vue de résoudre le litige ou de circonscrire les questions en litige.

I. Réévaluation du Plan de Poursuite

i. Flexibilité du Plan de Poursuite

102. Le présent Plan de Poursuite sera réévalué sur une base régulière et pourrait faire l'objet de modifications, avant ou après la détermination des Questions Communes, en fonction de gestion de l'instance continue assurée par la Cour, ou de toute autre manière que la Cour estime appropriée.

RECOURS COLLECTIF PORTANT SUR LES SERVICES DE PROTECTION DE LA JEUNESSE (LA RAFLE DU MILLÉNIUM) OFFERTS AUX PREMIÈRES NATIONS (« FIRST NATIONS YOUTH CARE / MILLENIUM SCOOP »)

AVIS DE CERTIFICATION SUGGÉRÉ

VEUILLEZ LIRE LE PRÉSENT AVIS AVEC ATTENTION PUISQU'IL POURRAIT AVOIR UN IMPACT SUBSTANTIEL SUR L'EXERCICE DE VOS DROITS

Nature de la Poursuite

En mars 2019, Sotos LLP, Kugler Kandestin LLP et Miller Titerle + Co. (collectivement, les "Procureurs du Groupe") ont introduit (devant la Cour Fédérale du Canada siégeant dans le district judiciaire de Montréal) un recours collectif à l'encontre du Procureur Général du Canada (la "Couronne") pour et au nom de demandeurs membres des Premières Nations.

Le recours collectif allège qu'à compter de 1991, la Couronne a mis en place, à l'échelle du territoire canadien, des politiques de financement discriminatoires ayant eu pour conséquence que plusieurs enfants de Premières Nations ont été retirés de leur foyer et de leur communauté en vue d'être confiés à divers organismes. Le recours collectif allègue également que la Couronne a refusé ou indûment tardé à fournir certains produits et services publics aux jeunes membres de Premières Nations qui en avaient besoin, le tout en contravention du Principe de Jordan.

Le recours collectif a été intenté au bénéfice des membres du Groupe suivant :

(a) tous les jeunes membres de Premières Nations ayant été retirés de leur foyer depuis le 1er avril 1991, alors qu'ils vivaient habituellement sur une réserve ou qu'au moins un (1) de leurs parents résidait habituellement sur une Réserve;

(b) tous les jeunes membres des Premières Nations qui se sont vu refuser un produit ou un service public ou à l'égard desquels la livraison d'un produit ou service public s'est vue retardée ou perturbée en raison d'un manque de fonds, d'une absence de juridiction ou d'un conflit de compétence entre paliers ou départements gouvernementaux, le tout en contravention du Principe de Jordan;

(c) les membres de la famille immédiate d'un membre du sous-groupe défini au paragraphe (a) ci-dessus.

Par ordonnance rendue le [**INSCRIRE LA DATE**], l'honorable juge _____ a certifié l'action intentée à titre de recours collectif et a désigné Xavier Moushoom et Jeremy Meawasige (représenté par sa tutrice à l'instance, Maurina Beadle) à titre de représentants du Groupe.

La Cour a également décidé que les questions suivantes, qui s'appliquent à l'ensemble du Groupe, seront débattues lors d'une audition portant sur les Questions Communes :

- [**INSCRIRE LES QUESTIONS COMMUNES RECONNUES PAR LE TRIBUNAL**]
- …

Participation au recours collectif

Si vous correspondez à la définition du Groupe, vous êtes automatiquement considéré(e) comme un Membre du Groupe, à moins de vous exclure du recours collectif de la manière décrite ci-dessous. Tous les Membres du Groupe seront liés par le jugement rendu par la

Cour, ou tout règlement conclu par les Parties et subséquemment approuvé par la Cour.

À ce stade des procédures, la Cour ne s'est pas prononcée sur les chances de recouvrement des demandeurs ou du Groupe, ni sur le mérite des allégations des demandeurs et/ou des moyens de défense invoqués par la Couronne.

Honoraires, Déboursés et Autres Frais

Vous n'aurez jamais à payer quelque honoraire, déboursé ou autre frais. Lorsqu'il question des honoraires et déboursés judiciaires à prévoir, les Représentants du Groupe et les Procureurs du Groupe ont convenu d'un mandat de représentation prévoyant que les cabinets juridiques concernés seront rémunérés suivant une formule à pourcentage – ce qui signifie en pratique qu'ils ne seront payés qu'en cas de jugement favorable ou d'un règlement hors Cour approuvé.

Vous ne serez d'aucune manière tenu(e) responsable des frais de justice de la partie défenderesse en cas d'échec du recours collectif. Tous les honoraires professionnels payés aux Procureurs du Groupe sont assujettis à l'approbation de la Cour.

Exclusion

Si vous souhaitez, en tant que Membre du Groupe, vous exclure du recours collectif, vous devez compléter et acheminer un « Formulaire d'Exclusion » au plus tard le [**INSCRIRE LA DATE-LIMITE**]. Il vous est possible de télécharger le Formulaire d'Exclusion à partir du site web [**INSCRIRE L'ADRESSE DU SITE WEB**].

Les Membres du Groupe ayant choisi de s'exclure du recours collectif à l'intérieur du délai stipulé ci-dessus ne recevront aucune des sommes qui pourraient être obtenues par les demandeurs dans ce recours collectif. Tous les Membres du Groupe qui n'auront pas demandé à être exclus du recours collectif avant l'expiration du délai seront liés par tout jugement rendu à l'issue des procédures (qu'il soit ou non favorable aux demandeurs), de même que par tout règlement intervenu et subséquemment approuvé par la Cour.

Coordonnées

Si vous avez quelque question ou préoccupation au sujet du contenu du présent Avis ou de l'évolution du recours collectif, il vous est possible de contacter les Procureurs du Groupe de différentes manières :

Schedule B - Trout Action Certification Order

(provided in English and French)

Federal Court Cour fédérale

Date: 20220211

Docket: T-1120-21

Citation: 2022 FC 149

Ottawa, Ontario, February 11, 2022

PRESENT: The Honourable Madam Justice Aylen

CLASS PROCEEDING

BETWEEN:

ASSEMBLY OF FIRST NATIONS and ZACHEUS JOSEPH TROUT

Plaintiffs

and

THE ATTORNEY GENERAL OF CANADA

Defendant

ORDER AND REASONS

UPON MOTION by the Plaintiffs, on consent and determined in writing pursuant to Rule 369 of the *Federal Courts Rules*, for an order:

(a) Granting the Plaintiffs an extension of time to make this certification motion past the deadline in Rule 334.15(2)(b);

(b) Certifying this proceeding as a class proceeding and defining the class;

(c) Stating the nature of the claims made on behalf of the class and the relief sought by the class;

(d) Stipulating the common issues for trial;

(e) Appointing the Plaintiff, Zacheus Joseph Trout, as representative plaintiff;

(f) Approving the litigation plan; and

(g) Other relief;

CONSIDERING the motion materials filed by the Plaintiffs;

CONSIDERING that the Defendant has advised that the Defendant consents in whole to the motion as filed;

CONSIDERING that the Court is satisfied, in the circumstances of this proceeding, that an extension of time should be granted to bring this certification motion past the deadline prescribed in Rule 334.15(2)(b);

CONSIDERING that while the Defendant's consent reduces the necessity for a rigorous approach to the issue of whether this proceeding should be certified as a class action, it does not relieve the Court of the duty to ensure that the requirements of Rule 334.16 for certification are met [see *Varley v Canada (Attorney General)*, 2021 FC 589];

CONSIDERING that Rule 334.16(1) of the *Federal Courts Rules* provides:

Subject to subsection (3), a judge shall, by order, certify a proceeding as a class proceeding if

(a) the pleadings disclose a reasonable cause of action;

(b) there is an identifiable class of two or more persons;

(c) the claims of the class members raise common questions of law or fact, whether or not those common questions predominate over questions affecting only individual members;

(d) a class proceeding is the preferable procedure for the just and efficient resolution of the common questions of law or fact; and

(e) there is a representative plaintiff or applicant who

(i) would fairly and adequately represent the interests of the class,

(ii) has prepared a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members as to how the proceeding is progressing,

(iii) does not have, on the common questions of law or fact, an interest that is in conflict with the interests of other class members, and

(iv) provides a summary of any agreements respecting fees and disbursements between the representative plaintiff or applicant and the solicitor of record.

Sous réserve du paragraphe (3), le juge autorise une instance comme recours collectif si les conditions suivantes sont réunies :

a) les actes de procédure révèlent une cause d'action valable;

b) il existe un groupe identifiable formé d'au moins deux personnes;

c) les réclamations des membres du groupe soulèvent des points de droit ou de fait communs, que ceux-ci prédominent ou non sur ceux qui ne concernent qu'un membre;

d) le recours collectif est le meilleur moyen de régler, de façon juste et efficace, les points de droit ou de fait communs;

e) il existe un représentant demandeur qui :

(i) représenterait de façon équitable et adéquate les intérêts du groupe,

(ii) a élaboré un plan qui propose une méthode efficace pour poursuivre l'instance au nom du groupe et tenir les membres du groupe informés de son déroulement,

(iii) n'a pas de conflit d'intérêts avec d'autres membres du groupe en ce qui concerne les points de droit ou de fait communs,

(iv) communique un sommaire des conventions relatives aux honoraires et débours qui sont intervenues entre lui et l'avocat inscrit au dossier.

CONSIDERING that, pursuant to Rule 334.16(2), all relevant matters shall be considered in a determination of whether a class proceeding is the preferable procedure for the just and efficient resolution of the common questions of law or fact, including whether: (a) the questions of law or fact common to the class members predominate over any questions affecting only individual members; (b) a significant number of the members of the class have a valid interest in individually controlling the prosecution of separate proceedings; (c) the class proceeding would involve claims that are or have been the subject of any other proceeding; (d) other means of resolving the claims are less practical or less efficient; and (e) the administration of the class proceeding would create greater difficulties than those likely to be experienced if relief were sought by other means;

CONSIDERING that:

(a) The conduct of the Crown at issue in this proposed class action proceeding, as set out in the Statement of Claim, concerns discrimination against First Nations children in the provision of essential services and the Crown's failure to prevent First Nations children from suffering gaps, delays, disruptions or denials in receiving services and products contrary to their *Charter*-protected equality rights. The Plaintiffs allege that the Crown's conduct was discriminatory, directed at Class Members because they were First Nations, and breached section 15(1) of the *Charter*, the Crown's fiduciary duties to First Nations and the standard of care at common and civil law.

(b) With respect to the first element of the certification analysis (namely, whether the pleading discloses a reasonable cause of action), the threshold is a low one. The question for the Court is whether it is plain and obvious that the causes of action are doomed to fail [see

Brake v Canada (Attorney General), 2019 FCA 274 at para 54]. Even without the Crown's consent, I am satisfied that the Plaintiffs have pleaded the necessary elements for each cause of action sufficient for purposes of this motion, such that the Statement of Claim discloses a reasonable cause of action.

(c) With respect to the second element of the certification analysis (namely, whether there is an identifiable class of two or more persons), the test to be applied is whether the Plaintiffs have defined the class by reference to objective criteria such that a person can be identified to be a class member without reference to the merits of the action [see *Hollick v Toronto (City of)*, 2001 SCC 68 at para 17]. I am satisfied that the proposed class definitions for the Child Class and Family Class (as set out below) contain objective criteria and that inclusion in each class can be determined without reference to the merits of the action.

(d) With respect to the third element of the certification analysis (namely, whether the claims of the class members raise common questions of law or fact), as noted by the Federal Court of Appeal in *Wenham v Canada (Attorney General)*, 2018 FCA 199 at para 72, the task under this part of the certification determination is not to determine the common issues, but rather to assess whether the resolution of the issues is necessary to the resolution of each class member's claim. Specifically, the test is as follows:

> The commonality question should be approached purposively. The underlying question is whether allowing the suit to proceed as a representative one will avoid duplication of fact-finding or legal analysis. Thus an issue will be "common" only where its resolution is necessary to the resolution of each class member's claim. It is not essential that the class members be identically situated vis-à-vis the opposing party. Nor is it necessary that common issues predominate over non-common issues or that the resolution of the common issues would be determinative of each class member's claim. However, the class members' claims must

> share a substantial common ingredient to justify a class action. Determining whether the common issues justify a class action may require the court to examine the significant of the common issues in relation to individual issues. In doing so, the court should remember that it may not always be possible for a representative party to plead the claims of each class member with the same particularity as would be required in an individual suit. (Western Canadian Shopping Centres, above at para 39; see also Vivendi Canada Inc. v. Dell'Aniello, 2014 SCC 1, [2014] 1 S.C.R. 3 at paras 41 and 44-46.)

Having reviewed the common issues (as set out below), I am satisfied that the issues share a material and substantial common ingredient to the resolution of each class member's claim. Moreover, I agree with the Plaintiffs that the commonality of these issues is analogous to the commonality of similar issues in institutional abuse claims which have been certified as class actions (such as the Indian Residential Schools and the Sixties Scoop class action litigation), as well as those certified in the Moushoom class action (T-402-19/T-141-20). Accordingly, I find that the common issue element is satisfied.

(e) With respect to the fourth element of the certification analysis (namely, whether a class proceeding is the preferable procedure for the just and efficient resolution of the common questions of fact and law), the preferability requirement has two concepts at its core: (i) whether the class proceeding would be a fair, efficient and manageable method of advancing the claim; and (ii) whether the class proceeding would be preferable to other reasonably available means of resolving the claims of class members. A determination of the preferability requirement requires an examination of the common issues in their context, taking into account the importance of the common issues in relation to the claim as a whole, and may be satisfied even where there are substantial individual issues [see *Brake*, *supra* at para 85; *Wenham*, *supra* at para 77 and *Hollick*, *supra* at paras 27-31]. The

Court's consideration of this requirement must be conducted through the lens of the three principle goals of class actions, namely judicial economy, behaviour modification and access to justice [see *Brake*, *supra* at para 86, citing *AIC Limited v Fischer*, 2013 SCC 69 at para 22].

(f) Having considered the above-referenced principles and the factors set out in Rule 334.16(2), I am satisfied a class proceeding is the preferable procedure for the just and efficient resolution of the common questions of fact and law. Given the systemic nature of the claims, the potential for significant barriers to access to justice for individual claimants and the concerns regarding the other means available for resolving the claims of class members, I am satisfied that the proposed class action would be a fair, efficient and manageable method of advancing the claims of the class members.

(g) With respect to the fifth element of the certification analysis (namely, whether there are appropriate proposed representatives), I am satisfied, having reviewed the affidavit evidence filed on the motion together with the detailed litigation plan, that the proposed representative plaintiff meets the requirements of Rule 334.16(1)(e);

CONSIDERING that the Court is satisfied that all of the requirements for certification are met and that the requested relief should be granted;

THIS COURT ORDERS that:

1. The Plaintiffs are granted an extension of time, *nunc pro tunc*, to bring this certification motion past the deadline in Rule 334.15(2)(b) of the *Federal Courts Rules*.

2. For the purpose of this Order and in addition to definitions elsewhere in this Order, the following definitions apply and other terms in this Order have the same meaning as in the Statement of Claim:

(a) **"Child Class"** means all First Nations individuals who were under the applicable provincial/territorial age of majority and who, during the Class Period, did not receive (whether by reason of a denial or a gap) an essential public service or product relating to a confirmed need, or whose receipt of said service or product was delayed, on grounds, including but not limited to, lack of funding or lack of jurisdiction, or as a result of a service gap or jurisdictional dispute with another government or governmental department.

(b) **"Class" means** the Child Class and Family Class, collectively.

(c) **"Class Counsel"** means Sotos LLP, Kugler Kandestin LLP, Miller Titerle + Co., Nahwegahbow Corbiere and Fasken Martineau Dumoulin LLP.

(d) **"Class Members"** mean all persons who are members of the Class.

(e) **"Class Period"** means the period of time beginning on April 1, 1991 and ending on December 11, 2007.

(f) **"Family Class"** means all persons who are brother, sister, mother, father, grandmother or grandfather of a member of the Child Class.

(g) **"First Nation"** and **"First Nations"** means Indigenous peoples in Canada, including the Yukon and the Northwest Territories, who are neither Inuit nor Métis, and includes:

i. Individuals who have Indian status pursuant to the *Indian Act*, R.S.C., 1985, c.I-5 [*Indian Act*];

ii. Individuals who are entitled to be registered under section 6 of the *Indian Act* at the time of certification;

iii. Individuals who met band membership requirements under sections 10-12 of the *Indian Act*, such as where their respective First Nation community assumed control of its own membership by establishing membership rules and the individuals were found to meet the requirements under those membership rules and were included on the Band List; and

iv. Individuals, other than those listed in sub-paragraphs (i)-(iii) above, recognized as citizens or members of their respective First Nations whether under agreement, treaties or First Nations' customs, traditions and laws by the date of trial or resolution otherwise of this action.

3. This proceeding is hereby certified as a class proceeding against the Defendant pursuant to Rule 334.16(1) of the *Federal Courts Rules*.

4. The Class shall consist of the Child Class and Family Class, all as defined herein.

5. The nature of the claims asserted on behalf of the Class against the Defendant is constitutional, negligence and breach of fiduciary duty owed by the Crown to the Class.

6. The relief claimed by the Class includes damages, *Charter* damages, disgorgement, punitive damages and exemplary damages.

7. Zacheus Joseph Trout is appointed as representative plaintiff and is deemed to constitute an adequate representative of the Class, complying with the requirements of Rule 334.16(1)(e).

8. Class Counsel are hereby appointed as counsel for the Class.

9. The proceeding is certified on the basis of the following common issues:

   (a) Did the Crown's conduct as alleged in the Statement of Claim [Impugned Conduct] infringe the equality right of the Class under section 15(1) of the *Canadian Charter of Rights and Freedoms*? More specifically:

      i. Did the Impugned Conduct create a distinction based on the Class' race, or national or ethnic origin?

      ii. Was the distinction discriminatory?

      iii. Did the Impugned Conduct reinforce and exacerbate the Class' historical disadvantages?

iv. If so, was the violation of section 15(1) of the *Charter* justified under section 1 of the *Charter*?

v. Are *Charter* damages an appropriate remedy?

(b) Was the Crown negligent towards the Class? More specifically:

i. Did the Crown owe the Class a duty of care?

ii. If so, did the Crown breach that duty of care?

(c) Did the Crown breach its obligations under the *Civil Code of Québec*? More specifically:

i. Did the Crown commit fault or engage its civil liability?

ii. Did the Impugned Conduct result in losses to the Class and if so, do such losses constitute injury to each of the members of the Class?

iii. Are members of the Class entitled to claim damages for the moral and material damages arising from the foregoing?

(d) Did the Crown owe the Class a fiduciary duty? If so, did the Crown breach that duty?

(e) Can the amount of damages payable by the Crown be determined partially under Rule 334.28(1) of the *Federal Courts Rules* on an aggregate basis? If so, in what amount?

(f) Did the Crown obtain quantifiable monetary benefits from the Impugned Conduct during the Class Period? If so, should the Crown be required to disgorge those benefits and if so, in what amount?

(g) Should punitive and/or aggravated damages be awarded against the Crown? If so, in what amount?

10. The Litigation Plan attached hereto as Schedule "A" is hereby approved, subject to any modifications necessary as a result of this Order and subject to any further orders of this Court.

11. The form of notice of certification, the manner of giving notice and all other related matters shall be determined by separate order(s) of the Court.

12. Notice of certification shall be given at the same time as the notice of certification of the companion Moushoom class action (Court File Nos. T-402-19/T-141-20), which shall be determined by separate order of this Court.

13. The opt-out period shall be six months from the date on which notice of certification is published in the manner to be specified by further order of this Court.

14. Pursuant to Rule 334.39(1) of the *Federal Courts Rules*, there shall be no costs payable by any party for this motion.

"Mandy Aylen"
Judge

SCHEDULE "A" .....

SCHEDULE "B" .....

SCHEDULE "C" .....

SCHEDULE "D" .....

I. DEFINITIONS

1. The definitions below will be used throughout this Litigation Plan. Any term defined in the Statement of Claim that is also used in this Litigation Plan has the same meaning as that included in the Statement of Claim or as otherwise defined by the Court.

Aggregate Damages Distribution Process means the system directed by the Court for the **Class Action Administrator** to distribute aggregate damages to **Approved Class Members**;

Approved Class Member(s) means **Approved Child Class Member(s)** and/or **Approved Family Class Members**;

Approved Family Class Member(s) means a Family Class Member who has been approved by the **Class Action Administrator** as meeting the criteria for being a Family Class Member, including the brother, sister, mother, father, grandmother or grandfather of an Approved Child Class Member (regardless of whether the Approved Child Class Member is alive) and whose approval as a Family Class Member has not been successfully challenged;

Approved Child Class Member(s) means a Child Class Member who has been approved by the **Class Action Administrator** as meeting the criteria for being a Child Class Member and whose approval as a Child Class Member has not been successfully challenged;

Certification Notice means the information set out in Schedule A to this Litigation Plan, as may be subsequently amended and as approved by the Court;

CHRT Proceeding means the proceeding before the **CHRT** under file number T1340/7008;

Claim Form means the form set out in Schedule C to this Litigation Plan used by the Child Class Members and/or the Family Class Members to submit a claim, as may be subsequently amended and as approved by the Court;

Class Action Administrator means any settlement administrator or other appropriate firm appointed by the Court to assist in the administration of the class proceeding;

Class Counsel means the consortium of law firms acting as co-counsel in this class proceeding, with the firms of Sotos LLP, Kugler Kandestin LLP, Miller Titerle + Company, Nahwegahbow Corbiere, and Fasken LLP as Solicitors of Record;

Class Member(s) means an individual who falls within the definition of the Child Class and/or the Family Class, as pleaded in the Statement of Claim and as approved by the Court;

Common Issues means the issues listed in the Notice of Motion for Certification, or as found by the Court, as may be subsequently amended and as approved by the Court;

Common Issues Notice means the information set out in the notice regarding the **Common Issues** to be certified by the Court at Certification, as may be subsequently amended and as approved by the Court;

Crown Class Member Information means information to be provided by the Crown, at the request of the plaintiffs and/or as ordered by the Court, to the **Class Action Administrator** and/or **Class Counsel** regarding the names and last known contact information of all individuals who meet the criteria of Class Members as set out in the Statement of Claim or as otherwise defined by the Court, including a list of all known Class Members' names and last known addresses using the information in the Crown's possession or under its control.[1]

Individual Damage Assessment Form means the form set out in Schedule D to this Litigation Plan, as may be subsequently amended and as approved by the Court, to be used by **Approved Class Member(s)** to elect an individual assessment of their damages and commence an individual damage assessment under the **Individual Damage Assessment Process**;

Individual Damage Assessment Process means the procedure and system to be approved by the Court following the **Common Issues** trial to be used to assess and distribute damages to **Approved Class Member(s)** who have requested an individual damage assessment by submitting an **Individual Damage Assessment Form**;

Notice Program means the process, set out in this Litigation Plan, for communicating the **Certification Notice** and/or the **Common Issues Notice** to **Class Members**, as may be subsequently amended and as approved by the Court;

Opt Out Form means the form set out in Schedule B to this Litigation Plan used by Class Members to opt out of the class proceeding, as may be subsequently amended and as approved by the Court;

Opt Out Period means the deadline, proposed by the plaintiffs as 180 days post Certification or as determined by the Court, to opt out of the class proceeding;

Opt Out Procedures means the procedures, set out in the Litigation Plan, for Class Members to opt out of this class proceeding, as may be subsequently amended and as approved by the Court; and

Special Opt Out Procedures means the procedures, set out in the Litigation Plan, for Class Members who have already commenced a civil proceeding in Canada or who are known

---

[1] Where Class Members are known to be represented by counsel, only their name should be provided along with their counsel's name and address.

by the Crown to have already retained legal counsel to opt out of this class proceeding, as may be subsequently amended and as approved by the Court.

II. OVERVIEW

2. The plaintiffs have commenced this action on behalf of First Nations individuals who allege that the Crown has breached their equality rights, depriving them of public services and products. The class action advances the rights of thousands of First Nations children and family members.

3. This Litigation Plan is advanced as a workable method of advancing the proceeding on behalf of the Class and of notifying Class Members as to how the class proceeding is progressing, pursuant to rule 334.16(1)(e)(ii) of the *Federal Court Rules*. The Litigation Plan is modelled on the class action relating to the Indian Residential Schools,[2] with numerous alterations made in order to streamline the procedure and to take into account lessons learned from that settlement.

4. This Litigation Plan sets out a detailed plan for the common stages of this litigation, and sets out, on a preliminary without prejudice basis, an early plan for how the individual stage of the action may progress. Given the early stage of the litigation, the plan is necessarily subject to substantial revisions as the case progresses.

III. PRE-CERTIFICATION PROCESS

5. The plaintiffs are litigating this action in parallel with a closely interrelated consolidated class action (Court File Nos. T-402-19 / T-141-20) about First Nations child and family services

---

[2] See *Baxter v Canada (Attorney General)*, 2006 CanLII 41673 (Ont Sup Ct), and subsequent orders of the Court. See also information available on the website of the Indian Residential Schools Adjudication Secretariat, online <http://www.iap-pei.ca/home-eng.php>.

and Jordan's Principle. Therefore, much of the work and processes are shared between the two actions.

A. The Parties

i. The Plaintiffs

6. The plaintiffs have proposed two classes:

   (a) the Child Class; and

   (b) the Family Class.

7. The proposed representative plaintiff is Zacheus Joseph Trout.

ii. The Defendant

8. The defendant is the Crown.

B. The Pleadings

i. Statement of Claim

9. The plaintiffs have delivered a Statement of Claim.

ii. Statement of Defence

10. The Crown has not delivered a Statement of Defence.

iii. Third Party Claim

11. The Crown has not issued any Third Party Claim.

C. Preliminary Motions

12. The plaintiffs propose that any preliminary motions be dealt with at the Motion for Certification or as directed by the Court.

D. Pre-Certification Communication Strategy

i. Responding to Inquiries from Putative Class Members

13. Both before and since the commencement of this class proceeding, Class Counsel have received many communications from Class Members affected by this class proceeding.

14. With respect to each inquiry, the individual's name, address, email and telephone number are added to a confidential database. Class Members are asked to register on the websites of Class Counsel. Once registered, they receive updates on the progress of the class proceeding in French and English. Any individual Class Members who contact Class Counsel are responded to in their preferred language.

ii. Pre-Certification Status Reports

15. In addition to responding to individual inquiries, Class Counsel have created a webpage concerning the class proceeding in English and French (see: https://sotosclassactions.com/cases/current-cases/first-nations-youth/). The most current information on the status of the class proceeding is posted and is updated regularly in English and French.

16. Copies of the publicly filed court documents and court decisions are accessible from the webpage. In addition, phone numbers for Class Counsel in Quebec and Ontario as well as email contact information are provided.

17. Class Counsel sends update reports to Class Members who have provided their contact information and have indicated an interest in being notified of further developments in the class proceeding.

iii. Pre-certification outreach

18. Class Counsel have presented the proposed class action to a council of First Nations social services delivery personnel for the Province of Québec and the region of Labrador, as well as the First Nations youth directors forum in British Columbia. Class Counsel are in the process of arranging similar presentations to affected communities in Québec and elsewhere in Canada.

E. Settlement Conference

i. Pre-Certification Settlement Conference

19. The plaintiffs will participate in a pre-Certification Settlement Conference to determine whether any or all of the issues arising in the class proceeding can be resolved.

20. The plaintiffs propose that a pre-Certification Settlement Conference be conducted at least one month after the Motion for Certification and responding materials, if any, have been filed with the Court.

F. Timetable

i. Plaintiffs' Proposed Timetable for the Pre-Certification Process

21. The plaintiffs propose that the pre-Certification process timetable set out below be imposed by Court Order at an early case conference.

	Deadline
Plaintiffs' Certification Motion Record	Date of Serving and Filing the Notice of Motion for Certification and Motion Record ("**DOF**")
Respondent's Motion Record, if any	Within 90 days from DOF
Plaintiffs' Reply Motion Record, if any	Within 120 days from DOF

Cross-examinations, if any, to be completed	Within 150 days from DOF
Undertakings answered	Within 180 days from DOF
Motions arising from cross-examinations, if any, heard	Within 210 days from DOF
Further cross-examinations, if necessary, completed by	Within 230 days from DOF
Plaintiffs' Memorandum of Fact and Law	Within 250 days from DOF
Respondent's Memorandum of Fact and Law	Within 280 days from DOF
Plaintiffs' Reply, if any	Within 300 days from DOF
Motion for Certification and all other Motions commencing	Within 310 days from DOF

IV. POST-CERTIFICATION PROCESS

A. Timetable

i. Plaintiffs' Timetable for the Post-Certification Process

22. The plaintiffs intend to proceed to trial on an expedited basis or a hybrid summary judgment/*viva voce* trial.

23. The plaintiffs propose that the following post-Certification process timetable, as explained in detail below, be imposed by the Court upon Certification:

Certification Notice to Class Members commences	Upon Certification
Exchange Affidavits of Documents within	70 days from certification
Motions for Production of Documents, Multiple Examinations of Crown representatives or for Examinations of Non-Parties to be conducted within	110 days from certification

Examinations for Discovery to be conducted within	140 days from certification
Certification Notice to Class Members completed within	90 days from certification
Trial Management Conference re: Expert Evidence	170 days from certification
Motions arising from Examinations for Discovery within	190 days from certification
Undertakings answered within	160 days from certification
Further Examinations, if necessary, within	210 days from certification
Common Issues Pre-Trial to be conducted	250 days from certification
Opt Out Period deadline	180 days from certification
Common Issues Trial or Hybrid Trial to be conducted within	300 days from certification

B. Certification Notice, Notice Program and Opt Out Procedures

i. Certification Notice

24. The Certification Notice and all other notices to Class Members provided by the plaintiffs will, once finalized and approved by the Court, be translated into French. The plaintiffs will explore whether it will be necessary to translate the Certification Notice and/or other notices into some First Nations languages, subject to Court approval.

25. The Certification Notice will, subject to further amendments, be in the form set out in Schedule A hereto.

ii. Notice Program

26. The plaintiffs propose to communicate the Certification Notice to Class Members through the following Notice Program.

27. The plaintiffs will provide Certification Notice to Class Members by arranging to have the Certification Notice (and its translated versions whenever possible) communicated/published in the following media within 90 days of Certification, as frequently as may be reasonable or as directed by the Court under rule 334.32 of the *Federal Courts Rules*. In particular, the plaintiffs propose the following means of providing Certification Notice:

(a) A press release within 15 days of the Certification order being issued;

(b) Direct communication with Class Members:

(i) by email or regular mail to the last known contact information of Class Members provided by the Crown (*i.e.*, Crown Class Member Information);

(ii) by email or regular mail to all Class Members who have provided their contact information to Class Counsel, including through the Class Proceeding's webpage;

(c) Distribution to the Assembly of First Nations for circulation to its membership of First Nations bands across Canada;

(d) Email to First Nations children's aid societies across Canada;

(e) Circulation through the following media:

(i) Aboriginal newspapers/publications such as First Nations Drum, The Windspeaker, Mi'kmaq Maliseet Nations News, APTN National News; and

(ii) social media outlets, such as Facebook and Instagram.

iii. Opt Out Procedures

28. The plaintiffs propose Opt Out Procedures for Class Members who do not wish to participate in the class proceeding.

29. The Certification Notice will include information about how to Opt Out of the class proceeding and will provide information about how to obtain and submit the appropriate Opt Out Forms to the Class Action Administrator and/or Class Counsel.

30. There will be one standard Opt Out Form for all Class Members.

31. Class Members will be required to file the Opt Out Form with the Class Action Administrator and/or Class Counsel within the Opt Out Period, proposed by the plaintiffs as 180 days post Certification or as directed by the Court.

32. The Class Action Administrator or Class Counsel shall, within 30 days after the expiration of the Opt Out Period, deliver to the Court and the Parties an affidavit listing the names of all persons who have opted out of the Class Action.

iv. Special Opt Out Procedures

33. The plaintiffs propose Special Opt Out Procedures for Class Members who are either named party plaintiffs in a civil proceeding in Canada or who are known by the Crown to have retained legal counsel in respect of the subject matter of this action with the express purpose of starting a separate action against the Crown.

C. Identifying and Communicating with Class Members

i. Identifying Class Members

34. As stated above, the plaintiffs intend to request the Crown Class Member Information.

ii. Database of Class Members

35. Class Counsel will maintain a confidential database of all Class Members who contact Class Counsel. The database will include each individual's name, address, telephone number, and email address where available.

iii. Responding to Inquiries from Class Members

36. Class Counsel and their staff will respond to each inquiry by Class Members.

37. Class Counsel will have a system in place to allow for responses to inquiries by Class Members in their language of choice whenever possible.

iv. Post Certification Status Reports

38. In addition to responding to individual inquiries, Class Counsel will continually update the webpage dedicated to this class action with information concerning the status of the class proceeding.

39. Class Counsel will send update reports to Class Members who have provided their contact information. These update reports will be sent as necessary or as directed by the Court.

D. Documentary Production

i. Affidavit/List of Documents

40. The plaintiffs will be required to deliver an Affidavit of Documents within 70 days after Certification. The Crown will similarly be required to deliver a List of Documents within 70 days after Certification.

41. The Parties are expected to serve Supplementary Affidavits (or Lists) of Documents as additional relevant documents are located.

ii. Production of Documents

42. All Parties are expected to provide, at their own expense, electronic copies of all Schedule "A" productions at the time of delivering their Affidavit of Documents. All productions are to be made in electronic format.

iii. Motions for Documentary Production

43. Any motions for documentary production shall be made within 110 days of Certification.

iv. Document Management

44. The Parties will each manage their productions with a compatible document management system, or as directed by the Court. All documents are to be produced in OCR format.

45. All productions should be numbered and scanned electronically to enable quick access and efficient organization of documents.

E. Examinations for Discovery

46. Examinations for Discovery will take place within 140 days of Certification.

47. The plaintiffs expect to request the Crown's consent to examine more than one Crown representative. In the event that a dispute arises in this regard, the plaintiffs propose to bring a motion within 110 days after Certification.

48. The plaintiffs anticipate that the Examination for Discovery of properly selected and informed officers of the Crown will take approximately 10 days, subject to refusals and undertakings.

49. The plaintiffs anticipate that the Examination for Discovery of the representative plaintiffs will take approximately one day, subject to refusals and undertakings.

F. Interlocutory Matters

i. Undertakings

50. Undertakings are to be answered within 160 days of Certification.

ii. Motions for Refusals and Undertakings

51. Specific dates for motions for undertakings and refusals that arise from the Examinations for Discovery will be requested upon Certification. Motions for refusals and undertakings will be heard within 190 days of Certification.

iii. Re-attendances and Further Examinations for Discovery

52. Any re-attendances or further Examinations for Discovery required as a result of answers to undertakings or as a result of the outcome of the motions for refusals and undertakings should be completed within 210 days of Certification.

G. Expert Evidence

i. Identifying Experts and Issues

53. A Trial Management Conference will take place following Examinations for Discovery at which guidelines for identifying experts and their proposed evidence at trial will be determined.

H. Determination of the Common Issues

i. Pre-Trial of the Common Issues

54. Upon Certification, the Court will be asked to assign a date for a Pre-Trial Conference relating to the Common Issues trial.

55. The plaintiffs expect that a full day will be required for a Pre-Trial Conference and will request that the Pre-Trial be held 250 days after Certification and, in any event, at least 90 days before the date of the Common Issues trial.

ii. Trial of the Common Issues

56. Upon Certification, the Court will be asked to assign a date for the Common Issues trial.

57. The plaintiffs propose that the trial of the Common Issues be held 300 days after Certification.

58. The length of time required for the Common Issues trial will depend on many factors and will be determined at the Trial Management Conference.

V. POST COMMON ISSUES DECISION PROCESS

A. Timetable

i. Plaintiffs' Timetable for the Post-Common Issues Decision Process

59. The plaintiffs propose that the following timetable be imposed by the Court following the Court's judgment on the Common Issues:

Common Issues Notice provided	Within 90 days of Common Issues decision
Individual Issue Hearings, if any, begin	120 days after decision
Individual Damage Assessments, if any, begin	240 days after decision
Deadline to Submit Claim Forms (as of right)	Within 1 year of decision
Deadline to Submit Claim Forms (as of right in prescribed circumstances or with leave of the Court)	1 year after decision

B. Common Issues Notice

i. Notifying Class Members

60. The Common Issues Notice will, subject to further amendments, be substantially in the form approved by the Court at the Common Issues trial. The Common Issues Notice may contain, amongst others, information on any aggregate damages awarded and any issues requiring individual determination, as approved by the Court.

61. The plaintiffs propose to circulate the Common Issues Notice within 90 days after the Common Issues judgment.

62. The Common Issues Notice will be circulated in the same manner as set out above dealing with the Certification Notice or as directed by the Court.

C. Claim Forms

i. Use of Claim Forms

63. The Court will be asked to approve under rule 334.37 the use of standardized Claim Forms by Class Members who may be entitled to a portion of the aggregate damage award or who may be entitled to have an individual assessment.

ii. Obtaining and Filing Claim Forms

64. The procedure for obtaining and filing Claim Forms will be set out in the Common Issues Notice.

65. The plaintiffs propose to use a single standard Claim Form, substantially in the form attached as Schedule C, for all three classes, subject to further amendments and as approved by the Court.

66. The plaintiffs propose that counselling be made available to Class Members in need of support and assistance when completing the Claim Forms. Where necessary, a process for appointing a guardian or trustee to assist the Class Members will be developed.

67. Before completing a Claim Form, Class Members will be able to review information about them in the possession of Canada relevant to their claim (the Crown Class Member Information). That information may include:

(a) any records relating to the Class Member's voluntary or involuntary placement in out-of-home care during the Class Period;

(b) any records relating to a need by the Class Member for a service or product;

(c) any records relating to a request made by the Class Member for a service or product;

(d) any records relating to the denial of a service or product to the Class Member;

(e) any records relating to any service(s) or product(s) provided by the Crown to the Class Member; and/or

(f) any records relating to the family status or family relationship between a Family Class Member and a Child Class Member.

68. Class Members will be required to file the appropriate Claim Form with the Class Action Administrator and/or Class Counsel within the deadlines set out below or as directed by the Court.

69. The Class Action Administrator will be responsible for receiving all Claim Forms.

iii. Deadline for Filing Claim Forms

70. Class Members will be advised of the deadline for filing Claim Forms in the Common Issues Notice.

71. The plaintiffs propose that Class Members be given one year, or such period as set out by the Court, after the Common Issues judgment to file Claim Forms as of right.

72. The plaintiffs propose that Class Members be entitled to file Claim Forms more than one year after the Court's judgment on the Common Issues in certain circumstances prescribed by the Court (*i.e.*, lack of awareness of entitlement, etc.) or with leave of the Court (*i.e.*, based on mental or physical health issues, etc.).

D. Determining and Categorizing Class Membership

i. Approving Child Class Members

73. The Class Action Administrator will determine whether an individual submitting a Claim Form as a Child Class Member properly qualifies as a Class Member.

74. The Class Action Administrator will make these determinations following guidelines determined by the Court at the Common Issues trial in part by referring to the information set out in the Claim Form. Such guidelines may include: (a) whether the Class Member needed a service or product at any point during the Class Period; (b) whether the Class Member was denied that service or product; (c) whether the Class Member's receipt of a service or product was delayed or disrupted; (d) whether such denial, disruption or delay was based on lack of funding, lack of jurisdiction or a jurisdictional dispute between governments or government departments; and/or (e) whether such denial, disruption or delay happened while the Class Member was under the applicable provincial/territorial age of majority.

75. The Class Action Administrator will also make these determinations in part by referring to the Crown Class Member Information regarding the number of Class Members who have received a service or product under Jordan's Principle under orders made in the CHRT Proceeding.

76. The Class Action Administrator will, where appropriate and necessary, request in writing further information from the individual submitting the Child Class Claim Form or the Crown to make these determinations.

ii. Approving Family Class Members

77. The Class Action Administrator will determine whether an individual submitting a Family Class Claim Form properly qualifies as a Family Class Member.

78. These determinations will be made by the Class Action Administrator by referring to Crown Class Member Information and the information set out in the Claim Form with respect to the relationship of the proposed Family Class Member with an Approved Child Class Member.

79. The Class Action Administrator will, where appropriate and necessary, request in writing further information from the individual filing the Claim Form to make these determinations.

iii. Deceased Class Members

80. The estate of a deceased Class Member may submit a Claim Form if the deceased Class Member died on or after April 1, 1991.

81. If the deceased Class Member would otherwise have qualified as an Approved Class Member, the estate will be entitled to be compensated in accordance with the Aggregate Damages Distribution Process. The estate will not have the option to proceed under the Individual Damage Assessment Process except with leave of the Court.

iv. Notifying Class Members, Challenging and Recording Decisions

82. Within 30 days of receipt of a Claim Form, the Class Action Administrator will notify the individual of its decision on whether the individual is an Approved Class Member. Individuals who are not approved as Class Members will be provided with information on the procedures to follow to challenge the decision of the Class Action Administrator. The plaintiffs propose that these procedures include an opportunity to resubmit an amended Claim Form with supporting documentation capable of verifying that the individual is a Class Member.

83. All interested parties will be provided with the ability to appeal a decision by the Class Action Administrator to the Court or in a manner to be prescribed. Class Counsel may challenge the decision on behalf of affected individuals.

84. The Class Action Administrator will keep records of all Approved Class Members and their respective Claim Forms and will provide this information to Class Counsel, the Crown and other interested parties on a monthly basis. Class Counsel and/or other interested parties will have 30 days after receiving this information to challenge the Class Action Administrator's decision by advising the Class Action Administrator and the other affected parties in writing of the basis for their challenge. The responding party will be given 30 days thereafter to respond in writing to the challenge at which time the Class Action Administrator will reconsider its decision and advise all parties.

E. Aggregate Damages Distribution Process

i. Distribution of Aggregate Damages

85. The Class Action Administrator will distribute the aggregate damages to all Approved Class Members in the manner directed by the Court.

86. The plaintiffs will propose that Approved Class Members be entitled to a proportion of the aggregate damages as determined by the Class Action Administrator based on factors to be approved by the Court, including but not limited to: (a) the duration of deprivation from a service or product as a result of a delay, denial or disruption; (b) the importance of the service or product to the child; and (c) the family relationship of the Family Class Member to a given Child Class Member.

87. The Class Action Administrator, upon advising Approved Class Members of its decision on their membership as set out above, will within a reasonable period of time to be determined by the Court, advise the Approved Class Members of the proportion of aggregate damages owing to each Approved Class Member under the Aggregate Damages Distribution Process to be approved by the Court.

88. In addition, if applicable, the Class Action Administrator will provide Approved Class Members with a package of materials including: information on how to collect their aggregate damage awards, information on Class Members' ability to proceed through the Individual Damage Assessment Process, copies of the Individual Damage Assessment Form along with a guide on how to complete the form, and contact information for obtaining independent legal advice and counselling. Such information is to be provided in a culturally responsive and appropriate style, making full use of interactive media, including video tutorials.

ii. Seeking an Individual Damage Assessment

89. Approved Class Members, when notified of their entitlement to aggregate damages, may be given information on their right to have their compensation individually assessed under the Individual Damage Assessment Process set out below.

F. Individual Damage Assessment Process

i. Individual Damage Assessment Forms

90. When Approved Class Members are notified of their aggregate damage entitlement and information on their right to proceed under the Individual Damage Assessment Process, they will be provided with an Individual Damage Assessment Form as set out in Schedule D.

91. If applicable, the plaintiffs propose that a request for individual damages be made by sending an Individual Damage Assessment Form to the Class Action Administrator, and that only those individuals who wish to proceed through the Individual Damage Assessment Process be required to submit Individual Damage Assessment Forms.

ii. Individual Damage Assessments

92. The Court may be asked to approve the use of an Individual Damage Assessment Process after a judgment on the Common Issues or otherwise as directed by the Court.

93. The Individual Damage Assessment Process would be available to all Approved Class Members except those who are found by the Court not to be entitled to individual damages following the Common Issues trial.

iii. Individual Issue Hearings

94. The Court will be asked to provide directions, or to appoint persons to conduct references under rule 334.26 of the *Federal Courts Rules* or appoint a judge to conduct test cases involving selected Approved Class Members who are proceeding under the Individual Damage Assessment Process to assist with the matters that may or may not remain in issue after the determination of the Common Issues, such as:

(a) Hearing rules for individual assessments;

(b) A compensation matrix for individual damages;

(c) Assistance in resolving disputes relating to the definitions of key terms such as "essential service", "delay", and "jurisdictional dispute"; and

(d) Other matters raised by the Court or the parties during the Common Issues litigation.

G. Fees

i. Plaintiffs' Legal Fees

95. The plaintiffs' fees are to be paid on a contingency basis, subject to the Court's approval under rule 334.4 of the *Federal Courts Rules*.

96. The agreement between the representative plaintiffs and Class Counsel states that legal fees and disbursements to be paid to Class Counsel shall be on the following basis:

(a) Aggregate damages recovery: 20% of the first two hundred million dollars ($200,000,000) in recovery by settlement or judgment, plus 10% of any amounts recovered by settlement or judgment beyond the first two hundred million dollars; and

(b) Individual damages recovery: 25% of settlement or judgment.

ii. Funding of Disbursements

97. Funding of legal disbursements for the representative plaintiffs has been, and will continue to be, made through Class Counsel, unless the plaintiffs and Class Counsel subsequently deem it to be in the best interests of the Class to obtain third-party funding, in which case Class Counsel will advise the Court of such third-party funding and seek approval thereof.

H. Settlement Issues

i. Settlement Offers and Negotiations

98. The plaintiffs will conduct settlement negotiations with the Crown from time to time with a view to achieving a fair and timely resolution.

ii. Mediation and Other Non Binding Dispute Resolution Mechanisms

99. The plaintiffs will participate in mediation or other non-binding dispute resolution mechanisms, if and when appropriate, in an effort to try to resolve the dispute or narrow the issues in dispute between the Parties.

I. Review of the Litigation Plan

i. Flexibility of the Litigation Plan

100. This Litigation Plan will be reconsidered on an ongoing basis and may be revised under the continued case management authority of the Court before or after the determination of the Common Issues or as the Court sees fit.

PROPOSED NOTICE OF CERTIFICATION

THIS NOTICE MAY AFFECT YOUR RIGHTS. PLEASE READ CAREFULLY.

The Nature of the Lawsuit

As of March 2019, Sotos LLP, Kugler Kandestin LLP, Miller Titerle + Co., Nahwegahbow Corbiere, and Fasken LLP (collectively "Class Counsel") have prosecuted an action on behalf of First Nations plaintiffs in the Federal Court of Canada in Montreal, against the Attorney General of Canada (the "Crown").

The lawsuit claims that between April 1, 1991 and December 11, 2007 the Crown instituted discriminatory policies across Canada, delaying, disrupting or denying the delivery of needed public services and products to First Nations youth.

The action was brought on behalf of a Class of:

(a) all First Nations youths who were denied a public service or product, or whose receipt of a public service or product was delayed or disrupted, on the grounds of lack of funding or lack of jurisdiction, or as a result of a jurisdictional dispute with another government or governmental department between April 1, 1991 and December 11, 2007;

(b) family members of the Class Members cited in (a) above.

By order dated **[INSERT DATE]**, The Honourable Justice **[INSERT NAME]** certified the action as a class proceeding, appointing Zacheus Joseph Trout as representative plaintiffs for the class.

The Court found that the following issues affecting the Class will be tried at a Common Issues trial:

- **[INSERT CERTIFIED COMMON ISSUE]**
- …

Participation in the Class Action

If you fall within the class definition, you are automatically included as a member of the Class, unless you choose to opt out of the Class Action, as explained below. All members of the Class will be bound by the judgment of the Court, or any settlement reached by the parties and approved by the Court.

At this juncture, the Court has not taken a position as to the likelihood of recovery for the representative plaintiffs or the Class, or with respect to the merits of the claims or defences asserted by the Crown.

Fees and Disbursements

You do not need to pay any legal fees out of your own pocket. A retainer agreement has been entered into between the representative plaintiffs and Class Counsel with respect to legal fees. The agreement provides that the law firms have been retained on a contingency fee basis, which means they will only be paid their fees in the event of a successful result in the litigation or a Court-approved settlement.

You will <u>not</u> be responsible for Defendant's legal costs if the class action is unsuccessful. Any fee paid to lawyers for the Class is subject to the Court's approval.

Opt Out

If you are a class member and wish to exclude yourself from this class proceeding ("opt out"), you must complete and return the "Class Member Opt Out" form by no later than **[INSERT DATE]**. The Opt Out form may be downloaded at: **[INSERT WEBSITE ADDRESS]**.

Class members who choose to opt out within the above noted deadline will not recover any monies if the representative plaintiffs are successful in this action. If class members do not choose to opt out by the deadline, they will be bound by any judgment ultimately obtained in this class action, whether favourable or not, or any settlement if approved by the Court.

Contact Information

If you have any questions or concerns about the matters in this Notice or the status of the class action, you may contact Class Counsel in a number of ways.

I, _____ [insert full name(s), including maiden name if applicable], have been notified that I am an Approved Child Class Member. My claim number is _____ [insert assigned claim number].

I have been provided with a package of information outlining and explaining my option to request an individual damage assessment in accordance with the Individual Damage Assessment Process.

I am also aware that I can obtain independent legal advice with respect to this request and can obtain assistance to complete this form at no charge to me by contacting [insert assigned contact #].

Below is information relating to my experience with the denial/delay/disruption of the receipt of a public service or product and the impacts and harms that resulted from my experience:

[The Individual Damage Assessment Form will be designed after a Court decision on the Common Issues. The goal of the Individual Damage Assessment Form though will be to obtain, amongst others, the following information from Approved Class Members:

- *Any conditions or circumstances that required a public service or product;*
- *Reasons for denial of a public service or product;*
- *Department(s) of contact;*
- *Authorizations for the Crown to obtain documents; and*
- *Such further and other information that is deemed necessary and appropriate.]*

[TRADUCTION FRANÇAISE]

Ottawa (Ontario), le 11 février 2022

En présence de madame la juge Aylen

RECOURS COLLECTIF

ENTRE :

ASSEMBLÉE DES PREMIÈRES NATIONS et ZACHEUS JOSEPH TROUT

demandeurs

et

LE PROCUREUR GÉNÉRAL DU CANADA

défendeur

ORDONNANCE ET MOTIFS

VU LA REQUÊTE déposée par les demandeurs, sur consentement et tranchée sur la base de prétentions écrites conformément à l'article 369 des *Règles des Cours fédérales*, en vue d'obtenir une ordonnance :

a) accordant aux demandeurs une prorogation du délai pour qu'ils puissent déposer la présente requête en autorisation après le délai prévu à l'alinéa 334.15(2)b);

b) autorisant la présente instance comme recours collectif et définissant le groupe;

c) énonçant la nature des réclamations présentées au nom du groupe et les réparations demandées par le groupe;

d) précisant les points de droit et de fait communs en litige;

e) nommant le demandeur, Zacheus Joseph Trout, à titre de représentant demandeur;

f) approuvant le plan de déroulement de l'instance;

g) accordant toute autre réparation;

VU les documents relatifs à la requête déposés par les demandeurs;

VU que le défendeur donne son consentement à l'ensemble de la requête déposée;

VU que la Cour est convaincue que, dans les circonstances de l'espèce, une prorogation du délai doit être accordée pour que la présente requête en autorisation puisse être déposée après le délai prévu à l'alinéa 334.15(2)b);

VU que, même si le consentement du défendeur rend moins nécessaire l'adoption d'une démarche rigoureuse pour trancher la question de savoir si la présente instance devrait être autorisée comme recours collectif, il ne dispense toutefois pas la Cour de l'obligation de veiller au respect des exigences relatives à l'autorisation prescrites à l'article 334.16 [voir *Varley c Canada (Procureur général)*, 2021 CF 589];

VU que le paragraphe 334.16(1) des *Règles des Cours fédérales* prévoit ce qui suit :

Sous réserve du paragraphe (3), le juge autorise une instance comme recours collectif si les conditions suivantes sont réunies :

a) les actes de procédure révèlent une cause d'action valable;

b) il existe un groupe identifiable formé d'au moins deux personnes;

c) les réclamations des membres du groupe soulèvent des points de droit ou de fait communs, que ceux-ci prédominent ou non sur ceux qui ne concernent qu'un membre;

d) le recours collectif est le meilleur moyen de régler, de façon juste et efficace, les points de droit ou de fait communs;

e) il existe un représentant demandeur qui :

(i) représenterait de façon équitable et adéquate les intérêts du groupe,

(ii) a élaboré un plan qui propose une méthode efficace pour poursuivre l'instance au nom du groupe et tenir les membres du groupe informés de son déroulement,

(iii) n'a pas de conflit d'intérêts avec d'autres membres du groupe en ce qui concerne les points de droit ou de fait communs,

(iv) communique un sommaire des conventions relatives aux honoraires et débours qui sont intervenues entre lui et l'avocat inscrit au dossier.

Subject to subsection (3), a judge shall, by order, certify a proceeding as a class proceeding if

(a) the pleadings disclose a reasonable cause of action;

(b) there is an identifiable class of two or more persons;

(c) the claims of the class members raise common questions of law or fact, whether or not those common questions predominate over questions affecting only individual members;

(d) a class proceeding is the preferable procedure for the just and efficient resolution of the common questions of law or fact; and

(e) there is a representative plaintiff or applicant who

(i) would fairly and adequately represent the interests of the class,

(ii) has prepared a plan for the proceeding that sets out a workable method of advancing the proceeding on behalf of the class and of notifying class members as to how the proceeding is progressing,

(iii) does not have, on the common questions of law or fact, an interest that is in conflict with the interests of other class members, and

(iv) provides a summary of any agreements respecting fees and disbursements between the representative plaintiff or applicant and the solicitor of record.

VU que conformément au paragraphe 334.16(2), pour décider si le recours collectif est le meilleur moyen de régler les points de droit ou de fait communs de façon juste et efficace, tous les facteurs pertinents sont pris en compte, notamment les suivants : a) la prédominance des points de droit ou de fait communs sur ceux qui ne concernent que certains membres; b) la proportion de membres du groupe qui ont un intérêt légitime à poursuivre des instances séparées; c) le fait que le recours collectif porte ou non sur des réclamations qui ont fait ou qui font l'objet d'autres instances; d) l'aspect pratique ou l'efficacité moindres des autres moyens de régler les réclamations, et e) les difficultés accrues engendrées par la gestion du recours collectif par rapport à celles associées à la gestion d'autres mesures de redressement;

VU que :

a) La conduite de la Couronne en cause dans le présent recours collectif envisagé, telle qu'elle est exposée dans la déclaration commune, concerne la discrimination dont ont été victimes les enfants des Premières Nations dans la prestation de services essentiels et du fait que la Couronne a échoué à faire en sorte que les enfants des Premières Nations ne souffrent pas de lacunes, de retards, d'interruptions ou de refus dans les services et les produits, et ce, de façon contraire à leurs droits à l'égalité garantis par la Charte. Les demandeurs allèguent que la conduite de la Couronne était discriminatoire, visait les membres du groupe, car ils étaient membres des Premières Nations, et contrevenait au paragraphe 15(1) de la Charte, aux obligations fiduciaires de la Couronne envers les Premières Nations et à la norme de diligence en common law et en droit civil.

b) En ce qui a trait à la première condition de l'analyse concernant l'autorisation (à savoir si les actes de procédure révèlent une cause d'action valable), les exigences minimales ne

sont pas élevées. La Cour doit trancher la question de savoir s'il est manifeste et évident que les causes d'action sont vouées à l'échec [voir *Brake c Canada (Procureur général)*, 2019 CAF 274 au para 54]. Même sans le consentement de la Couronne, je suis persuadée que les demandeurs ont suffisamment plaidé les éléments nécessaires pour chaque cause d'action aux fins de la présente requête, de sorte que la déclaration commune révèle une cause d'action raisonnable.

c) Pour ce qui est de la deuxième condition de l'analyse concernant l'autorisation (à savoir s'il existe un groupe identifiable formé d'au moins deux personnes), le critère à appliquer consiste à établir si les demandeurs ont défini le groupe en recourant à un critère objectif, c'est-à-dire que l'on peut décider si une personne est membre du groupe sans se référer au fond de l'action [voir *Hollick c Toronto (Ville)*, 2001 CSC 68 au para 17]. Je suis convaincue que les définitions proposées pour le groupe des enfants et le groupe des familles (énoncées ci-après) présentent des critères objectifs et que l'inclusion dans chaque groupe peut être déterminée sans se référer au fond de l'action.

d) Quant à la troisième condition de l'analyse concernant l'autorisation (à savoir si les réclamations des membres du groupe soulèvent des points de droit ou de fait communs), comme l'a indiqué la Cour d'appel fédérale au paragraphe 72 de l'arrêt *Wenham c Canada (Procureur général)*, 2018 CAF 199, l'objectif de cette étape de la détermination de l'autorisation n'est pas de déterminer les points communs, mais plutôt d'évaluer si la résolution des points est nécessaire pour régler les réclamations de chaque membre du groupe. Plus précisément, les exigences sont les suivantes :

> Il faut aborder le sujet de la communauté en fonction de l'objet. La question sous-jacente est de savoir si le fait d'autoriser le recours collectif permettra d'éviter la répétition de l'appréciation des faits ou de l'analyse juridique. Une question ne sera donc « commune » que lorsque sa résolution est nécessaire pour le règlement des demandes de chaque membre du groupe. Il n'est pas essentiel que les membres du groupe soient dans une situation identique par rapport à la partie adverse. Il n'est pas nécessaire non plus que les questions communes prédominent sur les questions non communes ni que leur résolution règle les demandes de chaque membre du groupe. Les demandes des membres du groupe doivent toutefois partager un élément commun important afin de justifier le recours collectif. Pour décider si des questions communes motivent un recours collectif, le tribunal peut avoir à évaluer l'importance des questions communes par rapport aux questions individuelles. Dans ce cas, le tribunal doit se rappeler qu'il n'est pas toujours possible pour le représentant de plaider les demandes de chaque membre du groupe avec un degré de spécificité équivalant à ce qui est exigé dans une poursuite individuelle (*Western Canadian Shopping Centres*, précité, au paragraphe 39; voir aussi *Vivendi Canada Inc. c. Dell'Aniello*, 2014 CSC 1, [2014] 1 R.C.S. 3, aux paragraphes 41 et 44 à 46.)

Après avoir examiné les points communs (énoncés ci-après), je suis convaincue que les points partagent un élément commun important au règlement des réclamations de chaque membre du groupe. De plus, je conviens avec les demandeurs que ces points communs s'apparentent aux points communs similaires soulevés dans les demandes fondées sur des cas d'abus institutionnel qui ont été autorisées comme recours collectifs (par exemple, les recours collectifs liés aux pensionnats autochtones et à la rafle des années soixante), tout comme celles qui ont été autorisées dans le recours collectif de Moushoom (T-402-19/T-141-20). Je conclus donc que la condition liée aux points communs est remplie.

e) Pour ce qui est de la quatrième condition de l'analyse concernant l'autorisation (à savoir si le recours collectif est le meilleur moyen de régler, de façon juste et efficace, les points de droit ou de fait communs), le critère du meilleur moyen comporte deux concepts

fondamentaux : i) la question de savoir si le recours collectif serait un moyen juste, efficace et pratique de faire progresser l'instance; ii) la question de savoir si le recours collectif serait préférable à tous les autres moyens raisonnables offerts pour régler les réclamations des membres du groupe. Pour statuer sur le critère du meilleur moyen, il faut examiner les points communs dans leur contexte, en tenant compte de l'importance de ceux-ci par rapport à l'instance dans son ensemble. Il peut être satisfait à ce critère même lorsqu'il y a d'importantes questions individuelles [voir *Brake*, précité, au para 85; *Wendham*, précité, au para 77, et *Hollick*, précité, aux para 27-31]. La Cour doit effectuer l'analyse de ce critère à la lumière des trois principaux objectifs du recours collectif : l'économie des ressources judiciaires, la modification des comportements et l'accès à la justice [voir *Brake*, précité, au para 86, citant *AIC Limitée c Fischer*, 2013 CSC 69 au para 22].

f) Après avoir examiné les principes mentionnés précédemment et les facteurs prévus au paragraphe 334.16(2), je suis convaincue que le recours collectif est le meilleur moyen de régler les points de droit ou de fait communs de façon juste et efficace. Compte tenu de la nature systémique des réclamations, des obstacles majeurs à l'accès à la justice auxquels pourrait être confronté chacun des réclamants ainsi que des préoccupations exprimées par les demandeurs à l'égard des autres moyens qui existent pour régler les réclamations des membres du groupe, je suis persuadée que le recours collectif envisagé est un moyen juste, efficace et pratique de faire progresser l'instance des membres du groupe.

g) En ce qui a trait à la cinquième condition de l'analyse concernant l'autorisation (à savoir s'il y a des représentants proposés adéquats), après avoir examiné la preuve par affidavit produite à l'appui de la requête ainsi que le plan de déroulement de l'instance détaillé, je

considère que le représentant demandeur proposé satisfait aux exigences énoncées à l'alinéa 334.16(1)e);

VU que la Cour est convaincue que toutes les conditions d'autorisation sont remplies et que les réparations demandées doivent être accordées;

LA COUR ORDONNE :

1. Les demandeurs ont droit à une prorogation du délai pour pouvoir déposer la présente requête en autorisation après le délai prévu à l'alinéa 334.15(2)b) des *Règles des Cours fédérales.*

2. Aux fins de la présente ordonnance et en plus des définitions figurant ailleurs dans la présente ordonnance, les définitions suivantes s'appliquent et d'autres termes utilisés dans la présente ordonnance ont le même sens que dans la déclaration commune :

   a) **« Avocats du groupe »** s'entend de Fasken Martineau Dumoulin LLP, Kugler Kandestin LLP, Miller Titerle + Co., Nahwegahbow Corbiere et Sotos LLP;

   b) **« groupe »** s'entend collectivement du groupe des enfants et du groupe des familles;

   c) **« groupe des enfants »** s'entend de tous les membres des Premières Nations qui n'avaient pas atteint l'âge de la majorité de la province ou du territoire concerné et qui, durant la période visée par le recours collectif, ont été privés (que ce soit à cause d'un refus ou d'une lacune) d'un service ou d'un produit public essentiel relié à un besoin confirmé ou pour qui le service ou le produit a été retardé en

raison notamment d'un manque de financement ou d'un défaut de compétence ou par la suite d'une lacune de service ou d'un conflit de compétence avec un autre gouvernement ou ministère;

d) **« groupe des familles »** s'entend de toutes les personnes qui sont le frère, la sœur, la mère, le père, la grand-mère ou le grand-père d'un membre du groupe des enfants;

e) **« membres du groupe »** s'entend de toutes les personnes qui sont membres du groupe;

f) **« période visée par le recours collectif »** s'entend de la période commençant le 1er avril 1991 et se terminant le 11 décembre 2007;

g) **« Première Nation »** et **« Premières Nations »** s'entendent des peuples autochtones du Canada, y compris au Yukon et dans les Territoires du Nord-Ouest, qui ne sont ni Inuits ni Métis et comprennent :

   i. les personnes qui possèdent le statut d'Indien en vertu de la *Loi sur les Indiens*, LRC 1985, c I-5;

   ii. les personnes qui ont droit à l'inscription en vertu de l'article 6 de la *Loi sur les Indiens* au moment de l'autorisation;

   iii. les personnes qui ont satisfait aux critères d'appartenance à une bande prévus aux articles 10 à 12 de la *Loi sur les Indiens*, de sorte que leur communauté de Première Nation respective a décidé de l'appartenance à

ses effectifs en fixant les règles et que les personnes ont été considérées comme ayant satisfait aux exigences prévues par ces règles d'appartenance et que leur nom a été consigné dans la liste de bande;

iv. les personnes, outre celles visées aux alinéas i) à iii) ci-dessus, qui sont reconnues comme citoyens ou membres de leur Première Nation respective en vertu d'ententes ou de traités, de coutumes, de traditions et de lois autochtones à la date du procès ou du règlement du présent litige.

3. L'instance est donc autorisée comme recours collectif contre la défenderesse en vertu du paragraphe 334.16(1) des *Règles des Cours fédérales.*

4. Le groupe est composé du groupe des enfants et du groupe des familles, tous au sens défini dans la présente ordonnance.

5. Les réclamations présentées au nom du groupe à l'encontre de la défenderesse sont de nature constitutionnelle et ont trait à la négligence et au manquement à l'obligation fiduciaire de la Couronne envers le groupe.

6. La réparation demandée par le groupe comprend des dommages-intérêts, des dommages-intérêts fondés sur la Charte, la restitution, des dommages-intérêts punitifs et des dommages-intérêts exemplaires.

7. Zacheus Joseph Trout est nommé comme représentant demandeur et est réputé constitué un représentant demandeur adéquat du groupe, conformément avec les exigences de l'alinéa 334.16(1)e).

8. Les avocats du groupe sont par les présentes nommés avocats pour le groupe.

9. L'instance est autorisée sur la base des points communs suivants :

   a) La conduite de la Couronne telle qu'elle est alléguée dans la déclaration commune [la conduite reprochée] a-t-elle porté atteinte aux droits à l'égalité garantis aux membres du groupe par le paragraphe 15(1) de la *Charte canadienne des droits et libertés*? Plus précisément :

      i. La conduite reprochée a-t-elle créé une distinction fondée sur la race ou l'origine nationale ou ethnique des membres du groupe?

      ii. La distinction était-elle discriminatoire?

      iii. La conduite reprochée a-t-elle renforcé ou accentué les désavantages historiques subis par les membres du groupe?

      iv. Dans l'affirmative, la violation du paragraphe 15(1) de la Charte était-elle justifiée au regard de l'article premier de la Charte?

      v. Les dommages-intérêts fondés sur la Charte constituent-ils une réparation appropriée?

   b) La Couronne a-t-elle été négligente les membres du groupe? Plus précisément :

      i. La Couronne avait-elle une obligation de diligence envers les membres du groupe?

ii. Dans l'affirmative, la Couronne a-t-elle manqué à cette obligation de diligence?

c) La Couronne a-t-elle manqué à ses obligations prévues au *Code civil du Québec*? Plus précisément :

i. La Couronne a-t-elle commis une faute ou engagé sa responsabilité civile?

ii. La conduite reprochée a-t-elle donné lieu à des pertes pour les membres du groupe et, dans l'affirmative, ces pertes constituent-elles un préjudice pour chacun des membres du groupe?

iii. Les membres du groupe ont-ils le droit de demander des dommages-intérêts pour les dommages moraux et matériels découlant de ce qui précède?

d) La Couronne avait-elle une obligation fiduciaire envers les membres du groupe? Dans l'affirmative, la Couronne a-t-elle manqué à cette obligation?

e) Le montant des dommages-intérêts payables par la Couronne peut-il être partiellement déterminé de façon globale en vertu du paragraphe 334.28(1) des *Règles des Cours fédérales*? Dans l'affirmative, quel devrait en être le montant?

f) La Couronne a-t-elle tiré des avantages pécuniaires quantifiables de la conduite reprochée pendant la période visée par le recours collectif? Dans l'affirmative, la Couronne devait-elle être tenue de restituer ces avantages, et, le cas échéant, quel devrait en être le montant?

g) La Couronne devrait-elle être condamnée à verser des dommages-intérêts punitifs et/ou majotés? Dans l'affirmative, quel devrait en être le montant?

10. Le plan de déroulement de l'instance joint à l'annexe « A » est par les présentes approuvé, sous réserve des modifications devant y être apportées par suite de la présente ordonnance et de toute autre ordonnance rendue par la Cour.

11. La forme de l'avis d'autorisation, les modalités de l'avis ainsi que toutes les autres questions connexes seront déterminées par la Cour dans une ou des ordonnances distinctes.

12. L'avis d'autorisation sera communiqué au même moment que l'avis d'autorisation du recours collectif complémentaire Moushoom (dossiers de la Cour T-402-19/T-141-20) dont les modalités seront déterminées par une ordonnance distincte de la Cour.

13. Le délai d'exclusion sera de six mois à compter de la date à laquelle l'avis d'autorisation est publié selon les modalités énoncées dans une autre ordonnance de la Cour.

14. Conformément au paragraphe 334.39(1) des *Règles des Cours fédérales*, aucuns dépens ne seront adjugés à l'une ou l'autre des parties pour la présente requête.

I. DÉFINITIONS

1. Les mots et expressions définis ci-dessous seront utilisés tout au long du présent Plan de Poursuite. Les mots et expressions définis à l'Acte introductif d'instance et qui se retrouvent également au présent Plan de Poursuite doivent, s'ils n'ont pas autrement été définis par la Cour, se voir attribuer le sens qui leur est donné à l'Acte introductif d'instance.

Administrateur du Recours Collectif (« *Class Action Administrator* ») : tout administrateur du règlement ou toute autre firme compétente désigné(e) par la Cour en vue d'assurer l'administration du recours collectif;

Avis de Certification (« *Certification Notice* ») : les informations se trouvant à l'Annexe A du présent Plan de Poursuite, telles qu'elles pourront ultérieurement être modifiées et telles qu'elles auront été approuvées par la Cour;

Avis de Détermination des Questions Communes (« *Common Issues Notices* »): les informations figurant à l'avis portant sur les **Questions Communes** devant être certifié par la Cour à l'étape de la Certification, tel qu'il pourrait être ultérieurement modifié et tel qu'il aura été approuvé par la Cour;

Dossier du TCDP (« *CHRT Proceeding* »): dossier du **TCDP** portant le numéro T1340/7008;

Formulaire de Détermination de Compensation Individuelle (« *Individual Damage Assessment Form* »): formulaire se trouvant à l'Annexe D du présent Plan de Poursuite (tel qu'il pourrait ultérieurement être modifié et tel qu'il aura été approuvé par la Cour) et devant être utilisé par les **Membres du Groupe Approuvés** en vue de permettre l'évaluation de leurs dommages et d'amorcer le **Processus de Détermination de Compensation Individuelle**;

Formulaire d'Exclusion (« *Opt out Form* »): formulaire se trouvant à l'Annexe B du présent Plan de Poursuite et utilisé par les Membres du Groupe souhaitant s'exclure du recours collectif (tel qu'il pourrait ultérieurement être modifié et tel qu'il aura été approuvé par la Cour);

Formulaire de Réclamation (« *Claim Form* ») : formulaire se trouvant à l'Annexe C du présent Plan de Poursuite et utilisé par les Membres du Groupe des Enfants et/ou les Membres du Groupe des Familles en vue de soumettre une réclamation (tel qu'il pourrait être ultérieurement amendé et tel qu'il aura été approuvé par la Cour);

Informations de la Couronne (« *Crown Class Member Information* »): informations devant être communiquées par la Couronne à l'**Administrateur du Recours Collectif** et/ou aux **Procureurs du Groupe**, à la demande des demandeurs et/ou suivant une ordonnance de la Cour), , au sujet des noms et des coordonnées les plus récentes de toutes les personnes

répondant à la définition de Membres du Groupe (telle qu'elle figure à l'Acte introductif d'instance ou telle qu'elle aura autrement été déterminée par la Cour), y compris une liste des noms et coordonnées de tous les Membres du Groupe connus (provenant des informations que la Couronne a en sa possession ou sous son contrôle);

Membre Approuvé du Groupe des Familles (« *Approved Family Class Member(s)* »): tout Membre du Groupe des Familles ayant été approuvé par l'**Administrateur du Recours Collectif** puisqu'il rencontre les critères pour être un Membre Approuvé du Groupe des Familles incluant le frère , la sœur, le père, la grand-mère ou le grand-père d'un **Membre Approuvé du Groupe des Enfants** – que ce dernier soit toujours vivant ou non – pour autant qu'une telle approbation n'ait pas été contestée avec succès;

Membre Approuvé du Groupe des Enfants (« *Approved Child Class Member(s)* »): tout Membre du Groupe des Enfants ayant été approuvé par l'**Administrateur du Recours Collectif** puisqu'il rencontre les critères pour être un Membre Approuvé du Groupe des Enfants, pour autant qu'une telle approbation n'ait pas été contestée avec succès;

Membre du Groupe (« *Class Member(s)* »): toute personne répondant à la définition d'un Membre du Groupe des Enfants ou d'un Membre du Groupe des Familles, tel qu'allégué à l'Acte introductif d'instance et approuvé par la Cour;

Membre du Groupe Approuvé (« *Approved Class Member(s)* »): tout **Membre Approuvé du Groupe des Enfants** et/ou **Membre Approuvé du Groupe des Familles**;

Période d'Exclusion (« *Opt Out Period* »): la date limite pour s'exclure du recours collectif, que les demandeurs proposent de fixer à six (6) mois suivant la date à laquelle l'avis de certification à l'intention du Groupe est publié selon la procédure à être déterminée par la Cour, ou la date limite pour s'exclure du recours collectif telle qu'autrement déterminée par la Cour;

Procédures d'Exclusions (« *Opt Out Procedures* »): les procédure, telles que définies au Plan de Poursuite, permettant à des **Membres du Groupe** de s'exclure du présent recours collectif, telle qu'elles pourraient être ultérieurement modifiées et telles qu'elles auront été approuvées par la Cour;

Procédures d'Exclusions Particulières (« *Special Opt Out Procedures* »): les procédures, telles que définies au Plan de Poursuite, applicables aux **Membres du Groupe** ayant déjà entrepris des recours civils au Canada ou ayant déjà, à la connaissance de la Couronne, retenu les services d'un procureur en vue de s'exclure du présent recours collectif, telles qu'elles pourront ultérieurement être modifiées et telles qu'elles auront été approuvées par la Cour;

Processus de Détermination de Compensation Individuelle (« *Individual Damage Assessment Process* »): la procédure et la méthodologie devant être approuvées par la Cour à l'issue de l'audition portant sur les **Questions Communes,** et qui seront utilisées pour quantifier et distribuer les dommages aux **Membres du Groupe Approuvés** ayant demandé une détermination de compensation individuelle en soumettant un **Formulaire de Détermination de Compensation Individuelle**;

Processus de Distribution des Dommages (« *Aggregate Damages Distribution Process* »): système établi par la Cour en vertu duquel l'**Administrateur du Recours Collectif** doit distribuer l'ensemble des dommages aux **Membres du Groupe Approuvés**.

Procureurs du Groupe (« *Class Counsel* »): le regroupement de cabinets juridiques agissant en tant que procureurs au dossier dans le cadre du présent recours collectif, c'est-à-dire Sotos LLP, Kugler Kandestin LLP, Miller Titerle + Company, Nahwegahbow Corbiere, et Fasken LLP.

Méthode de Notification (« *Notice Program* »): la procédure, telle que définie au présent Plan de Poursuite, pour la communication de l'**Avis de Certification** et/ou l'**Avis de Détermination des Questions Communes** aux **Membres du Groupe**, tel qu'elle pourrait être ultérieurement modifiée et telle qu'elle aura été approuvée par la Cour;

Questions Communes (« *Common Issues* ») : les questions énumérées à l'Avis de Demande de Certification (ou à quel qu'autre document exigé ou émis par la Cour), telles qu'elles pourraient être ultérieurement modifiées et telles qu'approuvées par la Cour.

II. SOMMAIRE

2. Les demandeurs ont introduit la présente action en justice au nom de membres de Premières Nations qui allèguent que la Couronne a contrevenu à l'obligation d'égalité, les privant ainsi de produits et services d'utilités publiques. De fait, le présent recours collectif vise l'avancement des droits fondamentaux de milliers d'enfants et des membres de famille des Premières.

3. Le présent Plan de Poursuite se veut un échéancier régissant l'évolution des procédures et mettant de l'avant certaines méthodes de communication avec les Membres du Groupe conformément aux dispositions du sous-paragraphe 334.16(1)(e)(ii) des *Règles des cours fédérales*. Le présent Plan de Poursuite s'inspire en grande partie de l'action collective portant sur les pensionnats indiens[1], avec de nombreuses modifications afin de rendre la procédure plus efficace et de tenir compte des leçons acquises suite au règlement de ce dossier.

4. Le présent Plan de Poursuite définit en détail les principales étapes des procédures à venir et établit d'entrée de jeu, quoique sous toutes réserves et de façon préliminaire, de quelle manière ces étapes se dérouleront. Étant donné que le dossier en est à ses débuts, il est entendu que le Plan fera l'objet de révisions substantielles au fur et à mesure que le dossier progressera.

III. PROCÉDURES PRÉ-CERTIFICATION

5. Les demandeurs poursuivent cette action parallèlement au dossier de l'action collective consolidée liée (numéros de dossier de cour : T-402-19/T-141-20), qui concerne les services à

[1] Voir *Baxter c. Canada (Procureur Général)*, 2006 CanLII 41673 (Cour supérieure de l'Ontario), de même que les ordonnances rendues subséquemment par la Cour. Voir également le site web du *Secrétariat d'Adjudication des Pensionnats Indiens* (SAPI) : www.iap-pei.ca/home-eng.php.

l'enfant et à la famille des Premières Nations et le Principe de Jordan. Par conséquent, une grande partie du travail et des procédures sont communs à ces deux dossiers.

A. Les Parties

i. Les demandeurs

6. Les demandeurs ont suggéré que le Groupe soit divisé en deux (2) sous-groupes :

   (a) le Groupe des Enfants; et

   (b) le Groupe des Familles.

7. Le demandeur représentant est Zacheus Joseph Trout.

ii. La défenderesse

8. La Couronne est la défenderesse en la présente instance.

B. Les prétentions

i. L'acte introductif d'instance

9. Les demandeurs ont produit un Acte introductif d'instance.

ii. Énoncé des moyens de défense

10. La Couronne n'a produit aucun Énoncé des moyens de défense.

iii. Réclamation d'un tiers

11. La Couronne n'a produit aucune Réclamation d'un tiers

C. Requêtes préliminaires

12. Les demandeurs proposent que toute requête préliminaire soit traitée lors de la demande de certification ou tel qu'ordonnée par la Cour.

D. Stratégie de communication préalable à la certification

i. Demandes formulées par des membres potentiels du groupe

13. Les Procureurs du Groupe ont, tant avant que depuis l'introduction du présent recours collectif, reçu diverses communications de la part de Membres du Groupe concernés par les procédures.

14. Le nom, l'adresse, le numéro de téléphone et l'adresse courriel de chaque Membre Potentiel du Groupe ayant contacté les Procureurs du Groupe ont été ajoutés à une base de données confidentielle. De fait, chaque Membre du Groupe est invité à s'enregistrer sur l'un ou l'autre des sites web des Procureurs du Groupe. Une fois enregistrés, les Membres du Groupe reçoivent, sur une base régulière et tant en français qu'en anglais, des mises à jour au sujet de l'évolution du recours collectif. Tout Membre du Groupe qui contacte les Procureurs du Groupe se voit répondre dans la langue qu'il préfère.

ii. Rapports d'Évolution Préalables à la Certification

15. En plus de répondre aux demandes individuelles qui leur sont adressées, les Procureurs du Groupe ont mis sur pied une page web, accessible tant en anglais qu'en français, portant spécifiquement sur le présent recours collectif : https://sotosclassactions.com/cases/current-cases/first-nations-youth/). Toutes les informations relatives à l'état du dossier sont postées et mises à jour régulièrement, tant en français qu'en anglais.

16. Des copies des documents de Cour produit publiquement et de toutes les décisions rendues par la Cour sont disponibles sur le site web. Les numéros de téléphone et les adresses courriel des Procureurs du Groupe se trouvant au Québec et en Ontario sont également affichés.

17. Les Procureurs du Groupe transmettent des rapports d'évolution aux Membres du Groupe ayant fourni leurs coordonnées et manifesté leur désir d'être tenus informés des développements survenant dans le cadre du recours collectif.

iii. Démarches de sensibilisation préalables à la certification

18. Les Procureurs du Groupe ont soumis les grandes lignes du recours collectif envisagé au personnel d'un centre de services sociaux d'un Conseil des Premières Nations siégeant au Québec et au Labrador, ainsi qu'à une assemblée des Directeurs de la Jeunesse de Premières Nations de la Colombie-Britannique. Les Procureurs du Groupe organisent présentement d'autres présentations similaires auprès de communautés concernées du Québec et d'autres provinces et territoires.

E. Conférence de Règlement

i. Conférence de Règlement Préalable à la Certification

19. Les demandeurs participeront à un processus de médiation préalable à la Certification en vue de déterminer si une ou plusieurs des questions soulevées dans le cadre du recours collectif pouvaient être résolues.

20. Les demandeurs proposent que la médiation préalable à la Certification se tienne un mois après le dépôt de la demande de certification et des documents à son appui, le cas échéant.

F. Échéancier

21. Les demandeurs proposent que l'échéancier pré-certification ci-dessous soit ordonné par la Cour lors d'une conférence de gestion.

	Délai
Dossier de demande de certification des demandeurs	Date de la signification et du dépôt de l'avis de la demande de certification et du dossier

11

	de demande de certification (« DSD »)
Dossier de l'intimé, le cas échéant	Dans les 90 jours suivant la DSD
Dossier de réplique des demandeurs, le cas échéant	Dans les 120 jours suivant la DSD
Contre-interrogatoires, le cas échéant	Dans les 150 jours suivant la DSD
Transmission des engagements	Dans les 180 jours suivant la DSD
Requêtes présentées à la suite de la tenue des interrogatoires préalables	Dans les 120 jours suivant la DSD
Tenue d'interrogatoires additionnels, si nécessaire	Dans les 230 jours suivant la DSD
Mémoire de fait et de droit des demandeurs	Dans les 250 jours suivant la DSD
Mémoire de fait et de droit de l'intimé	Dans les 280 jours suivant la DSD
Mémoire en réplique, le cas échéant	Dans les 300 jours suivant la DSD
Demande de certification et toute autre requête	Dans les 310 jours suivant la DSD

IV. PROCÉDURE POST-CERTIFICATION

A. Échéancier

i. Échéancier soumis par les demandeurs pour les démarches postérieures à la certification

22. Les demandeurs entendent tenir le procès soit selon une formule accélérée, soit en fonction d'une combinaison hybride de jugement sommaire et d'audition de vive voix.

23. Les demandeurs suggèrent que l'échéancier "post-Certification" ci-dessous soit retenu:

Début du processus de notification de la Certification aux Membres du Groupe	Date à être fixée par la Cour une fois la Certification obtenue
Échange des déclarations assermentées	Dans les 70 jours suivant la Notification de la Certification aux Membres du Groupe
Requêtes portant sur la production de documents, les interrogatoires des nombreux représentants de la Couronne, ou les interrogatoires de tiers	Dans les 110 jours suivant la notification de la Certification aux Membres du Groupe
Interrogatoires préalables	Dans les 140 jours suivant la notification de la Certification aux Membres du Groupe
Fin du processus de notification de la Certification aux Membres du Groupe	Dans les 90 jours de la date fixée par la Cour
Conférence de gestion de l'instance portant sur la présentation de la preuve d'experts	170 jours après la notification de la Certification aux Membres du Groupe
Requêtes présentées à la suite de la tenue des interrogatoires préalables	Dans les 190 jours suivant la notification de la Certification aux Membres du Groupe
Transmission des engagements	Dans les 160 jours suivant la notification de la Certification aux Membres du Groupe

Tenue d'interrogatoires additionnels, si nécessaire	Dans les 210 jours suivant la notification de la Certification aux Membres du Groupe
Tenue de l'audition préliminaire portant sur les Questions Communes	250 jours après la notification de la Certification aux Membres du Groupe
Expiration du délai d'exclusion	180 jours après la notification de la Certification aux Membres du Groupe
Audition portant sur les Questions Communes ou procès hybride	300 jours après la notification de la Certification aux Membres du Groupe

B. Avis de Certification, Méthode de Notification et Procédures d'Exclusions

i. Avis de Certification

24. L'Avis de Certification et tous les autres avis devant être transmis par les demandeurs aux Membres du Groupe seront traduits en français une fois finalisés et approuvés par la Cour. Les demandeurs verront, toujours sous réserve de l'approbation de la Cour, s'il est nécessaire de traduire l'Avis de Certification et/ou quelque autre avis dans un ou plusieurs langage(s) des Premières Nations.

25. Sous réserve de modifications subséquentes, l'Avis de Certification sera émis en la forme présentée à l'Annexe A du présent Plan de Poursuite.

ii. Méthode de Notification

26. Les demandeurs prévoient transmettre l'Avis de Certification conformément à la Méthode de Notification définie ci-dessous.

27. Les demandeurs communiqueront et/ou publieront l'Avis de Certification (de même que toute version traduite de celui-ci aussitôt que disponible) dans les médias suivants à compter de la date fixée par la Cour, et ce aussi fréquemment qu'il s'avèrera raisonnable de le faire selon les

ordonnances rendues par la Cour en vertu de l'article 334.32 des *Règles des Cours Fédérales*. Les demandeurs prévoient, à cette fin, retenir les Méthodes de Notification suivantes :

(a) Un communiqué de presse adressé aux Membres du Groupe, dûment approuvé par la Cour et publié le premier jour de la période de notification;

(b) Communications directes avec les Membres du Groupe :

(i) transmises par courrier ordinaire ou électronique aux coordonnées les plus récentes des Membres du Groupe fournies par la Couronne (i.e. Informations de la Couronne);

(ii) transmises par courrier ordinaire ou électronique à tous les Membres du Groupe ayant fourni leurs coordonnées aux Procureurs du Groupe (notamment par l'entremise de la page web portant sur le recours collectif);

(c) Informations distribuées par l'Assemblée des Premières Nations à l'échelle de toutes les bandes membres des Premières Nations situées au Canada;

(d) Informations transmises par courrier électronique aux sociétés d'aide aux enfants de Premières Nations situées au Canada;

(e) Informations circulées au moyen des médias suivants:

(i) Journaux et autres périodiques indiens tels que *First Nations Drum*, *The Windspeaker*, *Mi'kmaq Maliseet Nations News* et *APTN National News*;

(ii) Chaînes de télévision telles que *The Aboriginal Peoples Television Network*; et/ou

(iii) Réseaux sociaux en ligne tels que *Facebook* et *Instagram*.

iii. Procédures d'Exclusions

28. Les demandeurs suggèrent que les Procédures d'Exclusions définies ci-dessous s'appliquent aux Membres du Groupe qui ne souhaitent pas être liés par le recours collectif.

29. L'Avis de Certification indiquera aux Membres du Groupe de quelle manière il leur est possible de s'exclure du recours collectif en produisant un Formulaire d'Exclusion auprès de l'Administrateur du Recours Collectif et/ou des Procureurs du Groupe.

30. Un seul Formulaire d'Exclusion standard s'appliquera à tous les Membres du Groupe.

31. Tout Membre du Groupe désirant s'exclure du recours collectif devra obligatoirement soumettre un Formulaire d'Exclusion à l'Administrateur du Recours Collectif et/ou aux Procureurs du Groupe à l'intérieur de la Période d'Exclusion.

32. L'Administrateur du Recours Collectif ou les Procureurs du Groupe devront, dans les trente (30) jours suivant l'expiration de la Période d'Exclusion, produire de la Cour et des Parties une déclaration assermentée contenant la liste de toutes les personnes ayant choisi de s'exclure du recours collectif.

iv. Procédures d'Exclusions Particulières

33. Les demandeurs suggèrent que les Procédures d'Exclusions Particulières définies ci-dessous s'appliquent à tous les Membres du Groupe désignés comme une partie demanderesse à quelque action civile introduite au Canada ou ayant déjà (à la connaissance de la Couronne) retenu les services d'un procureur en vue d'introduire à l'encontre de la Couronne une action civile distincte fondées sur les faits et les circonstances faisant l'objet du recours collectif.

C. Identification des (et communication avec les) Membres du Groupe

i. Identification des Membres du Groupe

34. Tel qu'indiqué plus haut, les demandeurs entendent exiger les informations que la Couronne détient au sujet des Membres du Groupe.

ii. Base de données relative aux Membres du Groupe

35. Les Procureurs du Groupe maintiendront à jour une base de données confidentielle au sujet de tous les Membres du Groupe qui les auront contactés. Une telle base de données contiendra, s'ils sont disponibles, le nom, l'adresse, le numéro de téléphone et/ou l'adresse courriel de chaque individu concerné.

iii. Réponses aux demandes formulées par les Membres du Groupe

36. Les Procureurs du Groupe, et le personnel de leur cabinet, répondront à toutes les demandes soumises par des Membres du Groupe.

37. Les Procureurs du Groupe ont mis en place une structure leur permettant de répondre demandes soumises par les Membres du Groupe dans la langue de leur choix, dans la mesure du possible.

iv. Rapports d'évolution postérieurs au Processus de Certification

38. En plus de répondre aux demandes soumises par les Membres du Groupe, les Procureurs du Groupe mettront régulièrement à jour la page web dédiée au recours collectif en y indiquant le stade d'avancement des procédures.

39. Les Procureurs du Groupe transmettront des rapports d'évolution à tous les Membres du Groupe ayant communiqué leurs coordonnées, et ce aussi souvent que nécessaire ou selon les ordonnances de la Cour.

D. Production des documents

i. Affidavits et listes de documents

40. Les demandeurs devront produire un Affidavit de Documents dans les soixante-dix (70) jours de la publication de l'Avis de Certification adressé aux Membres du Groupe. La Couronne, pour sa part, devra produire une Liste de Documents dans les soixante-dix (70) jours de la publication de l'Avis de Certification adressé aux Membres du Groupe.

41. Il est à prévoir que les Parties produiront des Affidavits (ou des Listes) de Documents additionnels au fur et à mesure que de nouveaux documents seront identifiés.

ii. Production de documents

42. Chacune des Parties devra à ses frais, au moment de transmettre ses Affidavits de Documents, fournir des copies électroniques de tous les documents produits en vertu de l'Annexe A (qui devront eux-mêmes être soumis sous forme électronique).

iii. Requêtes portant sur la production de documents

43. Toute requête portant sur la production de documents devra être présentée au cours des cent-dix (110) jours suivant la publication de l'Avis de Certification adressé aux Membres du Groupe.

iv. Gestion des documents

44. Chaque Partie assurera la gestion des documents qu'elle produit au moyen d'un système de gestion compatible ou en conformité avec les directives émises par la Cour. Tous les documents devront être produits en format « reconnaissance optique de caractères » (ROC).

45. Chaque production de documents devrait être numérotée et numérisée en vue de permettre le repérage et la classification rapide de la documentation.

E. Interrogatoires préalables

46. Tous les Interrogatoires Préalables devront se tenir dans les cent quarante (140) jours suivant la publication de l'Avis de Certification adressée aux Membres du Groupe.

47. Les demandeurs prévoient demander à la Couronne de consentir à l'interrogatoire de plus d'un représentant. Dans l'éventualité où un désaccord survenait à ce sujet, les demandeurs suggèrent de présenter une requête dans les cent dix (110) jours de la publication de l'Avis de Certification adressée aux Membres du Groupe.

48. Les demandeurs prévoient que, sous réserve des objections et des engagements, l'Interrogatoire Préalable d'un officier de la Couronne adéquatement sélectionné et informé requerra plus ou moins dix (10) jours.

49. Les demandeurs prévoient que sous réserve des objections et des engagements, l'Interrogatoire Préalable des représentants du Groupe requerra plus ou moins une (1) journée.

F. Moyens préliminaires

i. Engagements

50. Tous les engagements souscrits devront être communiqués dans les cent soixante (160) jours suivant la publication de l'Avis de Certification adressé aux Membres du Groupe.

ii. Requêtes portant sur des objections ou des engagements

51. Les dates d'audition des requêtes portant sur les Objections ou les Engagements soulevés au cours d'Interrogatoires Préalables seront demandées une fois la Certification obtenue. De telles requêtes devront être présentées dans les cent-quatre-vingts-dix (190) jours suivant la publication de l'Avis de Certification adressé aux Membres du Groupe.

iii. Nouvelles comparutions et interrogatoires préalables additionnel

52. Les nouvelles comparutions ou Interrogatoires Préalables additionnels requis à la suite de la communication des réponses aux engagements ou en raison de jugements rendus sur les requêtes portant sur des objections et/ou des engagements devront avoir lieu au cours des cent cinquante (150) jours suivant la publication de l'Avis de Certification adressée au Membres du Groupe.

G. Preuve d'experts

i. Désignation des experts et identification des questions à l'étude

53. Une fois les Interrogatoires Préalables dûment complétés, une Conférence de Gestion de l'Instance devra être tenue au sujet des experts devant participer au procès et à la preuve qu'ils seront appelés à y présenter.

H. Détermination des Questions Communes

i. Audition préliminaire portant sur les Questions Communes

54. Une fois la Certification accordée, il sera demandé à la Cour de fixer la date de l'Audition Préliminaire portant sur les Question Communes.

55. Les demandeurs prévoient qu'une (1) journée complète d'audition sera requise dans le cadre de l'Audition Préliminaire. Ils suggéreront que l'Audition Préliminaire ait lieu dans les deux cents cinquante (250) jours suivant la publication de l'Avis de Certification adressé aux Membres du Groupe, ou au moins quatre-vingt-dix (90) jours avant la tenue de l'audition portant sur les Questions Communes.

ii. Audition portant sur les Questions Communes

56. Une fois la Certification obtenue, il sera demandé à la Cour de fixer la date de l'audition portant sur les Questions Communes.

57. Les demandeurs suggèrent que l'audition portant sur les Questions Communes ait lieu trois cent (300) jours après la publication de l'Avis de Certification adressé aux Membres du Groupe.

58. Parce qu'elle variera en fonction d'une multitude de facteurs, la durée de l'audition portant sur les Questions Communes sera déterminée au cours de la Conférence de Gestion d'Instance.

V. PROCÉDURES POSTÉRIEURES À LA DÉTERMINATION DES QUESTIONS COMMUNES

A. Échéancier

i. Échéancier des demandeurs

59. Les demandeurs suggèrent à la Cour d'ordonner que l'échéancier ci-dessous s'appliquera suite au jugement portant sur les Questions Communes :

Émission de l'Avis de Détermination des Questions Communes	Dans les 90 jours de la décision portant sur les Questions Communes
Début des auditions portant sur les Questions Individuelles, le cas échéant	Débute 120 jours après que la décision ait été rendue
Début du Processus de détermination de compensations individuelles	Débute 240 jours après que la décision ait été rendue
Expiration (de plein droit) du délai de production des Formulaires de Réclamation	Un (1) an après que la décision ait été rendue
Expiration (de plein droit en certaines circonstances ou en vertu d'une permission de la Cour) du délai de production des Formulaires de Réclamation	Un (1) an après que la décision ait été rendue

B. Avis de détermination des Questions Communes

i. Notification aux Membres du Groupe

60. Sous réserve de modifications subséquentes, l'Avis de Détermination des Questions Communes sera substantiellement dans la forme approuvée par la Cour lors de l'audition portant sur les Questions Communes. Il pourra contenir, entre autres choses et sous réserve de

l'approbation de la Cour, certaines informations au sujet de dommages accordés et de circonstances justifiant la détermination de compensations individuelles.

61. Les demandeurs soumettent que l'Avis de Détermination des Questions Communes devrait circuler dans les quatre-vingt-dix (90) jours suivant le jugement portant sur les Questions Communes.

62. L'Avis de Détermination des Questions Communes sera mis en circulation de la même manière que l'Avis de Certification, ou de la façon déterminée par la Cour.

C. Formulaires de réclamation

i. Utilisation des formulaires de réclamation

63. Il sera demandé à la Cour d'approuver (conformément aux dispositions de l'article 334.37 des *Règles des Cours Fédérales*) l'utilisation d'un Formulaire de Réclamation standardisé par tout Membre du Groupe susceptible d'avoir droit à une portion des dommages octroyés ou à quelque forme de compensation individuelle.

ii. Obtention et production d'un formulaire de réclamation

64. La procédure d'obtention et de production d'un Formulaire de Réclamation sera décrite en détail à l'Avis de Détermination des Questions Communes.

65. Sous réserve de modifications subséquentes et de l'approbation de la Cour, les demandeurs suggèrent qu'un seul et même Formulaire de Réclamation standardisé (respectant le gabarit se trouvant à l'Annexe C) s'applique aux trois (3) sous-groupes du Groupe.

66. Les demandeurs suggèrent également que les Membres du Groupe ayant besoin d'aide ou de soutien au moment de compléter un Formulaire de Réclamation puissent bénéficier de conseils

adéquats. Si nécessaire, un processus visant à désigner un tuteur ou un fiduciaire chargé d'apporter de l'aide ou du soutien aux Membres du Groupe sera mis sur pied.

67. Avant de compléter un Formulaire de Réclamation, le Membre du Groupe pourra passer en revue les renseignements détenus par Canada pertinents à sa réclamation (autrement dit, les Informations de la Couronne), qui pourront inclure :

(a) tous les dossiers en lien avec le placement volontaire ou forcé du Membre du Groupe au sein d'un environnement hors-foyer au cours de la Période du Recours Collectif;

(b) tous les dossiers indiquant que le Membre du Groupe a eu besoin d'un produit ou d'un service;

(c) tous les dossiers confirmant que le Membre du Groupe a requis un produit ou un service;

(d) tous les dossiers relatif au fait que le produit ou le service public demandé par le Membre du Groupe lui a été refusé;

(e) tous les dossiers relatifs aux produits et/ou aux services que la Couronne a effectivement fournis au Membre du Groupe; et/ou

(f) tous les dossiers faisant état d'une quelconque relation familiale entre un Membre du Groupe des Familles et un Membre du Groupe des Enfants.

68. Tous les Membres du Groupe devront produire le Formulaire de Réclamation prescrit auprès de l'Administrateur du Recours Collectif et/ou des Procureurs du Groupe à l'intérieur des délais indiqués ci-dessous, ou tels que déterminés par la Cour.

69. Il sera de la responsabilité de l'Administrateur du Recours Collectif de recueillir tous les Formulaires de Réclamation.

iii. Délai de Production des Formulaires de Réclamation

70. Les Membres du Groupe seront informés du délai de production des Formulaires de Réclamation par le biais de l'Avis de Détermination des Questions Communes.

71. Les demandeurs soumettent que les Membres du Groupe devraient bénéficier d'un délai d'un an à compter jugement portant sur les Questions Communes afin de déposer un Formulaire de Réclamation de plein droit, ou selon le délai déterminé par la Cour.

72. Les demandeurs soumettent également que les Membres du Groupe devraient, en certaines circonstances particulières définies par la Cour (par exemple : le fait qu'ils n'étaient pas au courant de leurs droits) ou avec la permission de la Cour (par exemple : en raison de l'état de santé physique ou mentale), avoir le droit de produire un Formulaire de Réclamation plus d'un an après le jugement sur les Questions Communes.

D. Détermination et classification des Membres du Groupe

i. Approbation des Membres du Groupe des Enfants

73. Il reviendra à l'Administrateur du Recours Collectif de déterminer si la personne qui soumet un Formulaire de Réclamation en tant que Membre du Groupe des Enfants se qualifie effectivement comme Membre du Groupe.

74. L'Administrateur du Recours Collectif fondera la détermination dont il est question au paragraphe 75 sur les informations figurant au Formulaire de Réclamation et sur les directives émises par la Cour lors de l'Audition portant sur les Questions Communes. De telles directives pourront, entre autres choses, répondre aux questions suivantes: (a) si le Membre du Groupe a eu besoin d'un produit ou d'un service à quelque moment que ce soit de la Période du Recours Collectif; (b) si le Membre du Groupe s'est vu refuser le produit ou service en question; (c) si la livraison du produit ou service requis s'est vue retardée ou perturbée; (d) si un(e) tel(le) refus,

retard ou perturbation était attribuable à un manque de fonds, à une absence de juridiction ou à un conflit de compétence entre paliers ou départements gouvernementaux; et/ou (e) si un(e) tel(le) refus, retard ou perturbation est survenu(e) après que le Membre du Groupe eût atteint l'âge de la majorité applicable au sein de la province ou du territoire pertinent.

75. L'Administrateur du Recours Collectif procédera également à ces déterminations en fonction des Informations de la Couronne relatives au nombre de Membres du Groupe ayant reçu un produit ou un service en vertu du Principe Jordan (depuis le prononcé de la Décision du TCDP).

76. L'Administrateur du Recours Collectif devra, lorsque cela s'avèrera nécessaire et adéquat, requérir par écrit que la Couronne et/ou le Membre du Groupe des Enfants ayant soumis un Formulaire de Réclamation lui communique(nt) davantage d'informations.

ii. Approbation des Membres du Groupe des Familles

77. Il reviendra à l'Administrateur du Recours Collectif de déterminer si la personne qui soumet un Formulaire de Réclamation en tant que Membre du Groupe des Familles se qualifie effectivement comme Membre du Groupe des Familles.

78. L'Administrateur du Recours Collectif procédera à la détermination dont il est question au paragraphe 79 sur les renseignements figurant au Formulaire de Réclamation et sur les Informations qu'aura fournies la Couronne au sujet de la relation existant entre le potentiel Membre du Groupe des Familles et un Membre Approuvé du Groupe des Enfants.

79. L'Administrateur du Recours Collectif devra, lorsque cela s'avèrera nécessaire et adéquat, requérir par écrit que le Membre du Groupe Jordan ayant soumis un Formulaire de Réclamation lui communique davantage d'informations.

iii. Membres du Groupe décédés

80. La succession de tout Membre du Groupe décédé le ou après le 1er avril 1991 peut soumettre un Formulaire de Réclamation dans le cadre du présent recours collectif.

81. S'il appert que le Membre du Groupe Décédé se serait qualifié en tant que Membre du Groupe Approuvé, sa succession aura le droit d'être indemnisée conformément au Processus de Distribution des Dommages. À moins qu'elle n'y soit explicitement autorisée par la Cour, aucune succession ne pourra être indemnisée en vertu du Processus d'Évaluation de Compensations Individuelles.

iv. Notification des Membres du Groupe / Enregistrement et Contestation des Décisions

82. Dans les trente (30) jours de la réception d'un Formulaire de Réclamation, l'Administrateur du Recours Collectif devra aviser le requérant de sa décision de le reconnaître ou de le rejeter en tant que Membre du Groupe Approuvé. Les personnes dont le statut de Membre du Groupe n'aura pas été reconnu se verront expliquer de quelle manière elles peuvent contester la décision rendue par l'Administrateur du Recours Collectif. Les demandeurs suggèrent que la procédure de contestation inclut la possibilité de soumettre un Formulaire de Réclamation modifié, accompagné de pièces justificatives permettant de démontrer que le requérant est bel et bien un Membre du Groupe.

83. Toutes les parties intéressées auront l'opportunité d'en appeler de toute décision rendue par l'Administrateur du Recours Collectif devant la Cour, ou selon une façon à être déterminée. Les Procureurs du Groupe pourront interjeter appel d'une décision pour et au nom des personnes concernées.

84. L'Administrateur du Recours Collectif conservera tous les dossiers des Membres du Groupe Approuvés ainsi que les Formulaires de Réclamation qu'ils auront soumis, et il communiquera une fois par mois ces informations aux Procureurs du Groupe, à la Couronne et à toute autre partie intéressée. Les Procureurs du Groupe et/ou toute partie intéressée pourront, dans les trente (30) jours de la réception des informations, contester la décision rendue par l'Administrateur du Recours Collectif en transmettant à ce dernier (et à toute autre partie concernée) un exposé de leurs motifs de contestation. La partie répondante aura alors trente (30) jours pour répliquer par écrit à la demande de contestation, à l'expiration desquels l'Administrateur du Recours Collectif devra reconsidérer la décision qu'il a prise et assurer un suivi auprès de toutes les parties.

E. Processus de distribution des dommages

i. Distribution des dommages

85. L'Administrateur distribuera de la manière déterminée par la Cour les dommages obtenus au bénéfice de tous les Membres du Groupe Approuvés.

86. Les demandeurs proposeront que les Membres du Groupe Approuvés aient droit à une certaine proportion des dommages déterminée par l'Administrateur du Recours Collectif en fonction de critères à être approuvés par la Cour, lesquels comprennent, sans s'y limiter : (a) le temps qu'un Membre du Groupe a été privé d'un produit ou d'un service en raison d'un refus, d'un délai ou d'une perturbation (le tout en contravention du Principe de Jordan); (b) l'importance, pour l'enfant, du produit ou du service, et (c) la relation familiale existant entre un Membre du Groupe des Familles et un Membre du Groupe des Enfants.

87. Une fois qu'il les aura informés de la décision qu'il a prise au sujet de leur appartenance à un groupe ou à un autre, l'Administrateur du Recours Collectif devra, à l'intérieur d'un délai

raisonnable que la Cour aura fixé, aviser les Membres du Groupe Approuvés de la proportion de dommages à laquelle chacun a droit en vertu du Processus de Distribution des Dommages approuvé par la Cour.

88. L'Administrateur du Recours Collectifs devra également, le cas échéant, transmettre à chaque Membre du Groupe Approuvé une série de documents comprenant : de l'information quant à la façon de percevoir les dommages auquel il a droit; de l'information quant à l'opportunité pour le Membre du Groupe de recourir au Processus d'Évaluation de Compensations Individuelles; des copies du Formulaire d'Évaluation de Compensation Individuelle accompagnées d'un guide indiquant comment compléter le Formulaire en question; et les coordonnées de ressources susceptibles de fournir des conseils juridiques indépendants. De telles informations seront communiquées selon une forme et un style appropriés à la culture des interlocuteurs, au moyen de médiums interactifs tels que des capsules vidéo d'apprentissage.

ii. Évaluation individuelle des dommages

89. Une fois informés de leur droit au paiement de dommages, les Membres du Groupe Approuvés pourraient être avisés de l'opportunité de bénéficier d'une compensation individuelle établie conformément au Processus d'Évaluation de Compensations Individuelles, tel que défini ci-après.

F. Processus d'Évaluation de Compensations Individuelles

i. Formulaire d'Évaluation de Compensation Individuelle

90. Lorsqu'un Membre du Groupe Approuvé est informé de son droit de percevoir des dommages et de recourir au Processus d'Évaluation de Compensations Individuelles, il recevra un exemplaire du Formulaire d'Évaluation de Compensation Individuelle se trouvant à l'Annexe D.

91. Les demandeurs suggèrent qu'une demande de dommages individuels soit valablement formée par l'envoi d'un Formulaire d'Évaluation de Compensation Individuelle à l'attention de l'Administrateur du Recours Collectif, étant entendu et convenu que seules les personnes désirant recourir au Processus d'Évaluation de Compensations Individuelles seront tenues de produire un Formulaire d'Évaluation de Compensation Individuelle.

ii. Évaluation des Compensations Individuelles

92. Il pourrait être demandé à la Cour d'approuver la structure d'un Processus d'Évaluation de Compensations Individuelles une fois rendu le jugement portant sur les Questions Communes, ou au moment autrement déterminé par la Cour.

93. Un tel Processus d'Évaluation de Compensations Individuelles serait mis à la disposition de tous les Membres du Groupe Approuvés, à l'exception de ceux qui, de l'avis de la Cour à l'issue de l'audition portant sur les Questions Communes, n'ont pas droit à une Compensation Individuelle.

iii. Auditions portant sur les Points Individuels

94. Il sera demandé à la Cour d'émettre des directives, ou de désigner certaines personnes devant lui faire rapport en vertu de l'article 334.26 des *Règles des Cours Fédérales*, ou encore de nommer un juge chargé de réaliser un échantillonnage de test impliquant des Membres du Groupe Approuvés sélectionnés et qui ont choisi de recourir au Processus d'Évaluation de Compensations Individuelles, et cela en vue d'éclaircir les points qui pourraient demeurer pertinents à la suite de la détermination des Questions Communes – par exemple :

(a) Règles d'audition régissant les évaluations individuelles;

(b) Grille de compensations individuelles;

(c) Résolution de différends portant sur la définition de concepts essentiels tels que « service essentiel », « retard » et « conflit de juridiction » et

(d) Toute autre question soulevée par la Cour ou une partie au cours des débats entourant la détermination des Questions Communes.

G. Coût et financement des procédures

i. Frais juridiques des demandeurs

95. Les frais juridiques encourus par les demandeurs seront payés suivant une formule à pourcentage, sujet à l'approbation de la Cour conformément à l'article 334.4 des *Règles des Cours Fédérales*.

96. L'entente intervenue entre les Représentants du Groupe et les Procureurs du Groupe stipule que les honoraires et déboursés payables à ces derniers seront établis de la manière suivante :

(a) Recouvrement collectif: vingt pour cent (20%) des premiers deux cent millions de dollars ($200,000.000) recueillis par voie de règlement ou en vertu d'un jugement, plus dix pour cent (10%) de tout montant recueilli en excédent de la somme de deux cent millions de dollars ($200,000,000) par voie de règlement ou en vertu d'un jugement; ET

(b) Recouvrement individuel: vingt-cinq pour cent (25%) des montants recueillis par voie de règlements ou en vertu d'un jugement.

ii. Financement des dépenses et débours

97. Tous les dépenses et débours de nature juridique encourus par les Représentants du Groupe ont été (et continueront à être) financés par les Procureurs du Groupe – à moins que les Représentants du Groupe et les Procureurs du Groupe n'en viennent éventuellement à la conclusion qu'il est dans le meilleur intérêt du Groupe d'obtenir du financement auprès de

tierces parties. En pareil cas, les Procureurs du Groupe aviseraient la Cour de la situation et requerraient son approbation.

H. *Règlement*

i. Négociations et offres de règlement

98. Les demandeurs ont entretenu des négociations avec la Couronne en vue de parvenir à un règlement équitable du litige, dans un délai raisonnable.

ii. Médiation et autres modes de résolution de conflits volontaires

99. Les demandeurs ont participé à des séances de médiation et d'autres négociations en vue de résoudre le litige ou de circonscrire les questions en litige.

I. Réévaluation du Plan de Poursuite

i. Flexibilité du Plan de Poursuite

100. Le présent Plan de Poursuite sera réévalué sur une base régulière et pourrait faire l'objet de modifications, avant ou après la détermination des Questions Communes, en fonction de gestion de l'instance continue assurée par la Cour, ou de toute autre manière que la Cour estime appropriée.

AVIS DE CERTIFICATION SUGGÉRÉ

VEUILLEZ LIRE LE PRÉSENT AVIS AVEC ATTENTION PUISQU'IL POURRAIT AVOIR UN IMPACT SUBSTANTIEL SUR L'EXERCICE DE VOS DROITS

Nature de la Poursuite

En mars 2019, Sotos LLP, Kugler Kandestin LLP, et Miller Titerle + Co. (collectivement, les "Procureurs du Groupe") ont introduit (devant la Cour Fédérale du Canada siégeant dans le district judiciaire de Montréal, un recours collectif à l'encontre du Procureur Général du Canada (la "Couronne") pour et au nom de demandeurs membres des Premières Nations.

Le recours collectif allège qu'entre le 1er avril 1991 et le 11 décembre 2007, la Couronne a mis en place, à l'échelle du territoire canadien, des politiques de financement discriminatoires ayant eu pour conséquence que plusieurs enfants de Premières Nations se sont vus refusés ou ont reçu tardivement certains produits et services publics.

Le recours collectif a été intenté au bénéfice des membres du Groupe suivant :

(a) tous les jeunes membres des Premières Nations qui se sont vu refuser un produit ou un service public ou à l'égard desquels la livraison d'un produit ou service public s'est vue retardée ou perturbée en raison d'un manque de fonds, d'une absence de juridiction ou d'un conflit de compétence entre paliers ou départements gouvernementaux, entre le 1er avril 1991 et le 11 décembre 2007;

(b) les membres de la famille immédiate d'un membre du sous-groupe défini au paragraphe (a) ci-dessus.

Par ordonnance rendue le **[INSCRIRE LA DATE]**, l'honorable juge **[INSCRIRE LE NOM]** a certifié l'action intentée à titre de recours collectif et a désigné Zacheus Joseph Trout à titre de représentant du Groupe.

La Cour a également décidé que les questions suivantes, qui s'appliquent à l'ensemble du Groupe, seront débattues lors d'une audition portant sur les Questions Communes :

- **[INSCRIRE LES QUESTIONS COMMUNES RECONNUES PAR LE TRIBUNAL]**
- …

Participation au recours collectif

Si vous correspondez à la définition du Groupe, vous êtes automatiquement considéré(e) comme un Membre du Groupe, à moins de vous exclure du recours collectif de la manière décrite ci-dessous. Tous les Membres du Groupe seront liés par le jugement rendu par la Cour, ou tout règlement conclu par les Parties et subséquemment approuvé par la Cour.

À ce stade des procédures, la Cour ne s'est pas prononcée sur les chances de recouvrement des demandeurs ou du Groupe, ni sur le mérite des allégations des demandeurs et/ou des moyens de défense invoqués par la Couronne.

Honoraires, Déboursés et Autres Frais

Vous n'aurez jamais à payer quelque honoraire, déboursé ou autre frais. Lorsqu'il question des honoraires et déboursés judiciaires à prévoir, les Représentants du Groupe et les Procureurs du Groupe ont convenu d'un mandat de représentation prévoyant que les cabinets juridiques concernés seront rémunérés suivant une formule à pourcentage – ce qui signifie en pratique qu'ils ne seront payés qu'en cas de jugement favorable ou d'un règlement hors Cour approuvé.

Vous ne serez d'aucune manière tenu(e) responsable des frais de justice de la partie défenderesse en cas d'échec du recours collectif. Tous les honoraires professionnels payés aux Procureurs du Groupe sont assujettis à l'approbation de la Cour.

Exclusion

Si vous souhaitez, en tant que Membre du Groupe, vous exclure du recours collectif, vous devez compléter et acheminer un « Formulaire d'Exclusion » au plus tard le [**INSCRIRE LA DATE-LIMITE**]. Il vous est possible de télécharger le Formulaire d'Exclusion à partir du site web [**INSCRIRE L'ADRESSE DU SITE WEB**].

Les Membres du Groupe ayant choisi de s'exclure du recours collectif à l'intérieur du délai stipulé ci-dessus ne recevront aucune des sommes qui pourraient être obtenues par les demandeurs dans ce recours collectif. Tous les Membres du Groupe qui n'auront pas demandé à être exclus du recours collectif avant l'expiration du délai seront liés par tout jugement rendu à l'issue des procédures (qu'il soit ou non favorable aux demandeurs), de même que par tout règlement intervenu et subséquemment approuvé par la Cour.

Coordonnées

Si vous avez quelque question ou préoccupation au sujet du contenu du présent Avis ou de l'évolution du recours collectif, il vous est possible de contacter les Procureurs du Groupe de différentes manières :

Schedule C - Framework for Supports for Claimants in Compensation Process

Holistic Wellness Supports Relating to Compensation Under the Class Actions on First Nations Child and Family Services and Jordan's Principle

The parties to the compensation settlement negotiations regarding First Nations Child and Family Services (FNCFS) and Jordan's Principle recognize the need to provide trauma-informed, culturally safe, and accessible health and cultural supports to class members as they navigate the compensation process, as well as supports they may require following the claims process and over the course of their lives. Given that First Nations partners have emphasized the cultural appropriateness of the Indian Residential Schools Resolution Health Support Program (IRS-RHSP), the presented components are services that mirror the IRS-RHSP with special consideration for the needs of children, youth and families. The approach would seek to build from and emphasize the best practices and innovation demonstrated through the IRS-RHSP and support the First Nations mental wellness continuum and continuity of services for class members. Funding provided to First Nations service providers under the IRS-RHSP does not exclude other community members from accessing cultural and emotional supports. This approach would continue in the current claims process. Fee for service mental health counselling is available to class members regardless of their eligibility for Non-Insured Health Benefits.

Components for the approach are based on the following considerations:

- Ensuring services are aligned with the First Nations Mental Wellness Continuum Framework (FNMWCF), which is widely endorsed and developed with First Nations partners, to guide culture as foundation and holistic navigation supports.
- Supporting the largest class action client cohort to date, and unique given the focus on children and youth and/or adverse childhood experiences.
- Recognizing the generational nature of this compensation, mental health and cultural supports will need to be available over the duration of the claims process and flexible to accommodate differing timelines on compensation and support needs as class members reach the age of majority. The approach outlined in this annex builds on the existing network of service providers to enable access to a continuity of services, including First Nations community-based programs, mental wellness teams, Non-Insured Health Benefits counselling and other services.
- Supporting, including funding, regional First Nations partners and First Nations governments to implement supports in the claims process.
- Mental health and cultural supports provided by service providers under contribution agreement will be accessible to all impacted community members.
- Adult class members will be appropriately served by the existing network of health and cultural supports with enhancements to capacity.
- Children and youth will be better served by specialized trauma-informed services, provided through existing First Nations organizations that are already serving children, youth, and families.
- Lessons learned from the Missing and Murdered Indigenous Women and Girls (MMIWG) Inquiry are that client utilization ramped up more quickly than in the first years of the IRS-RHSP. This is likely due to increased awareness and availability of services.
- There is a need for a specific line with chat/text function and case management supports for class members on a confidential basis to easily navigate access to trauma-informed services supported by culturally relevant assessments and comprehensive case management.
- The role of case management is to prevent class members having to repeat their stories and minimize re-traumatization.
- Collaboration with Correctional Services of Canada (CSC), provincial and territorial correctional services and youth detention centers (YDC) is needed to ensure services are provided to class members that are in custody.
- Collaboration with a variety of educational providers (community based, federal, and provincial and territorial) is needed to ensure that services are provided/referred in a way that is accessible to school-aged children, including leveraging expertise in existing youth programs and mental wellness teams that work closely with schools.

DRAFT

Guiding principles for building options:

PRINCIPLES	DESCRIPTION
Child & youth focus, competent service	Healthy child [and youth] development is a key social determinant of health and is linked to improved health outcomes in First Nations families and communities. Successful services for Indigenous children and youth include programs that: are holistic, community-driven and owned; build capacity and leadership; emphasize strengths and resilience; address underlying health determinants; focus on protective factors; incorporate Indigenous values, knowledge and cultural practices; and meaningfully engage children, youth, families and the community (FNMWCF, p. 16 & Considerations for Indigenous child and youth population mental health promotion in Canada). Creating safe and welcoming environments where First Nations children, youth and families are assured their needs will be addressed in a timely manner is essential. Child development expertise, neuro-diverse services and other considerations must be accounted for.
Client-centred care within holistic family and community circle/context	Services and supports build on individual, family and community strengths, considers the wholistic needs of the person, [family and community] (e.g., physical, spiritual, mental, cultural, emotional and social) and are offered in a range of settings (Honouring Our Strengths, p. 41). Services are accessible regardless of status eligibility and place of residence. Services consider neuro-diversity, especially in the case of children and youth.
Trauma-informed, Child development-informed	Trauma-informed care involves understanding, recognizing, and responding to the effects of all types of trauma experienced as individuals at different development stages of life and understands trauma beyond individual impact to be long-lasting, transcending generations of whole families and communities. A trauma-informed care approach emphasizes physical, psychological and emotional safety for both consumers and providers, and helps survivors (individuals, families, and communities) rebuild a sense of control and empowerment. Trauma-informed services recognize that the core of any service is genuine, authentic and compassionate relationships. With trauma-informed care, communities, service providers or frontline workers are equipped with a better understanding of the needs and vulnerabilities of First Nations clients affected by trauma (FNMWCF: Implementation Guide, p. 81).
Provision of culturally safe assessments	Assessment frameworks, tests, and processes must be developed from an Indigenous perspective, including culturally appropriate content (Thunderbird Partnership Foundation's *A Cultural Safety Toolkit for Mental Health and Addiction Workers In-Service with First Nations People*).
Provision of coordinated & comprehensive continuum of services (i.e. awareness of other programs & services)	Active planned support for individuals and families to find services in the right element of care transition from one element to another and connect with a broad range of services and supports to meet their needs. A comprehensive continuum of essential services includes: Health Promotion, Prevention, Community Development, Education, Early Identification and Intervention, Crisis Response, Coordination of Care and Care Planning, Withdrawal Management, Trauma-informed Treatment, Support and Aftercare (Honouring Our Strengths, p.3 & FNMWCF, p. 45). The Continuum of Services will aim to prevent class members needing to repeat their stories.
Enhanced care coordination & planning	Ensure timely connection, increased access, and cultural relevancy [and safety] across services and supports. It is intended to maximize the benefits achieved through effective planning, use, and follow-up of available services. It includes collaborative and consistent communication, as well as planning and monitoring among various care options specific to individual's holistic needs. It relies upon a range of individuals to provide ongoing support to facilitate access to care (Honouring Our Strengths, p. 60 & FNMWCF, p. 17).
Culturally competent workforce through ongoing self-reflection	Awareness of one's own worldviews and attitudes towards cultural differences, including both knowledge of and openness to the cultural realities and environments of the individuals served. A process of ongoing self-reflection and organizational growth for service providers and the system as a whole to respond effectively to First Nations people (Honouring Our Strengths, p. 8).

PRINCIPLES	DESCRIPTION
Culturally-informed and sustainable workforce: long-term development of First Nations service providers	Education, training and professional development are essential building blocks to a qualified and sustainable workforce of First Nations service providers through long-term approaches, whereby ensuring service continuity. Building and refining the skills of the workforce can be realized by ensuring workers are aware of what exists through both informal and formal learning opportunities, supervision, as well as sharing knowledge within and outside the community (FNMWCF, p. 48).
Community-based multi-disciplinary teams (i.e. Mental Wellness Teams)	Grounded in culture and community development, multi-disciplinary teams are developed and driven by communities, through community engagement and partnerships. It supports an integrated approach to service delivery (multi-jurisdictional, multi-sectoral) to build a network of services for First Nations people living on and off reserve (FNMWCF, p. 52, Honouring Our Strengths, p. 79). This approach could link with, or build within, navigation supports for class members to assess their eligibility and access the claims process.
Community-based programming	Comprehensive, culturally relevant, and culturally safe community-based services and supports are developed in response to community needs. Community-based programs considers all levels of knowledge, expertise and leadership from the community (FNMWCF, p. 44).
Flexible service delivery	Services are developed to embrace diversity and are flexible, responsive, accessible and adaptable to multiple contexts to meet the needs of First Nations peoples, family, and community across the lifespan (FNMWCF, p. 45). There will need to be special consideration for remote communities.

Component 1: Service Coordination and Care Teams approach for supports to claimants

Elements	FNMWCF Alignment
• Interdisciplinary Care Teams for class members to support coordinated, seamless access to services and supports, wherever possible. • Service Coordinators housed in First Nations organizations across the country to exercise case management role and pull assigned team leads for administrative, financial literacy and health and cultural supports (including professional oversight/supervision when necessary) depending on the class member's needs. Service Coordinators would not be delivering the services themselves but acting as the central point of contact for class members. • Care Teams are based on partnerships between various local/regional organizations (e.g., First Nations financial institutions, IRS-RHSP providers, peer support networks, etc.). • The Final Settlement Agreement would indicate what the base standard for Care Team services must include and the description of Service Coordination functions. • Wherever possible, services are available in local/regional First Nations languages. • Community contact person to be identified as an extension of the sub-regional Care Team. • A national/regional network of Service Coordinators would be brought together for feedback and this would be shared with the Settlement Implementation Committee. These networks would also offer peer support, training, evaluation.	• Effective and innovative way to increase access to and enhance the consistency of services; outreach, assessment, treatment, counselling, case management, referral, and aftercare. • Culture as foundation. • Developed and driven by communities. • Based on community needs and strengths. • Effective model for developing relationships that support service delivery collaborations both with provinces and territories and between community, cultural, and clinical service providers.

Component 2: Bolstering existing network of health and cultural supports

Elements	FNMWCF Alignment
• Leveraging and expanding the existing network of health and cultural supports housed within First Nations and Indigenous organizations, with an emphasis on child and family-focused supports, to provide trauma-informed care while class members navigate the settlement process. Some of the organizations would be part of the existing network of IRS-RHSP, MMIWG, day schools and other service providers, while others could be new providers, particularly to increase access for children and youth.	• Enhanced flexible funding. • Community development, ownership and capacity building. • Self-determination. • Culture as foundation. • First Nations play key role in hiring of personnel to ensure personnel is recognized by their community. • Communities can ensure service provision are culturally safe and appropriate.

Component 3: Access to mental health counselling to all class members

Elements	FNMWCF Alignment
• Mental health counselling for individuals, families and communities is provided by regulated health professionals (i.e. psychologists, social workers, culture-based practitioners/ceremonialists) who are in good standing with their respective regulatory body and are enrolled with ISC. Access to counselling is not dependent on residence or Non-Insured Health Benefits eligibility. • Counselling would be provided in health professionals, culture-based practitioners/ceremonialists private practice and are primarily paid by ISC on a fee-for-service basis. Counsellors can travel into communities and be reimbursed on a per diem basis. • Virtual mental health counselling will be eligible, depending on regulatory college specifications.	• Enhanced flexible funding. • Community development, ownership and capacity building. • Self-determination. • To increase access to services to class members and their families as defined by First Nations partners.

Component 4: Support enhancement to the Hope for Wellness Help Line or dedicated line

Elements	FNMWCF Alignment
• Dedicated support team for class action members that is accessible in First Nations languages, including: o Access to specialized child and youth expertise, including trauma-informed, child development perspective. o Case management function. o Referrals to dedicated Care Teams through Service Coordinators (component 1). o Referral to information line relating to the application process. • Phone line employees will receive training on the class actions, the course of the CHRT complaint and other related legal, policy and social documentation.	• Quality care system and competent service delivery. • Increase access to necessary services.

Schedule D - Provincial and Territorial Ages of Majority

Province / Territory	Age of Majority	Governing Statute / Provision
Alberta	18 years old	"Every person attains the age of majority and ceases to be a minor on attaining the age of 18 years" Source: *Age of Majority Act*, RSA 2000, c A-6, s 1
British Columbia	19 years old	"From April 15, 1970, (a) a person reaches the age of majority on becoming age 19 instead of age 21, and (b) a person who on that date has reached age 19 but not 21 is deemed to have reached majority on that date" Source: *Age of Majority Act*, RSBC 1996, c 7, s 1(1)
Manitoba	18 years old	"Every person attains the age of majority, and ceases to be a minor, on attaining the age of 18 years" Source: *The Age of Majority Act*, CCSM 1988, c A-7, s 1
New Brunswick	19 years old	"A person attains the age of majority and ceases to be a minor on attaining the age of 19 years" Source: *Age of Majority Act*, RSNB 2011, c 103, s 1(1)
Newfoundland And Labrador	19 years old	"Every person who attains the age of 19 years (a) attains the age of majority; and (b) ceases to be a minor person" Source: *Age Of Majority Act*, SNL 1995, c A-4.2, s 2
Northwest Territories	19 years old	"Every person attains the age of majority, and majority ceases to be a minor, on attaining the age of 19 years" Source: *Age of Majority Act*, RSNWT 1988, c A-2, s 2

Nova Scotia	19 years old	"Every person attains the age of majority, and ceases to be a minor, on attaining the age of nineteen years" Source: *Age of Majority Act*, RSNS 1989, c 4, s 2(1)
Nunavut	19 years old	"Every person attains the age of majority, and ceases to be a minor, on attaining the age of 19 years" Source: *Age of Majority Act*, RSNWT (Nu) 1988, c A-2, s 2
Ontario	18 years old	"Every person attains the age of majority and ceases to be a minor on attaining the age of eighteen years" Source: *Age of Majority and Accountability Act*, RSO 1990, c A.7, s 1
Prince Edward Island	18 years old	"Every person attains the age of majority and ceases to be a minor on attaining the age of eighteen years" Source: *Age of Majority Act*, RSPEI 1988, c A-8, s 1
Quebec	18 years old	"Full age or the age of majority is 18 years. On attaining full age, a person ceases to be a minor and has the full exercise of all his civil rights" Source: *Civil Code of Quebec*, c CCQ-1991, c 64, s 153
Saskatchewan	18 years old	"Every person attains the age of majority and ceases to be a minor on attaining the age of eighteen years" Source: *Age of Majority Act*, RSS 1978, c A-6, s 2(1)
Yukon	19 years old	"Every person reaches the age of majority, and ceases to be a minor, on reaching the age of 19 years" Source: *Age of Majority Act*, RSY, c 2, s 1

Schedule E - Summary Chart of Jordan's Principle / Trout Approach

CLASS	CRITERIA	AMOUNT
Jordan's Principle Class (2007-2017)	Significant Impact due to Essential Service Gap/Delay/Denial as determined by Framework of Essential Services **OR** Highest Level of Impact on the Questionnaire[1] **OR** Service Gap/ Denial/Delay outside of Framework of Essential Services but satisfies Article 6.07 AND Highest Impact on Questionnaire[1]	Minimum $40,000
	Lower Impact due to Essential Service Gap/Delay/Denial as determined by Framework of Essential Services **OR** Service Gap/Denial/Delay outside of Framework of Essential Services but satisfies requirements of Article 6.07 BUT not Highest Level of Impact on Questionnaire[1]	Up to $40,000 maximum[2]
Trout Class (1991-2007)	Significant Impact due to Essential Service Gap/Delay/Denial as determined by Framework of Essential Services **OR** Highest Level of Impact on the Questionnaire[1] **OR** Service Gap/ Denial/Delay outside of Framework of Essential Services but satisfies requirements of Article 6.07 AND Highest Impact on Questionnaire[1]	Minimum $20,000
	Lower Impact due to Essential Service Gap/Delay/Denial as determined by Framework of Essential Services **OR** Service Gap/Denial/Delay outside of Framework of Essential Services but satisfies requirements of Article 6.07 BUT not Highest Level of Impact on Questionnaire[1]	Up to $20,000 maximum[3]

[1] To be determined based on a review of Supporting Documentation and Questionnaire responses.
[2] Amount will depend on number of claimants sharing within Jordan's Principle Class budget of $3 billion.
[3] Amount will depend on number of claimants sharing within Trout Class budget of $2 billion.

Schedule F - Examples Chart of Removed Child Family Class Approach

Examples Chart of Removed Child Family Class Approach

This table sets out examples of various scenarios where multiple Caregiving Parents or Caregiving Grandparents apply for, and are approved for compensation with respect to one (1) Removed Child.

# of Approved Category A: Caregiving Parents (biological)	# of Approved Category B: Caregiving Parents (adoptive or Stepparent)	# of Approved Category C: Caregiving Grandparent(s)	Disposition
2	2	4	• Category A parents receive one (1) Base Compensation each. • Other categories receive no compensation.
1	2	4	• Category A parent receives one (1) Base Compensation. • Category B parents **share** the one (1) remaining Base Compensation **pro rata**. • Category C grandparents receive no compensation.
1	1	4	• Category A parent receives one (1) Base Compensation. • Category B parent receives one (1) Base Compensation. • Category C grandparents receive no compensation.
0	2	4	• Category B parents receive one (1) Base Compensation each. • Category C grandparents receive no compensation.
0	3	4	• Category B parents **share** two (2) Base Compensations **pro rata**. • Category C grandparents receive no compensation.
0	1	1	• Category B parent receives one (1) Base Compensation. • Category C grandparent receives one (1) Base Compensation.

0	1	2 or more	• Category B parent receives one (1) Base Compensation. • Category C grandparents **share** one (1) Base Compensation **pro rata**.
0	0	1 or 2	• Category C grandparent receives one (1) Base Compensation each.
0	0	3 or more	• Category C grandparents **share** two (2) Base Compensations **pro rata**.

Schedule G - Investment Committee Guiding Principles

SCHEDULE [●]

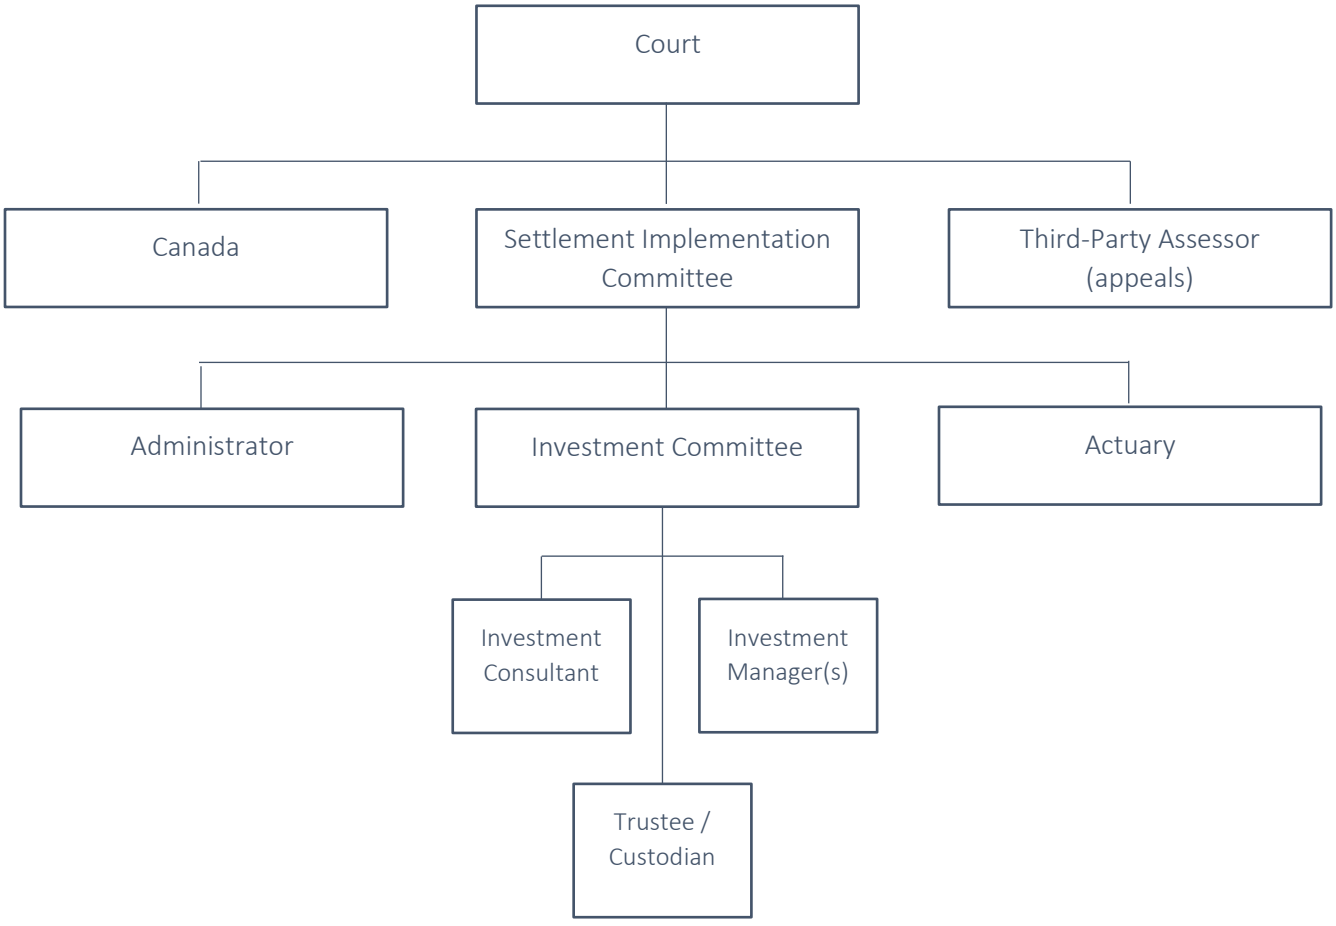
Investment Committee Guiding Principles

This Schedule sets out the principles that shall inform the drafting of the Investment Committee Terms of Reference by the Settlement Implementation Committee, as set out in the Final Settlement Agreement.

Basic Governance Structure relating to Investment Committee:

1. **In order to facilitate the effective management of the Settlement Funds, the Investment Committee should be constituted in a manner that is directly overseen by the Settlement Implementation Committee.** The Investment Committee should be permitted to make decisions within the scope of the Terms of Reference with independence, but is accountable to the Settlement Implementation Committee and, ultimately, the Court. The Investment Committee must be able to communicate with both the Administrator and the Actuary, whether independent of, or through the Settlement Implementation Committee.

2. **The Settlement Implementation Committee should be responsible for oversight of the entire process, including resolving any issues that may arise from time to time.** Where necessary, the Settlement Implementation Committee is the body responsible for seeking guidance from the Court, on behalf of the Class, the Administrator, the Actuary or the Investment Committee.



3. **The Investment Committee should be guided by a statement of investment goals established by the Settlement Implementation Committee.** These goals should not be prescriptive of methods, but rather establish desired outcomes, with the implementation to achieve these outcomes assigned to the Investment Committee.

4. **The Investment Committee should be empowered, through its Terms of Reference to take the following actions:**

    a. Establish, review and maintain a Statement of Investment Policies and Procedures, consistent with the investment goals established by the Settlement Implementation Committee;

    b. Review investment goals and recommending changes to the investment goals to the Settlement Implementation Committee;

    c. On advice from the Investment Consultant and the Actuary, review the asset mix of the Trust to ensure it is consistent with the Trust's return objectives and risk tolerances. As required, modify the asset allocation to ensure the Trust remains prudently invested and diversified to achieve its long-term objectives.

    d. Identify and recommend to the Settlement Implementation Committee an Investment Consultant and corporate trustee for the Fund and for an expenses fund, in the case that implementation expenses are pre-paid by Canada.

    e. Determine the number of investment managers to use from time to time. Select and appoint investment manager(s), set the mandate for each investment manager, terminate investment manager(s) and/or rebalance the funds among the investment manager(s), all based on the advice of the Investment Consultant.

    f. Periodically (bi-annually, annually, semi-annually, or quarterly) review the performance of the Investment Consultant, custodian and corporate trustee and report the results of the review to the Settlement Implementation Committee.

    g. Engage the Investment Consultant to provide advice as considered appropriate from time to time.

    h. Receive, review and approval of reports from the Investment Consultant, investment manager(s) and corporate trustee for the Fund.

    i. Direct the Investment Consultant and/or investment manager(s) to implement any decisions of the Investment Committee.

j. Delegate to the investment manager(s) such decisions regarding the investment of the Fund consistent with the Statement of Investment Policies and Procedures.

k. Monitor compliance of the Trust's investment and investment procedures with the Statement of Investment Policies and Principles.

l. With assistance from the Investment Consultant, monitor the investment performance of the Fund as a whole. Monitor and review all aspects of the performance and services of the Investment Manager(s) including style, risk profile and investment strategies.

m. Monitor risks to the Fund with respect to the overall compensation plan.

    i. With assistance from the Investment Consultant, conduct an annual risk review of the Fund in conjunction with the review by the Settlement Implementation Committee and at such other times as the Investment Committee considers prudent.
    ii. Implement such risk mitigation strategies as considered prudent and report results to the Settlement Implementation Committee.

n. Provide assistance to the Auditor as required.

o. Make recommendations to the Settlement Implementation Committee regarding any Court Approved Protocols and policies that affect the investments of the Fund, including adoption, amendment and termination.

p. Receive periodic reports from the Actuary regarding expected future compensation payments (amount and timing) and based on advice from the Investment Consultant, determine whether any changes to the Statement of Investment Policies and Procedures is necessary or if any changes to the mandates given to the investment manager(s) is necessary.

q. Take direction from and being responsive to the Settlement Implementation Committee on a timely basis.

This is Exhibit “L” referred to in the Affidavit of William Colish of the City of Montreal, in the Province of Quebec, affirmed before me at the City of Toronto, in the Province of Ontario on September 2, 2022, in accordance with O. Reg. 431/20, Administering Oath or Declaration Remotely.

Commissioner for Taking Affidavits (or as may be)

Government of Canada / Gouvernement du Canada

Statistics on the Implementation of the Indian Residential Schools Settlement Agreement

Information update on the Independent Assessment Process From September 19, 2007 to March 31, 2019

- **The deadline to apply to the Independent Assessment Process (IAP) was September 19, 2012**
- The IAP is administered by the Indian Residential Schools Adjudication Secretariat (IRSAS)
- The Government of Canada is responsible for conducting research and disclosing its documents to the IRSAS according to Schedule D of the Indian Residential Schools Settlement Agreement (IRSSA). In addition, the Government of Canada is responsible for negotiating settlements, attending all IAP hearings, and compensating eligible claimants. Statistics shown below reflect how Canada fulfills its obligations. Further statistics are available from IRSAS

Statistics about the IAP

1727

Process Summary		Total
IAP applications received by the IRSAS		**38,257**
IAP claims for which Canada has disclosed its documents to the IRSAS		**30,825**
IAP claims resolved (% (percent) of applications received)		**38,178 (99%)**
	through decisions following a hearing	26,693
	through negotiated settlements	4,165
	through negotiated settlements: post hearing	245
	not admitted or withdrawn or dismissed	7,075
Total IAP payments approved		**$3.180 billion**
Average IAP payment, including legal costs		**$111,265**
Statistics include continuing Alternative Dispute Resolution (ADR) claims as per the IRSSA.		

Other updates on the implementation of the Indian Residential Schools Settlement Agreement

Requests to add new Indian residential schools to the IRSSA

- Article 12 of the IRSSA sets out a two-part test that is used to assess

each requested institution to determine if it should be recognized as an Indian residential school

- To date, 9,471 people have asked for 1,531 distinct institutions to be added to the IRSSA. Since implementation of the IRSSA, CIRNAC has determined that 7 requested institutions meet the Article 12 test criteria and have been added as Indian Residential Schools for specific periods of time. The court has also added 3 institutions, the last of which, Kivalliq Hall (Nunavut), was added on December 14, 2016, by the Nunavut Court of Justice, and upheld on appeal by the Nunavut Court of Appeal via decision dated July 20, 2018. Canada did not appeal this decision, and therefore, the total number of eligible Indian Residential Schools under the IRSSA is now 140. There are no remaining Article 12 challenges
- The Order of Madam Justice Brown regarding the Designated Amount Fund (DAF) Wind-Up was entered July 27, 2015. In order to begin transfer of unused funds in the DAF (Designated Amount Fund) to the National Indian Brotherhood Trust Fund and Inuvialuit Education Foundation for educational programs, a bar was placed on any new forms of application or Request for Direction that will have the effect of creating a demand or liability on the DAF, such as seeking to add an institution to Schedule F under Article 12
- For information on institutions requested through Article 12, please visit the official IRSSA web site

Outreach

- The Advocacy and Public Information Program began in 2007 and is a contribution funding program managed by CIRNAC to encourage the sharing of information and ensure that the Aboriginal

community, particularly former students and their families, are aware of all aspects of the IRSSA, including CEP (Common Experience Payment) and IAP. Other objectives include supporting healing and reconciliation, with a particular focus on youth and intergenerational issues

- From 2007 to 2014, over $28 million was fully invested into 140 regional and national projects across Canada. All of these projects were completed by March 31, 2014

Commemoration

- The IRSSA identifies $20 million for commemoration to provide former students, their families and communities the opportunity to pay tribute to, honour, educate, remember, and memorialize their experiences by acknowledging the systemic impacts of the residential school system. CIRNAC and the Truth and Reconciliation Commission (TRC) are jointly responsible for the development and implementation of commemoration
- All project funding under the commemoration initiative was allocated by March 31, 2014

Resolution Health Support Program: Indigenous Services Canada

- The Indian Residential Schools Resolution Health Support Program (IRS RHSP) provides mental health and emotional support services to former students and their families before, during and after their participation in IRSSA processes, including CEP, IAP, TRC events and commemoration activities
- The following services are provided:

- **emotional support**: Resolution Health Support workers to listen, talk and provide support through all phases of the IRSSA
- **cultural support**: Elders and traditional healers for teachings, ceremonies, dialogue and traditional healing
- **professional counselling**: psychologists and social workers that are registered with Health Canada, for individual or family counselling
- **assistance with transportation** may be offered when professional counselling and cultural support services are not locally available

- For more information on the program and its services, please visit the Indigenous Services Canada website.

Information update on the Common Experience Payment From September 19, 2007 to March 31, 2016

The deadline for applying to the Common Experience Payment (CEP) was September 19, 2011. The deadline to apply for the CEP under exceptional circumstances was September 19, 2012. After March 31, 2016, updates will be made to the CEP statistics below only when there are significant changes, such as the addition of an institution under Article 12 of the Indian Residential Schools Settlement Agreement or the official completion of the program.

Statistics and information concerning the CEP

Process summary		Total
Projected number of CEP applications at launch of process		**110,000**
Projected number of eligible CEP applications at launch of process		**80,000**
Original amount of the CEP Trust Fund		**$1,900,000,000**
Total CEP payments, including advance payments		**$1,622,422,106**
Average CEP payment		**$20,457**
Total CEP applications received since 2007		**105,530**
Total CEP applications received since 2007*		**105,524**
Total CEP applications completed: paid or ineligible		**103,236**
	applications paid	79,309
	applications ineligible	23,927
Complete CEP applications in progress		**6**

* Includes applications where research has been conducted, but authentication requires additional information from applicants.

Appeal process summary		Total
Total reconsideration requests received		**27,798**
	reconsideration processed eligible	9,771
	reconsideration processed ineligible	18,022
	reconsideration in progress	5

1732

Appeal process summary		Total
Total National Administrative Committee (NAC) appeals received		**5,259**
	NAC appeals processed eligible	1,164
	NAC appeals processed ineligible	3,511
	NAC appeals in progress	7
Total court appeals received		**741**
	court appeals processed eligible	13
	court appeals processed ineligible	723
	court appeals in progress	5

CEP remainder

- In accordance with the Indian Residential Schools Settlement Agreement, an audit of the Designated Amount Fund was conducted after September 19, 2011. The audit disclosed a balance in excess of $40 million which triggered the requirement to disburse amounts to CEP recipients, upon application, as personal credits
- Personal credits are non-cash credits that are redeemable at approved educational entities and groups for individual or group educational services. Personal credits have a maximum value of $3,000 per individual CEP recipient. Personal credits can be used by the CEP recipient and by certain members of the CEP recipient's

family

- Terms and conditions in respect to the administration of personal credits were negotiated by Canada, and the Assembly of First Nations and by Canada and the Inuit Representatives. The terms and conditions were approved by the Supreme Court of British Columbia on October 31, 2013. The implementation of the personal credits process began in January 2014
- Following the October 31, 2014 deadline to apply for personal credits originally approved by the court and agreed to by all parties, an Order of the Supreme Court of British Columbia extending personal credits deadlines was entered on January 7, 2015. New deadlines are as follows:
    - acknowledgement forms: extended from October 31, 2014, to March 9, 2015
    - redemption forms: extended from December 1, 2014, to June 8, 2015
    - completion of educational activities: extended from April 30, 2015, to August 31, 2015
- As of March 31, 2016, 30,042 personal credits applications had been received and a total of 23,774 redemption forms totaling over $57 million had been processed
- In order to begin transfer of unused funds in the Designated Amount Fund (DAF) to the National Indian Brotherhood Trust Fund and Inuvialuit Education Foundation for educational programs, Madam Justice Brown issued an Order regarding the DAF Wind-Up on July 27, 2015. A bar was placed on future CEP applications, personal

credits applications and any forms of application or Request for Direction that will have the effect of creating a demand or liability on the DAF, such as seeking to add an institution to Schedule F under Article 12. After extensive efforts by Canada, the Assembly of First Nations and the Inuit Representatives to attempt to locate applicants with whom Canada had lost contact, the court also dismissed over 2,300 incomplete CEP applications

- Any amount remaining in the DAF after all demands and liabilities are satisfied will be distributed in percentage installments approved by the court to the National Indian Brotherhood Trust Fund and the Inuvialuit Education Foundation

ORDER

UPON MOTION by the Plaintiffs, heard at a special sitting of the Court on June 22, 2022, for an order approving the Short-Form and Long-Form Notices of Certification and Settlement Approval Hearing, and the Opt-out Form;

CONSIDERING the Plaintiffs' motion record and the submissions of counsel for the parties at the hearing of the motion;

AND CONSIDERING that the Defendant consents to the relief sought;

THIS COURT ORDERS that:

1. The Short-Form Notice of Certification and Settlement Approval Hearing, the Long-Form Notice of Certification and Settlement Approval Hearing, and the Opt-out Form substantially in the forms attached respectively hereto as Schedules "A", "B", and "C" are hereby approved, subject to the right of the parties to make non-material amendments as may be necessary or desirable, and subject to necessary language translations of the Short-Form Notice of Certification and Settlement Approval Hearing, the Long-Form Notice of Certification and Settlement Approval Hearing, and the Opt-out Form into Cree, Ojibwe, Dene and Mi'kmaq prior to publication, as agreed on by the parties.

2. Individuals seeking to opt out of the class proceedings in Court File Numbers T-402-19 and T-141-20, or the class proceeding in Court File Number T-1120-21, shall do so by either sending the Opt-out Form to the Claims Administrator, postmarked on or before the opt-out deadline, or by opting out online using the opt-out coupon on the class website at www.fnchildcompensation.ca. The opt-out deadline shall be six months from the date on which the notices are published.

3. Where the postmark is not visible or legible, the request to opt out shall be deemed to have been postmarked four (4) business days prior to the date that it is received by the Claims Administrator.

4. The election to opt out, whether in paper format or online, must be signed by the person or the person's designee, and must include the following information as prescribed in Schedule "C" to this Order:

    a. The person's full name, current address, telephone number, and Indian Registry/Status Number (if available);

    b. The approved statement to the effect that the person wishes to be excluded from the class action and understands that opting out of the class action means the individual will not receive payment under the class action; and

    c. The reason for wanting to opt out.

5. Any class member who opts out of the proceedings shall have no further right to participate in the proceedings or to share in the distribution of any funds received as a result of a judgment or settlement in the proceedings.

6. Within thirty (30) days of the opt-out deadline, the Claims Administrator shall provide to class counsel and the Defendant a report containing the names of each person who has validly and timely opted out of the proceedings and a summary of the information delivered by such persons pursuant to paragraph 4 above.

7. Any person exercising the opt-out right on behalf of a person under the applicable age of majority or otherwise lacking legal capacity shall seek approval of this Court, and such opt-out is not valid without the Court's approval. The procedure

for obtaining such Court approval shall be the subject of a further order of the Court.

8. The notice plan and the appointment of the Claims Administrator shall be the subject of a further order of this Court.

Short Form Notice of Certification and Settlement

Federal Child Welfare and Jordan's Principle Class Action

The Federal Court of Canada has approved this notice.

The plaintiffs and Canada have reached a $20 billion settlement of this class action taken on behalf of First Nations children and some of their family members. If you qualify, you may be entitled to payment under this settlement.

This notice provides information about the lawsuit and the settlement. More detailed information is available online here. You can also sign up to receive updates on the compensation process at the same link.

This notice also gives you a chance to remove yourself (opt out) from the class action. You should only remove yourself from the class action if you do not want to receive payment in this settlement and be bound by the settlement.

If you want to stay in the class action and be eligible to submit a claim for payment in this settlement, you do not need to do anything now.

If you would like help to better understand this notice, there is contact information below. You can make an appointment for a call with someone who will explain it to you and answer your questions.

What is the class action about?

The class action claims that from April 1, 1991 until March 31, 2022, Canada discriminated against First Nations children living on reserves or in the Yukon who were removed from their homes by child welfare agencies operating in First Nations communities and placed in out-of-home care.

The class action also covers claims that between 1991 and November 2, 2017, where Canada failed to provide (or delayed in providing) essential services to First Nations children who had a confirmed need for such essential services. This treatment discriminated against the children and broke a legal rule known as Jordan's Principle.

Are you included in the class action?

In general, you are included in the class action if you are in one of the following groups:

> **Category 1:** First Nations children living on-reserve or in the Yukon who were removed from their homes by child welfare agencies and placed into state care, foster care or group homes at any time between April 1, 1991 and March 31, 2022. This group also includes First Nations children who were not living on-reserve but one of their parents was ordinarily resident on a reserve at the time of their removal.

Category 2: First Nations children (living both on-reserve and off-reserve) who were confirmed to need an essential service but faced a delay, denial or a gap in receiving that essential service between April 1, 1991 and November 2, 2017;

Category 3: The parents, grandparents or siblings of one of the individuals above.

More details about who is included in the class action can be found here.

What is the proposed settlement?

The plaintiffs and Canada have agreed to a settlement that requires that Canada pay $20 billion in compensation. The settlement must be approved by the court before it becomes effective.

If the settlement is approved by the court, each removed child described in Category 1 may receive $40,000 or more in compensation depending on how many people are approved for compensation. Parents or grandparents who were caring for a person in Category 1 at the time of removal may also be entitled to up to $40,000 or up to a maximum of $60,000 in cases of multiple removed children. Siblings of a removed child will not be entitled to any payment under the settlement.

Each person in Category 2 who:

(a) lacked timely access to, or experienced a denial or gap in receiving an essential service that they were confirmed to have needed between December 12, 2007 and November 2, 2017 (under Jordan's Principle) are entitled to compensation. Those who suffered significant impact as a result of this may receive $40,000 or more. Others may receive less than $40,000 and up to $40,000, depending on how many claimants are approved. The actual amounts that each claimant will receive cannot be determined until a later date when the number of people making a claim is known.

OR

(b) lacked timely access to, or experienced a denial or gap in receiving an essential service that they were confirmed to have needed between April 1, 1991 and December 11, 2007 are entitled to receive compensation. Those who suffered significant impact as a result of this may receive $20,000 or more. Others may receive less than $20,000 and up to $20,000, depending on how many claimants are approved. The actual amounts that each claimant will receive cannot be determined until a later date when the number of people making a claim is known.

Caregiving parent(s) or caregiving grandparent(s) of the persons in Category 2 who suffered the most significant hardship may also be entitled to compensation, under Category 3.

A fund of $50 million will be established to assist First Nations children and families impacted by Canada's discrimination.

What are my options?

1. **Stay in the class action**: If you wish to stay in the class and be eligible to submit a claim for payment under the settlement, you do not need to do anything at this time.

2. **Remove yourself from the class action (opt out)**: If you do not want to participate in this class action, and you do not want to receive a payment under the settlement, you need to remove yourself by submitting an Opt-Out Form by this date: _____.

   If you submit the Opt-Out Form, you will not receive compensation from the settlement.

   To remove yourself from the lawsuit, please visit [URL] to fill out and submit an Opt-Out Form online, or mail a print copy of the Opt-Out Form to [ADDRESS] requesting to be removed from this class action. You can also receive a copy of the Opt-Out Form from the Administrator by contacting [1-800 NUMBER].

   The deadline to submit an Opt-out Form and remove yourself from the lawsuit is **[DATE].**

What if I want to object to or comment on the settlement?

The Federal Court will hold a hearing to decide if the $20 billion settlement and the lawyers' fees should be approved. It is expected that the hearing will take place on **September 19-23, 2022** in Ottawa, but it is possible that this date might change. If the date changes, a new date will be posted here. Register here to receive notification by email of any change to the hearing date and/or place.

The hearing will take place in person and will be broadcasted online. Details of the hearing will be posted here.

You do not have to attend the hearing or provide any comments on the settlement in order to be eligible to receive compensation.

If you want to object to or comment on the settlement or the lawyers' fees that will be requested, you have two options:

1. **Object or provide comments in writing:** You may send any comments to _____. Your comments will be sent to the Federal Court before the hearing.

2. **Object in person:** Ask to speak in court about the proposed settlement or the lawyers' fees on September 19-23, 2022, either in person at the Federal Court in Ottawa or by videoconference.

If you want to object, you must send your written comments or request to speak at the hearing by **September 12, 2022**.

Canadian Human Rights Tribunal decision

The settlement of the lawsuit will also be reviewed by the Canadian Human Rights Tribunal (Tribunal). A hearing before the Tribunal is expected to take place in June or July of 2022.

The Tribunal will be asked to make a ruling that the $20 billion settlement of the lawsuit satisfies its previous compensation order against Canada (2019 CHRT 39). If the Tribunal finds that the $20 billion settlement satisfies its compensation order against Canada, then the $20 billion settlement will replace the compensation order, and you will not be allowed to claim a payment under the Tribunal's order. Also, if the Tribunal finds that the $20 billion settlement of this lawsuit satisfies its compensation order, and if the Federal Court approves the settlement, then you will not be able to claim compensation under the Tribunal's compensation order even if you opt out of this lawsuit.

If the Tribunal does not find that the settlement satisfies its compensation order, then the settlement will come to an end and the September hearing before the Federal Court will not proceed. If that happens, you will receive another notice.

It is possible that some people who are entitled to a payment under the Tribunal's compensation order, in particular those persons in Category 3 above, may not receive direct compensation under the settlement of this lawsuit, or they may receive less money than they would be entitled to under the Tribunal's compensation order.

Are there any negative consequences of staying in the class action?

By staying in the class action, you will be eligible to submit a claim for compensation. However, by staying in the class action you will not be able to sue Canada. You can still sue an agency, foster parent or group home. You cannot apply to the Canadian Human Rights Tribunal for compensation, about the same discriminatory conduct that is the subject of the class action.

Who is representing the class?

The class is represented by the following plaintiffs: Xavier Moushoom, Jeremy Meawasige (by his litigation guardian, Jonavon Joseph Meawasige), Jonavon Joseph Meawasige, Ashley Dawn Louise Bach, Karen Osachoff, Melissa Walterson, Noah Buffalo-Jackson (by his litigation guardian, Carolyn Buffalo), Carolyn Buffalo, Dick Eugene Jackson, and Zacheus Joseph Trout. The Assembly of First Nations is also a plaintiff in the class action.

The plaintiffs are represented by five law firms from across Canada: Sotos LLP, Kugler Kandestin LLP, Miller Titerle + Co., Nahwegahbow Corbiere and Fasken Martineau Dumoulin LLP.

You do not have to pay the lawyers, or anyone else, to be a part of this lawsuit or to receive payment in the settlement.

How will the lawyers be paid?

The lawyers will be paid by Canada. No amount paid to the lawyers will be taken from the $20 billion settlement or from any payments that are made to class members.

The amount that the lawyers will be paid will be negotiated between the plaintiff lawyers and Canada. If they agree to an amount of fees, then the lawyers will ask the Court to approve the amount at the hearing currently scheduled for September 19-23, 2022.

More details on the legal fees that will be requested will be posted here after the negotiations have concluded.

INTRODUCTION

The Federal Court of Canada has approved this notice.

The plaintiffs and Canada have reached a $20 billion settlement of this class action taken on behalf of First Nations children and some of their family members. If you qualify, you may be entitled to payment under this settlement.

This notice provides information about the lawsuit and the settlement. More detailed information is available online here. You can also sign up to receive updates on the compensation process at the same link.

This notice also gives you a chance to remove yourself from the class action. **You should only remove yourself from the class action if you do not want to receive payment in this settlement.**

If you want to stay in the class action and be eligible to submit a claim for payment in this settlement, you do not need to do anything now.

If you would like help to better understand this notice, there is contact information below. You can make an appointment for a call with someone who will explain it to you and answer your questions.

THE CLASS ACTION

WHAT IS A CLASS ACTION?

A class action is a lawsuit brought by one or more persons on behalf of a large group of people.

WHAT IS THIS CLASS ACTION ABOUT?

This class action is about discrimination by the Canadian government against First Nations children in providing child welfare, health care, and other essential services.

The class action claims that from 1991 until 2022, Canada discriminated against First Nations children living on reserves who were removed from their homes and placed in out-of-home care.

The class action also claims that between 1991 and 2017, Canada failed to provide (or delayed in providing) essential services to First Nations children who had a confirmed need for such essential services. This treatment discriminated against the children and broke a legal rule known as Jordan's Principle.

In the winter of 2022, the parties' intensive negotiations led to Canada committing **$20 billion** to victims of discrimination to resolve the class action (the **Settlement**). The goal of the Settlement is to offer compensation to survivors and their families in recognition of the harms they've endured – while knowing that no amount of money can make up for their pain and suffering.

WHO IS INCLUDED IN THE CLASS ACTION?

Three (3) groups may receive compensation under the Settlement:

Category 1	First Nations children who were removed from their homes on reserve and placed in care at any time between April 1, 1991 and March 31, 2022.
Category 2	First Nations children who faced a service gap or were denied or delayed access to an essential service between April 1, 1991 and November 2, 2017.

Category 3 Their caregiving parents or caregiving grand-parents.

CATEGORY 1: REMOVED CHILDREN

Under the Settlement, First Nations children on reserve or those who had at least one parent living on reserve, or lived in the Yukon, and who were placed in care between April 1, 1991 and March 31, 2022 may be able to receive money. To find out more about compensation under the Settlement, click here.

You may qualify for payment if you:

- Are First Nations;
- Lived on reserve or had at least one parent living on reserve, or in the Yukon as a child (except in the Northwest Territories)
- Were placed into care as a child between April 1, 1991 and March 31, 2022; and
- Your placement was funded by Canada.

Covered	Not Covered
First Nations children	Non- First Nations children
Children living on reserve or had at least one parent living on reserve, or lived in the Yukon	Children living off-reserve, or in the Northwest Territories
Children who were placed into care between April 1, 1991 and March 31, 2022, including in: • **Foster Homes** • **Assessment Homes** • **Non-kin Foster Homes**	Children who were placed into care *prior* to April 1, 1991, or who were placed into: • Non-paid Kin Homes • Non-paid Community Homes

• **Paid Kinship Homes** • **Group Homes** • **Residential Treatment Facilities** • **Others**	
Funded by Canada	Funded by a province

Children who were removed from their homes prior to 1991 are the subject of other class actions such as the "Sixties' Scoop" settlement. These are separate class actions, distinct from this one.

WHAT DOES "FIRST NATIONS" MEAN UNDER THE SETTLEMENT WITH RESPECT TO REMOVED CHILDREN?

Under the Settlement, "First Nations" means Indigenous peoples who:

(i) Are registered under the *Indian Act*;
(ii) Were entitled to be registered under the *Indian Act* as of February 11, 2022; or
(iii) Met band membership requirements as of at least February 11, 2022 (i.e., they were included on the Band List of their community)

I AM FIRST NATIONS BUT WAS NOT LIVING ON RESERVE AT THE TIME THAT I WAS REMOVED FROM MY HOME. CAN I STILL RECEIVE COMPENSATION?

If one or both of your parents were ordinarily resident on a reserve when you were placed into care, you may be able to get compensation. But, if neither you nor your parents were living on reserve, you are not entitled to compensation unless Canada funded your removal under an agreement with a province or territory.

Take this quiz to find out if you qualify in this category:

1. Are you First Nations?

☐ Yes ☐ No

2. Did you live on a reserve or had at least one parent living on reserve, or lived in the Yukon?

(N.B. if you lived in the Northwest Territories, select "No")

☐ Yes ☐ No

4. Were you placed in care at any time between April 1, 1991 and March 31, 2022?

☐ Yes ☐ No

If you answered "Yes" to all of these questions, you may qualify for payment. Contact the Assembly of First Nations Helpline at **[contact]** to learn more.

CATEGORY 2: JORDAN'S PRINCIPLE / TROUT

Under the Settlement, First Nations children who faced a service gap or were denied or delayed access to an essential service between 1991 and 2017 may be able to receive money. This group is commonly referred to as "Jordan's Principle" class, in honour of Jordan River Anderson. (Although Jordan's Principle did not exist until 2007, this category dates back to April 1, 1991 under the name of Trout.)

WHAT IS "JORDAN'S PRINCIPLE"?

"Jordan's Principle" is a legal rule that requires the government to treat First Nations children in the same manner as non-First Nations children, and not deprive them of important services that they need. The government must put the interests of the child first, before any jurisdictional or funding dispute.

This principle was named in honour of Jordan River Anderson, who did not receive the services he desperately needed because the governments were arguing about who should pay for Jordan's needs. Jordan's Principle is intended to ensure that what happened to Jordan does not happen to other First Nations children.

To find out more about compensation under the Settlement, click here.

You may qualify for payment if:

- You are First Nations (whether you lived on or off reserve, including in the Yukon and Northwest Territories);
- You needed an essential service between April 1, 1991 and November 2, 2017; and
- You requested the service but were denied or delayed access to this service, or you did not request the service but there was a service gap, because of a:
    1. lack of funding
    2. lack of jurisdiction
    3. jurisdictional dispute between Canada and the provincial / territorial government
    4. other reasons

Covered	Not Covered
First Nations children	Non-First Nations children
Children who were confirmed by a professional with relevant expertise to have needed an essential service	Children who needed a non-essential service
Were denied or delayed access to this service or faced a service gap	Were denied or delayed access to this service
Because of a: • **lack of funding** • **lack of jurisdiction** • **service gap** • **jurisdictional dispute** • **other**	For any reason
Between April 1, 1991 and November 2, 2017	Before April 1, 1991 or after November 2, 2017

WHAT DOES "FIRST NATIONS" MEAN UNDER THE SETTLEMENT WITH RESPECT TO JORDAN'S PRINCIPLE CHILDREN?

Under the Settlement, "First Nations" means Indigenous peoples across Canada (including the Yukon and Northwest Territories) who:

(i) Are registered under the Indian Act;

(ii) Were entitled to be registered under the Indian Act as of February 11, 2022; or

(iii) Were recognized as citizens or band members of a First Nations community as of February 11, 2022, and faced a delay, denial or service gap with respect to an essential service between January 26, 2016 and November 2, 2017.

Take this quiz to find out if you may qualify in this category:

1. Are you First Nations?

☐ Yes ☐ No

2. Did a professional with relevant expertise confirm that you needed an essential service between April 1,1991 and November 2, 2017? (For more information on the list of essential services, click here)

☐ Yes ☐ No

3. Were you denied access to this service, or did you experience a delay in receiving this service?

☐ Yes ☐ No

4. Were you unable to obtain this service due to a service gap?

☐ Yes ☐ No

If you answered "Yes" to these questions, you may qualify for payment.

CATEGORY 3: FAMILIES

The caregiving parents or the caregiving grandparents of children who were removed from their homes or denied access to an essential service may also be able to receive compensation. This includes the biological or adoptive parent(s), or grand-parent(s), of the child. Foster parents are not included.

Covered	Not Covered
Caregiving biological parent(s)	Foster parent(s)
Caregiving adoptive parent(s)	
Step-parent(s)	
Caregiving biological grand-parent(s)	
Caregiving adoptive grand-parent(s)	

Importantly, only those parent(s) or grand-parent(s) who were caring for the child at the time of removal are entitled to compensation – i.e., the *primary caregivers* – to a maximum of two (2) caregivers.

Siblings and other family members of the affected children will not receive direct compensation under this Settlement.

THE SETTLEMENT

OVERVIEW

Under the settlement Canada will pay committing **$20 billion** to class members. In addition, Canada pledged an additional **$20 billion** to fund long-term reform to eliminate systemic discrimination against First Nations children. However, that pledge is not part of this settlement.

The Settlement must be approved by the courts. If it is approved by the courts, individuals falling within Category 1, Category 2, or Category 3 may be able to receive compensation.

Is this case different from the Canadian Human Rights Tribunal compensation decision ordering Canada to pay $40,000 to each affected individual?

The Settlement of the class action partly overlaps with the Tribunal compensation decision. The Tribunal will be asked to confirm that this settlement satisfies its compensation order. If the Federal Court then approves the Settlement, this Settlement will cover all claims under both the Tribunal and the class action. You will only need to make one application for compensation.

HOW MUCH COMPENSATION CAN I GET?

The amount of money you may receive will vary based on different factors. Each Category provides for an estimated minimum base payment. In addition, you may be able to receive additional payments, if certain factors are present.

CATEGORY 1: REMOVED CHILDREN

Minimum Payment

Under the Settlement, individuals who were removed from their homes and placed into care as children, between April 1, 1991 and March 31, 2022, are each entitled to a minimum payment of **$40,000**.

Additional Payments

Some individuals will also be able to get more compensation, based on several factors. These include, for example:

- The age when you were first placed into care;
- The total amount of time spent in care;
- Whether you were removed from your home due to lack of access to an essential service;
- Whether you lived in a Northern or remote community;

- The number of times you were placed into care; and
- The number of out of home placements.

These factors are intended to acknowledge the harm suffered by each child, in light of their individual circumstances.

The availability and the amount of additional payments may vary depending on the number of applicants.

CATEGORY 2: JORDAN'S PRINCIPLE / TROUT

Minimum Payment

The minimum amount available for members of Category 2 depends on *when* the essential service gap or the denial or delay of an essential service happened:

Between April 1, 1991 – December 11, 2007 **up to $20,0000 or more**

Between December 12, 2007 – November 2, 2017 **up to $40,000 or more**

The actual amount each person can receive will depend on the severity of the impact on the child, the number of approved claimants, and the availability of funds.

Additional Payments

Individuals may also be able to get more money, in certain circumstances, if the denial or delay of an essential service had a severe impact on them. Any additional payments will depend on the severity of the impact, the number of approved claimants, and the availability of funds.

CATEGORY 3: FAMILIES

The caregiving parents or the caregiving grandparents of children who were removed from their homes or denied access to an essential service may also be able to receive compensation. The amount of money a caregiver may be entitled to depends on the Category.

Category 1: Caregivers of removed children	**$40,000 per child** up to a **maximum of $60,000**
Category 2: Caregivers of Jordan's Principle and Trout children	The amount is not determined at this time. It is expected that the caregiving parents or caregiving grandparents of the children who were most significantly impacted will receive direct compensation. The amount each caregiver may receive will depend on the number of approved claimants.

Siblings and other family members of the affected children will not receive direct compensation under this Settlement.

To find out how you can get money, click here.

WILL MY MONEY BE TAXED?

Money received under the Settlement is not subject to federal income tax. In addition, Canada has agreed to work with provinces and territories to exempt these amounts from provincial taxes or other deductions.

ARE THERE ADDITIONAL SUPPORTS FOR CHILDREN & FAMILIES?

In addition to the above, a **$50 million** trust fund will be created to support First Nations children and families in different ways. This includes, for example:

- Grants to facilitate culture, community and healing-based services to class members and their children;
- Supports for children in care, or formerly in care, including funding for family and community reunification;
- Funding to facilitate access to cultural programs, activities and supports (ex. youth groups, ceremonies, languages, Elders and Knowledge Keepers, mentors, land-based

activities, and culturally-based arts and recreation);

- Supports for children transitioning out of care (ex. safe and accessible housing, life skills and independent living, financial literacy, continuing education, health and wellness supports, etc.);

- Facilitating the creation of a scholarship for the Jordan's Principle Class and their children; and

- The creation of a national network for First Nations children in care.

APPROVAL OF SETTLEMENT

WHEN WILL THE SETTLEMENT BE APPROVED?

FEDERAL COURT

The Federal Court will hold a hearing to decide if the Settlement should be approved. This hearing will take place in Ottawa on **September 19 to 23, 2022**. Details of the hearing will be posted here as well as details on how to attend a virtual hearing if available.

It is possible that this date might change. Sign up here to receive notifications by email of any change to the time and place of the hearing.

CANADIAN HUMAN RIGHTS TRIBUNAL

The Settlement must also be reviewed by the Canadian Human Rights Tribunal. A hearing before the Tribunal is expected to take place before the hearing at the Federal Court.

At this hearing, the Tribunal will be asked to confirm if the Settlement satisfies its previous compensation order against Canada (the **Compensation Order**). If it does, the Settlement will replace the Compensation Order. This means that claimants will have to seek compensation through the Settlement rather than the Compensation Order.

CAN I COMMENT OR OBJECT TO THE SETTLEMENT?

You do not have to attend the hearing to provide any comments on the Settlement, but you can if you want to.

If you want to provide comments or object to the Settlement, there are two (2) ways you can do so:

In writing: You can provide comments in writing to this address: [insert]. Your comments will be sent to the Federal Court before the hearing. To be included, all written comments must be received by **September 12, 2022**.

In person: You can ask to speak in court about the Settlement on September 19 to 23, 2022 in person or by videoconference. If you want to comment or object in person, you must send your request to speak at the hearing by **September 12, 2022**.

You will also have an opportunity to comment on the fees for the lawyers who worked on the class action. For more information about the lawyers and their fees, click here.

WHAT HAPPENS AFTER THE SETTLEMENT IS APPROVED?

Participation in the Settlement is voluntary. You can decide if you would like to participate and make a claim for payment. The following are your options:

OPTION 1: STAY IN THE CLASS ACTION

If you want to stay in the class and submit a claim for payment under the Settlement, you do not need to do anything at this time. Once the Settlement is approved by the court, you will be provided with information about how to make a claim.

ARE THERE ANY NEGATIVE CONSEQUENCES OF STAYING IN THE CLASS ACTION?

Staying in the class action will not impact any government supports that you may be receiving or may be entitled to receive in the future from any government.

By staying in the class action, you can submit a claim for compensation under the Settlement. But, you will not be able to sue Canada again, or make an application to the Canadian Human Rights Tribunal, regarding the same discriminatory conduct.

Nothing in the Settlement prevents you from taking legal action for any other harms not included in this class action, or starting a claim against a province, territory or agency.

OPTION 2: REMOVE YOURSELF FROM THE CLASS ACTION

If you do not want to participate in the class action, you can ask to be removed from the lawsuit. You can do so by filling out an Opt-Out Form online or mailing a copy to this address: [insert]. **If you remove yourself from the class action, you will NOT receive any compensation under this Settlement.**

You can also contact the Administrator of the Settlement by contacting [1-800-NUMBER].

The last day to remove yourself from the class action is: **[date]**.

IF I OPT-OUT OF THE SETTLEMENT, CAN I STILL GET MONEY FROM THE CANADIAN HUMAN RIGHTS TRIBUNAL COMPENSATION ORDER?

No. If approved by the Canadian Human Rights Tribunal, the Settlement will replace the Compensation Order process altogether. This means that claimants can only request money through the Settlement. If you opt-out of the Settlement, you will not be able to claim compensation for this discriminatory conduct.

CLASS ACTION TEAM

WHO IS REPRESENTING THE CLASS?

YOUR REPRESENTATIVE PLAINTIFFS

The Assembly of First Nations is a plaintiff. The class action was brought by the following individuals on behalf of affected First Nations across Canada:

- Xavier Moushoom
- Jeremy Meawasige
- Jonavon Joseph Meawasige
- Ashley Dawn Louise Bach
- Karen Osachoff

- Melissa Walterson
- Noah Buffalo-Jackson
- Carolyn Buffalo
- Dick Eugene Jackson
- Zacheus Joseph Trout

These are your representative plaintiffs. They act as representatives of the entire class.

YOUR LEGAL TEAM

The class is represented by five (5) law firms across Canada:

- Sotos LLP
- Kugler Kandestin LLP
- Miller Titerle + Co.
- Nahwegahbow Corbiere
- Fasken Martineau Dumoulin LLP

HOW WILL THE LAWYERS BE PAID?

You do not have to pay the lawyers, or anyone else, to be a part of this lawsuit or to receive payment in the Settlement.

The lawyers will be paid by Canada, separate and apart from the Settlement. These fees will not be taken from the Settlement, or from any payments to be made to class members. The settlement funds ($20 billion) have been set aside for the class *only*.

The amount to be paid to the lawyers will be negotiated separately between the lawyers and Canada, and will be subject to court approval. The amount will have no impact on your ability to get money under the Settlement.

More details on the legal fees that will be requested will be posted here after the negotiations have concluded.

ORDONNANCE

VU LA REQUÊTE déposée par les demandeurs, entendue lors d'une séance spéciale de la Cour le 22 juin 2022, en vue d'obtenir une ordonnance approuvant la version abrégée et la version détaillée de l'avis d'audience de certification et de règlement, ainsi que le formulaire de retrait;

ET VU le dossier de requête des demandeurs, ainsi que les observations formulées par les avocats des parties lors de l'audition de la requête;

ET VU que le défendeur consent à la mesure de redressement demandée;

LA COUR ORDONNE :

1. La version abrégée de l'avis d'audience de certification et de règlement, la version détaillée de l'avis d'audience de certification et de règlement ainsi que le formulaire de retrait essentiellement sous les formes ci-jointes respectivement en tant qu'annexes « A », « B » et « C » sont approuvées, sous réserve du droit des parties d'apporter des modifications non importantes selon ce qui est nécessaire ou souhaitable, et sous réserve de la traduction de la version abrégée de l'avis d'audience de certification et de règlement, de la version détaillée de l'avis d'audience de certification et de règlement ainsi que du formulaire de retrait en cri, en ojibwé, en déné et en mi'kmaq avant la publication, tel que les parties en auront convenu.

2. Les personnes qui souhaitent se retirer du recours collectif dans les dossiers de la Cour numéros T-402-19 et T-141-20 ou du recours collectif dans le dossier de la Cour numéro T-1120-21 doivent, pour ce faire, envoyer à l'administrateur des réclamations le formulaire de retrait au plus tard à la date limite de retrait, le cachet de la poste faisant foi, ou se retirer en ligne en utilisant le document de retrait qui se trouve sur le site Web du recours collectif, à l'adresse http://www.fnchildcompensation.ca/?lang=fr. Le délai de retrait doit être de six mois à compter de la date à laquelle les avis sont publiés.

3. Lorsque le cachet de la poste n'est pas visible ou est illisible, on considérera que la demande de retrait a été postée quatre (4) jours ouvrables avant la date à laquelle elle a été reçue par l'administrateur des réclamations.

4. Le choix de se retirer, qu'il soit formulé sur papier ou en ligne, doit être signé par la personne concernée ou par son délégué et doit inclure les renseignements suivants, tel qu'il est indiqué à l'annexe C de la présente ordonnance :

    a. le nom complet de la personne, son adresse actuelle, son numéro de téléphone, ainsi que son numéro au registre des Indiens ou son numéro d'attestation du statut autochtone (le cas échéant);

    b. la déclaration approuvée indiquant que la personne souhaite se retirer du recours collectif et qu'elle comprend que ce retrait fera en sorte qu'elle ne recevra pas de paiement dans le cadre du recours collectif;

    c. la raison pour laquelle la personne souhaite se retirer du recours collectif.

5. Tout membre du recours collectif qui se retire de l'instance n'aura plus le droit de participer à l'instance ni d'obtenir une part des fonds reçus à la suite d'un jugement ou d'un règlement dans l'instance.

6. Dans les trente (30) jours suivant la date limite de retrait, l'administrateur des réclamations doit remettre aux avocats du groupe et au défendeur un rapport contenant les noms de toutes les personnes qui se sont retirées de l'instance à temps et de façon valide, ainsi qu'un résumé des renseignements fournis par ces personnes conformément au paragraphe 4 ci-dessus.

7. Toute personne qui exerce le droit de retrait au nom d'une personne qui n'a pas atteint l'âge applicable de la majorité ou qui, pour une autre raison, n'a pas la

capacité juridique d'exercer elle-même le droit de retrait doit demander l'approbation de la Cour; dans ces cas, le retrait ne sera valide qu'avec l'approbation de la Cour. La procédure d'obtention de l'approbation de la Cour fera l'objet d'une autre ordonnance de la Cour.

8. Le programme de notification et la désignation de l'administrateur des réclamations feront l'objet d'une autre ordonnance de la Cour.

ANNEXE A

Avis d'autorisation et d'approbation du règlement (forme courte)

Action collective relative à la protection de l'enfance au niveau fédéral et au principe de Jordan

La Cour fédérale du Canada a approuvé cet avis.

Les demandeurs et le gouvernement du Canada (« **Canada** ») ont conclu un règlement de 20 milliards de dollars pour cette action collective intentée au nom des enfants des Premières Nations et de certains membres de leur famille. Si vous êtes admissible, vous pourriez avoir droit à un paiement en vertu de ce règlement.

Cet avis fournit des informations sur l'action collective et son règlement. Des informations plus détaillées sont disponibles en ligne ici. Vous pouvez également vous inscrire pour recevoir des mises à jour sur le processus d'indemnisation à ce même lien.

Cet avis vous donne également la possibilité de vous retirer (vous exclure) de l'action collective. Vous devez vous retirer de l'action collective uniquement si vous ne voulez pas recevoir de paiement dans le cadre de ce Règlement ni être lié par lui.

Si vous voulez rester dans l'action collective et être admissible à soumettre une demande de paiement dans ce règlement, vous n'avez rien à faire maintenant.

Si vous souhaitez obtenir de l'aide pour mieux comprendre cet avis, vous trouverez les coordonnées pour le faire ci-dessous. Vous pouvez prendre rendez-vous pour un appel avec une personne qui vous l'expliquera et répondra à vos questions.

Sur quoi porte cette action collective ?

Cette action collective allègue que, du 1er avril 1991 au 31 mars 2022, Canada a fait preuve de discrimination envers les enfants des Premières Nations vivant dans une réserve ou au Yukon qui ont été retirés de leur foyer par les agences de protection de l'enfance opérant dans les collectivités des Premières Nations et placés à l'extérieur de leur foyer.

L'action collective allègue également qu'entre 1991 et le 2 novembre 2017, Canada n'a pas fourni (ou a tardé à fournir) des services essentiels aux enfants des Premières Nations qui en avaient un besoin confirmé. Ce traitement était discriminatoire envers les enfants et enfreignait une règle juridique connue sous le nom de « principe de Jordan ».

Êtes-vous inclus(e) dans l'action collective ?

En général, vous êtes inclus(e) dans l'action collective si vous faites partie de l'un des groupes suivants :

> **1re catégorie :** Enfants des Premières Nations vivant dans une réserve ou au Yukon qui ont été retirés de leur foyer par les agences de protection de l'enfance opérant dans les

collectivités des Premières Nations et placés dans une agence, un foyer d'accueil ou un foyer de groupe à tout moment entre le 1er avril 1991 et le 31 mars 2022. Ce groupe comprend également les enfants des Premières Nations qui ne vivaient pas dans une réserve, mais dont l'un des parents résidait habituellement dans une réserve au moment de leur retrait.

2e catégorie : Enfants des Premières Nations (vivant dans une réserve et hors d'une réserve) dont il a été confirmé qu'ils avaient besoin d'un service essentiel, mais qui ont été confrontés à un retard, un refus ou un manque dans la réception de ce service essentiel entre le 1er avril 1991 et le 2 novembre 2017.

3e catégorie : Les parents, grands-parents ou frères et sœurs de l'une des personnes susmentionnées.

Vous trouverez plus de détails sur les personnes concernées par l'action collective ici.

Quel est le règlement proposé ?

Les demandeurs et Canada ont convenu d'un règlement qui exige que Canada verse 20 milliards de dollars en compensation. Le règlement doit être approuvé par le tribunal avant d'entrer en vigueur.

Si le règlement est approuvé par le tribunal, chaque enfant retiré décrit dans la 1re catégorie peut recevoir 40 000 dollars ou plus en compensation, selon le nombre de personnes dont la demande de compensation est approuvée. Les parents ou les grands-parents qui s'occupaient d'une personne de la 1re catégorie au moment de son retrait du foyer peuvent également avoir droit à une indemnité de 40 000 dollars ou à un maximum de 60 000 dollars dans le cas de plusieurs enfants retirés. Les frères et sœurs d'un enfant retiré n'auront droit à aucun paiement au titre du règlement.

Chaque personne appartenant à la 2e catégorie qui :

(a) n'a pas eu accès à un service essentiel en temps voulu, ou a été privé d'un service essentiel dont il a été confirmé qu'elle avait besoin entre le 12 décembre 2007 et le 2 novembre 2017 (en vertu du principe de Jordan) a droit à une indemnisation. Les personnes qui ont subi un impact important à cause de cela peuvent recevoir 40 000 $ ou plus. Les autres peuvent recevoir moins de 40 000 $ et jusqu'à 40 000 $, en fonction du nombre de demandeurs approuvés. Les montants réels que chaque demandeur recevra ne pourront être déterminés qu'à une date ultérieure, lorsque le nombre de personnes présentant une demande sera connu.

OU

(b) n'a pas eu accès en temps voulu à un service essentiel, ou a subi un refus ou un manque dans la réception d'un service essentiel dont il a été confirmé qu'elle avait besoin entre le 1er avril 1991 et le 11 décembre 2007, a droit à une indemnisation. Les personnes qui ont subi un préjudice important de ce fait peuvent recevoir 20 000 $ ou plus. Les autres peuvent recevoir moins de 20 000 $ et jusqu'à 20 000 $, selon le nombre de demandeurs approuvés.

Les montants réels que chaque demandeur recevra ne pourront être déterminés qu'à une date ultérieure, lorsque le nombre de personnes présentant une demande sera connu.

Le(s) parent(s) ou grand-parent(s) qui s'occupaient des personnes de la 2e catégorie qui ont subi les préjudices les plus graves peuvent également avoir droit à une indemnisation au titre de la 3e catégorie.

Un fonds de 50 millions de dollars sera également créé pour aider les enfants et les familles des Premières Nations touchés par la discrimination du Canada.

Quelles sont mes options ?

1. **Rester dans l'action collective :** Si vous souhaitez rester dans le groupe et être admissible à soumettre une demande de paiement en vertu du règlement, vous n'avez rien à faire pour le moment.

2. **Vous retirer de l'action collective (exclusion) :** Si vous ne voulez pas participer à cette action collective, et si vous ne voulez pas recevoir un paiement dans le cadre du règlement, vous devez vous retirer (vous exclure) en soumettant un formulaire d'exclusion avant le : _____.

   Si vous soumettez le formulaire d'exclusion, vous ne recevrez pas d'indemnisation dans le cadre du règlement.

   Pour vous retirer de l'action en justice, veuillez visiter le [URL] pour remplir et soumettre un formulaire d'exclusion en ligne, ou envoyer une copie imprimée du formulaire d'exclusion à [ADRESSE] en demandant à être retiré(e) de cette action collective. Vous pouvez également recevoir une copie du formulaire d'exclusion de l'administrateur en composant le [1 800 NUMÉRO].

   La date limite pour soumettre le formulaire d'exclusion et vous retirer de l'action collective est le : **[DATE]**.

Que se passe-t-il si je veux m'opposer au règlement ou soumettre un commentaire à son sujet ?

La Cour fédérale tiendra une audience pour déterminer si elle approuve le règlement de 20 milliards de dollars et les honoraires des avocats. Il est prévu que l'audience ait lieu **du 19 au 23 septembre 2022** à Ottawa, mais il est possible que cette date change. Si la date change, une nouvelle date sera affichée ici. Inscrivez-vous ici pour recevoir un avis par courriel de tout changement de date et/ou de lieu de l'audience.

L'audience aura lieu en personne et sera diffusée en ligne. Les détails de l'audience seront publiés ici.

Vous n'êtes pas tenu(e) d'assister à l'audience ni de formuler des commentaires sur le règlement pour pouvoir bénéficier d'une indemnisation.

Si vous voulez vous opposer au règlement ou faire des commentaires sur le règlement ou les honoraires d'avocats qui seront demandés, vous avez deux options :

1. **Vous opposer ou soumettre vos commentaires par écrit :** Vous pouvez envoyer vos commentaires à _____. Vos commentaires seront envoyés à la Cour fédérale avant l'audience.

2. **Vous opposer en personne :** Demandez à parler au tribunal du règlement proposé ou des honoraires des avocats entre le 19 et le 23 septembre 2022, soit en personne à la Cour fédérale à Ottawa, soit par vidéoconférence.

Si vous souhaitez vous opposer, vous devez envoyer vos commentaires écrits ou demander de prendre la parole lors de l'audience au plus tard le **12 septembre 2022**.

Décision du Tribunal canadien des droits de la personne

Le règlement de l'action doit également être examiné par le Tribunal canadien des droits de la personne (le Tribunal). Une audience devant le Tribunal devrait avoir lieu en juin ou juillet 2022.

Il sera demandé au Tribunal de rendre une décision selon laquelle le règlement de 20 milliards de dollars de l'action collective satisfait à son ordonnance de compensation antérieure contre le Canada (2019 TCDP 39). Si le Tribunal conclut que le règlement de 20 milliards de dollars satisfait à son ordonnance de compensation contre Canada, alors le règlement de 20 milliards de dollars remplacera l'ordonnance de compensation, et vous ne pourrez pas demander un paiement en vertu de l'ordonnance du Tribunal. De plus, si le Tribunal conclut que le règlement de 20 milliards de dollars de cette poursuite satisfait à son ordonnance d'indemnisation, et si la Cour fédérale approuve le règlement, vous ne pourrez pas demander d'indemnisation en vertu de l'ordonnance d'indemnisation du Tribunal, même si vous vous retirez de cette poursuite.

Si le Tribunal ne conclut pas que le règlement satisfait à son ordonnance d'indemnisation, le règlement prendra fin et l'audience de septembre devant la Cour fédérale n'aura pas lieu. Si cela se produit, vous recevrez un autre avis.

Il est possible que certaines personnes qui ont droit à un paiement en vertu de l'ordonnance d'indemnisation du Tribunal, en particulier les personnes de la 3e catégorie ci-dessus, ne reçoivent pas d'indemnisation directe en vertu du règlement de l'action collective, ou qu'elles reçoivent moins d'argent que ce à quoi elles auraient droit en vertu de l'ordonnance d'indemnisation du Tribunal.

Y a-t-il des conséquences négatives à rester dans l'action collective ?

En demeurant dans l'action collective, vous serez admissible à soumettre une demande d'indemnisation. Cependant, en restant dans l'action collective, vous ne pourrez plus poursuivre Canada. Vous pouvez toujours poursuivre une agence, un foyer d'accueil ou un foyer de groupe. Vous ne pourrez pas demander une indemnisation au Tribunal canadien des droits de la personne pour le même comportement discriminatoire qui fait l'objet de l'action collective.

Qui représente le groupe ?

Le groupe est représenté par les demandeurs suivants : Xavier Moushoom, Jeremy Meawasige (par son tuteur judiciaire, Jonavon Joseph Meawasige), Jonavon Joseph Meawasige, Ashley Dawn Louise Bach, Karen Osachoff, Melissa Walterson, Noah Buffalo-Jackson (par sa tutrice judiciaire, Carolyn Buffalo), Carolyn Buffalo, Dick Eugene Jackson et Zacheus Joseph Trout. L'Assemblée des Premières Nations est également un demandeur dans l'action collective.

Les demandeurs sont représentés par cinq cabinets d'avocats à travers le Canada : Sotos LLP, Kugler Kandestin LLP, Miller Titerle + Co., Nahwegahbow Corbiere et Fasken Martineau Dumoulin LLP.

Vous n'avez pas à payer les avocats, ou qui que ce soit d'autre, pour faire partie de cette action ou pour recevoir un paiement dans le cadre du règlement.

Comment les avocats seront-ils payés ?

Les avocats seront payés par Canada. Aucune somme versée aux avocats ne sera prélevée sur le règlement de 20 milliards de dollars ou sur tout paiement effectué aux membres du groupe.

Le montant que les avocats recevront sera négocié entre les avocats des demandeurs et Canada. S'ils s'entendent sur un montant d'honoraires, les avocats demanderont à la Cour d'approuver ce montant lors de l'audience actuellement prévue du 19 au 23 septembre 2022.

Plus de détails sur les honoraires juridiques qui seront demandés seront publiés ici après la conclusion des négociations.

INTRODUCTION

La Cour fédérale du Canada a approuvé cet avis.

Les demandeurs et le gouvernement du Canada (« **Canada** ») ont conclu un règlement de 20 milliards de dollars pour cette action collective intentée au nom des enfants des Premières Nations et de certains membres de leur famille. Si vous êtes admissible, vous pourriez avoir droit à un paiement en vertu de ce règlement.

Cet avis fournit des informations sur l'action collective et son règlement. Des informations plus détaillées sont disponibles en ligne ici. Vous pouvez également vous inscrire pour recevoir des mises à jour sur le processus d'indemnisation à ce même lien.

Cet avis vous donne également la possibilité de vous retirer (vous exclure) de l'action collective. **Vous devez vous retirer de l'action collective uniquement si vous ne voulez pas recevoir de paiement dans le cadre de ce règlement.**

Si vous voulez rester dans l'action collective et être admissible pour soumettre une demande de paiement dans ce règlement, vous n'avez rien à faire maintenant.

Si vous souhaitez obtenir de l'aide pour mieux comprendre cet avis, vous trouverez les coordonnées pour le faire ci-dessous. Vous pouvez prendre rendez-vous pour un appel avec une personne qui vous l'expliquera et répondra à vos questions.

L'ACTION COLLECTIVE

QU'EST-CE QU'UNE ACTION COLLECTIVE ?

Une action collective est une action en justice déposée par une personne ou plusieurs au nom d'un groupe de personnes.

SUR QUOI PORTE CETTE ACTION COLLECTIVE ?

Cette action collective porte sur la discrimination exercée par le gouvernement canadien à l'égard des enfants des Premières Nations en matière de protection de l'enfance, de soins de santé et d'autres services essentiels.

Cette action collective allègue que, de 1991 à 2022, Canada a fait preuve de discrimination envers les enfants des Premières Nations vivant dans une réserve qui ont été retirés de leur foyer et placés à l'extérieur de leur foyer.

L'action collective allègue également qu'entre 1991 et 2017, Canada n'a pas fourni (ou a tardé à fournir) des services essentiels aux enfants des Premières Nations qui en avaient un besoin confirmé. Ce traitement était discriminatoire envers les enfants et enfreignait une règle juridique connue sous le nom de « principe de Jordan ».

Au cours de l'hiver 2022, les négociations intensives entre les parties ont mené à un engagement du Canada à verser **20 milliards de dollars** aux victimes de discrimination pour régler l'action collective (le **Règlement**). L'objectif du Règlement est d'offrir un dédommagement aux survivants et à leurs familles en reconnaissance des préjudices qu'ils ont subis — tout en sachant qu'aucune somme d'argent ne peut compenser leur douleur et leur souffrance.

QUI EST INCLUS DANS L'ACTION COLLECTIVE ?

Trois (3) groupes peuvent recevoir un dédommagement en vertu du Règlement :

1re catégorie	Enfants des Premières Nations qui ont été retirés de leur foyer dans une réserve et placés entre le 1er avril 1991 et le 31 mars 2022.
2e catégorie	Enfants des Premières Nations qui se sont vu refuser des services essentiels ou ont reçu des services après un retard, entre le 1er avril 1991

et le 2 novembre 2017.

3e catégorie Leurs parents ou grands-parents qui s'occupaient d'eux.

1RE CATÉGORIE : ENFANTS RETIRÉS DE LEUR FOYER

En vertu du règlement, les enfants des Premières Nations vivant dans une réserve ou ceux dont au moins un parent vivait dans une réserve, ou qui vivaient au Yukon, et qui ont été placés entre le 1er avril 1991 et le 31 mars 2022 peuvent être en mesure de recevoir de l'argent. Pour en savoir plus sur les indemnités prévues par le règlement, cliquez ici.

Vous pouvez bénéficier d'un paiement si :

- Vous êtes membre des Premières Nations ;
- Vous viviez dans une réserve ou aviez eu au moins un parent vivant dans une réserve, ou au Yukon pendant votre enfance (sauf dans les Territoires du Nord-Ouest) ;
- Vous avez été placé en tant qu'enfant entre le 1er avril 1991 et le 31 mars 2022 ; et
- Votre placement a été financé par le Canada.

Couvert	Non couvert
Enfants des Premières Nations	Enfants n'appartenant pas aux Premières Nations
Enfants vivant dans une réserve ou ayant au moins un parent vivant dans une réserve, ou au Yukon	Enfants vivant hors réserve ou aux Territoires du Nord-Ouest
Enfants placés entre le 1er avril 1991 et le 31 mars 2022, y compris dans un ou des : • **Foyers d'accueil**	Enfants placés *avant* le 1er avril 1991, ou qui ont été placés dans un ou des : • Foyers familiaux non rémunérés

• **Foyers d'évaluation** • **Foyers d'accueil non familiaux** • **Foyers de parenté rémunérés** • **Foyers de groupe** • **Centres de traitement résidentiel** • **Autres**	• Foyers communautaires non rémunérés
Financement par le Canada	Financement par une province

Les enfants qui ont été retirés de leur foyer avant 1991 font l'objet d'autres actions collectives comme le règlement pour la « Rafle des années soixante ». Il s'agit d'actions collectives distinctes de celle-ci.

QUE SIGNIFIE « PREMIÈRES NATIONS » EN VERTU DU RÈGLEMENT RELATIF AUX ENFANTS RETIRÉS DE LEUR FOYER ?

Dans le cadre du règlement, le terme « Premières Nations » désigne les personnes autochtones qui :

(i) Sont enregistrés en vertu de la *Loi sur les Indiens ;*

(ii) Avaient le droit d'être enregistrés en vertu de la *Loi sur les Indiens* en date du 11 février 2022 ; ou

(iii) Satisfont aux exigences d'appartenance à la bande au moins à partir du 11 février 2022 (c'est-à-dire qu'elles étaient enregistrés sur la liste de la bande de leur collectivité).

JE SUIS MEMBRE D'UNE PREMIÈRE NATION, MAIS JE NE VIVAIS PAS DANS UNE RÉSERVE AU MOMENT OÙ J'AI ÉTÉ RETIRÉ DE MON FOYER. PUIS-JE QUAND MÊME RECEVOIR UNE INDEMNITÉ ?

Si l'un de vos parents ou les deux résidaient ordinairement dans une réserve lorsque vous avez été placé(e), vous pourriez avoir droit à une indemnité. Toutefois, si ni vous ni vos parents ne viviez dans une réserve, vous n'avez pas droit à une indemnité, à moins que Canada n'ait financé votre retrait en vertu d'un accord avec une province ou un territoire.

Répondez à ce questionnaire pour découvrir si vous faites partie de cette catégorie :

1. Êtes-vous membre des Premières Nations ?

☐ Oui ☐ Non

2. Viviez-vous dans une réserve ou aviez-vous au moins un parent vivant dans une réserve, ou au Yukon ? (N. B. Si vous viviez dans les Territoires du Nord-Ouest, sélectionnez « Non ».)

☐ Oui ☐ Non

4. Avez été placé(e) à tout moment entre le 1er avril 1991 et le 31 mars 2022 ?

☐ Oui ☐ Non

Si vous avez répondu « Oui » à toutes ces questions, vous pouvez avoir droit à un paiement. Contactez la ligne d'assistance de l'Assemblée des Premières Nations au [**contact**] pour en savoir plus.

2E CATÉGORIE : PRINCIPE DE JORDAN/TROUT

En vertu du Règlement, les enfants des Premières Nations qui n'ont pas reçu de services, se sont vu refuser des services essentiels ou ont reçu des services après un retard entre 1991 et 2017 peuvent avoir droit de recevoir de l'argent. Ce groupe est communément appelé la catégorie du « principe de Jordan », en l'honneur de Jordan River Anderson. (Bien que le principe de Jordan n'ait pas existé avant 2007, cette catégorie remonte au 1er avril 1991 sous le nom de Trout).

QU'EST-CE QUE LE « PRINCIPE DE JORDAN » ?

Le « principe de Jordan » est une règle juridique qui oblige le gouvernement à traiter les enfants des Premières Nations de la même manière que les autres enfants, et à ne pas les priver des services importants dont ils ont besoin. Le gouvernement doit faire passer les intérêts de l'enfant en premier, avant tout conflit de compétence ou de financement.

Ce principe a été nommé en l'honneur de Jordan River Anderson, qui n'a pas reçu les services dont il avait désespérément besoin parce que les gouvernements se disputaient pour savoir qui devait payer pour combler les besoins de Jordan. Le principe de Jordan vise à garantir que ce qui

est arrivé à Jordan n'arrive pas à d'autres enfants des Premières Nations.

Pour en savoir plus sur les indemnités prévues par le Règlement, cliquez ici.

Vous pouvez être admissible à un paiement si :

- Vous êtes membre des Premières Nations (que vous ayez vécu dans une réserve ou hors réserve, y compris au Yukon et dans les Territoires du Nord-Ouest) ;
- Vous aviez besoin de services essentiels entre le 1er avril 1991 et le 2 novembre 2017 ; et
- Vous avez demandé le service, mais l'accès à ce service vous a été refusé ou retardé, ou vous n'avez pas demandé le service, mais il y a eu un manque de service, en raison :
    1. D'un manque de financement
    2. D'un manque de juridiction
    3. D'une dispute juridictionnelle entre le Canada et le gouvernement provincial ou territorial
    4. D'autres motifs

Couvert	Non couvert
Enfants des Premières Nations	Enfants n'appartenant pas aux Premières Nations
Les enfants dont un professionnel compétent a confirmé qu'ils avaient besoin d'un service essentiel.	Les enfants qui avaient besoin d'un service non essentiel.
L'accès à ce service a été refusé ou retardé, ou il y a eu un manque de service.	L'accès à ce service a été refusé ou retardé.
À cause : • **D'un manque de financement** • **D'un manque de juridiction** • **D'une interruption de service**	Pour toute raison

• **D'une dispute juridictionnelle** • **D'autres motifs**	
Entre le 1er avril 1991 et le 2 novembre 2017.	Avant le 1er avril 1991 ou après le 2 novembre 2017.

QUE SIGNIFIE « PREMIÈRES NATIONS » EN VERTU DU RÈGLEMENT RELATIF AUX ENFANTS CONCERNÉS PAR LE PRINCIPE DE JORDAN ?

Dans le cadre du règlement, le terme « Premières Nations » désigne les personnes autochtones du Canada (y compris du Yukon et des Territoires du Nord-Ouest) qui :

(i) Sont enregistrés en vertu de la *Loi sur les Indiens* ;

(ii) Avaient le droit d'être enregistrés en vertu de la *Loi sur les Indiens* en date du 11 février 2022 ; ou

(iii) Étaient reconnues comme citoyennes ou membres de la bande d'une collectivité des Premières Nations au 11 février 2022, et ont vécu un retard, un refus ou un manque de service en ce qui concerne un service essentiel entre le 26 janvier 2016 et le 2 novembre 2017.

Répondez à ce questionnaire pour découvrir si vous faites partie de cette catégorie :

1. Êtes-vous membre des Premières Nations ?

☐ Oui ☐ Non

2. Un professionnel ayant une expertise pertinente a-t-il confirmé que vous aviez besoin d'un service essentiel entre le 1er avril 1991 et le 2 novembre 2017 ? (Pour plus d'informations sur la liste des services essentiels, cliquez ici).

☐ Oui ☐ Non

3. L'accès à ce service vous a-t-il été refusé, ou avez-vous subi un retard dans l'obtention de ce service ?

☐ Oui ☐ Non

4. Avez-vous été dans l'impossibilité d'obtenir ce service en raison d'un manque de service ?

☐ Oui ☐ Non

Si vous avez répondu « Oui » à ces questions, vous pouvez avoir droit à un paiement.

3E CATÉGORIE : FAMILLES

Les parents ou les grands-parents qui s'occupent des enfants qui ont été retirés de leur foyer ou qui se sont vu refuser l'accès à un service essentiel peuvent également être en mesure de recevoir une indemnisation. Il s'agit du ou des parents biologiques ou adoptifs, ou du ou des grands-parents de l'enfant. Les parents des foyers d'accueil ne sont pas inclus.

Couvert	Non couvert
Parent(s) biologique(s) s'occupant de l'enfant	Parent(s) de foyer d'accueil
Parent(s) adoptif(s) s'occupant de l'enfant	
Beau(x) parent(s)	
Grand-parent(s) biologique(s) s'occupant de l'enfant	
Grand-parent(s) adoptif(s) s'occupant de l'enfant	

Il est important de noter que seuls le(s) parent(s), le(s) grand(s) parent(s) qui s'occupaient de l'enfant au moment du retrait ont droit à une indemnisation — c'est-à-dire les personnes qui s'occupent principalement de l'enfant — jusqu'à un maximum de deux (2) personnes.

Les frères et sœurs et les autres membres de la famille des enfants concernés ne recevront pas de compensation directe dans le cadre de ce règlement.

LE RÈGLEMENT

SURVOL

En vertu du Règlement, Canada versera **20 milliards de dollars** aux membres du groupe. En outre, Canada s'est engagé à verser **20 milliards de dollars** supplémentaires pour financer une réforme à long terme visant à éliminer la discrimination systémique à l'égard des enfants des Premières Nations. Toutefois, cette promesse ne fait pas partie de ce règlement.

Le Règlement devra être approuvé par les tribunaux. S'il est approuvé par les tribunaux, les personnes relevant de la 1re catégorie, de la 2e catégorie ou de la 3e catégorie pourront être en mesure de recevoir une indemnisation.

Cette affaire est-elle différente de la décision d'indemnisation du Tribunal canadien des droits de la personne ordonnant au Canada de verser 40 000 dollars à chaque personne touchée ?

Le Règlement de l'action collective chevauche en partie la décision d'indemnisation du Tribunal. Il sera demandé au Tribunal de confirmer que ce Règlement satisfait à son ordonnance d'indemnisation. Si la Cour fédérale approuve alors le Règlement, celui-ci couvrira toutes les demandes d'indemnisation du Tribunal et de l'action collective. Vous ne devrez faire qu'une seule demande d'indemnisation.

QUEL EST LE MONTANT DE LA COMPENSATION QUE JE PEUX OBTENIR ?

Le montant que vous pouvez recevoir varie en fonction de différents facteurs. Chaque catégorie prévoit un paiement de base minimum estimé. En outre, vous pouvez être en mesure de recevoir des paiements supplémentaires si certains facteurs sont présents.

1RE CATÉGORIE : ENFANTS RETIRÉS DE LEUR FOYER

Paiement minimum

En vertu du Règlement, les personnes qui ont été retirées de leur foyer et placées dans des foyers d'accueil lorsqu'elles étaient enfants, entre le 1er avril 1991 et le 31 mars 2022, ont chacune droit

à un paiement minimum de **40 000 $**.

Paiements additionnels

Certaines personnes pourront également obtenir une indemnisation plus importante, en fonction de plusieurs facteurs. Il s'agit, par exemple, de :

- L'âge auquel vous avez été pris(e) en charge pour la première fois ;
- La durée totale de la prise en charge ;
- Si vous avez été retiré(e) de votre foyer en raison du manque d'accès à un service essentiel ;
- Si vous viviez dans une collectivité nordique ou éloignée ;
- Le nombre de fois où vous avez été pris(e) en charge ; et
- Le nombre de placements hors du foyer.

Ces facteurs visent à reconnaître le préjudice subi par chaque enfant, à la lumière de sa situation individuelle.

La disponibilité et le montant des paiements supplémentaires peuvent varier en fonction du nombre de demandes.

2E CATÉGORIE 2 : PRINCIPE DE JORDAN/TROUT

Paiement minimum

Le montant minimum disponible pour les membres de la 2e catégorie dépend *de la date* à laquelle le manque de service essentiel ou le refus ou le retard d'un service essentiel s'est produit :

Entre le 1er avril 1991 et le 11 décembre 2007	**jusqu'à 20 000 $ ou plus**
Entre le 12 décembre 2007 et le 2 novembre 2017	**jusqu'à 40 000 $ ou plus**

Le montant réel que chaque personne peut recevoir dépend de la gravité de l'impact sur l'enfant,

du nombre de demandeurs approuvés et de la disponibilité des fonds.

Paiements additionnels

Les personnes peuvent également être en mesure d'obtenir plus d'argent, dans certaines circonstances, si le refus ou le retard d'un service essentiel a eu un impact grave sur elles. Tout paiement supplémentaire dépendra de la gravité de l'impact, du nombre de demandeurs approuvés et de la disponibilité des fonds.

3E CATÉGORIE : FAMILLES

Les parents ou les grands-parents qui s'occupaient des enfants qui ont été retirés de leur foyer ou qui se sont vu refuser l'accès à un service essentiel peuvent également être en mesure de recevoir une indemnisation. Le montant auquel un aidant familial peut avoir droit dépend de la catégorie.

1re catégorie : Personnes s'occupant des enfants retirés de leur foyer	**40 000 $ par enfant** jusqu'à un maximum de **60 000 $**
2e catégorie : Personnes s'occupant d'enfants concernés par le principe de Jordan/Trout	Le montant n'est pas encore déterminé à l'heure actuelle. On s'attend à ce que les parents ou grands-parents s'occupant des enfants qui ont été les plus touchés reçoivent une compensation directe. Le montant que chaque aidant peut recevoir dépendra du nombre de demandeurs approuvés.

Les frères et sœurs et les autres membres de la famille des enfants concernés ne recevront pas de compensation directe dans le cadre de ce Règlement.

Pour savoir comment vous pouvez obtenir de l'argent, cliquez ici.

MON ARGENT SERA-T-IL ASSUJETTI À L'IMPÔT ?

Les sommes reçues dans le cadre du Règlement ne sont pas assujetties à l'impôt fédéral sur le revenu. En outre, Canada a accepté de collaborer avec les provinces et les territoires afin d'exempter ces montants des taxes provinciales ou d'autres déductions.

EXISTE-T-IL DE L'AIDE SUPPLÉMENTAIRE POUR LES ENFANTS ET LES FAMILLES ?

En plus de ce qui précède, un fonds fiduciaire de **50 millions de dollars** sera créé pour soutenir les enfants et les familles des Premières Nations de différentes manières. Cela comprend, par exemple :

- Des subventions pour faciliter les services basés sur la culture, la communauté et la guérison pour les membres du groupe et leurs enfants ;
- Du soutien aux enfants pris en charge ou ayant été pris en charge, y compris le financement de la réunification familiale et communautaire ;
- Du financement pour faciliter l'accès aux programmes, activités et soutiens culturels (p. ex. groupes de jeunes, cérémonies, langues, aînés et gardiens du savoir, mentors, activités de la terre, arts et loisirs culturels) ;
- Du soutien aux enfants qui quittent le système de soins (p. ex. logement sûr et accessible, aptitudes à la vie quotidienne et à l'autonomie, éducation financière, formation continue, soutien à la santé et au bien-être, etc.) ;
- La facilitation de la création d'une bourse d'études pour les membres du groupe du principe de Jordan et leurs enfants ; et
- La création d'un réseau national pour les enfants des Premières Nations pris en charge.

APPROBATION DU RÈGLEMENT

QUAND LE RÈGLEMENT SERA-T-IL APPROUVÉ ?

COUR FÉDÉRALE

La Cour tiendra une audience pour déterminer si elle approuve le Règlement. Cette audience aura

lieu à Ottawa **du 19 au 23 septembre 2022**. Les détails de l'audience seront affichés ici ainsi que les détails sur la façon d'assister à une audience virtuelle, si cela est offert.

Il est possible que cette date soit modifiée. Inscrivez-vous ici pour recevoir un avis par courriel de tout changement de l'heure et du lieu de l'audience.

TRIBUNAL CANADIEN DES DROITS DE LA PERSONNE

Le règlement doit également être examiné par le Tribunal canadien des droits de la personne. Une audience devant le Tribunal devrait avoir lieu avant l'audience à la Cour fédérale.

Lors de cette audience, il sera demandé au Tribunal de confirmer si le Règlement satisfait à son ordonnance de compensation antérieure contre le Canada (l'**Ordonnance de compensation**). Si c'est le cas, le Règlement remplacera l'ordonnance d'indemnisation. Cela signifie que les demandeurs devront demander une indemnisation en vertu du Règlement plutôt que de l'ordonnance d'indemnisation.

PUIS-JE COMMENTER LE RÈGLEMENT OU M'Y OPPOSER ?

Vous n'êtes pas obligé d'assister à l'audience pour fournir des commentaires sur le Règlement, mais vous pouvez le faire si vous le souhaitez.

Si vous voulez faire des commentaires ou vous opposer au Règlement, vous pouvez le faire de deux (2) façons :

> **Par écrit :** Vous pouvez transmettre vos commentaires par écrit à cette adresse : [insérer]. Vos commentaires seront envoyés à la Cour fédérale avant l'audience. Pour être pris en compte, tous les commentaires écrits doivent être reçus au plus tard le **12 septembre 2022**.
>
> **En personne :** Vous pouvez demander à parler au tribunal au sujet du Règlement entre le 19 et le 23 septembre 2022, en personne ou par vidéoconférence. Pour pouvoir apporter vos commentaires ou vous objecter au Règlement en personne, votre demande pour ce faire devra être reçue au plus tard le **12 septembre 2022**.

Vous aurez également l'occasion de commenter les honoraires des avocats qui ont travaillé sur

l'action collective. Pour plus d'informations sur les avocats et leurs honoraires, cliquez ici.

QUE SE PASSERA-T-IL UNE FOIS LE RÈGLEMENT APPROUVÉ ?

La participation au Règlement est volontaire. Vous pouvez décider si vous souhaitez participer et faire une demande de paiement. Voici les options qui s'offrent à vous :

1RE OPTION : RESTER DANS L'ACTION COLLECTIVE

Si vous souhaitez rester dans le groupe et soumettre une demande de paiement en vertu du Règlement, vous n'avez rien à faire pour le moment. Une fois que le Règlement sera approuvé par le tribunal, vous recevrez des informations sur la manière de présenter une demande.

Y A-T-IL DES CONSÉQUENCES NÉGATIVES À RESTER DANS L'ACTION COLLECTIVE ?

Le fait de rester dans l'action collective n'aura aucune incidence sur les aides gouvernementales que vous pouvez recevoir ou que vous pouvez être en droit de recevoir à l'avenir de la part d'un gouvernement.

En restant dans l'action collective, vous pouvez soumettre une demande de compensation en vertu du Règlement. Cependant, vous ne pourrez pas poursuivre le Canada à nouveau, ou faire une demande au Tribunal canadien des droits de la personne, concernant la même conduite discriminatoire.

Rien dans le Règlement ne vous empêche d'intenter une action en justice pour tout autre préjudice non inclus dans cette action collective, ou d'entamer une réclamation contre une province, un territoire ou une agence.

2E OPTION : VOUS RETIRER (VOUS EXCLURE) DE L'ACTION COLLECTIVE

Si vous ne voulez pas participer à l'action collective, vous pouvez demander d'être retiré de la poursuite. Vous pouvez vous exclure en remplissant un formulaire de retrait (d'exclusion) en ligne ou en envoyant une copie à cette adresse : [insérer]. **Si vous vous retirez de l'action collective, vous ne recevrez PAS de compensation dans le cadre de ce Règlement.**

Vous pouvez également contacter l'Administrateur du Règlement en appelant le

[1 800 NUMÉRO].

Le dernier jour pour vous retirer de l'action collective est le : **[date]**.

SI JE ME RETIRE DU RÈGLEMENT, PUIS-JE QUAND MÊME RECEVOIR DE L'ARGENT DE L'ORDONNANCE D'INDEMNISATION DU TRIBUNAL CANADIEN DES DROITS DE LA PERSONNE ?

Non. S'il est approuvé par le Tribunal canadien des droits de la personne, le Règlement remplacera complètement le processus de l'ordonnance d'indemnisation. Cela signifie que les demandeurs ne pourront demander de l'argent que par l'entremise du Règlement. Si vous vous retirez du Règlement, vous ne pourrez pas demander d'indemnisation pour cette conduite discriminatoire.

L'ÉQUIPE DE L'ACTION COLLECTIVE

QUI REPRÉSENTE LE GROUPE ?

VOS REPRÉSENTANTS DEMANDEURS

L'Assemblée des Premières Nations est un demandeur. L'action collective a été intentée par les personnes suivantes au nom des Premières Nations touchées à travers le Canada :

- Xavier Moushoom
- Jeremy Meawasige
- Jonavon Joseph Meawasige
- Ashley Dawn Louise Bach
- Karen Osachoff
- Melissa Walterson
- Noah Buffalo-Jackson
- Carolyn Buffalo
- Dick Eugene Jackson
- Zacheus Joseph Trout

Ce sont vos représentants demandeurs. Ils agissent en tant que représentants du groupe entier.

VOTRE ÉQUIPE JURIDIQUE

Le groupe est représenté par cinq (5) cabinets d'avocats à travers le Canada :

- Sotos LLP
- Kugler Kandestin LLP
- Miller Titerle + Co.
- Nahwegahbow Corbiere
- Fasken Martineau Dumoulin LLP

COMMENT LES AVOCATS SERONT-ILS PAYÉS ?

Vous n'avez pas à payer les avocats ni qui que ce soit d'autre, pour faire partie de cette action en justice ou pour recevoir un paiement dans le cadre du Règlement.

Les avocats seront payés par Canada, séparément du Règlement. Ces honoraires ne seront pas prélevés sur le Règlement ni sur les paiements qui seront versés aux membres du groupe. Les fonds du règlement (20 milliards de dollars) ont été mis de côté pour le groupe *uniquement*.

Le montant à payer aux avocats sera négocié séparément entre les avocats et Canada, et sera soumis à l'approbation du tribunal. Le montant n'aura aucune incidence sur votre capacité à obtenir de l'argent dans le cadre du Règlement.

De plus amples détails sur les honoraires d'avocat qui seront demandés seront affichés ici après la conclusion des négociations.

ASSEMBLY OF FIRST NATIONS and ZACHEUS JOSEPH TROUT

Plaintiffs

and

THE ATTORNEY GENERAL OF CANADA

Defendant

ORDER

UPON MOTION by the Plaintiffs, heard at a special sitting of the Court on August 8, 2022, for:

(a) An order approving the proposed notice plan for the distribution of the Notices of Certification and Settlement Approval Hearing, substantially in the form appended as Schedule "A" to the Notice of Motion [Notice Plan];

(b) An order that Canada pay the reasonable costs of giving notice in accordance with the Notice Plan;

(c) An order appointing Deloitte LLP as the administrator for notice, opt-out and the claims implementation in the proposed settlement in these class proceedings;

(d) An order that Canada pay the reasonable costs and disbursements of the administrator in accordance with the terms of the proposed settlement agreement, including subject to Canada's right to dispute the reasonableness of such costs and disbursements; and

(e) Such further and other relief as this Honourable Court may deem just and appropriate;

CONSIDERING the Plaintiffs' motion record and the submissions of counsel for the parties at the hearing of the motion;

AND CONSIDERING that the Defendant consents to the relief sought;

AND CONSIDERING that the Court is satisfied that the Notice Plan meets the requirements of Rules 334.32 and 334.34 and shall constitute good and sufficient service upon class members of the certification of these proceedings and of the Settlement Approval Hearing;

AND CONSIDERING that the provision of notice to class members of any approval of the Settlement Agreement will be the subject of a future notice plan to be submitted to the Court for approval;

AND CONSIDERING that the Court is satisfied that the balance of the relief sought should be granted;

THIS COURT ORDERS that:

1. The Notices of Certification and Settlement Approval Hearing shall be delivered in the manner set out in the Notice Plan attached hereto as Schedule "A" commencing immediately upon the issuance of this Order and continuing until the commencement of the Settlement Approval Hearing.

2. The Defendant shall pay the reasonable costs of giving notice in accordance with the Notice Plan, including the costs of translation of the notices.

3. In the event that the proposed settlement agreement is approved, the notice plan for the distribution of the notice of approval of the proposed settlement shall be the subject of a future order of this Court.

4. Deloitte LLP is hereby appointed as the Administrator in the proposed settlement of these class proceedings.

5. The Defendant shall pay the reasonable costs and disbursements of the Administrator in accordance with the terms of the proposed settlement agreement, including subject to the Defendant's right to dispute the reasonableness of such costs and disbursements.

6. The Administrator shall, within ninety days of the date of this Order, provide the parties with a detailed estimate of the anticipated costs in an illustrative budget based on expected claims/services for the administration during the first year of the administration including the anticipated costs of case setup, monthly

overhead, claim intake, claim processing, support centre and distribution and communication/noticing.

7. There shall be no costs of this motion.

"Mandy Aylen"
Judge

SCHEDULE "A"

NOTICE PLAN

(Certification and Settlement Approval Hearing)

First Nations Child and Family Services, Jordan's Principle and Trout Essential Services

I. BACKGROUND

A. Parties

The parties to this matter are as follows:

(a) Xavier Moushoom, Jeremy Meawasige by his litigation guardian, Jonavon Joseph Meawasige, and Jonavon Joseph Meawasige (together, the "**Moushoom Plaintiffs**");

(b) Assembly of First Nations ("**AFN**"), Ashley Dawn Louise Bach, Karen Osachoff, Melissa Walterson, Noah Buffalo-Jackson by his litigation guardian, Carolyn Buffalo, Carolyn Buffalo, and Dick Eugene Jackson also known as Richard Jackson (together, the "**AFN Plaintiffs**");

(c) AFN and Zacheus Joseph Trout (together, the "**Trout Plaintiffs**"), and;

(d) Her Majesty the Queen in Right of Canada ("**Canada**") (collectively, "**Parties**").

B. Background of the litigation

The Moushoom Plaintiffs commenced a Federal Court class action against Canada over the discriminatory provision of child and family services and essential services to First Nations dating back to April 1, 1991. The AFN Plaintiffs subsequently commenced a similar action in the Federal Court. The Moushoom Plaintiffs and AFN Plaintiffs later agreed to advance the matter jointly and cooperatively in the best interests of the class.

The Federal Court ordered the consolidation of the claims in July 2021 ("**Consolidated Action**"). The Federal Court also ordered the separate prosecution of the claims relating to delays, denials or gaps in the provision of essential services between 1991 and 2007, and therefore the Trout Plaintiffs commenced an action in July 2021 ("**Trout Action**", and together with the Consolidated Action, "**Actions**").

The Federal Court certified the Consolidated Action on November 26, 2021, and the Trout Action on February 11, 2022.

C. The Class

The Actions and the Final Settlement Agreement affect several groups of people (*i.e.*, the class) as follows: The Removed Child Class, The Removed Child Family Class, The Jordan's Principle Class, The Jordan's Principle Family Class, The Trout Child Class, and The Trout Family Class. These classes were defined in the certification orders.

II. FACTORS AFFECTING NOTICE DISSEMINATION

This plan is designed to notify the class members of certification and the settlement approval hearing in a trauma-informed and culturally sensitive manner, and to provide them with the opportunity to see, read, or hear the notice of certification and settlement approval hearing, understand their rights, and respond if they choose to.

The following factors inform the dissemination method needed to achieve an appropriate notice effort: class size, location of class members, the literacy and education level of class members, and the languages spoken by class members.

A. Targeted Groups

i. First Nations Composition of the Class

The Actions solely concern First Nations people amongst the Indigenous population (not Inuit or Métis).[1] Given the publicity that has surrounded these class proceedings and the overlapping proceedings before the Canadian Human Rights Tribunal, many class members are expected to be aware of the proceedings.

ii. Class Size

The class is primarily a subset of the First Nations population in Canada. The 2016 Census[2] shows that 977,235 individuals identified as being First Nations.[3] The more recent 2021 Census relating to First Nations people is expected to be released on September 21, 2022.[4] Relevant information that becomes available in the 2021 Census will form part of any ongoing notice dissemination at that time, and for the next phase of notice in this proposed settlement further particularized below.

The Parties retained experts to estimate the size of the Removed Child Class. They estimated the size of the Removed Child Class to be 115,000 based on historical data on First Nations children whose out of home care was funded by Indigenous Services Canada between April 1991 and March 2022. The number of Removed Child Family Class members is unknown. The Office of the Parliamentary Budget Officer has estimated that on average there may be 1.5 parents or grandparents per First Nations child.[5]

---

[1] With the exception of non-common law caregiving parents and caregiving grandparents, where a First Nations condition does not exist in the class definition and those class members may be from the general population or non-First Nations Indigenous persons.

[2] Statistics Canada. 2018. *Canada [Country]* (table). *Aboriginal Population Profile*. 2016 Census. Statistics Canada Catalogue no. 98-510-X2016001. Ottawa. Released July 18, 2018. http://www12.statcan.gc.ca/census-recensement/2016/dp-pd/abpopprof/index.cfm?Lang=E (accessed July 24, 2022).

[3] Statistics Canada. 2018. *Canada [Country]* (table). Aboriginal Population Profile. 2016 Census. Statistics Canada Catalogue no. 98-510-X2016001. Ottawa. Released July 18, 2018. http://www12.statcan.gc.ca/census-recensement/2016/dp-pd/abpopprof/index.cfm?Lang=E (accessed July 24, 2022).

[4] See Statistics Canada: https://www12.statcan.gc.ca/census-recensement/2021/ref/prodserv/release-diffusion-eng.cfm.

[5] Compensation for the delay and denial of services to First Nations children, February 23, 2021, page 7: <https://publications.gc.ca/collections/collection_2021/dpb-pbo/YN5-219-2021-eng.pdf>.

The information on the size of the Jordan's Principle Class and the Trout Child Class is far less precise because reliable data does not exist. One method of arriving at a rough estimate has been to extrapolate the number of individual service requests accepted under the current Jordan's Principle service delivery program to the past. An extrapolation of this form with a pre-COVID quarter of individual requests since Canada has been found to be compliant with Jordan's Principle yields an estimated Jordan's Principle Class size of between 58,385 and 69,728—with a conservatively high median class size estimate of 65,000 class members. On the same basis as above, the Trout Child Class can be roughly estimated at 104,000 for the period of 1991-2007, by the simple multiplication of the median Jordan's Principle Class size estimate by the longer time period of 1991-2007. The number of Jordan's Principle Family Class and Trout Family Class members is unknown.

iii. Place of Residence

Class members are located throughout Canada, on and off First Nations reserves, within First Nations communities including northern and remote communities, and within the non-Indigenous population. Those residing outside of a First Nation community are in rural and urban areas. A percentage of the class members are incarcerated or currently reside outside of Canada.

The 2016 census data reported that 334,385 First Nations people were living on reserves.[6] This compares to 642,845-First Nations people living outside reserves.[7]

Ontario, British Columbia and Alberta are home to the largest First Nations populations in Canada, although most of the First Nations population in Canada is generally concentrated in the prairie provinces and the West Coast. The following chart shows the First Nations population in Canada, by province/territory:[8]

Location	First Nations
Canada	977,235
Ontario	236,680
Quebec	92,655
British Columbia	172,520
Alberta	136,585
Manitoba	130,505
Saskatchewan	114,570
Nova Scotia	25,830
New Brunswick	17,575
Newfoundland and Labrador	28,375
Prince Edward Island	1,875
Northwest Territories	13,185
Nunavut	190
Yukon	6,690

The population reporting of First Nations identity is prevalent both in urban centres and northern and remote communities. Metropolitan areas, such as Toronto, Winnipeg, Edmonton and Vancouver contain large populations of First Nations who live outside reserves: The following chart shows the number of First Nations residents of some metropolitan areas:[9]

Metropolitan Area	Population of First Nations
Toronto	27,805
Ottawa-Gatineau	17,790

Halifax	7,955

iv. Anticipated Age of Class Members

Communications will be attentive to different experiences amongst class members to ensure awareness and understanding of all class members. The class members targeted for notice are mostly expected to be youths and young adults.

The experts retained by the Parties estimated that about 44,000 of the Removed Child Class were under the age of majority as of March 2022. Insofar as the Family of Removed Child Class members is concerned: parents and grandparents are expected to be almost exclusively adults. Siblings are expected to include both minors and adults. As such, the class is mostly young but includes several generations of First Nations: children, youth, parents, and grandparents.

The Jordan's Principle Class is likewise expected to include minors for a number of years given that the end date of that class affecting children is November 2, 2017. The Trout Child Class, which ended in 2007, is expected to consist almost entirely of adults. The age range of the

Jordan's Principle Family Class and the Trout Family Class is expected to be similar to the Removed Child Family Class.

In general terms, the 2016 Census showed a national trend toward a younger First Nations population. The following figure shows a breakdown of the age distribution. The age composition of the First Nations population in Canada is generally as follows:[10]

Age	First Nation Population
Total	977,230
0 to 24 years	456,530
25 to 34 years	136,920
35 to 44 years	116,625
45 to 54 years	117,945
55 to 64 years	87,135
65 years and over	62,075
65 to 74 years	43,610
75 years and over	18,460

v. Literacy and Education Level

Literacy and education levels are expected to vary widely amongst the class members. While a significant number of class members did not complete a high school diploma, some have received higher university education. This is further exacerbated by the wide age range of class members, which often interrelates with education levels.

Amongst the general population of First Nations people of 20 years or older, 196,305 individuals had not obtained a high school or equivalent level of education. Conversely, 603,305 individuals

[10] Statistics Canada, 2016 Census of Population, Statistics Canada Catalogue no. 98-400-X2016156. Ottawa. Released Date modified: June 19, 2019. (accessed July 24, 2022). https://www12.statcan.gc.ca/census-recensement/2016/dp-pd/abpopprof/details/page.cfm?Lang=E&Geo1=PR&Code1=01&Data=Count&SearchText=Canada&SearchType=Begins&B1=All&C1=All&SEX_ID=1&AGE_ID=1&RESGEO_ID=1

had obtained that level of education. In percentage terms, this represents 32% and 68% of the First Nations population, respectively.[11]

vi. Languages

The majority of First Nations people (826,295 individuals) have identified English or French as their mother tongue, while approximately 166,120 individuals have identified a First Nations language as their mother tongue.[12] These numbers represent approximately 83% of the First Nations population and 17% of the population, respectively. Those First Nations who identified an Indigenous language as a mother tongue were more likely to reside on reserve, at 74%.[13]

The Federal Court has ordered that the long-form notice, short-form notice and the opt-out form in this case be translated into four First Nations languages: Cree, Dene, Mi'kmaq, and Ojibway. These four languages were spoken as the mother tongue of the largest number of First Nations. Cree has the largest number of speakers, at 89,550, with Ojibway, Dene, and Mi'kmaq, following at 34,835, 9,950, and 7,010, respectively.[14]

III. NOTICE OF CERTIFICATION AND SETTLEMENT APPROVAL HEARING

A. The two phases of notice in the settlement, and the focus of this notice plan

[11] Statistics Canada. 2018. Canada [Country] (table). Aboriginal Population Profile. 2016 Census. Statistics Canada Catalogue no. 98-510-X2016001. Ottawa. Released July 18, 2018. [14] Statistics Canada. 2018. Canada [Country] (table). Aboriginal Population Profile. 2016 Census. Statistics Canada Catalogue no. 98-510-X2016001. Ottawa. Released July 18, 2018. (accessed July 26, 2022); Statistics Canada. 2018. Canada [Country] (table). Aboriginal Population Profile. 2016 Census. Statistics Canada Catalogue no. 98-510-X2016001. Ottawa. Released July 18, 2018. (accessed July 26, 2022).

The Parties anticipate that notice will be given to the class members in two phases. **This plan only deals with the first phase of notice distribution**, further described below, while the distribution of notice regarding the process to claim compensation will be subject to a further plan specific to that purpose and subject to judicial approval at a future date. The two phases of notice are as follows:

(a) **Phase I**: This phase, which is the subject of this notice plan, disseminates the notices already approved by the Court. The approved notices adopt a trauma-informed, culturally and age-appropriate method of communication. They announce that the Actions have been certified pursuant to the Federal Court's certification orders. The notices advise class members of their legal rights as a result of certification, including the binding nature of the Actions on all class members who do not opt out of the settlement. Further, the notices advise of the procedures and deadlines whereby those who wish to opt-out of the settlement may do so. This phase also describes the proposed Final Settlement Agreement, the dates and location for the settlement approval hearing, where and how to access information about the settlement, as well as providing information on how to object, if desired. The Parties expect many class members to already be aware of the Actions and the proposed settlement, and for class members to have significant interest in the settlement approval hearing.

(b) **Phase II**: This phase will be the subject of a further notice plan and includes a more extensive notice plan that is in effect for a longer period. Notice in the second phase announces the approval of the settlement by the Federal Court

and outlines the settlement and its benefits. It also provides information on how to access the claims process. Given that there are multiple distinct classes, this phase will provide instructions and direct class members to dedicated support to assist in clarifying eligibility, filling out claim forms, and obtaining supporting documentation. The Phase II notice plan will be presented to the Court at a later date.

B. Phase I Notice Plan

i. Notice of Certification

In its order certifying the Consolidated Action on November 26, 2021, the Court stated: "The form of notice of certification, the manner of giving notice and all other related matters shall be determined by separate order(s) of the Court." The Federal Court's certification order in the Trout Action dated February 11, 2022 was to the same effect.

The Federal Court approved the short-form and long-form notice of certification and settlement approval hearing on June 24, 2022. This included a short-form notice, a long-form notice, and an opt-out form. The Federal Court's June 24, 2022 order and its schedules is enclosed as **Schedule "A"** to this notice plan.

In this phase of notice, class members are advised that the Federal Court has certified the Actions. The dissemination of this notice triggers the opt-out period and the opt-out right of the class members. The short-form notice and the long-form notice approved by the Federal Court provide accessible information to class members about their options, the implications of opting out of the Actions, and how they can opt out should they choose to.

Any class member who wishes to be excluded from the Actions needs to complete the opt-out form approved by the Federal Court on June 24, 2022 and submit the completed opt-out form to the administrator before the expiry of the six-month deadline from the date on which notice is disseminated to the class pursuant to this notice plan.

Class members who have already commenced a proceeding that raises the common questions of law or fact set out in the certification orders are excluded from the Actions and cannot benefit from the Final Settlement Agreement if those class members do not discontinue such individual proceedings before the opt-out deadline. Class members who do not opt out of the Actions will be bound by the results achieved in the Actions, including the terms of the Final Settlement Agreement if approved by the Federal Court.[15]

ii. Notice of Settlement Approval Hearing

The notices advise of the date that the court has set for the settlement approval hearing and provide specific information about the hearing in order to allow class members to attend in person, participate, or to file objections to the settlement in advance. In this case, class members will have virtual attendance options in order to maximize opportunity for class members across the country to participate in the settlement approval process.

Class members who wish to object to the settlement must send their written objections to the administrator so that the comments can be compiled and sent to the Federal Court in advance of the hearing. The Federal Court can only approve or deny the Final Settlement Agreement and cannot change the terms of the Final Settlement Agreement.

[15] Rule 344.21 of the *Federal Courts Rules*, SOR/98-106.

IV. NOTICE PLAN DELIVERY

The approved short-form and long-form notices direct class members to the extensive mental health and wellness supports that the Parties have negotiated as part of the Final Settlement Agreement. Those supports are summarized in "Schedule C: Framework for Supports for Claimants in Compensation Process" to the Final Settlement Agreement, which is enclosed hereto as **Schedule "B"**.

Given the vulnerability of many class members, notice must take into account that concepts such as opt-out may not be easily understandable to some class members and a real risk exists that such class members think they need to opt out in order to receive compensation under the Final Settlement Agreement. Therefore, the approved notices seek to explain the implications of opting out and the approval of the Final Settlement Agreement clearly and in plain language.

The distribution of notice in this phase is expected to start immediately upon approval by the Federal Court of this notice plan and the appointment of the proposed administrator, both of which are necessary in order to disseminate notice to the class.

The proposed method of disseminating Phase I notice includes four approaches described below. These approaches will enable Phase I notice to reach class members for the purposes of certification and settlement approval.

The notice plan for Phase II will be developed and submitted to the Court for approval at a later date.

A. Direct Communication with Class Members

During the course of this litigation, class counsel have maintained a website dedicated to this case where class members can obtain information, learn how to contact class counsel and register for updates. This website is: https://www.sotosclassactions.com/cases/first-nations-youth/. The

AFN has also created a website where class members can obtain information and register for updates: http://www.fnchildcompensation.ca/.

Through these websites, thousands of interested class members and organizations assisting class members have signed up for updates. The information provided includes name, email address, phone number (optional) and mailing address (optional). Further, when class members contact class counsel by phone and do not have an email, their information and mailing address is recorded and entered into the database.

This information enables direct communication with such class members by email or regular mail, where no email exists. This direct communication will include the short-form and long-form notice of certification and settlement approval under this notice plan.

Further, class counsel and the AFN have travelled and established communication channels with First Nations child and family service providers and First Nations leadership across Canada. Class counsel have presented on the Actions before First Nations child and family stakeholders in British Columbia and Quebec and attended related gatherings in Saskatchewan. The AFN consulted with First Nations leadership to provide updates of the status on the negotiations, the structure of the settlement, and the substance of the Final Settlement Agreement at approximately 50 such briefings across the country. Further meetings and presentations are planned and invitations to provide information sessions across communities are always welcomed.

B. Dissemination by the Assembly of First Nations

The AFN is a national advocacy organization that works to advance the collective aspirations of First Nations individuals and communities across Canada on matters of national or international nature and concern. The AFN hosts two Assemblies a year where mandates and directives for the

organization are established through resolutions directed and supported by elected Chiefs or proxies from member First Nations across Canada.

The AFN is guided by an Executive Committee consisting of an elected National Chief and Regional Chiefs from each province and territory. Representatives from five national councils (Knowledge Keepers, Youth, Veterans, 2SLGBTQQIA+ and Women) support and guide the decisions of the Executive Committee.

The AFN is thus connected to 634 First Nation communities in the country and will circulate the short-form notice and long-form notice to class members through those communications channels.

C. Dissemination through Social Media

Given that the targeted population is generally younger, the notices will be disseminated through targeted advertising on social media, including Facebook and Instagram. These media enable the selection of criteria that ensure that the notices are brought to the attention of individuals and organizations with an interest in the subject matter of this litigation through an efficient, relevant, and trauma-informed process.

Given that internet accessibility will vary across the regions and provinces, the use of social media will complement, where possible, the other dissemination approaches specified in this notice plan.

D. Circulation Through Indigenous Media

Notice will also be published in the following Indigenous newspapers/publications upon approval and may be repeated in some or all of these media during the opt-out period, which is six months from the date of dissemination of notice: First Nations Drum, The Windspeaker, Mi'kmaq Maliseet Nations News, APTN National News.

V. CONCLUSION

The notice plan for the Actions recognizes the scope and breadth of the class members, particularly in terms of age of the target, individual experiences, geographic distribution, language representation and familiarity with traditional and social media means of communication.

The notice plan seeks a proportionate, multi-faceted, culturally appropriate, relevant and trauma-informed approach to notice dissemination, backed by extensive mental health and wellbeing supports available to class members.

As ordered by the Federal Court, the notice plan is intended to commence at least one month prior to the settlement approval hearing date set by the court. As approved by the Federal Court, the notices provide sufficient information on certification and the Final Settlement Agreement in plain language so that class members understand how the Final Settlement Agreement may affect them. The approved notices also specify the terms upon which judicial approval is being sought, providing critical information on the settlement approval hearing itself in terms of logistics and class members' right to participate or file an objection to the proposed settlement.

ORDONNANCE

VU la requête présentée par les demandeurs, entendue lors d'une séance spéciale de la Cour le 8 août 2022, pour obtenir une ordonnance :

a) approuvant le plan de notification proposé pour la distribution des avis d'autorisation et d'audience d'approbation du règlement, essentiellement sous la forme jointe à titre d'annexe A de l'avis de requête [le plan de notification],

b) enjoignant au Canada de payer les coûts raisonnables de la distribution des avis conformément au plan de notification,

c) désignant Deloitte LLP administratrice pour l'avis, l'exclusion et la mise en œuvre des réclamations dans le règlement proposé pour le recours collectif,

d) enjoignant au Canada de payer les honoraires et les débours raisonnables de l'administratrice conformément aux modalités de l'accord de règlement proposé, sous réserve, notamment, du droit du Canada de contester le caractère raisonnable de ces honoraires et débours,

e) accordant toute autre mesure de réparation que la Cour estime juste et appropriée;

VU le dossier de requête des demandeurs et les observations faites par les avocats des parties lors de l'audition de la requête;

VU que le défendeur consent aux mesures de réparation demandées;

VU que la Cour est convaincue que le plan de notification répond aux exigences prévues aux articles 334.32 et 334.34 des *Règles des Cours fédérales* et qu'il constituera une signification valable et suffisante aux membres du groupe de l'autorisation du recours collectif et de l'audience d'approbation du règlement;

VU que la communication aux membres du groupe d'un avis d'approbation de l'accord de règlement fera l'objet d'un plan de notification ultérieur qui sera soumis à l'approbation de la Cour;

ET VU que la Cour est convaincue que les autres mesures de réparation demandées devraient être accordées;

LA COUR ORDONNE :

1. Les avis d'autorisation et d'audience d'approbation du règlement seront délivrés de la manière décrite dans le plan de notification joint aux présentes à titre d'annexe A à compter de la date de la présente ordonnance et jusqu'au début de l'audience d'approbation du règlement.

2. Le défendeur paiera les coûts raisonnables liés à la communication des avis conformément au plan de notification, y compris les coûts de traduction des avis.

3. Advenant que l'accord de règlement proposé soit approuvé, le plan de notification pour la communication de l'avis d'approbation du règlement proposé fera l'objet d'une ordonnance ultérieure de la Cour.

4. Deloitte LLP est par la présente désignée administratrice dans le cadre du règlement proposé du présent recours collectif.

5. Le défendeur doit payer les honoraires et débours raisonnables de l'administratrice conformément aux modalités de l'accord de règlement proposé, sous réserve, notamment, du droit du défendeur de contester le caractère raisonnable de ces honoraires et débours.

6. L'administratrice doit, dans les quatre-vingt-dix jours suivant la date de la présente ordonnance, fournir aux parties une estimation détaillée des coûts prévus dans un budget indicatif basé sur les réclamations et les services prévus pour l'administration au cours de la première année de son mandat à titre

d’administratrice, y compris les frais généraux mensuels et les coûts qu’elle prévoit engager pour l’établissement des dossiers, la réception des réclamations, le traitement des réclamations, le centre de soutien ainsi que la distribution, la communication et la notification.

7. Aucuns dépens ne sont adjugés en ce qui concerne la présente requête.

ANNEX « A »

PLAN DE NOTIFICATION

(Audience de certification et d'approbation du règlement)

Services à l'enfance et à la famille des Premières Nations, principe de Jordan et services essentiels Trout

I. CONTEXTE

A. Parties

Les parties à cette affaire sont les suivantes :

(a) Xavier Moushoom, Jeremy Meawasige (par son tuteur judiciaire, Jonavon Joseph Meawasige) et Jonavon Joseph Meawasige (ensemble, les « **demandeurs Moushoom** »)

(b) l'Assemblée des Premières Nations (« l'**APN** »), Ashley Dawn Louise Bach, Karen Osachoff, Melissa Walterson, Noah Buffalo-Jackson (par sa tutrice judiciaire, Carolyn Buffalo), Carolyn Buffalo, et Dick Eugene Jackson, aussi connu sous le nom de Richard Jackson (ensemble, les « **demandeurs de l'APN** ») ;

(c) l'APN et Zacheus Joseph Trout (ensemble, les « **demandeurs Trout** ») ; et

(d) Sa Majesté la Reine du chef du Canada (« **Canada** ») (collectivement, les « **Parties »)**.

B. Historique du litige

Les demandeurs Moushoom ont intenté une action collective devant la Cour fédérale contre le Canada au sujet de la prestation discriminatoire de services à l'enfance et à la famille et de services essentiels aux membres des Premières Nations depuis le 1er avril 1991. Les demandeurs de l'APN ont par la suite intenté une action similaire devant la Cour fédérale. Les demandeurs

Moushoom et les demandeurs de l'APN ont par la suite convenu de faire avancer l'affaire conjointement et en coopération dans le meilleur intérêt du groupe.

La Cour fédérale a ordonné la consolidation des demandes en juillet 2021 (l'« **Action consolidée** »). La Cour fédérale a également ordonné la poursuite séparée des réclamations relatives aux retards, aux refus ou aux lacunes dans la fourniture de services essentiels entre 1991 et 2007, et les demandeurs Trout ont donc intenté une action en juillet 2021 (l'« **Action Trout** » et, conjointement avec l'Action consolidée, les « **Actions** »).

La Cour fédérale a certifié l'Action consolidée le 26 novembre 2021 et l'Action Trout le 11 février 2022.

C. Le groupe

Les Actions et l'Entente de règlement final affectent plusieurs groupes de personnes (c'*est-à-dire* le groupe) comme suit : Le groupe des enfants retirés de leur famille, le groupe des familles des enfants retirés, le groupe du principe de Jordan, le groupe des familles du principe de Jordan, le groupe des enfants Trout et le groupe des familles Trout.

Ces groupes ont été définis dans les ordonnances de certification.

II. LES FACTEURS INFLUANT LA DIFFUSION DE L'AVIS

Le présent plan est conçu pour informer les membres du groupe de l'audience de certification et d'approbation du règlement d'une manière tenant compte des traumatismes et de la culture, et pour leur donner l'occasion de voir, de lire ou d'entendre l'avis de certification et d'audience d'approbation du règlement, de comprendre leurs droits et de répondre s'ils le souhaitent.

Les facteurs suivants ont une influence sur la méthode de diffusion nécessaire pour réaliser un effort de notification approprié : la taille du groupe, la localisation des membres du groupe, le

niveau d'alphabétisation et d'éducation des membres du groupe, et les langues parlées par les membres du groupe.

A. Groupes ciblés

i. Premières Nations — composition du groupe

Les Actions concernent uniquement les membres des Premières Nations parmi la population autochtone (pas les Inuits ni les Métis)[1]. Étant donné la publicité qui a entouré ces actions collectives et les procédures qui se chevauchent devant le Tribunal canadien des droits de la personne, on s'attend à ce que de nombreux membres du groupe soient au courant des procédures.

ii. Taille du groupe

Ce groupe constitue principalement un sous-ensemble de la population des Premières Nations au Canada. Le recensement de 2016[2] montre que 977 235 personnes se sont identifiées comme étant membres des Premières Nations[3].Le recensement de 2021, plus récent, concernant les Premières Nations, devrait être publié le 21 septembre 2022[4].Les informations pertinentes qui seront disponibles dans le cadre du recensement de 2021 feront partie de toute diffusion d'avis en cours

---

[1] À l'exception des parents et des grands-parents soignants qui ne relèvent pas de la common law, où la définition du groupe ne comporte pas de condition liée aux Premières Nations et où les membres du groupe peuvent appartenir à la population générale ou à des personnes autochtones qui ne sont pas membres des Premières Nations.

[3] Statistique Canada. 2018. *Canada [Pays]* (tableau). Profil de la population autochtone. Recensement de 2016. Numéro de catalogue de Statistique Canada. 98-510-X2016001. Ottawa. Publié le 18 juillet 2018. https://www12.statcan.gc.ca/census-recensement/2016/dp-pd/abpopprof/index.cfm?Lang=F (consulté le 24 juillet 2022).
https://www12.statcan.gc.ca/census-recensement/2016/dp-pd/abpopprof/index.cfm?Lang=F (accessed July 24, 2022).

[4] Voir Statistique Canada : https://www12.statcan.gc.ca/census-recensement/2021/ref/prodserv/release-diffusion-fra.cfm.

à ce moment-là, et pour la prochaine phase d'avis dans le cadre de cette proposition de règlement décrite plus en détail ci-dessous.

Les Parties ont retenu les services d'experts pour estimer la taille du groupe des enfants retirés. Ceux-ci ont estimé la taille du groupe des enfants retirés à 115 000, en se fondant sur les données historiques relatives aux enfants des Premières Nations dont les soins à l'extérieur du foyer ont été financés par les Services aux Autochtones du Canada entre avril 1991 et mars 2022. Le nombre de membres du groupe des familles d'enfants retirés est inconnu. Le Bureau du directeur parlementaire du budget a estimé qu'il y a en moyenne 1,5 parent ou grand-parent par enfant des Premières Nations[5].

Les informations sur la taille du groupe du Principe de Jordan et du groupe des enfants Trout sont beaucoup moins précises, car il n'existe pas de données fiables. Une méthode permettant d'obtenir une estimation approximative a consisté à extrapoler le nombre de demandes de service individuelles acceptées dans le cadre du programme actuel de prestation de services du principe de Jordan par rapport au passé. Une extrapolation de ce formulaire à partir d'un trimestre de demandes individuelles antérieures à la COVID depuis que le Canada a été jugé conforme au principe de Jordan donne une estimation de la taille du groupe du principe de Jordan se situant entre 58 385 et 69 728 — avec une estimation prudente de la taille médiane du groupe de 65 000 membres. Sur la même base que ci-dessus, le groupe des enfants Trout peut être estimé à 104 000 pour la période 1991-2007, par la simple multiplication de l'estimation de la taille médiane du groupe du principe de Jordan par la période plus longue de 1991-2007. On ne connaît pas le nombre de membres du groupe des familles du principe de Jordan et des familles Trout.

---

[5] Compensation pour le retard et le refus de services aux enfants des Premières Nations, 23 février 2021, page 7 : < https://publications.gc.ca/collections/collection_2021/dpb-pbo/YN5-219-2021-fra.pdf >.

iii. Lieu de résidence

Les membres du groupe se trouvent partout au Canada, dans les réserves des Premières Nations et à l'extérieur de celles-ci, au sein des collectivités des Premières Nations, y compris les collectivités nordiques et éloignées, et au sein de la population non autochtone. Ceux qui résident en dehors d'une collectivité des Premières Nations se trouvent dans des zones rurales et urbaines. Un pourcentage des membres du groupe est incarcéré ou réside actuellement à l'extérieur du Canada.

Les données du recensement de 2016 ont indiqué que 334 385 membres des Premières Nations vivaient dans des réserves[6].En comparaison, 642 845 membres des Premières Nations vivaient à l'extérieur des réserves[7].

L'Ontario, la Colombie-Britannique et l'Alberta abritent les plus grandes populations de membres des Premières Nations au Canada, bien que la majeure partie de la population des Premières Nations au Canada soit généralement concentrée dans les provinces des Prairies et sur la côte Ouest. Le tableau suivant montre la population des Premières Nations au Canada, par province/territoire[8] :

Emplacement	Premières Nations
Canada	977 235

La déclaration de l'identité autochtone est prévalente tant dans les centres urbains que dans les collectivités nordiques et éloignées. Les régions métropolitaines, telles que Toronto, Winnipeg, Edmonton et Vancouver, comptent d'importantes populations de membres des Premières Nations qui vivent à l'extérieur des réserves. Le tableau suivant indique le nombre de résidents des Premières Nations dans certaines régions métropolitaines[9].

Zone métropolitaine	**Nombre de membres des Premières Nations**
Toronto	27 805

iv. Âge prévu des membres du groupe

Les communications seront attentives aux différentes expériences des membres du groupe afin de garantir la sensibilisation et la compréhension de tous les membres du groupe. Les membres du groupe visés par la notification devraient être principalement des jeunes et des jeunes adultes. Les experts retenus par les parties ont estimé qu'environ 44 000 membres du groupe des enfants retirés étaient mineurs en mars 2022. En ce qui concerne la famille des membres du groupe des enfants retirés, les parents et les grands-parents devraient être presque exclusivement des adultes. Les frères et sœurs sont censés comprendre des mineurs et des adultes. Ainsi, le groupe est principalement jeune, mais comprend plusieurs générations de membres des Premières Nations : enfants, jeunes, parents et grands-parents.

On s'attend également à ce que le groupe du principe de Jordan comprenne des mineurs pendant un certain nombre d'années, étant donné que la date de fin de ce groupe touchant les enfants est le 2 novembre 2017. Le groupe des enfants Trout, qui a pris fin en 2007, devrait être composé presque entièrement d'adultes. La tranche d'âge du groupe des familles du principe de Jordan et du groupe des familles Trout devrait être similaire à celle du groupe des familles des enfants retirés.

De manière générale, le recensement de 2016 a montré une tendance nationale vers une population des Premières Nations plus jeune. La figure suivante présente une ventilation de la répartition par âge. La composition par âge de la population des Premières Nations au Canada est généralement la suivante[10] :

Âge	Membres des Premières Nations
Total	977 230
0 à 24 ans	456 530
25 à 34 ans	136 920
35 à 44 ans	116 625
45 à 54 ans	117 945
55 à 64 ans	87 135
65 ans et plus	62 075
65 à 74 ans	43 610
75 ans et plus	18 460

v. Niveau d'alphabétisation et d'éducation

Les niveaux d'alphabétisation et d'éducation devraient varier considérablement parmi les membres du groupe. Bien qu'un nombre important de membres du groupe n'aient pas obtenu de diplôme d'études secondaires, certains ont reçu une formation universitaire supérieure. Cette situation est exacerbée par le large éventail d'âges des membres du groupe, qui est souvent lié au niveau d'éducation.

Parmi la population générale des membres des Premières Nations âgés de 20 ans ou plus, 196 305 personnes n'avaient pas obtenu un diplôme d'études secondaires ou un niveau de scolarité équivalent. Inversement, 603 305 personnes avaient obtenu ce niveau de scolarité. En

[10] Statistique Canada, Recensement de la population de 2016, numéro de catalogue de Statistique Canada. 98-400-X2016156. Ottawa. Publié Date modifiée : 19 juin 2019. (consulté le 24 juillet 2022). https://www12.statcan.gc.ca/census-recensement/2016/dp-pd/abpopprof/details/page.cfm?Lang=F&Geo1=PR&Code1=01&Data=Count&SearchText=Canada&SearchType=Begins&B1=All&C1=All&SEX_ID=1&AGE_ID=1&RESGEO_ID=1

termes de pourcentage, cela représente 32 % et 68 % de la population des Premières Nations, respectivement[11].

vi. Langues

La majorité des membres des Premières Nations (826 295 personnes) ont identifié l'anglais ou le français comme leur langue maternelle, tandis qu'environ 166 120 personnes ont déclaré une langue des Premières Nations comme leur langue maternelle[12]. Ces chiffres représentent environ 83 % de la population des Premières Nations et 17 % de la population, respectivement. Les membres des Premières Nations qui ont indiqué une langue autochtone comme langue maternelle étaient plus susceptibles de résider dans une réserve, soit 74 %[13].

La Cour fédérale a ordonné que l'avis détaillé, l'avis abrégé et le formulaire de retrait dans cette affaire soient traduits dans quatre langues des Premières Nations : le cri, le déné, le mi'kmaq et l'ojibway. Ces quatre langues sont la langue maternelle du plus grand nombre de membres des Premières Nations. Le cri compte le plus grand nombre de locuteurs, soit 89 550, suivi de l'ojibway, du déné et du mi'kmaq, qui comptent respectivement 34 835, 9 950 et 7 010 locuteurs[14].

III. AVIS D'AUDIENCE DE CERTIFICATION ET D'APPROBATION DU RÈGLEMENT

A. Les deux phases de notification dans le règlement et l'objectif de ce plan de notification

Les Parties prévoient que l'avis sera donné aux membres du groupe en deux phases. Le **présent plan ne traite que de la première phase de distribution de l'avis**, décrite ci-dessous, tandis que la distribution de l'avis concernant le processus de demande d'indemnisation fera l'objet d'un autre plan spécifique à cette fin et soumis à l'approbation judiciaire à une date ultérieure. Les deux phases de la notification sont les suivantes :

(a) **Phase I :** Cette phase, qui fait l'objet du présent plan de notification, diffuse les notifications déjà approuvées par la Cour. Les notifications approuvées adoptent une méthode de communication tenant compte des traumatismes et adaptée à la culture et à l'âge. Ils annoncent que les actions ont été certifiées conformément aux ordonnances de certification de la Cour fédérale. Les avis informent les membres du groupe de leurs droits légaux résultant de la certification, y compris la nature contraignante des Actions pour tous les membres du groupe qui ne se retirent pas du règlement. De plus, les avis indiquent les procédures et les délais par lesquels ceux qui souhaitent se retirer du règlement peuvent le faire. Cette phase décrit également l'Entente de règlement final proposée, les dates et le lieu de l'audience d'approbation du règlement, où et comment accéder à l'information sur le règlement, et fournit des informations sur la façon de s'opposer, si désiré. Les Parties s'attendent à ce que de nombreux membres du groupe soient déjà au courant des Actions et du règlement proposé, et que les membres du groupe aient un intérêt marqué pour l'audience d'approbation du règlement.

(b) **Phase II :** Cette phase fera l'objet d'un autre plan de notification et comprendra un plan de notification plus étendu qui sera en vigueur pendant une période plus longue. La notification de la deuxième phase annonce l'approbation du règlement par la Cour fédérale et décrit le règlement et ses avantages. Il fournit également des informations sur la manière d'accéder au processus de réclamation. Étant donné qu'il y a plusieurs groupes distincts, cette phase fournira des instructions et dirigera les membres du groupe vers un support dédié pour les aider à clarifier leur admissibilité, à remplir les formulaires de réclamation et à obtenir les documents justificatifs. Le plan de notification de la phase II sera présenté à la Cour à une date ultérieure.

B. Plan de notification de la phase I

i. Avis de certification

Dans son ordonnance certifiant l'action consolidée le 26 novembre 2021, la Cour a déclaré : « La forme de l'avis d'autorisation, les modalités de l'avis ainsi que toutes les autres questions connexes seront déterminées par la Cour dans une ou des ordonnances distinctes. » L'ordonnance de certification de la Cour fédérale dans l'Action Trout, datée du 11 février 2022, va dans le même sens.

Le 24 juin 2022, la Cour fédérale a approuvé la version abrégée et la version longue de l'avis d'audience de certification et d'approbation du règlement. Il s'agissait d'un avis abrégé, d'un avis détaillé et d'un formulaire d'exclusion. L'ordonnance de la Cour fédérale du 24 juin 2022 et ses annexes sont jointes à l'**annexe A** du présent plan de notification.

Dans cette phase de notification, les membres du groupe sont informés que la Cour fédérale a certifié les Actions. La diffusion de cet avis déclenche la période d'exclusion et le droit

d'exclusion des membres du groupe. La notification abrégée et la notification détaillée approuvées par la Cour fédérale fournissent des informations accessibles aux membres du groupe sur leurs options, les implications de l'exclusion des Actions et la manière dont ils peuvent s'exclure s'ils le souhaitent.

Tout membre du groupe qui souhaite être exclu des Actions doit remplir le formulaire d'exclusion approuvé par la Cour fédérale le 24 juin 2022 et soumettre le formulaire d'exclusion rempli à l'administrateur avant l'expiration du délai de six mois à compter de la date de diffusion de l'avis au groupe conformément au présent plan d'avis.

Les membres du groupe qui ont déjà entamé une procédure qui soulève les questions communes de droit ou de fait énoncées dans les ordonnances de certification sont exclus des Actions et ne peuvent bénéficier de l'Entente de règlement final si ces membres du groupe ne se désistent pas de ces procédures individuelles avant la date limite d'exclusion. Les membres du groupe qui ne s'excluent pas des Actions seront liés par les résultats obtenus dans les Actions, y compris les termes de l'Entente de règlement final si celle-ci est approuvée par la Cour fédérale[15].

ii. Avis relatif à l'audience d'approbation du règlement

Les avis annoncent la date que le tribunal a fixée pour l'audience d'approbation du règlement et fournissent des informations précises sur l'audience afin de permettre aux membres du groupe d'assister en personne, de participer ou de déposer des objections au règlement à l'avance. Dans ce cas, les membres du groupe auront la possibilité d'assister virtuellement à l'audience afin de maximiser l'occasion pour les membres du groupe à travers le pays de participer au processus d'approbation du règlement.

[15] Règle 344.21 des *Règles des Cours fédérales*, DORS/98-106.

Les membres du groupe qui souhaitent s'opposer au règlement doivent envoyer leurs objections écrites à l'administrateur afin que les commentaires puissent être compilés et envoyés à la Cour fédérale avant l'audience. La Cour fédérale ne peut qu'approuver ou refuser l'Entente de règlement final et ne peut pas changer les modalités de l'Entente de règlement final.

IV. LIVRAISON DU PLAN DE NOTIFICATION

Les notifications abrégées et détaillées approuvées orientent les membres du groupe vers les mesures de soutien étendues en matière de santé mentale et de bien-être que les Parties ont négociées dans le cadre de l'Entente de règlement final. Ces soutiens sont résumés à l'Annexe C : « Cadre de soutien aux demandeurs dans le cadre du processus d'indemnisation » de l'Entente de règlement final, qui est jointe aux présentes en tant qu'**Annexe B**.

Étant donné la vulnérabilité de nombreux membres du groupe, la notification doit tenir compte du fait que des concepts tels que l'exclusion peuvent ne pas être facilement compréhensibles pour certains membres du groupe et qu'il existe un risque réel que ces membres du groupe pensent qu'ils doivent s'exclure afin de recevoir une compensation en vertu de l'Entente de règlement final. Par conséquent, les avis approuvés visent à expliquer les implications de l'option de refus et de l'approbation de l'Entente de règlement final de manière claire et en langage simple.

La diffusion de la notification dans cette phase devrait commencer immédiatement après l'approbation par la Cour fédérale de ce plan de notification et la nomination de l'administrateur proposé, qui sont tous deux nécessaires pour diffuser la notification au groupe.

La méthode proposée pour diffuser la notification de la phase I comprend quatre approches décrites ci-dessous. Ces approches permettront à la notification de la phase I d'atteindre les membres du groupe aux fins de la certification et de l'approbation du règlement.

Le plan de notification pour la phase II sera élaboré et soumis à la Cour pour approbation à une date ultérieure.

A. Communication directe avec les membres du groupe

Au cours de ce litige, les avocats du groupe ont maintenu un site Web consacré à cette affaire où les membres du groupe peuvent obtenir des informations, apprendre comment contacter les avocats du groupe et s'inscrire pour recevoir des mises à jour. Ce site est le suivant : https://www.sotosclassactions.com/cases/jeunes-des-premieres-nations/. L'APN a également créé un site Web où les membres du groupe peuvent obtenir des informations et s'inscrire pour recevoir des mises à jour : http://www.fnchildcompensation.ca/?lang=fr .

Grâce à ces sites Web, des milliers de membres du groupe intéressés et d'organisations aidant les membres du groupe se sont inscrits pour recevoir des mises à jour. Les informations fournies comprennent le nom, l'adresse électronique, le numéro de téléphone (facultatif) et l'adresse postale (facultatif). De plus, lorsque les membres du groupe contactent les avocats du groupe par téléphone et n'ont pas d'adresse électronique, leurs informations et leur adresse postale sont enregistrées et saisies dans la base de données.

Cette information permet de communiquer directement avec ces membres du groupe par courriel ou par courrier ordinaire, s'il n'existe pas de courriel. Cette communication directe comprendra la version abrégée et la version longue de l'avis de certification et d'approbation du règlement en vertu du présent plan de notification.

De plus, les avocats du groupe et l'APN ont voyagé et établi des voies de communication avec les fournisseurs de services à l'enfance et à la famille des Premières Nations et les dirigeants des Premières Nations partout au Canada. Les avocats du groupe ont fait des présentations sur les actions devant des intervenants en matière d'enfance et de famille des Premières Nations en

Colombie-Britannique et au Québec et ont participé à des rencontres connexes en Saskatchewan. L'APN a consulté les dirigeants des Premières Nations pour faire le point sur l'état des négociations, la structure du règlement et la teneur de l'Entente de règlement final lors d'une cinquantaine de séances d'information organisées dans tout le pays. D'autres réunions et présentations sont prévues et les invitations à tenir des séances d'information dans les collectivités sont toujours les bienvenues.

B. Diffusion par l'Assemblée des Premières Nations

L'APN est une organisation nationale de défense des intérêts qui s'efforce de faire avancer les aspirations collectives des individus et des collectivités des Premières Nations du Canada sur des questions de nature et de préoccupation nationales ou internationales. L'APN tient deux assemblées par an, au cours desquelles les mandats et les directives de l'organisation sont établis par l'entremise de résolutions dirigées et soutenues par les Chefs élus ou les mandataires des Premières Nations membres du Canada.

L'APN est dirigée par un Comité exécutif composé d'un Chef national élu et de Chefs régionaux de chaque province et territoire. Les représentants de cinq conseils nationaux (Gardiens du savoir, Jeunes, Anciens combattants, 2SLGBTQQIA+ et Femmes) soutiennent et orientent les décisions du Comité exécutif.

L'APN est ainsi reliée à 634 collectivités des Premières Nations dans le pays et fera circuler l'avis abrégé et l'avis détaillé aux membres du groupe par ces canaux de communication.

C. Diffusion par les médias sociaux

Étant donné que la population ciblée est généralement plus jeune, les avis seront diffusés par l'entremise de publicités ciblées sur les médias sociaux, notamment Facebook et Instagram. Ces médias permettent de sélectionner des critères qui garantissent que les avis sont portés à

l'attention des personnes et des organisations ayant un intérêt dans l'objet de ce litige par l'entremise d'un processus efficace, pertinent et tenant compte des traumatismes.

Étant donné que l'accessibilité à l'Internet variera selon les régions et les provinces, l'utilisation des médias sociaux complétera, dans la mesure du possible, les autres approches de diffusion précisées dans ce plan de notification.

D. Diffusion par l'entremise des médias autochtones

L'avis sera également publié dans les journaux/publications autochtones suivants après approbation et pourra être répété dans certains ou tous ces médias pendant la période d'exclusion, qui est de six mois à compter de la date de diffusion de l'avis : First Nations Drum, The Windspeaker, Mi'kmaq Maliseet Nations News, APTN National News.

V. CONCLUSION

Le plan de notification des Actions tient compte de la diversité des membres du groupe, notamment en termes d'âge, d'expérience individuelle, de répartition géographique, de représentation linguistique et de familiarité avec les moyens de communication traditionnels et les médias sociaux.

Le plan de notification vise une approche proportionnée, à multiples facettes, culturellement appropriée, pertinente et tenant compte des traumatismes pour la diffusion de la notification, appuyée par des soutiens étendus en matière de santé mentale et de bien-être disponibles pour les membres du groupe.

Comme l'a ordonné la Cour fédérale, le plan de notification est destiné à commencer au moins un mois avant la date de l'audience d'approbation du règlement fixée par la Cour. Tels qu'approuvés par la Cour fédérale, les avis fournissent suffisamment d'informations sur la certification et l'Entente de règlement final dans un langage clair et simple afin que les membres

du groupe comprennent comment l'Entente de règlement final peut les affecter. Les avis approuvés précisent également les conditions selon lesquelles l'approbation judiciaire est demandée, fournissant des informations essentielles sur l'audience d'approbation du règlement elle-même en termes de logistique et de droit des membres du groupe à participer ou à déposer une objection au règlement proposé.

This is Exhibit "O" referred to in the Affidavit of William Colish of the City of Montreal, in the Province of Quebec, affirmed before me at the City of Toronto, in the Province of Ontario on September 2, 2022, in accordance with O. Reg. 431/20, Administering Oath or Declaration Remotely.

(See Distribution List)

Dear Parties,

Re: First Nations Child and Family Caring Society et al. v. Attorney General of Canada
Tribunal File: T1340/7008

The Panel directs as follows:

The Panel is in receipt of the Federation of Sovereign Indigenous Nations' letter dated August 4, 2022 indicating their intent to make submissions seeking interested party status. The Panel is also in receipt of the Caring Society's letter and affidavit dated August 8, 2022.

Upon consideration of the recent procedural issues in this case and, in keeping with the principles of procedural fairness and expeditiousness and the parties' confirmation that they are all available on **August 15, 2022**, the Panel as Masters of its own house directs the following schedule:

> The Caring Society, the COO, the NAN and the Commission who wish to cross-examine affiants will send their cross-examinations questions for the affiants to the AFN, Canada and the Tribunal by **August 16, 2022 am EDT.** The Panel suggests that August 15, 2022 can be used to finalize the questions given that everyone is available on that date. Cross-examinations of affiants will be made in writing. AFN and Canada will respond no later than **August 23, 2022.**
>
> The Caring Society, the COO, the NAN and the Commission who wish to file and exchange affidavits will do so by **August 30, 2022.** The AFN and Canada will ask questions if any, by **September 2, 2022**.
>
> The responses to the AFN and Canada's questions can be provided alongside the Caring Society, the COO, the NAN and the Commission's written submissions in response to the AFN and Canada's motion.

> All parties who wish to respond to the AFN and Canada's joint motion will do so in writing by **September 9, 2022** and file their submissions with the Tribunal and exchange them with the parties. The AFN and Canada will file their reply by **September 15, 2022.**
>
> The Panel sets aside **September 15 and 16, 2022** for a videoconference hearing for oral arguments if all parties request it. Parties can also indicate that they do not require an oral hearing. The Panel agrees to consider the motion in writing and to make best efforts to issue a ruling with reasons to follow if possible and if so, prior to the Federal Court hearing dated September 19, 2022. Should the parties all opt for the videoconference hearing, the AFN and Canada will file their reply by **September 14, 2022.**

Should this schedule fail to work on the parties' end, the parties are invited to write to the Tribunal to explain their reasons.

This will also need to be explained to the Federal Court in an attempt to obtain another hearing date in the near future, if possible.

Given the above, the Panel will not participate in a conference call on **August 15, 2022.**

Since May, the Panel made best efforts to expedite this matter as best as it could given the circumstances that were outside of its control. In order to do so, it had set aside most of the summer in order to deal with this important matter. The Panel, in crafting the schedule above, balanced procedural fairness with expeditiousness to ensure that parties can proceed at the Federal Court given a hearing as been set aside for **September 19, 2022.**

The Panel will also direct a schedule shortly in order to deal with the Federation of Sovereign Indigenous Nations' request for interested party status.

Should you have any questions, please do not hesitate to contact the Registry Office by e-mail at registry.office@chrt-tcdp.gc.ca by telephone at 613-878-8802 or by fax at 613-995-3484.

Dear Parties,

Re: First Nations Child and Family Caring Society et al. v. Attorney General of Canada
Tribunal File: T1340/7008

The Panel wishes to advise the parties of the following:

The Panel is in receipt of the AFN's letter dated August 10, 2022, the Commission's letter dated August 12, 2022, the Caring Society's letter dated August 15, 2022 and Canada's letter dated August 15, 2022. At the time of writing this message, unfortunately, the Panel has not heard from the COO or the NAN. The Panel was hoping to learn their views before the set schedule's first deadline of August 16, 2022. The Panel has to make a decision given today's deadline.

The Panel thanks the AFN, the Commission, the Caring Society and Canada for their responses. The Panel appreciates the Caring Society's comments of August 15, 2022, regarding the Panel's approach so far in this case.

The Panel was under the impression that no counsel from the Caring Society, the Commission, the COO and the NAN were available in August for a hearing. This was explained to the Panel earlier this month. Therefore, the Panel in trying to move this matter forward, opted for a cross-examination of affiants in writing.

Upon consideration, the Panel requests the parties to comply with the set schedule and may revisit it later if new procedural issues arise.

On the issue of proceeding with an oral hearing of the motion, the Panel made tentative arrangements to secure a hearing room and IT support for videoconferencing and recording on September 15 and 16, 2022 for a hybrid, in-person hearing in Ottawa for the Panel members and all parties who can attend in-person and videoconferencing for the parties who cannot attend in-person and for members of the public. The Panel would also allow the filming of these proceedings. Details can be discussed later. The Panel is mindful that the timing is very short for the reply from the AFN and Canada should we proceed with the oral hearing. The Panel will consider their views once cross-examinations have been completed.

Should you have any questions, please do not hesitate to contact the Registry Office by e-mail at registry.office@chrt-tcdp.gc.ca by telephone at 613-878-8802 or by fax at 613-995-3484.

Yours truly,

Judy Dubois

INTERIM ORDER AND REASONS

[1] On this Motion, filed August 15, 2022, the Plaintiffs seek an interim Order against non-parties as follows:

(i) an interim and interlocutory Order that no legal professionals, other than class counsel appointed by this Court, the Plaintiff Assembly of First Nations [AFN], or the Court-appointed administrator, Deloitte LLP, publish a communication to class members relating to these class proceedings without the Court's prior approval obtained on motion made on notice to the parties in these class proceedings; and

(ii) an interim and interlocutory Order that the websites of the Consumer Law Group [CLG] and any other such websites containing communications to class members relating to these class proceedings be removed upon service of the Court's Order herein, pending the disposition by the Court of the Plaintiffs' Motion for relief in the week of November 21, 2022, unless such communications are approved by the Court on motion made on notice to the parties in these class proceedings.

[2] In support of their Motion, the Plaintiffs filed the following Affidavits:

a. Affidavit of Janice Ciavaglia affirmed on August 15, 2022;

b. Affidavits of Wenxin Yu affirmed on August 15, 2022;

c. Affidavit of Kenneth Dennis Brady Dixon sworn on August 11, 2022; and

d. Affidavit of Kim Blanchette sworn on August 15, 2022.

[3] CLG was served with the Motion and filed an Affidavit of Andrea Grass sworn on August 16, 2022. CLG also filed a letter dated August 16, 2022, agreeing to the interim Order.

I. Background

[4] By way of brief background, the underlying class proceedings relate to harms caused by the discriminatory provision of child and family services and essential services to First Nations' children. The class members are children and young adults who have experienced homelessness, substance misuse, disabilities, and encounters with the criminal justice system. The First Nations class members are described by AFN as "some of the most vulnerable individuals in Canadian society".

[5] The parties reached a Final Settlement Agreement (FSA) on June 30, 2022, which, if approved by the Court, will provide $20 billion in compensation to the class members. The Court approval hearing for the FSA is scheduled for September 19, 2022.

[6] In advance of the FSA approval hearing, the Court approved the Notice Plan developed by class counsel to provide class members with detailed information relating to the FSA. This Notice is expected to be published by August 19, 2022.

[7] In the meantime, and prior to the FSA receiving Court approval, CLG, who are not class counsel and who have had no involvement in these proceedings, put information on two websites about the "settlement" and invited class members to "Join this Class Action". Their websites offer contingency fee retainers and request that class members provide personal information - including information about "damages or symptoms experienced".

[8] The Plaintiffs assert the CLG website communications contain misleading information about the class action, the potential settlement agreement, and the prospective claims process. On the CLG websites, there is no reference to or identification of class counsel. Further, the Plaintiffs allege the solicitation of retainer agreements and the request for information about damages or symptoms from class members is exploitative, re-traumatizing, and contrary to the various safeguards built into the FSA and the Notice Plan.

[9] At the hearing of this Motion, legal counsel for CLG confirmed the information relating to these class proceedings has been removed from their websites. A hearing to determine the extent to which non-class counsel may communicate and engage with class members regarding the claims process is set for November 21, 2022. In advance of that hearing, CLG advised the Court that it does not object to the interim Order sought by the Plaintiffs.

II. Issue

[10] The only issue is whether the Court should exercise its discretion and grant the interim Order.

III. Analysis

[11] The relief sought by the Plaintiffs falls within the Court's plenary jurisdiction to manage its own proceedings (*Dugré v Canada (Attorney General)*, 2021 FCA 8 at para 20).

[12] Furthermore, as noted in *Federal Courts Rules*, SOR/98-106, Rule 385(1)(a):

Unless the Court directs otherwise, a case management judge or a prothonotary assigned under paragraph 383(c) shall deal with all matters that arise prior to the trial or hearing of a specially managed proceeding and may	Sauf directives contraires de la Cour, le juge responsable de la gestion de l'instance ou le protonotaire visé à l'alinéa 383c) tranche toutes les questions qui sont soulevées avant l'instruction de l'instance à gestion spéciale et peut :
(a) give any directions or make any orders that are necessary for the just, most expeditious and least expensive outcome of the proceeding;	a) donner toute directive ou rendre toute ordonnance nécessaires pour permettre d'apporter une solution au litige qui soit juste et la plus expéditive et économique possible;

[13] The Affidavit of Janice Ciavaglia, the Chief Executive Officer of the AFN, speaks to how First Nations individuals have been exploited and re-traumatized in other class action settlements, such as the Indian Residential Schools Settlement Agreement (IRSSA). She states as follows at paragraphs 15 and 17 of her Affidavit:

> 15. The AFN and its class counsel have gone to great lengths to ensure that the claims process for this proposed settlement will minimize the risk of re-traumatization to complainants, be as accessible as possible and will not require lawyers to successfully submit a claim. There is no individualized assessment that requires a narrative-form explanation of the claimant's circumstances or the harm suffered in order to establish an entitlement to compensation. Any additional compensation amounts are based upon objective factors. The settlement is designed in accordance with the lessons learned from the IRSSA compensation process, which were documented in a report from the National Centre for Truth and Reconciliation…
>
> …
>
> 17. Thus, the Parties to the proposed settlement agreement negotiated a crucial component through the appointment of "navigators" which are to be funded by Canada. Navigators will offer community-based, culturally competent support in order to

> assist claims members fill out the required documentation and submit a complete claim. This service will not cost anything to the Claimants and no portion of their compensation award will be affected. The involvement of lawyers foreign to the settlement and First Nations communities, acting as "form fillers" is unacceptable to the AFN and raises a serious risk of re-traumatization and revictimization. It may also dissuade some class members from engaging with the claims process at all, as a result of First Nations individuals' past experiences and the legacy of the IRSSA implementation process.

[14] The issues that arose in other First Nations class action settlements are discussed in more detail in *Fontaine Estate v Canada*, [2014] MJ No 159 and *Fontaine v Canada (Attorney General)*, 2016 ONSC 5359.

[15] With respect to accuracy and reliability of the information on the CLG website, the Affidavit of Kenneth Dennis Brady Dixon is telling. Mr. Dixon is First Nations and states he was aware of the class proceedings and had contacted class counsel to discuss the case. However, when he saw the CLG advertisement, he believed this was how the compensation was being provided and that he needed to sign the CLG retainer in order to claim compensation. When his brother told him the retainer stated CLG would charge 25% of the compensation, he contacted class counsel again, only then learning that CLG was not associated with the class action.

[16] The Notice Plan provides as follows:

> …The plan is designed to notify the class members of certification and the settlement approval hearing in a trauma-informed and culturally sensitive manner, and to provide them with the opportunity to see, read, or hear the notice of certification and settlement approval hearing, understand their rights, and respond if they so choose…

> The notice plan seeks a proportionate, multi-faceted, culturally appropriate, relevant and trauma-informed approach to notice dissemination… [Footnotes omitted.]

[17] In keeping with the objectives of the Notice Plan, it is vital that the details of the proposed FSA are sensitively and accurately communicated to the members of the class. This will allow class members to make informed decisions about their rights and the claims process. Importantly, class members will be advised that they will not need to retain legal counsel in order to advance a claim.

[18] Therefore, until the Notice Plan has been communicated to class members, allowing non-class legal counsel to provide information on the proposed FSA in a manner that is outside the Court's purview poses a serious risk to the class proceedings.

[19] Based upon the foregoing and considering the applicable legal test from *RJR-MacDonald Inc v Canada (Attorney General),* [1994] 1 SCR 311 (as cited in *Google Inc v Equustek Solutions Inc*, 2017 SCC 34 at para 25 [*Equustek*]), I am satisfied that:

a. there is a serious issue to be tried considering the history of predatory activity on First Nations class action settlements;
b. the class members will suffer irreparable harm if the Notice Plan is not communicated in a culturally sensitive and trauma-informed manner; and
c. the balance of convenience favours granting the relief.

[20] Accordingly, in my view, it is just and equitable in the circumstances to exercise the Court's jurisdiction and grant the injunctive relief sought against non-parties (*Equustek* at para 28).

IV. Conclusion

[21] The Plaintiffs' Motion is granted.

INTERIM ORDER IN T-402-19, T-141-20, AND T-1120-21

THIS COURT ORDERS that:

1. no legal professionals, other than class counsel appointed by this Court, the Plaintiff, Assembly of First Nations, or the Court-appointed administrator, Deloitte LLP, shall publish a communication to class members relating to these class proceedings without the Court's prior approval obtained on motion made on notice to the parties in these class proceedings; and

2. the websites of the Consumer Law Group and any other such websites containing communications to class members relating to these class proceedings shall be removed upon service of this Order, pending the disposition by the Court of the Plaintiffs' Motion for relief in the week of November 21, 2022, unless such communications are approved by the Court on motion made on notice to the parties in these class proceedings.

Executive Summary

I was retained by Sotos LLP approximately a year ago to assist with the Jordan's Principle and Trout Components of Moushoom et al v Canada, Court File Nos. T-402-19/T-141-20 and Trout et al v Canada, Court File No. T-1120-21. I remained involved and assisted class counsel until the parties eventually signed a Final Settlement Agreement on June 30, 2022. Key principles regarding the application process were identified in that document, but details regarding the application were not defined. I was asked by Sotos LLP to address the following questions:

1. What conceptual frameworks exist to inform our understanding of a claims process that requires an assessment of the impact, on First Nations individuals, of denials, delays, or gaps in essential services that took place between 1991 and 2017?

2. What are the challenges associated with asking about something that occurred in the past?

3. Given the retrospective nature of this inquiry, what proxies can be used to estimate impact?

4. What method would you recommend to assess eligibility and impact and that would allow evaluators to determine greater and lesser levels of compensation?

The following are my responses and recommendations related to these questions.

1. There are 3 conceptual frameworks of health, well-being, and wellness, that inform our understanding of how to understand and evaluate the impact of denials, delays, and gaps in essential services and supports experienced by First Nations individuals during childhood. First is the Culture as Intervention Model from the Thunderbird Partnership Foundation First Nations Mental Wellness Continuum Framework (Health Canada, 2015); second is the International Classification of Functioning, Disability and Health (WHO, 2002); third are the Medical and Social Models of Disability (Shakespeare, 2006).
    a. the first framework emphasizes the importance of *meaning, purpose, belonging and hope* as key concepts that express wellness in the First Nations context;
    b. the second framework treats health as a process that situates *meaningful participation in personal, family and community life* as one that is informed by the environment context, which includes access to services and supports such as technologies, products, and equipment.
    c. although the third framework contrasts medical and social models of disability, it highlights the role that *access to medical supports and services as well as social supports and services* play in the construction of what counts as a disability.

    I recommend that these concepts be central to the development of a claims process for compensation of the denial, delay, and gap in services that First Nations children experienced between 1991 and 2017. These should inform the Framework for Essential

***Services, the Claim Form, the Professional Confirmation of Essential Services Form, and the Impact Assessment Questionnaire*.**

2. This application process is by nature, retrospective. Claimants will be asked to reflect on services that they needed and would have benefited from in the past. They will be asked to submit either historical or contemporaneous documentation from a professional or other type of expert, as to what was needed whilst a child.

   There are at least three primary risks associated with asking claimants to reflect on the past. The first has to do with the emotional impact of asking those who could have or should have benefited from services and supports that they did not receive. At a minimum, claimants may re-experience frustration associated with what they had previously endured. The second has to do with the extent to which current representations of what happened in the past are subject to different forms of recall bias. Two First Nations individuals who had similar needs as a child will subjectively experience them very differently based on their personal and contextual environments. Also, claimants may under-interpret the gravity of their needs and impact in the past. This leads us to the third risk, which is that of over-interpretation of needs and impact. This risk of overinterpretation is that the distribution of impacts across the claimants will be skewed, making it difficult to distinguish between those eligible for greater vs. lesser levels of compensation.

   At the same time, it is important to honour narratives of First Nations claimants' lived experience of the past. The Claim form, the Professional Confirmation form, and the Impact Assessment Questionnaire ask First Nations claimants, as well as experts, to speak to the past. Claimants are also asked to reflect on their present as they are asked about how their lives are now, keeping in mind essential services that were needed in the past. Both approaches are subjective.

   The Impact Assessment Questionnaire or "IAQ" (See Appendix E) asks about both the past and the present allowing both past and present subjective accounts to come forward and be counted. It is through the counting that some level of objectivity is achieved.

   I recommend that the Impact Assessment Questionnaire (IAQ) be piloted to address its feasibility of implementation, understandability, acceptability, and distribution (see questions below).

3. A number of concepts were considered as proxies for greater and lesser impact of denial, delay and gap in essential services and supports. Number of essential services denied, delayed or not provided, child development outcomes, quality of life, and type of diagnosis or impairment, **are not recommended as proxies.** The concept of meaningful participation in personal, family, and community life has been central to the questionnaire that I created for this process. As will be further explained below, the AFN undertook its own process with a Circle of Experts, which subsequently imported a

uniquely First Nations perspective into the IAQ, while preserving aspects of this concept that are located in questions 3 and 4 in the IAQ. Additional concepts of impact that are responsive to First Nations' perspectives were incorporated into the IAQ.

I recommend that instructions for the Impact Assessment Questionnaire describe, in more detail, what is meant by 'life' and that this concept of participation or engagement in personal, family, and community be integrated into those instructions.

Other proxies for assessing impact that I support include remoteness, relocation, and death, subject to the discussion that follows.

4. The Framework for Essential Services outlines eligibility, the claims process, and provides an example of essential services that claimants and professionals or other experts should consider when completing the following forms:
   i. The Claim Form (which is still in development)
   ii. The Professional Confirmation of Essential Services Form (Appendix D)
   iii. Impact Assessment Questionnaire (IAQ) (Appendix E)

I recommend that the Impact Assessment Questionnaire (IAQ) be piloted to address at least the following questions:

- ***i. Does this IAQ fulfill its intended function of distinguishing between class members who experienced more significant impact and those who experienced lesser impact in relation to the subject essential services?***
- ***ii. What is the distribution of scores?***
- ***iii. How easy is the questionnaire to complete?***
- ***iv. How understandable is each question?***
- ***v. Are there any items that are unacceptable or objectionable?***
- ***vi. How much time does it take to complete?***
- ***vii. What instructions are needed to help First Nations claimants complete the forms and questionnaire?***
- ***viii. How much assistance do First Nations claimants need to complete the forms and questionnaire?***
- ***ix. Is there anything that should be added to the questionnaire that would strengthen the evaluation of impact?***
- ***x. How do First Nations experience being asked questions about the past?***

I. Introduction

Canada's failure to provide First Nations children with essential services available to non-First Nations Children or which would have been required to ensure substantive equality under the Charter, is at the heart of this report. The court and tribunal proceedings resulted in a historic landmark settlement that allocated $5B to First Nations individuals for essential services that were denied, delayed, or not available between 1991 and 2017. This expert report responds to a set of questions that were identified to guide the development of a claims method for First Nations claimants. It reflects the results of a review of relevant literature and a comprehensive consultation process with both First Nations and non-First Nations experts.

There is no adequate precedent that can be directly replicated to inform the method for applying for compensation for essential services that were denied, delayed, or not provided during childhood. The method proposed in this report relies on a claimant form, a professional confirmation form, and an impact on health and well-being questionnaire. The general method is laid out in the Framework for Essential Services (see Appendix C).

A. Objectives of this report

This report addresses the following questions:

> 1. What conceptual frameworks exist to inform our understanding of a claims process that requires an assessment of the impact, on First Nations individuals, of denials, delays, or gaps in essential services that took place between 1991 and 2017?
>
> 2. What are the challenges associated with asking about something that occurred in the past?
>
> 3. Given the retrospective nature of this inquiry, what proxies can be used to estimate impact?
>
> 4. What method would you recommend to assess eligibility and impact and that would allow evaluators to determine greater and lesser levels of compensation?

In this report, I identify, and comment on, a method that assesses First Nations claimants' needs and circumstances without the requirement for in-person interviews, cross-examinations, or other more intrusive methods. This method is product of consultations and information sharing sessions held with experts from various disciplines, First Nations and non-First Nations, and in my opinion, sets out a feasible approach for the compensation process. It is important to note that ***there is no precedent for, or existing method to, retrospectively assess First Nations claimants, their needs and their circumstances, and the impact of these on their lives, either past or present.*** Therefore, the proposed method is unique to the circumstances of this case and the provision of compensation to First Nations individuals.

The three-step process that I propose involves the completion of a Claim Form to be completed by the individual seeking compensation, a Professional Confirmation of Essential Service Form to be completed by a professional or someone who can attest to what the claimant needed as a child, and an Impact Assessment Questionnaire (IAQ) to be completed by the claimant. The Claim Form and Professional Confirmation of Essential Service Form will be used to determine and confirm the eligibility of claimants, while the Impact Assessment Form, through a series of questions, determines the extent of compensation provided to claimants.

I co-developed a questionnaire with the Vancouver Circle of Experts, referred to below. The Impact Assessment Questionnaire that is enclosed to this report incorporates First Nations' perspective, which were developed through the AFN's process of Circle of Experts, which I also discuss further below.

Given the unique nature of the proposed method, future pilot testing is essential to establishing feasibility, understandability, and acceptability of the questions as well as variability in distribution of responses to the Impact Assessment Questionnaire. Pilot testing will allow for the method and questions to be refined, and amended in response to the results.

I am a tenured Associate Professor in the School of Social Work, Faculty of Arts, at McGill University, and also hold Associate member appointments in the Faculty of Medicine, Departments of Pediatrics, Neurology and Neurosurgery. My leadership roles in university administration, my strong interdisciplinary research portfolio in the childhood health and disability area, my cross-disciplinary and cross-faculty teaching and mentoring, as well as my deep commitment to community engagement with both government and non-government organizations in Quebec and other Canadian jurisdictions, are qualities that I bring with me into this expert role. To date, I have 70 peer reviewed publications, 13 chapters, have received almost $5M in research funds as principal or co-principal investigator, and another $5.2M as co-investigator. My involvement with Jordan's Principle and First Nations is centred in Manitoba where I have worked with a community (Pinaymootang) and the Assembly of Manitoba Chiefs (AMC) to document implementation of Jordan's Principle in that province.[1] My CV can be reviewed in Appendix A.

This report begins with a description of the relevant historical events leading up to the Final Settlement Agreement, which was signed on July 4, 2022. It is structured by the 4 key questions that comprise my mandate (see Appendix B). A final conclusion summarizes my key opinions, the evidence for which constitutes the body of this report.

B. Historical Background

1. On December 17, 2007, the House of Commons unanimously passed a motion (M-296). It stated that "the government should immediately adopt a child first principle based on Jordan's Principle, to resolve jurisdictional disputes involving the care of First Nations children". What this meant is that when a First Nations child required services, the government or department to which the request was originally made should pay for the services without delay. Jurisdictional disputes regarding responsibility for payment would ***not*** take precedence over the delivery of services that the child needed. Named after the late Jordan River Anderson, Jordan's Principle is now a child-first substantive equality principle that applies equally to all First Nations children whether resident on- or off-reserve, including the Northwest Territories.

2. That same year, the First Nations Child and Family Caring Society (FNCFCS) and the Assembly of First Nations (AFN) filed a complaint to the Canadian Human Rights Tribunal (CHRT) alleging that the failure to implement Jordan's Principle constituted an indication of ongoing discrimination against First Nations children.

3. In 2016, the CHRT held that the complaint was substantiated and that Jordan's Principle had been breached. Over the course of several subsequent decisions, the CHRT re-focused its analysis on substantive equality and expanded Jordan's Principle to cases beyond jurisdictional disputes amongst governments or levels of government. This expanded scope applied to a broader range of health, education, and social services.

4. On March 4, 2019, Xavier Moushoom commenced a proposed class action under Court File Number T-402-19, seeking compensation for the Class dating back to 1991.

5. On January 28, 2020, the AFN and other plaintiffs also filed a proposed class action under Court File Number T-141-20 dating back to 1991.

6. Both groups of plaintiffs came together to combine efforts in the best interests of the Class. The consolidated action sought compensation for First Nations individuals who were victims of the Crown's systemic discrimination while they were under the age of majority and for family members who suffered the break-up of their families and other harm when their children were removed from their homes and/or their Jordan's Principle substantive equality rights were breached.

7. The consolidated Moushoom et al v Attorney General of Canada (Court File Nos. T-402-19/T-141-20) class action was filed on July 21, 2021. This action sought "compensation for those First Nations children who suffered or died while awaiting the services or products that the Crown was legally required to provide but did not

provide, in breach of Jordan's Principle and the substantive equality rights that it embodies." This is referred to as the Jordan's Principle Class.

8. The Consolidated Statement of Claim removed, with the Court's approval, members of Jordan's Class and their corresponding Family Class members whose claims dated back to between April 1, 1991, and December 11, 2007, that were previously part of Court File Number T402-19 and/or Court File Number T-141-20. Those claims proceeded separately as part of a new Statement of Claim in the Federal Court. This is referred to as the Trout Class.

9. Jordan's Principle Class refers to all First Nations individuals who, during the period between December 12, 2007 and November 2, 2017, did not receive from Canada (whether ***by reason of a denial, delay, or service gap***), an ***essential service*** related to a ***confirmed need***, on grounds, including but not limited to, lack of funding or lack of jurisdiction, or jurisdictional dispute with another government or government department, while they were under the Age of Majority.

10. The Trout Class refers to all First Nations individuals who, during the period between April 1, 1991 and December 11, 2007, and while they were under the Age of Majority, did not receive from Canada (whether ***by reason for denial, delay, or service gap***), an ***essential servic***e related to ***a confirmed need***, on grounds, including but not limited to, lack of funding or lack of jurisdiction, or jurisdictional dispute with another government or government department.

C. Final Settlement Agreement

1. The following are key features of the final settlement agreement:

ii. The design and implementation of the distribution protocol within the Claims Process will be within the sole discretion of the Plaintiffs, subject to the approval of the Court.

iii. The Claims Process is intended to be expeditious, cost-effective, user-friendly, culturally sensitive, trauma-informed, and non-traumatizing to participants.

iv. There is a presumption that a Claimant is acting honestly and in good faith with respect to any Claim and all reasonable inferences will be made in favour of the Claimant.

v. Documentation used to support the application may be historical or contemporaneous.

vi. Those making decisions about Claimant applications will receive training on Jordan's Principle, Essential Services, Confirmed Needs, Professionals, and Supporting Documentation.

vii. The application process intends to:

a. be trauma-informed regarding the Jordan's Principle Class and the Trout Child Class;
b. avoid subjective assessments of harm, individual trials, or other cumbersome methods of making Eligibility Decisions with respect to this class; and
c. use objective criteria to assess Class Members' needs and circumstances as a proxy for the significant harm inflicted on such Class Members in a discriminatory system.

viii. The Plaintiffs have estimated a Budget of $3.0 billion dollars for the Jordan's Principle Class.

ix. The Plaintiffs have estimated a Budget of $2.0 billion dollars for the Trout Child Class.

2. Assumptions regarding scope of the demand for essential services between 1991-2017:

i. The actual prevalence of children who had unmet needs related to essential services between 1991 and 2017 is not known. Furthermore, the prevalence of First Nations children with various types of functional impairments to which essential services may be linked, is not known.

ii. The latest figures from Statistics Canada regarding prevalence of children, age 5-17 years, in Canada with impairments is 12.3% (Statistics Canada, 2019). However, this figure does not include First Nations children who are on-reserve and so is not an accurate or applicable figure. Earlier prevalence figures of non-First Nations children are also not applicable in this case as Statistics Canada has changed how they enquire about functional impairments and limitations.

iii. In 2017, 32% of First Nations people, age 15 and over, living off reserve, had one or more functional impairments that limited them in their daily activities (Hahmann, Badets, & Hudges, 2019).

iv. Estimates of the Jordan's Principle Class Size, were between 58,385 and 69,728 for the period from December 12, 2007 to November 2, 2017; based on the Jordan's Principle Class Size Estimates, the plaintiffs estimated the size of the Trout Class to be approximately 104,000. These estimates are based on an extrapolation from a single quarter of 2019-2020 data, representing current Jordan's Principle service requests, provided by Indigenous Services Canada.

v. Considering $3 billion set aside to compensate the Jordan's Principle children's class (2007 to 2017), if $40,000 was given per Jordan's Principle class member, 75,000 Jordan's Principle class members could be compensated.

vi. Considering $2 billion set aside to compensate the Trout child class (1991 – 2007), if $20,000 was given per Trout class member, 100,000 Trout class members could be compensated.

D. Consultations and Information Sharing Sessions Held

In forming the opinions expressed in this report, I have consulted the following individuals and groups:

- Barbara Fallon - Professor, Faculty of Social Work, University of Toronto
- Nico Trocme - Professor, School of Social Work, McGill University
I met with Drs. Fallon and Trocme to obtain background information on the report they prepared for Indigenous Services Canada entitled *Review and Data Process Considerations for Compensation Under 2019 CHRT39.*

- Molly Churchill – Lawyer
I met with Ms. Churchill to review work she completed on a Jordan's Principle project while a law and social work student at McGill University.

Statistics Canada experts in surveys and measurement:
- Rubab Arim - Chief, Social Analysis and Modelling Division, Analytical Studies, Methodology and Statistical Infrastructure Field, Statistics Canada
- Dafna Kohen - Assistant Director, Health Analysis Division, Statistics Canada
I met with Drs. Arim and Kohen to discuss existing data on First Nations children at Statistics Canada.

Statistics Canada experts in the Canadian Survey on Disability and the Disability Screening Questionnaire:
- Mike Burns, Chief – Disability and Accessibility Program, Diversity and Sociocultural Statistics, Statistics Canada.
- Susan Wallace – Unit Head, Disability and Accessibility Program, Diversity and Sociocultural Statistics, Statistics Canada
- Tara Hahmann - Research Analyst, Statistics Canada
- Hailegh McDonald - Health Analyst, Statistics Canada
I met with this group of experts to discuss the development, structure, implementation and limitations of the Disability Screening Questionnaire.

Statistics Canada experts in the remoteness index:
- Shawn Brule - Health Analyst, Statistics Canada
- Mohan Kumar - Research Analyst, Statistics Canada

- Haaris Jafri - Unit Head, Statistics Canada
- Fatemeh Hosseininasabnajar - Analyst, Statistics Canada
- Anne Munro – Analyst, Statistics Canada

I met with this group of experts to discuss the development and limitations of their work on the remoteness indices.

Vancouver Circle of Experts:
- Peter Rosenbaum - Professor of Paediatrics, McMaster University, Canada Research Chair in Childhood Disability 2001-14, Co-Founder, CanChild Centre for Childhood Disability Research
- David Streiner - Emeritus Professor, McMaster University, Department of Psychiatry & Behavioural Neurosciences; Professor, University of Toronto, Department of Psychiatry Fellow, Canadian Psychological Association, American Psychological Association, Society for Personality Assessment
- Sabrina Eliason - Developmental Pediatrician, Assistant Clinical Professor, Division of Developmental and Behavioral Pediatrics; Department of Pediatrics, University of Alberta; Glenrose Rehabilitation Hospital, Edmonton, Alberta
- Joanna Mills - Executive Director of Indigenous Relations, Community Living British Columbia
- Jackie Watts - Provincial Advisor, Aboriginal Supported Child Development Programs of BC Partnerships Project Coordinator
- Diana Elliott - Provincial Advisor to Aboriginal Infant Development Programs of British Columbia
- Gordon Bruyere - MSW Coordinator, IBSW Program Development, Old Sun Community College, Siksika, Alberta
- Marlyn Bennett - Associate Professor, Faculty of Social Work and Werklund School of Education, University of Calgary
- Richard Sullivan - Professor Emeritus, School of Social Work, University of British Columbia
- Anamaria Richardson - Paediatrician, Clinical Assistant Professor, Wall Scholar (2021-2022), University of British Columbia

This is a group of experts that I brought together to inform the development of the Framework on Essential Services as well as the initial version of the questionnaire for evaluating impact of denial, delay and gaps in essential services on health and well-being.

Information sharing sessions with Assembly of First Nations' Circle of Experts:
I attended several meetings with the Assembly of First Nations' Circle of Experts. These discussions highlighted the importance of drawing on Indigenous knowledge pertaining to denials, delays, and gaps in services as well as health and well-being. I have incorporated my understanding of these views into the report.

Plaintiffs:
- Jonavon Meawasige – Jordan's Principle plaintiff
- Zacheus Trout (and his wife, Veronica Trout) – Trout Plaintiff

I had an opportunity to meet with the plaintiffs, to describe the method that has been developed for the application for compensation process, and to obtain their input.

II. Answers to Questions

This section of the report addresses each of the questions that I have been provided as my mandate.

A. What conceptual frameworks exist to inform our understanding of a claims process that inquires about the impact, on First Nations individuals, of denials, delays, or gaps in essential services that took place between 1991 and 2017?

There are 3 conceptual frameworks that inform our understanding of the proposed claims process in different ways: the Culture as Intervention Model of the Thunderbird Foundation Framework of Mental Wellness Continuum (Health Canada, 2015), the World Health Organization's International Classification of Functioning, Disability, and Health (World Health Organization, 2007; World Health Organization, 2002), and the Social and Medical Models of Disability (Shakespeare, 2006). The Culture as Intervention Model places emphasis on the importance of meaning (mental behaviour), belonging (emotional behavior), hope (spiritual behaviour), and purpose (physical behaviour). The ICF emphasizes health as a process between the body structures and functions, what tasks or person can do (i.e., activities), their level of engagement in personal, family, and community life given what they can or cannot do (i.e. participation) and the assets and constraints of the context within which they are engaged (i.e., personal and environmental). The social and medical models of disability contrast how a person's health challenges are perceived and treated through these different lenses (Shakespeare, 2006). It is indisputable that having essential services be denied, delayed, or not provided during childhood had a negative impact on First Nations children. In order to establish a method to evaluate how much compensation claimants will receive, there are two key questions that must be addressed. First is 'impact on what?'; the second key question is 'how to establish a process of assessing greater vs. lesser impact?'

The development of any method should be based on a theoretical framework(s). The method that I have developed and upon which I am commenting draw on First Nations and non-First Nations understandings of health and well-being to address these questions. ***The approach I recommend and endorse is one that gives consideration to medical, social services and other types of supports that were denied, delayed or not provided, and invites claimants to reflect on how the denial, delay or gap in these services and/or supports are associated with their well-being during childhood and on their current life now.***

The following describes the conceptual frameworks and how they inform the proposed method.

1. Drawing on the Thunderbird Partnership Foundation First Nations Mental Wellness Continuum Framework (Health Canada, 2015)

During an information sharing meeting that I attended with the Assembly of First Nations' Circle of Experts, the Culture as Intervention Model from the Thunderbird Partnership Foundation First Nations Mental Wellness Continuum (Health Canada, 2015) was identified as a conceptual framework that should be considered to inform our collective understanding of impact on health and well-being. This framework draws our attention to central concepts of ***meaning, purpose, belonging, and hope,*** concepts that are key to understanding what is meant by well-being in the First Nations context.

i. **Mental wellness** contributes to the creation of **Meaning**, which arises from a sense of understanding. This understanding arises from a balance between appreciation for intuition (i.e., connection to spirit and creation) and rationale (i.e., mental thought and what one experiences in the world). When intuition and rationale are in balance, they lead to an understanding of how one's life, family, and community are part of creation. *In the questionnaire the extent to which meaning was impacted during childhood through the denial, delay, or gap in essential services is arrived at by asking about* ***impact on learning and understanding*** *(as a child).*

ii. **Purpose** is expressed through **physical wellness**, which is facilitated not only taking care of one's physical body but also by respecting First Nations peoples' unique worldviews and values. *In the questionnaire, the extent to which purpose was impacted during childhood through the denial, delay, or gap in essential services is arrived at by asking about* ***impact on participation in physical and recreational activities*** *(as a child).*

iii. **Belonging** is expressed through **emotional wellness**, which itself is facilitated through attitudes and relationships. Attitudes that are positive, including attitudes that emphasize "living life to the fullest," contribute to a better sense of emotional wellbeing. When combined with connections to family, community, the environment, and the universe that arise from one's relationships, a sense of belonging becomes possible. *In the questionnaire, the extent to which purpose was impacted during childhood through the denial, delay, or gap in essential services is arrived at by asking about* ***impact on relationships with family and community*** *(as a child).*

iv. **Hope** is expressed through spiritual wellness, which is facilitated through one's connection to values, identity, and beliefs. *In the questionnaire the extent to which meaning was impacted during childhood through the denial, delay, or gap in essential services is arrived at by asking about* ***impact on participation in cultural activities, connecting with culture or spirituality*** *(as a child).*

This diagram depicts the Culture as Intervention Model. Holding key concepts of meaning, belonging, purpose, and hope in the center, this diagram demonstrates how culture, Indigenous social determinants of health, personal, family, and community life affect these key concepts of wellness (Health Canada, 2015).

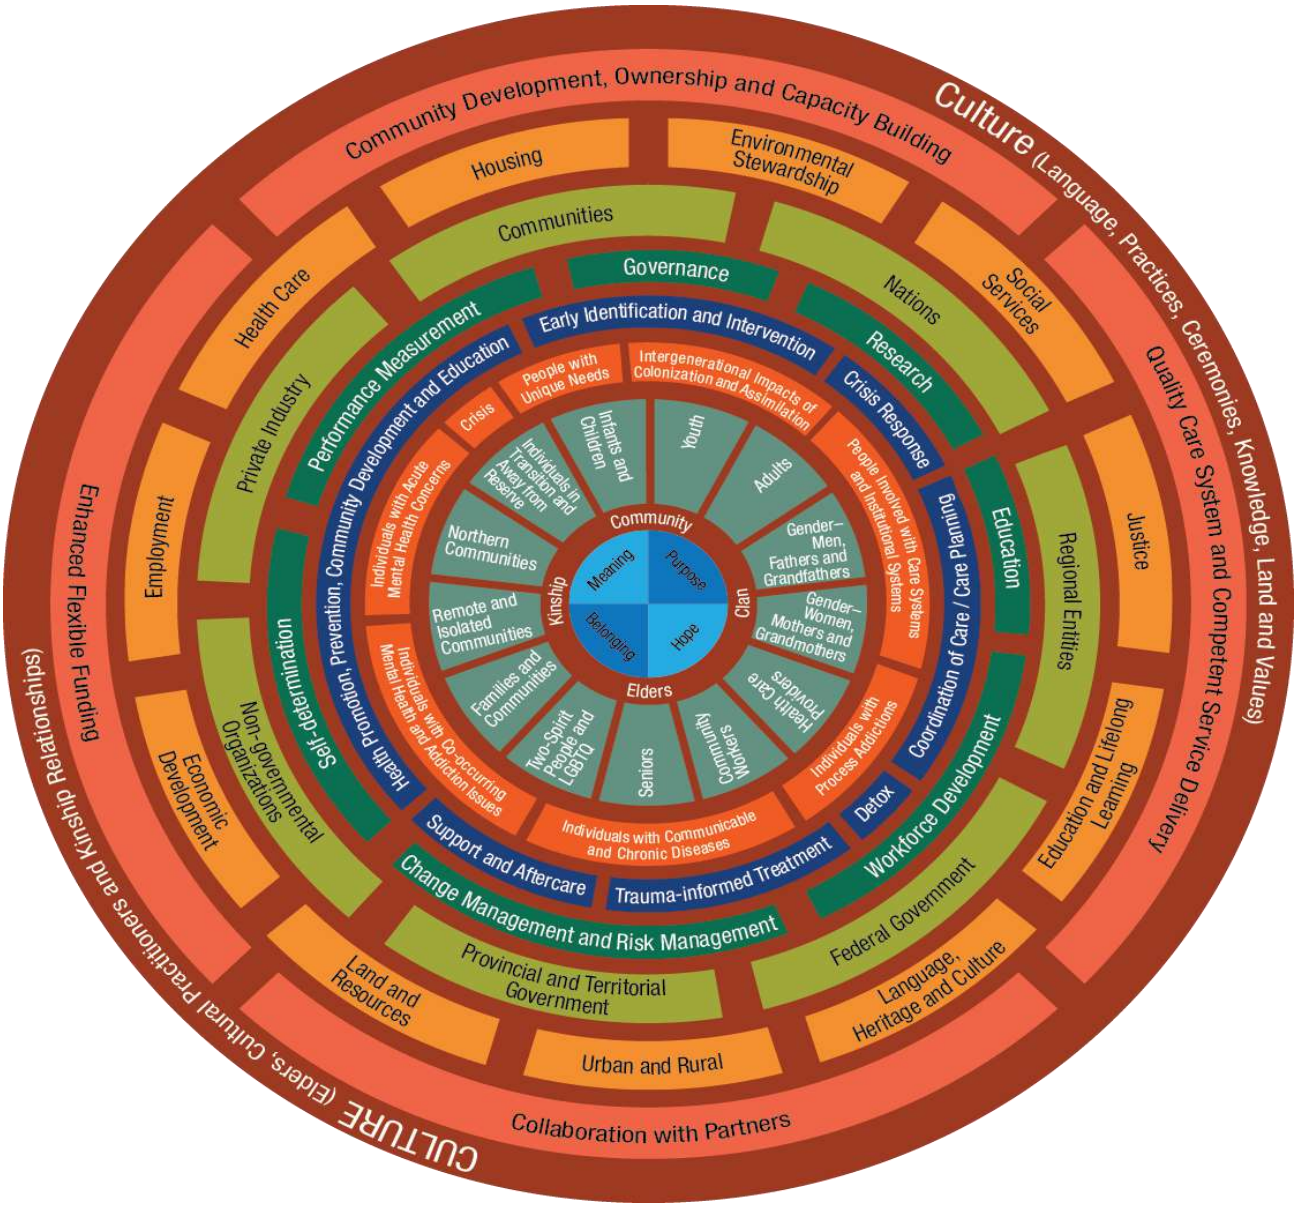

Figure 1. Culture as Intervention Model from the Thunderbird Partnership Foundation First Nations Mental Wellness Continuum Framework

This diagram provides more detail about the key concepts of meaning, purpose, hope and belonging (cited in Restoule, Hopkins, Robinson, & Wiebe, 2016).

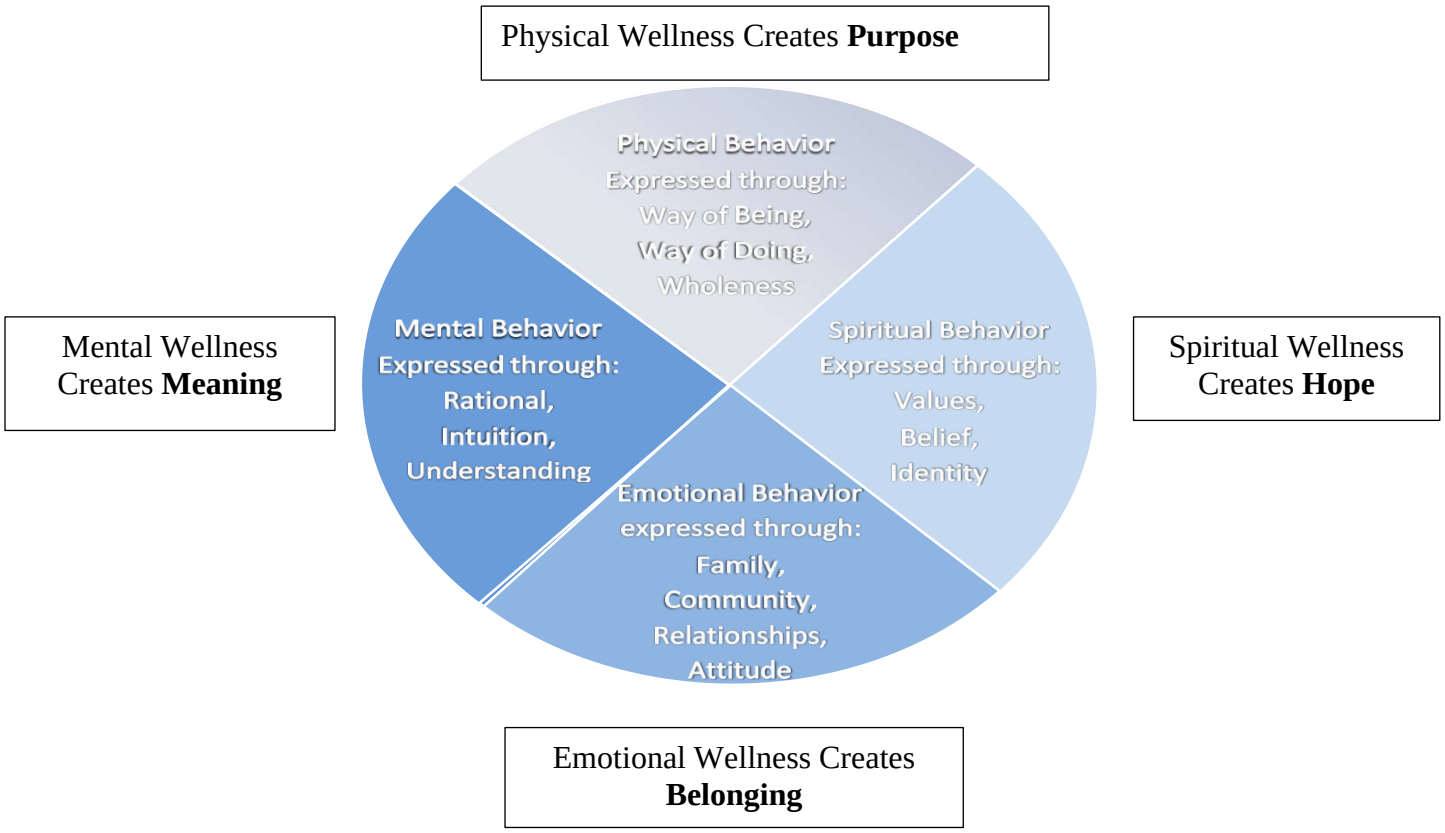

Figure 2. Focus on Meaning, Purpose, Hope and Belonging

Given how integral concepts of purpose, hope, belonging and meaning are to well-being in the First Nations context, questions to the connection between what essential services were needed, and a person's sense of physical, spiritual, emotional, and mental wellness as a child have been integrated into the Impact Assessment questionnaire. ***In my opinion, this is critical, but the understandability of these questions will need to be ascertained through pilot testing.***

2. Drawing on the International Classification of Functioning, Disability, and Health to Understand Health and Well-Being.

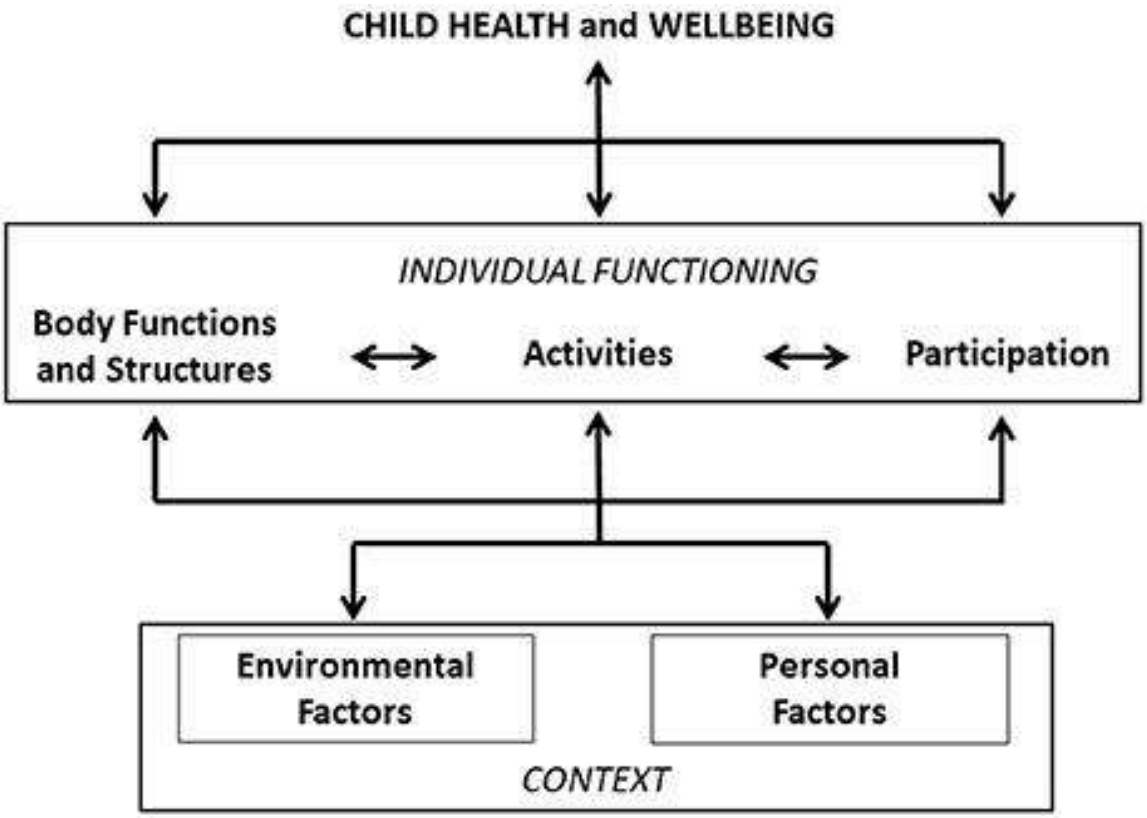
The International Classification of Functioning, Disability, and Health (ICF) is a framework developed by the World Health Organization (WHO) to create common international language and a more shared understanding of what is meant by 'health and well-being'. It incorporates the medical and social models, thereby recognizing the role that the body and environment play in creating health and well-being. The ICF built on the 1948 definition of health which identified health as incorporating physical, social, and mental well-being, and not just the absence of illness or disease. The 2002 version shifted the definition of health to one that is a

process that includes how the body, the whole person, and the person in their social context function (World Health Organization, 2002).

i. One of the key concepts in the ICF is that of participation. Described as "a person's involvement in a life situation", participation in the ICF model highlights the importance of integrating the extent to which aspects of the environment facilitate how well children and adults are meaningfully engaged in their social world (World Health Organization, 2007). Participation is not just a function of what individuals are capable of and how well they perform; it is also a function of the extent to which there are barriers and facilitators in their environment to participation. The concept of meaningful participation in personal, family, and community life was central to the first questionnaire. There are aspects of it that now appear in the AFN's Impact Assessment Questionnaire.

Figure 3. International Classification of Functioning, Disability and Health (WHO, 2002)

This figure depicts the ICF's concept of functioning, disability, and health as a process that involves a number of factors. A child's health and well-being are informed by their functional impairments, activities (ability to execute tasks), participation in life situations, which are also informed by personal and environmental factors (World Health Organization, 2007).



ii. In the ICF, participation refers to the following areas of participation:
- Learning and applying knowledge
- Undertaking general day-to-day tasks and demands
- Communicating
- Self-Care
- Domestic life – acquiring necessities, household tasks, caring for others
- Managing interpersonal interactions and relationships
- Education, work and employment
- Engagement in community, social life

I highly recommend that instructions for the IAQ expand on what is meant by 'life' in question 4 and draw on this concept of participation or engagement in personal, family, and community life.

iii. Claimants completing the claims process may or may not have had (and still may not have), a diagnosis of an illness, chronic health condition, or disability. Requiring a diagnosis would potentially disadvantage claimants who never had access to a professional and/or diagnostic testing to have a diagnosis made. However, a denial, delay, or gap in an essential service can be linked to different areas of function such as seeing, hearing, physically getting around, etc. The International Classification of Functioning, Disability, & Health (ICF) provides some guidance regarding areas of function but is quite complex in its coverage of function. It has 8 areas of function and each of these is subdivided in up to 23 sub-areas of function. I believe that it is a system that is too complex for this purpose.

iv. I explored the structure of the Disability Screening Questionnaire (Statistics Canada, 2017) which enquires into how the frequency and intensity of activities are limited in different areas of function. The DSQ's areas of function were less complex than that of the ICF, but did not include communication. These areas were reviewed by the Vancouver Circle of Experts and one area of functioning pertaining to expressive and receptive language was added. These were considerd comprehensive enough, but not overly complex, and should be used on the Impact Assessment Questionnaire. ***I recommend that Claimants be asked about each area of function currently, keeping in mind essential services that were denied, delayed, or not provided during childhood.***

v. The areas of function from the DSQ are as follows:
- Seeing
- Hearing
- Getting around, dexterity, and other physical activities
- Pain-related
- Learning, remembering, or concentrating
- Developmental
- Emotional/psychological or mental health-related

- Other

These categories inform the architecture of Question #4 in the Impact Assessment Questionnaire. I recommend that pain and chronic health conditions be added to the categories.

3. Drawing on the Social and Medical Models of Disability

In the literature, these perspectives are often presented as dichotomous and as conflicting with one another (Shakespeare, 2006). Given how misleading dichotomies can be (Berlin, 1990), it is important to understand the intended distinction between the two as the emphasis in health and social care policies and practices are uniquely different in one over the other.

i. The medical model of disability views disability as a problem that an individual experiences; symptoms require medical care in the form of treatment typically provided by trained professionals. According to this model, disability is directly caused by something, whether it be trauma, disease, or other health-related conditions. "Cures" and policy responses to disability under this model are mostly healthcare-related, with treatments and therapies being seen as the most effective way to "treat" disability (World Health Organization, 2007). ***In the Framework for Essential Services, a list of services that First Nations children may have needed is provided.*** This list is not exhaustive but provides claimants with examples of services that Jordan's Principle and HRT rulings are meant to address.

ii. The social model of disability views disability not as individualistic but as a socially-created problem. Rather than focusing on the individual pathological elements of disability, this model treats disability as a phenomenon created by barriers in society. Therefore, policy responses under this model are a matter of making environmental adjustments to fully integrate individuals into society (World Health Organization, 2007). Participation and inclusion are enhanced by addressing physical, technological, or attitudinal obstacles (Hahmann et al., 2019). Policy responses to disability under this model involve social actions that enable a better integration of individuals with disabilities into society (World Health Organization, 2007).

iii. In the Framework for Essential Services, examples of equipment, products and technologies, are included as these are examples of environmental adaptations that were denied, delayed, or not provided to First Nations children. Both models of disability inform the creation of the proposed Framework for Essential Services with both medical and social experiences being brought into account.

iv. 'Disability' is a contested term and has been criticized by some as a 'colonial construct that conflicts with Indigenous perspectives of community membership' (Ineese-Nash, 2020). Furthermore, given that many First Nations children have not

had access to services to receive a diagnosis, **there is no requirement for a First Nations person to have a disability to be eligible.**

v. Literature examining how the ICF maps onto or intersects with Indigenous populations worldwide is limited (Alford, Remedios, Webb, & Ewen, 2013). Having said that, the Culture as Intervention Model and the ICF make unique contributions regarding health and well-being. Their elements are present in the questionnaire as well as Framework for Essential Services.

vi. The impact of denial, delay, or gap in services on an individual's 'participation' in their day-to-day life is commensurate with the notion of 'meaningful and purposeful participation in personal, family, and community life'. The WHO construct of 'participation' and the First Nations wellness concepts of meaning, purpose, belonging, and hope, are unique, but also share some common elements. A questionnaire should reflect First Nations ways of knowing and understanding. The connection that I see is that ***meaning, purpose, belonging and hope are created through meaningful participation in life situations at the personal, family, and community levels. This connection should be integrated into the instructions for claimants as well as professionals and other experts.***

B. What are the challenges associated with asking about something that occurred in the past?

The Final Settlement Agreement uses "material impact on the child" as a central concept. While Jordan's Principle cases are based on the denial, delay, or lack of an essential service that was needed as a child, the Vancouver Circle of Experts expressed deep concern about the extent to which professionals would be able to claim retroactively, what the material impact of receiving services that were denied, delayed, or not provided during childhood, would be on an individual, either on a child at the time, or over time. "Material impact on the child," was modified to "impact on a person's health and well-being" in order to better account for how not having received an essential service(s) affected claimants.

1. Retrospective Nature of Claims Process

i. I anticipate that most claimants will not have access to historical documents that provide the evidence needed to demonstrate a confirmed need for an essential service that was either denied or delayed.

ii. The application process for compensation is, by nature, retrospective. The first way in which it is retrospective is that most claimants will need to obtain contemporaneous documentation of an essential service(s) that they needed during childhood and from which they would have benefited.

iii. The second way in which the application process is retrospective is that any evaluation, either by the claimant, or by a professional, will require a reflection on an association between essential services that were needed during childhood and different aspects of that child's life at the time, or an individual's current situation.

2. Considering Temporality and Causality

i. The compensation process is going to ask claimants and professionals to submit forms that identify essential services that are confirmed to have been needed but were denied, delayed or not available, during childhood. The Impact Assessment Questionnaire asks claimants to reflect on the extent to which denials, delays, or lack of those essential services had on different aspects of their well-being (e.g., meaning, purpose, hope, and belonging) during childhood. It also asks about their current function, given the nature of the essential services that were denied, delayed, or not provided during childhood.

ii. The Vancouver Circle of Experts expressed concern about asking First Nations claimants to reflect on the impact of not having received services during childhood on their sense of well-being at that time.

iii. Reflecting on the time when essential services were denied, delayed, or not provided during childhood, and a child's sense of meaning, purpose hope, and belonging, requires adult claimants and professionals to be able to make a link between these two factors. For example, they would need to make a link between not having received services to address mobility issues, and the frequency and intensity of impact this had on their ability to meaningfully engage in learning, recreational activities, cultural activities, and in relationships with their family and community.

iv. The main limitation with this approach is that of recall or reporting bias where the link between the two may be over-interpreted, or under-interpreted. Answering a question about the past requires a claimant to be able to understand the question, recall the time in their life when the essential service was needed, make an inference or estimation of the impact, map their answer onto the response categories provided, and then edit their answer (Streiner, Norman, & Cairney, 2014). The risk with the latter is that claimants may respond in a manner that is most socially desirable, or they may respond in a manner that maximizes benefit. There is a risk of obtaining a skewed distribution whereby the responses of a large proportion of claimants indicate the highest level of impact. The problem with this is that it will make it difficult to differentiate those who are eligible for greater levels of compensation from those eligible for lower levels of compensation.

v. At the same time, it is important to consider the importance of historical narratives in the lives of First Nations claimants (Absolon, 2022; Laurila, 2016). The voices of

those who have a story to tell about the harm they experienced as a child in not obtaining services they would have benefited from, should be given an opportunity to be taken into account. ***I therefore support the idea that questions regarding the connection between not receiving services in the past and impact in the past be considered in a pilot test and that attention be paid to the feasibility, understandability, acceptability, and distribution of responses.***

vi. If a family member was claiming compensation on behalf of someone who had died during childhood, questions regarding essential services not provided and the impact on the child at the time would be the only way to ascertain how denials, delays, or gaps had an impact. Questions regarding the present would be irrelevant.

vii. The Vancouver Circle of Experts were comfortable with drawing an association (as opposed to a causal link) between not receiving services and supports in the past, and how a person's current functional challenges are declared in their current life. Question 4 in the Impact Assessment questionnaire taps into this aspect by asking claimants to keep in mind essential services that were not provided during childhood and how any about trouble seeing, hearing, moving around or using hands or fingers, learning or remember, mental health, communication, and other developmental or chronic health conditions, impact them currently. ***I therefore support the idea that questions regarding the connection between not receiving services in the past and current function be considered in a pilot test and that attention be paid to the understandability, acceptability, and distribution of responses.***

viii. Reflecting on the time when essential services were denied, delayed, or not provided during childhood, and an adult's current functioning requires claimants and professionals to use concurrent function as the indicator of impact. It is important to note that these two factors, denial, delay or gap in services and supports, and concurrent function CANNOT be treated as causal and linear. They should be treated as independent, and possibly associated, phenomena. For example, there may be a claimant whose mobility issues were not addressed during childhood. Now, as an adult, this person's mobility is considerably restricted. These phenomena coexist, but a causal linear relationship cannot be inferred as there may be other factors that contributed to a person's current mobility impairment. An association treats them as co-existing and linked, but not that one caused the other.

The connection between essential services denied, delayed, or not provided during childhood, and a child's well-being at the time, or an adult's life in the present, co-exist, but are not causal and linear phenomena. In other words, one did not LEAD to the other.

C. Given the retrospective nature of this inquiry, what proxies can be used to estimate impact of denial, delay, or lack of provision of an essential service?

A number of proxies were considered to estimate impact: number of essential services denied, delayed or not provided, developmental outcomes, diagnosis or type of impairment, participation in personal, family, and community life, remoteness, relocation, and death.

There are 3 key concepts to unpack in order to fully answer this question. First, what is an 'unmet need for an essential service(s)?' Second, 'what is an essential service?' Third, what is 'impact'?

1. What is an unmet need for an essential service(s)?

i. First Nations individuals and communities often face significant barriers in accessing health, social care, and education services. Colonial legacies and discriminatory policies have created a status quo in which First Nations communities have not been able to provide services that their members need (Greenwood & de Leeuw, 2012; Vives & Sinha, 2019).

ii. Compensation for the denial, delay or gap in receiving essential services is informed by the literature on 'unmet need'. Most of this literature is U.S.-based, and almost exclusively describes the nature or prevalence of unmet need, or examines, correlates or factors that may explain unmet need (Lopez et al., 2019; Ocanto et al., 2020; Parasuraman et al., 2018; Faubert et al., 2020). There is no literature evaluating the longer term 'impact of unmet need'. In this way, there is no precedent, that I am aware of, to guide evaluation of the impact of unmet needs over time.

iii. An example of the absence of the impact of unmet needs for one condition is the recent scoping review of the literature conducted by Gerlach et al. (2022) which found that there was a clear lack of data on Autism Spectrum Disorder (ASD) and unmet health, social, and educational service needs among Indigenous children with ASD in Canada. Therefore, peer-reviewed literature provides minimal guidance in this regard.

iv. Needs become unmet when services and supports are inadequate, inconsistent, or nonexistent (Haller, 2019). There are geographic, administrative, and financial reasons for First Nations children not having their needs met, including remoteness and federal/provincial jurisdictional issues (Vives & Sinha, 2019; Vives et al., 2017). Although the literature acknowledges that children's' needs being unmet pose significant problems for the wellbeing of those children, their families, and their communities (Vives & Sinha, 2019), no studies have tracked the longitudinal impact of unmet need on child or adult well-being.

v. In the United States, lower educational levels, the location of care relative to the location of the family, and socioeconomic factors were explanatory variables for needs not being met (Lopez et al., 2019; Ocanto et al., 2020). The literature on

unmet needs in the United States confirms that there are long-term sequelae associated with unmet needs. These include poorer health outcomes, more frequent disruptions in individual functioning, and increased complications with economic well-being (Faubert et al., 2020).

vi. In this report unmet needs for essential services refer to denials, delays, or gaps in services that First Nations children were confirmed to have needed but did not receive.

2. What is an essential service(s)?

i. I was provided with an initial listing of essential services when the Final Settlement Agreement was being drafted. It was comprised of a list of professionals that claimants could have consulted, different types of medical equipment that could have been provided, educational services and technologies, medical transportation, dietary supplements, mental wellness supports, and supports for oral health that would address different areas of difficulty in function.

ii. Upon consultation with the Vancouver Circle of Experts, it was determined that this list did not adequately account for all services that would qualify claimants for compensation. In fact, it became clear that a list of essential services was more exclusionary than helpful for claimants.

iii. It was therefore recommended that a Framework for Essential Services be developed instead. An adapted list was created and inserted into the Framework as an example of essential services that may have been denied, delayed, or not provided. Working from the initial list, the Vancouver Circle of Expert group recommended the following:

a. rather than listing professionals that could have been consulted, develop a description of what professionals do, rather than who they are. For example, instead of referring to services provided by a physiotherapist, refer to services that help individuals with movement of their hands, arms, and legs (e.g., physiotherapists, adapting mobility devices)
b. add an item pertaining to services and supports that assist with communication (Helping individuals with expressive and receptive language skills (e.g., speech and language pathologists, *augmentative and alternative communication*)
c. add orthotics to medical equipment
d. draw on language from the ICF-CY to describe environmental supports (e.g., Equipment, products, processes, methods and technologies)
e. provide examples of medical equipment for diagnosed illnesses (e.g., percussion vests)
f. add surgeries to the list

3. Can Number of Essential Services Denied, Delayed or Not Provided be Treated as a Proxy?

The relationship between unmet needs for essential services and impact on health and well-being over time is complex and cannot easily be measured. Most importantly the number of unmet needs may not be reflective of the impact on an individual. Some unmet needs may be more important than others, and the impacts on individuals with the same unmet needs will not be the same. Professionals who were not providing care or who had no knowledge of the adult as a child, may not feel comfortable opining on the difference that an essential service would or would not have made with any level of confidence. ***In my opinion, scaling compensation based on the number of essential services that were not provided should not be used as a proxy for impact.*** The existence of an unmet need for essential services can be used as a threshold qualification for claimant compensation.

i. First Nations children needed essential services to address needs that would address different areas of function (e.g., learning, getting around, development) so that their sense of well-being at home with their families, at school with their peers and teachers, and in their community in general, would be optimal. Some of these essential services were considered 'medical' and are related to specific health conditions (e.g., diabetes), while other services were focused on their learning, and sense of belonging.

ii. I do not recommend using number of essential services to evaluate impact and therefore greater and lesser compensation. Compensation should not be based on number of medical or social services and supports not provided as this assumes that they are of equal value. A more holistic understanding of impact would take into account the impact of not receiving services on a person's sense of well-being in their community. This is more consistent with the Culture as Intervention Model as well as the ICF. By asking about how their environment failed to provide them with what was needed to address functional challenges, responsibility for their full inclusion is placed on the denial, delay, and lack of services and supports, rather than on what First Nations individuals were or were not able to do or obtain themselves.

4. Can Child Development Outcomes be Treated as a Proxy?

I do not recommend using retrospective accounting of the impact of denial, delay, or gap in service on child development outcomes. This was not supported by the Vancouver Circle of Experts as they strongly advised that evaluation of the impact of not having received an essential service could not be objectively evaluated on developmental outcomes at the time, nor over time.

i. In order to ascertain the particular impact of a denial, delay, or gap in services on developmental child outcomes, longitudinal studies that follow children who

experienced these denials, delays or gaps over time, would be needed. To the best of my knowledge, as well as the knowledge of the Vancouver Circle of Experts, there are no studies that address any version of this question.

ii. No causal linear inferences can be made between a denial, delay or gap in a specific type of service, and a child's development outcomes as a child, as there are many other potentially confounding factors that inform developmental outcomes in addition to a denial, delay or gap in service. For example, no professional would be willing to testify that speech and language services denied during childhood would have achieved a specific or particular outcome. The difference that speech and language services make varies considerably from child to child and the outcome often is not evident until the service is provided.

iii. Asking professionals to provide an opinion on the particular impact of a shortfall in services on an individual claimant was also considered. For a variety of reasons this alternative was not considered prudent or feasible. A professional would have to believe that it is within their scope of expertise to describe how a denial, delay, or lack of an essential service as a child led to impacts on their physical, emotional, or spiritual development as a child, or as an adult. This would impose a significant burden on those completing the professional confirmation form as they would have to describe how aspects of the claimant's developmental outcomes were affected by the denial, delay, or lack of service. There is no clear scientific understanding to evaluate for example the immediate, intermediate, or longer- term effects of receiving vs. not receiving essential services such as physiotherapy or a psychoeducational assessment. There is no professionally accepted protocol or approach that would permit reliable assessments, and in particular permit them to be used comparatively as between individual claimants.

iv. The Vancouver Circle of Experts expressed concern over retrospective reporting which would require claimants to identify both the shortfall in services and the impact on their lives: both of these can be potentially re-traumatizing. They are certainly complex and subjective. ***A pilot study would enquire about how claimants experienced answering the questions.***

5. Can Quality of Life Be Treated as a Proxy?

Quality of life is a difficult construct to define, assess, and therefore use as a proxy for impact. What one person draws on to generate a representation of their quality of life, is different from what another person would draw on. This makes assessment and comparison of quality of life ratings across individuals meaningless. Existing measures of quality of life have not been validated in the First Nations context. ***I therefore do not recommend that quality of life be used as a proxy for impact.***

i. Quality of life is a very subjective and at the same time complex construct to describe and operationalize. This is especially so since not having received an essential service has the potential to impact the claimant in multiple ways (Lindly et al., 2016). That which constitutes quality of life is contested and factors that inform variability in quality of life are not only a product of biomedical factors, but other social aspects such as the environment, participation in life situations, and personal ties (Alford et al., 2013; Lach et al., 2006). Since quality of life deals with how people experience their health conditions and life overall, it is subjective and therefore difficult to measure (World Health Organization, 2007). The literature on quality of life is diverse, with definitions and descriptions of quality of life vary significantly (Fayed et al., 2012). Although there are multiple measures of quality of life (Janssens et al., 2015) there are no known measures of quality life that apply to First Nations. Thus, it is not a construct that is recommended for use in this context.

ii. The gold standard regarding evaluation of quality of life is to develop measures with and for the population for whom the measurement is intended (Streiner, Norman, & Cairney, 2015). Thus, if quality of life were to be used in this context, a definition would need to be agreed upon and then adapted to the local culture of the group being evaluated (Guillemin et al., 1993). This would take a great deal of time and always be challenging given that there is no quality of life measure specific to First Nations as well as differences amongst First Nations themselves. Those who will be assisting claimants in the application process would need to be able to understand quality of life in the same manner, across the country. This is not feasible.

6. Can Diagnosis or Type of Impairment Be Treated as a Proxy?

Neither diagnosis nor type of impairment should be treated as a proxy for impact as there is considerable variability in the needs of those with any specific diagnosis or type of impairment.

i. According to the International Classification of Functioning, Disability, and Health (WHO, 2002), impairment refers to problems in body function or structure. Functions refer to different systems in the body (e.g., sensory functions such as seeing, hearing, etc.). Impairment in any type of function such as a visual impairment will vary in level of severity between individuals and over time.

ii. When type of impairment is paired with unmet need for essential service, it is difficult to ascertain if 2 individuals with similar functional impairments or diagnoses would have benefited from the essential service in the same manner.

iii. Sometimes type of impairment is another way of saying diagnosis. The problem with using type of diagnosis as a proxy for impact is that there is no hierarchy of diagnoses that identifies 'Diagnosis A' as being more severe than 'Diagnosis B'. Furthermore, there is considerable variability of severity within any type of diagnosis. For example, someone diagnosed with an intellectual disability, may have

a mild level of impairment in cognitive function, whilst others may have more severe levels of impairment. The same is true for other diagnoses such as cerebral palsy or autism spectrum disorder. In this way, diagnosis does not, in and of itself, provide adequate information to infer impact.

iv. Compensation should not be directed at level or type of impairment. However, information about level or type of impairment and diagnosis (if it exists) should be used to describe to whom compensation is being provided.

7. Can Participation in Personal, Family and Community Life be Treated as a Proxy?

Participation in personal, family, and community life is a concept that is closely aligned with the questions in the Impact Assessment questionnaire. It was the central concept in the first questionnaire that I initially developed. However, my understanding is that participation is a construct that may not capture the full suite of First Nations' understandings of well-being. Even though this exact phrase is not specifically used in the Impact Assessment Questionnaire, it is located and inferred in questions 3 and 4. ***I highly recommend that instructions for the questionnaire describe, in more detail, which is meant by 'life' in question 4.*** In that question, if a person has difficulty currently seeing, there are a series of responses asking individuals to reflect on the extent to which difficulty seeing impacts their life. I would recommend that instructions elaborate on what is meant by life: personal life, family life, and life in your community.

8. Can Remoteness be Treated as a Proxy?

To the best of my knowledge, there are no objective indicators of remoteness that apply to the period 1991-2017. ***Respondents should, however, be asked about the time and/or method they used to access essential services. The greater the length of time and the more hardship they experience in getting there, the greater the impact.*** This is reflected in the Impact Assessment questionnaire.

i. Given the role that remoteness plays in accessing services and supports, and given the role that lack of access to services and supports has in the consideration of 'impact', I inquired about ways of integrating measurement of remoteness into the framework and/or questionnaire.

ii. Statistics Canada have developed remoteness indices using population centres and census subdivisions as the nodes. Indices exist for remoteness for the years 2011 and 2016. After consultation with Statistics Canada experts, these indices of remoteness were deemed as not appropriate as population centres may or may not have contained health, social care, or education services and supports.

iii. I was informed that Indigenous Services Canada developed remoteness indicators that were more specific to access to health care. However, these indicators were specific to the years in which they were developed. Their applicability to claimants who were children that were denied, delayed or experienced a gap in services in years other than for when the remoteness indicators were developed would not be relevant.

iv. The effect of remoteness on unmet need has been studied rigorously, particularly for children with high care needs in the United States (Zablotsky & Black, 2020; Lindly et al., 2020; Lindly et al., 2016).

v. In more rural and therefore remote areas, the burden on community service providers increases because they are expected to provide services to address the needs of community members spans across developmental stages and types of impairment and level of need (Vives & Sinha, 2019). Their capacity to meet this level of need is impeded by various contextual factors, not the least of which has been the discriminatory and inequitable funding (Vives & Sinha, 2019).

vi. Moreover, the isolation that individuals face in rural areas results in an increased vulnerability to mental health issues (Kelly & Chakanyuka, 2021). While First Nations communities provide community and social support, the lack of service provision and medical support, understandably, weigh heavily on the shoulders of families and caregivers.

vii. In the absence of objective indicators of remoteness, respondents should be asked about how far they had to travel, and what method they used to access essential services.

9. Can Relocation Be Used As A Proxy?

While some families remained on reserve or in their communities without adequate services and supports, others relocated to access those services and supports. This came at a considerable cost as they were cut off from their local support system and experienced isolation, discrimination, and stigmatization where they moved to. ***I support the inclusion of a question regarding relocation in the Impact Assessment questionnaire.***

i. The care of children with special care needs in First Nations communities has been contingent on the capacity of families and caregivers to meet those needs in a context where there are little to no local resources. They are often left with little choice but to move to urban centres to access those services and supports (Vives & Sinha, 2019).

ii. This relocation carries serious consequences for families and caregivers. Moving to urban centres to access care removes First Nations from their support systems and

communities, and positions them in environments that are unfamiliar and often culturally unsafe (Vives & Sinha, 2019). Given the unavailability of essential services and supports that are nearby, this type of relocation is therefore considered forced.

10. Can Death be Treated as a Proxy?

Death of a child that is related to an essential service that was not provided during childhood is a definite proxy for high impact. For example, if a child needed a medication that would have prolonged their life, or a medical procedure such as dialysis, or a surgery to address a heart condition, and if their death could be related to the denial, delay or lack of service, they should automatically be considered for being in the high impact category.

Furthermore, I recommend that if a child died prior to the age of 18, even if that death cannot be attributed to having been denied, delayed, or not provided essential services, questions pertaining to function as an adult in the IAQ (see question #4), should be adapted to focus on function as a child.

D. What method would you recommend to assess eligibility and impact and that would allow evaluators to determine greater and lesser levels of compensation?

There is no existing method that is reliable and valid to objectively assess eligibility for compensation, and level of impact of denial, delay, or lack of services for First Nations claimants. Agreement has been reached on a Framework for Essential Services that describes who can apply for compensation, how to apply for compensation, documentation that must be provided (if available), and lists examples of types of essential services that should be considered when reflecting on denials, delays and gaps in service(s). It is located in Appendix C.

The method that I recommend has to do with the completion of 3 key documents:

1. **Claim Form**
2. **Professional Confirmation of Essential Service Form (if historical documentation cannot be located)**
3. **Impact Assessment Questionnaire**

1. **The Claim form** is to be completed by the claimant and will ask them to provide brief key identifying information about themselves, the area of function and/or diagnosis for which the essential service was intended, and the type of essential service(s) that was denied, delayed, or not provided.

   i. The claims process is for essential services that are confirmed to have been needed by a First Nations child between 1991 and 2017 but were not provided or were delayed. With some minor exceptions, individuals claiming compensation must be above the age of majority in the province or territory where they live (age 18+ or

19+ depending on the jurisdiction). Where the adult claimant does not have legal capacity, a guardian, tutor or other substitute decision maker may claim compensation on their behalf.

ii. To the extent that is possible, claimants will be encouraged to locate relevant historical records to substantiate their claim. It is highly likely, that in most circumstances, there will either be insufficient historical records, or there will be significant barriers to obtaining those historical records.

iii. In the case where no historical records can be located, accessed, or produced, contemporaneous documentation through the Professional Confirmation of Essential Service Form will need to be completed.

2. **The Professional Confirmation of Essential Service** Form will ask professionals or other types of experts, with relevant expertise, to identify the area of function and/or diagnosis for which the essential service was intended, and the type of essential service that the claimant would have potentially benefited from, and how the claimant would have potentially benefited from this essential service. The professional or other expert completing this form should have the expertise to be able to generate an opinion about what was needed and how the individual would have potentially benefited. The professional or other type of expert will not be required to 'prove' that the First Nations claimant would have definitively benefited from the essential service. Instructions will specify that they should identify services and supports that would have been considered as a best practice at the time for any child.

i. Professionals and other types of experts will have access to online training that will help them to complete the form in a manner that is fair, considers services and supports that were available historically, and that would have been recommended at the time to address the claimant's functional impairment. It is important to highlight that compensation will not be contingent on what was not provided, but rather on the impact on the First Nations claimant's well-being. Professional confirmation will only attest to the First Nations claimant's eligibility for compensation insofar as the "*confirmed* need" element of a Jordan's Principle or Trout claim is concerned.

ii. The range of types of professionals that can complete the Professional Confirmation of Essential Service Form is very broad and include not only health and social care professionals, but also Elders and Knowledge Keepers if such professionals have relevant expertise about the essential service in question. When deciding on what professional should complete the form, expertise, scope of practice as well as accessibility will need to be considered.

3. An Impact Assessment Questionnaire (IAQ) has now been developed with a First Nations lens through the Assembly of First Nations (AFN) while taking into account my initial work

product, my findings through expert consultation and the principles of participation described earlier in this report.

Further, in the IAQ, the death of a child and relocation for more than 1 year entitle claimants to the higher level of compensation. As per above, I fully support using such criteria to differentiate claimants.

i. If the IAQ works as expected, it will generate a total score that can then be standardized to a value between 0 and 1 that should reflect level of impact. Using this method, scores between 0 and 1 may be subdivided into 2 or 3 categories to identify those with higher and lower levels of impact (2 categories), or those with mild, moderate, and severe levels of impact (3 categories). These categories could then be attributed a monetary level of compensation.

ii. Some of the questions in the IAQ lend themselves to using a matrix to arrive at an overall score for each of meaning, purpose, hope and belonging. This, put together with scores from the other questions will generate an overall score, which will then be standardized to a value between 0 and 1. A cut-off score for greater and lesser impact will then need to be identified. The extent to which these scores are aligned with the lived experience of individuals should be further ascertained during the pilot phase by conducting interviews with First Nations claimants who are invited to share their experience based on purposeful criteria (e.g., claimants from a more remote community, claimants who did and did not relocate, claimants who did not receive specific types of services and supports, claimants who have different types of functional challenges).

iii. Assessment, measurement, or evaluation are theoretically-laden and non-neutral processes about what should be taken into account, and what should be counted. Streiner, Norman and Cairney (2014) recommend questions be generated in a number of ways: theory, focus groups and key informant interviews as well as interviews with those for whom the assessment is intended, and expert opinion. This report has drawn on all of these methods except for interviews with First Nations individuals who will be applying for compensation. I recommend that these interviews take place at the piloting stage.

iv. During the piloting stage, the following questions should be addressed:

- ***i. Does the questionnaire fulfill its intended function under the FSA of using objective factors to categorize class members based on greater and lesser impact?***
- ***ii. What is the distribution of scores?***
- ***iii. How easy is the questionnaire to complete?***
- ***iv. How understandable is each question?***
- ***v. Are there any items that are unacceptable or objectionable?***
- ***vi. How much tie does it take to complete?***

vii. What instructions are needed to help First Nations claimants complete the forms and questionnaire?

viii. How much assistance do First Nations claimants need to complete the forms and questionnaire?

ix. Is there anything that should be added to the questionnaire that would strengthen the evaluation of impact?

x. How do First Nations experience being asked questions about the past?

III. Conclusion

1. There is no literature evaluating the longer term 'impact of unmet need'. In this way, there is no precedent, that I am aware of, to guide evaluation of unmet need over time.

2. It is possible to develop a method that will guide implementation of a claims process specific to the Jordan's Principle Class and the Trout Child Class. This method is presented in this report. It involves implementation of a:

    a. Claim Form
    b. Professional Confirmation of Essential Services Form, and
    c. Impact Assessment Questionnaire.

3. The 3 conceptual frameworks identify key concepts that inform the creation of these forms and the method for their implementation.

4. Number of essential services should not be used as a proxy for compensation. Nor should child development outcomes, quality of life, diagnosis, and type of impairment.

5. There are challenges associated with assessing impact about something that occurred in the past. The first is the risk of a strong emotional response; the second is under-interpretation of impact, and; the third is over-interpretation of impact.

6. The Impact Assessment Questionnaire is grounded in an Indigenous perspective, taking into account key indicators of well-being that have to do with meaning, belonging, purpose and hope. It also asks about current functional difficulties and the extent to which they impact a person's life. I highly recommend that the Impact Assessment Questionnaire be piloted. A pilot will inform what support is needed to complete the questionnaire, how understandable and acceptable the questions are, and whether the distribution of scores is skewed or not. The latter is important as an overly skewed distribution will make it more challenging to differentiate between those with greater and less impact.

Appendix A: Dr. Lach's Curriculum Vitae

LUCYNA M. LACH
Curriculum Vitae

My program of research has two main streams, the first focusses on documenting social determinants of living a life of quality among children, youth and young adults with neurodisabilities and their families, and the second focuses on the co-construction of systems of care that promote navigation of and access to supports and services needed by these individuals and their families. Projects addressing social determinants have documented caregiver health, parenting, income trajectories, educational outcomes, and utilization of health services by children and their primary caregivers. Funded by Kids Brain Health Network (KBHN) and using administrative and clinical databases, this work has revealed the heightened challenges faced by this population in the Canadian context. I have collaborated with Dr. David Nicholas (University of Calgary) to increase capacity across and within government and non-government organizations to create transparent and more efficient pathways of care. Organizations that families must navigate access to have come together in Vancouver, Edmonton, Watson Lake (Yukon), and Montreal, to collaborate and innovate through program development and training. In addition, I am part of CHILDBRIGHT, and am co-leading (along with Dr. Patrick McGrath) a randomized control trial entitled Parents Empowering Neurodiverse Kids. This project is evaluating a web-based parenting program that combines group coaching and educational modules, with parent-to-parent support for parents whose children have brain-based development disorders such as Autism Spectrum Disorder or Intellectual Disability AND a mental health problem. I am also a peer-reviewer for numerous journals and funding bodies.

As Associate Dean in the Faculty of Arts (2012-2021), I oversaw the Student Affairs portfolio where I led a number of initiatives to improve support that students receive from their point of entry until graduation. In this role, I provided academic leadership and contributed to various university-wide committees addressing student success and well-being. In the community, I am a board member on the CIUSSS Centre-Ouest Board of Directors, the Board of Governors at Centre Miriam, and the Board of Directors of Dans La Rue. Through my research and community engagement, I am committed to improving the lives of neurodivergent children, youth, and young adults and their families.

ACADEMIC APPOINTMENTS

June 2009 - Present McGill University, Faculty of Arts, School of Social Work, Associate Professor, Tenured

May 2004 – Present McGill University, Faculty of Medicine, Department of Paediatrics (Child Development Program) and Department of Neurology and Neurosurgery (Division of Neurology), Associate Member

November 2003 – May 2009 McGill University, Faculty of Arts, School of Social Work, Assistant Professor, Tenure Track

September 2001 – October 2003 McGill University, Faculty of Arts, School of Social Work, Assistant Professor, Special Status

January 1999 – Dec. 2000 University of Toronto, Faculty of Social Work, Sessional Lecturer

EDUCATION

Doctor of Philosophy, 2004
University of Toronto, Faculty of Social Work
Thesis: Social Experiences of Children and Adolescents Diagnosed With Intractable Epilepsy; Supervisor: Elsa Marziali

Master of Social Work, 1986
University of Toronto, Faculty of Social Work

Bachelor of Arts (Honours in Sociology), 1984
University of Toronto, University College

ADMINISTRATIVE APPOINTMENTS

2012-2021 McGill University, Faculty of Arts, Associate Dean (Student Affairs)

2020-2021 CO-CHAIR, Committee on Student Services (Subcommittee of Senate), McGill University

2018-2019 CHAIR, Committee for Implementation of the Policy Against Sexual Violence, McGill University

2012-2021 CHAIR, Committee on Student Affairs, Faculty of Arts, McGill University
CHAIR, Scholarship Committee
CO-CHAIR, Curriculum Committee, Faculty of Arts
MEMBER, Senate
MEMBER, Faculty Council, Faculty of Arts
MEMBER, Subcommittee on Student Affairs Policy
MEMBER, Subcommittee on Student Services
MEMBER, Enrolment and Student Affairs Advisory Committee
MEMBER, Exchange and Study Away Steering Committee

2011-2012 GRADUATE PROGRAM DIRECTOR, MSW Program, School of Social Work, Faculty of Arts, McGill University

2010-2016 MEMBER, Staff Selection, Promotion, and Tenure Review Committee, School of Social Work, Faculty of Arts, McGill University

2011-2012 MEMBER, Scholarship Committee, Faculty of Arts

2010-2011 MEMBER, Governance Task Force, Canadian Association for Social Work Education

2006-2010 UNDERGRADUATE PROGRAM DIRECTOR, BSW Program, School of Social Work, Faculty of Arts, McGill University

2006-2007 SUPERVISOR, MSW Student, Child Development Program, Montreal Children's Hospital

2004-2005 DIRECTOR, Centre for Applied Family Studies, Faculty of Arts, McGill University

2004-2006 MEMBER, BSW Committee, School of Social Work, Faculty of Arts, McGill University

2004-2008 MEMBER, Board of Accreditation, Canadian Association of Schools of Social Work

2003-2007 MEMBER, Curriculum Committee, Faculty of Arts, McGill University

2002-2003 ASSOCIATE DIRECTOR, MSW Program, School of Social Work, Faculty of Arts, McGill University

2001-2003 MEMBER, Staff Search Promotion and Tenure Committee (SSPT), School of Social Work, Faculty of Arts, McGill University

2001-2003 MEMBER, MSW Committee, School of Social Work, Faculty of Arts, McGill University

1999-2001 PROJECT DIRECTOR, Hospital For Sick Children, Research Institute. Population Health and Brain and Behaviour Divisions.

1997-1999 CONSULTANT, EARLY INTERVENTION SERVICES OF YORK REGION

1996-1997 MEMBER, STRATEGIC TRANSFORMATION AND REDESIGN TEAM, HSC

1991-1997 SUPERVISOR, MASTER OF SOCIAL WORK GRADUATE STUDENTS, HSC
Faculty of Social Work, University of Toronto
Faculty of Social Work, Sir Wilfred Laurier University
Faculty of Social Work, Washington University

RESEARCH

2020-2022 LES EXPÉRIENCES D'EXCLUSION ET D'INCLUSION SOCIALES CHEZ LES PERSONNES VIEILLISSANT EN SITUATION DE NEURODIVERSITÉ ET LEURS PROCHES. Shari Brotman (PI), Tamara Sussman (McGill), Émilie Raymond (Laval), Marie-Hélène Deshaies (Laval), Lucyna Lach (McGill), Daniel Dickson (Concordia), Laura Pacheco (CIUSSS de l'Ouest-del'île-de-Montréal); Zelda Freitas (CREGES-CIUSSS du Centre-Ouest-de-l'île-de-Montréal), Julien Simard (McGill) (collaborators);
$149,705 awarded by Société et culture (FRQSC) Action concertée – Programme de recherche sur les personnes aînées vivant des dynamiques de marginalisation et d'exclusion sociale
My role is to provide substantive support regarding the neurodisability literature and lived experience of families raising children/young/young adults with neurodisabilities; I will also provide input into the implementation of the project methods.

2020-2022 NOTHING WITHOUT US: TOWARDS INCLUSIVE, EQUITABLE COVID-19 POLICY RESPONSES FOR YOUTH WITH DISABILITIES AND THEIR FAMILIES. Jennifer Zwicker (PI), David Nicholas (Co-PI), Denise Keiko Shikako-Thomas (Co-PI), Chantal Camden, Mayada Elsabbagh, Anne Hudo, Matthew Hunt, Sebastian Jodoin, Lucyna Lach, Raphael Lencucha (Co-applicants), Neil Belander, Krista Carr, Robert Lattanzio, Nicky Lewis, Michael Prince (collaborators).
$199,965 awarded by Canadian Institutes of Health Research (CIHR) COVID-19 Mental Health and Substance Use Service Needs and Delivery Program
Using a mixed methods design, this research maps COVID-19 policies implemented in each province and their alignment with disability-inclusive design that promotes resilience and mental health, describes acute mental health needs of youth with
disabilities and their caregivers and co-designs recommendations using evidence to better match COVID-19 policy responses
My role is to support implementation of the qualitative component of the project.

2018-2020 WHO BENEFITS FROM GOVERNMENT DISABLITY FINANCIAL SUPPORT? AN ASSESSMENT OF HOW DISABILITY BENEFITS SUPPORT CAREGIVERS OF CHILDREN WITH SEVERE DISABILITIES IN CANADA AT DIFFERENT INCOMES. Jennifer Zwicker (PI), Daniel Dutton, Lucyna Lach, David Nicholas (Co-applicants), Rubab Arim, Dafna Kohen, Kathleen O'Grady (collaborators).
$74,675 awarded by Social Sciences and Humanities Research Council (SSHRC) Insight Development Program
This research uses a mixed methods approach to determine the take-up of federal disability benefits and supports among families of children/youth with DD in each province and across income levels.
My role is involves oversight of qualitative component of the project.

2017-2022 INTEGRATED NAVIGATIONAL SUPPORT FOR FAMILIES OF CHILDREN WITH NEURODEVELOPMENTAL DISABILITIES: A PILOT IN ALBERTA, BRITISH COLUMBIA, AND THE YUKON. David Nicholas and Lucyna Lach (Co-PIs), Jenn Zwicker and Community Partners
$199,992 awarded by Kids Brain Health Network
This is a community-based participatory project that involves the development of partnerships between managers/directors in the health, social services, and education sectors, non-government organizations, advocates, and family members. A collective community impact approach is being used to develop a shared understanding of the challenges that families of children with neurodisabilities face accessing services, mapping assets, and developing joint initiatives to improve families' experience of navigating services.
$750,000 (2018-2022) awarded by Azrieli Foundation
$660,000 (2018-2022) awarded by Anonymous Donor

2016-2022 PARENTING PROGRAM FOR CHALLENGING BEHAVIOUR IN CHILDREN WITH NEURODISABILITIES: STRONGEST FAMILIES NEURODEVELOPMENTAL. Patrick McGrath and Lucyna Lach (Co-PIs), Megan Aston, Christine Ellsworth, Anna Huguet, Patricia Lingley-Pottie, Jennifer McLean, Patricia Monaghan, Mike Sangster, Krista Sweet, Lori Wozney and Donna Thomson
$1,395,046 awarded by CIHR Strategic Patient Oriented Research (SPOR) entitled CHILD-BRIGHT: Child Health Initiatives Limiting Disability – Brain Research Improving Growth and Health Trajectories. Annette Majnemer, Steve Miller, Dan Goldowitz (Co-PI's) et al. I am co-principal investigator on one of 13 projects; value of the SPOR $25 Million.
3-arm RCT testing an online and telephone-based parent coaching intervention
Providing co-leadership for all aspects of the project

2016-2018 MECHANISMS OF INTERGENERATIONAL FAMILY VIOLENCE PERPETRATION TRANSMISSION: THE PHENOMENOLOGY OF ADOLESCENT AFFECT REGULATION. Katherine Maurer (PI), Robert Buckley, Lucyna Lach, Delphine Collin-Vezina, Heather MacIntosh (Co-Applicants).
$68,389 awarded by Social Sciences and Humanities Research Council (SSHRC) Insight Development Grant Program

Phenomenological study examining adolescent experience of managing difficult emotions
Contributing to recruitment, analysis and interpretation of data

2016-2019 THE FAMILY NAVIGATOR: A GLOBAL PARTNERSHIP TO EXPAND ACCESS TO CARE FOR AUTISM AND RELATED CONDITIONS. Mayada Elsabbagh , Brigitte Auger, Mimi Israel (Co-PIs), Marie-Josee Fleury, Ridha Joober, Keiko Shikako-Thomas, Peter Szatmari, Wendy Ungar (co-applicants), Jonathon Green, Sebastien Jacquemont, Lucyna Lach, Annette Majnemer, Laurent Mottron, Illina Singh (collaborators). CIUSS Montreal-West, ACCESS Canada, Montreal Children's Hospital, MUHC Technology Assessment Unit, World Health Organization, Autism Speaks (decision makers).
$377,778 awarded by CIHR Patient and Health Systems Improvement (PHSI) Grant Collaborator
RCT to evaluate the efficacy of a family navigator intervention for families of children with autism and other neurodisabilities

2015-2018 HEALTH ECONOMICS AND SOCIAL DETERMINANTS OF HEALTH (HE-SDOH): A FRAMEWORK FOR UNDERSTANDING SOCIOECONOMIC AND QUALITY OF LIFE OUTCOMES AMONG CHILDREN WITH NEURODISABILITIES AND THEIR CAREGIVERS. Lucyna Lach, David Nicholas, Herb Emery, Jennifer Zwicker (CoPI's), David Rothwell, Dafna Kohen, Rubab Arim, Gabriel Ronen, Nora Fayed, & Rachel Birnbaum.
$700,000 awarded by NeuroDevNet (NDN), National Centre of Excellence (funded by Industry Canada) Co-principal investigator role
Multiple projects using existing population-based, administrative, and clinical datasets to document various social determinants of health (income trajectory, ethnocultural status, social support, access to care) of children with neurodisabilities and their caregivers; findings support capacity building for health economic evaluations of NDN projects
Focus groups and individual interviews with parents of children with neurodisabilities at different stages of transition (dx, entry into school, high school, and leaving high school) regarding their experience of and need for support

2014-2017 SOINS EN COLLABORATION EN SANTE MENTAL JEUNESSE: CHARACTERISTIQUES DES INTERVENTIONS THERAPEUTIQUE ET QUALITE DES SERVICES. Lucie Nadeau, Andre Delorme (Co-PIs), Sara Fraser, Vania Jiminez-Siguoin, Lucyna Lach, Nicholas Moreau, Lourdes Rodriguez Del Barrio, & Cecile Rousseau
$477,734 operating grant awarded by CIHR (Partnerships in Health System Improvement)
role purpose of the project is to document outcomes and process indicators associated with 3 different models of delivery of mental health services
co-investigator; providing input into design of study and interpretation of findings

2014-2016 CP2: ENGAGING COMMUNITY PARTNERS FOR CHILDREN'S PARTICIPATION. Keiko Shikako-Thomas, Michael Shevell, Maryam Oskoui, Chantal Camdem, Lucyna Lach, Isabelle Émond, Nathalie Trudelle, Walter Wittich
Doug Maynard, Marie-Claire Major, Margaret Guest (Collaborators)

Nadine Bergeron (Knowledge User)
$12,500 planning grant awarded by CIHR Institute Community Support; OPHQ $17,500 and REPAR $17,500
co-investigator role; contribute to planning and execution of a KT event with community partners invested in facilitating participation of children with CP

2012-2015 POVERTY AND ETHNOCULTURAL DIVERSITY AS THE CONTEXT FOR PARENTING AND SERVICE ACCESS FOR CHILDREN WITH NEURODEVELOPMENTAL DISORDERS IN MONTREAL, QUEBEC. Lucyna M. Lach, David Rothwell, Cecile Rousseau, Sebastien Breau, Monica Ruiz-Casares, Dana Anaby, Daniel Amar, Peter Rosenbaum, Dafna Kohen, David Nicholas.
$20,000 awarded by McGill University; McGill University Collaborative Grant Competition; Additional $15,000 from SSHRC to CIHR internal grant; McGill University
primary investigator
conduct a review of literature, focus groups, and planning grant meeting to prepare submission to CIHR or provincial funding body

2010-2014 THE HEALTH OF CANADIAN CAREGIVERS: USING ADMINSTRATIVE HEALTH SERVICES DATA TO UNDERSTAND DETERMINANTS OF HEALTH. Jamie Brehaut, Dafna Kohen, Peter Rosenbaum, Anton Miller, Lucyna M. Lach, Marni Brownell, Kimberley McGrail, Rochelle Garner, Rubab Arim & Anne Guevremont (Collaborator)
$349,699 awarded by the Canadian Institutes of Health Research; Operating Grant
co-investigator
provide input into design, implementation, analysis, and interpretation of findings

2010-2014 DETERMINANTS OF ACTIVE INVOLVEMENT IN LEISURE FOR YOUTH: DAILY LIVING WITH DISABILITY. Annette Majnemer, Lucyna M. Lach, D. Maltais, Barbara Mazer, Line Nadeau, P. Riley, C. Rohlicek, Norbert Schmitz.
$388,272 awarded by the Canadian Institutes of Health Research; Operating Grant
co-investigator
provide input into design, implementation and analysis of findings

2010 A DIALOGUE ON THE HEALTH OF CAREGIVERS OF CHILDREN WITH DISABILITIES. Jamie C. Brehaut, Dafna E. Kohen, and Rubab G. Arim, Lucyna M. Lach, Peter Rosenbaum, Anton Miller, & Rochelle Garner.
$40,000 awarded by the Canadian Institutes of Health Research; Meetings, Planning, and Dissemination Grant.
co-investigator
presented results related to health of caregivers of children with chronic health conditions and neurodevelopmental disorders to policy makers, institutional and clinical leaders, advocates and parents

2009-2015 CIHR TEAM IN PARENTING MATTERS! THE BIOPSYCHOSOCIAL CONTEXT OF PARENTING CHILDREN WITH NEURODEVELOPMENTAL DISORDERS IN CANADA. Peter

Rosenbaum (Nominated Principal Investigator), Lucyna M. Lach (Co-Principal Investigator); Dafna Kohen (Co-Principal Investigator); Michael Saini, Rochelle Garner, Rachel Birnbaum, David Nicholas, Jamie Brehaut, Delphine Collin-Vezina, Ted McNeill, Alison Niccols, & Michael McKenzie and collaborators
$780,114 awarded by the Canadian Institutes of Health Research; Emerging Team Grant: Children with Disabilities (Bright Futures For Kids With Disabilities) Competition
co-principal investigator – rated as 1st of 8 studies reviewed in this competition
responsible for conceptualizing the grant, managing the research teams, implementation of 4 projects, training and supervision of RAs, interpretation of findings, and dissemination

2009-2011 A SYNTHESIS REVIEW OF INTERVENTIONAL OUTCOMES IN PAEDIATRIC AUTISM. David Nicholas, Lonnie Zwaigenbaum, Sheila Roberts, Joyce Magill-Stevens, Lucyna M. Lach, Margaret Clarke, and Decision Makers Margaret Whelan, Laura Cavanagh, Margaret Spoelstra,
$99,960 awarded by the Canadian Institutes of Health Research Synthesis Grant: Knowledge Translation
co-investigator – rated as 1st of 68 studies submitted to the competition
responsible for developing methods, recruitment, training and supervision of RAs, interpretation of findings.

2009-2014 OUTCOME TRAJECTORIES IN CHILDREN WITH EPILEPSY: WHAT FACTORS ARE IMPORTANT? QUEBEC SUBSAMPLE OF THE CANADIAN STUDY OF PAEDIATRIC EPILEPSY HEALTH OUTCOMES. Lucyna M. Lach (Principal Investigator), Michael Shevell, Lionel Carmant, Gabriel Ronen, David Streiner, Peter Rosenbaum, Charles Cunningham, & Michael Boyle.
$255,820 awarded by the Ministère de la Santé et des Service Sociaux
principal investigator – funding received to collect data in Quebec (Montreal Children's Hospital and Ste. Justine) and to contribute to the pan-Canadian study on HRQL in epilepsy (see below)
responsible for all aspects of implementing this research
additional funding received from CRIR ($15,000), McGill University Faculty of Arts ($7,500), Faculty of Medicine ($5,000), MUHC Research Institute ($2,500), VP Research ($7,500), and CIHR McMaster Team ($50,000)

2008 PARENTING IN A BIOPSYCHOSOCIAL CONTEXT: CHALLENGES, SUCCESSES, AND THE IMPACT OF PARENTING ON THE WELL-BEING OF CHILDREN WITH NEURODEVELOPMENTAL DISORDERS IN CANADA. Peter Rosenbaum (Nominated Principal Investigator), Lucyna M. Lach (Co-Principal Investigator); Jamie Brehaut, Delphine Collin-Vezina, Rochelle Garner, Dafna Kohen, Ted McNeill, David Nicholas, & Michael Saini.
$9,927 awarded by the Canadian Institutes of Health Research Emerging Team Grant Competition: Children with Disabilities (Bright Futures for Kids with Disabilities); Letter of Intent
co-principal investigator – one of 9 studies (out of an original 16) funded to develop a full proposal for funding to be submitted in September 2008.
responsible for team meeting in Ottawa on the 12 and 13th of June, coordinating development of the grant proposal and final submission of the grant proposal.

2008-2009 PARENTING CHILDREN AND ADOLESCENTS WITH CHRONIC HEALTH CONDITIONS AND DISABILITIES: A SYNTHESIS OF THE RESEARCH. Lucyna M. Lach (Principal Investigator), David, Nicholas, Ted McNeill (Michael Saini and Peter Rosenbaum as collaborators)
$36,983 awarded by the Social Sciences and Humanities Research Council – Research Development Initiative (SSHRC-RDI)
primary applicant – study funded to conduct a systematic review of parenting literature and to develop a theoretical model for use in future studies
responsible for project management, develop of algorithm, supervision of students and research assistants, writing up final report.

2008-2013 OUTCOME TRAJECTORIES IN CHILDREN WITH EPILEPSY: WHAT FACTORS ARE IMPORTANT? Gabriel M. Ronen, David L. Streiner, Peter L. Rosenbaum, Lucyna M. Lach, Michael H. Boyle, & Charles E. Cunningham.
$767,485 awarded by the Canadian Institutes for Health Research (CIHR)
co-applicant – study funded to test a theoretical model of determinants of health related quality of life in children and adolescents with epilepsy
responsible for development of theoretical model tested, analysis and interpretation of pilot data, choosing measures, project management.

2007-2011 DETERMINANTS OF PARTICIPATION AND QUALITY OF LIFE AMONG ADOLESCENTS WITH CEREBRAL PALSY. Annette Majnemer, Denise Keiko Thomas, Michael Shevell, Lucyna M. Lach, Mary Law, Norbert Schmitz, (and Allan Colver, Kathleen Montpetit, France Martineau, Michele Gardiner, Louise Koclas as collaborators).
$300,834 awarded by the Canadian Institutes for Health Research (CIHR)
co-applicant – study funded to test a theoretical model of determinants of participation and quality of life
responsible for choosing measures, interpretation of data, publications.

2007-2008 DETERMINANTS OF PARTICIPATION IN LEISURE ACTIVITIES AMONG ADOLESCENTS WITH CEREBRAL PALSY. Annette Majnemer, Denise Keiko Thomas, Michael Shevell, Lucyna M. Lach, Mary Law, Norbert Schmitz, Allan Colver, Kathleen Montpetit, France Martineau, Michele Gardiner, Louise Koclas.
$40,000 awarded by the Réseau provinciale de récherche en adaptation-réadaptation (REPAR)
co-applicant – study funded to test a theoretical model of determinants of participation

2007-2009 REHABILITATION SERVICES FOR PRESCHOOL CHILDREN WITH PRIMARY LANGUAGE IMPAIRMENT: INDIVIDUAL VS DYAD INTERVENTION. Barbara Samuel (Mazer), Annette Majnemer, Lucyna M. Lach, Elin Thordardottir, & Michael Shevell.
$258,632 awarded by the Fonds de Récherche en Santé du Québec (FRSQ- Subventions de Recherches Cliniques ou en Santé des Populations)
co-applicant – study funded to examine effectiveness of dyadic versus traditional approaches to providing rehabilitation services for preschool children with language impairment.

2006-2008 PANDEMIC PLANNING FOR PAEDIATRIC CARE. David Nicholas, Beverley Antle, Donna Koller, Cynthia Bruce-Barrett, Anne Matlow, Randi Shaul Zlotnik, & Lucyna M. Lach.
$159,632 awarded by the Canadian Institutes for Health Research
co-applicant – study funded to review existing institutional, provincial and federal policies and build a consensus for best practices to guide paediatric-based pandemic planning.
responsible for liaison with Quebec-based paediatric hospitals and rehabilitation centres.

2006-2007 CHILDHOOD-DISABILITY – LINK: A WEBSITE LINKING INFORMATION AND NEW KNOWLEDGE TO SERVICE PROVIDERS AND FAMILIES. Annette Majnemer, Jeffrey D Atkinson, Kim Cornish, D Feldman; Eric Jean Fombonne, S Ghosh; Eva Kehayia, Nicole Korner-Bitensky, Lucyna M. Lach, Mindy Levin, Catherine Limperopoulos, F Malouin, Barbara Mazer, Line Nadeau; Michael Shevell; Laurie Snider.
$20,048 awarded by the Réseau Provincial de Récherche en Adaptation-Réadaptation, Fonds de Récherche en Santé du Québec.
co-applicant – study funded to develop plans for a website that will provide a forum for exchange of evidence regarding childhood disability
regular written contribution to web-site regarding research progress, publications

2006-2007 DETERMINANTS OF QUALITY OF LIFE IN ADOLESCENTS WITH CEREBRAL PALSY: A QUALITATIVE STUDY, Annette Majnemer, Lucyna M. Lach, Michael Shevell, Denise Keiko Thomas.
$7,500 awarded by the Montreal Children's Hospital Research Institute
co-applicant – study funded to build a theoretical model of factors that influence quality of life in adolescents with cerebral palsy
project management, training of interviewers and supervision of data analysis

2005-2007 THE HEALTH OF CANADIAN CAREGIVERS: CAN A NATIONAL LONGITUDINAL DATASET BE USED TO MODEL THE HEALTH OF CAREGIVERS OF CHILDREN WITH DISABILITIES? Jamie Brehaut, Dafna Kohen, Anne F. Klassen, Lucyna M. Lach, Anton Miller, Peter Rosenbaum.
$274, 464 grant awarded by the Canadian Institutes for Health Research. Operating Grant – Population Health.
co-applicant – study funded to examine the health of caregivers of Canadian children with chronic health conditions and disabilities using the National Longitudinal Study of Children and Youth (NLSCY) in Canada
team leader for analysis and interpretation of data pertaining to caregivers of children and youth with neurodevelopmental disabilities; contribute to interpretation of SEM pertaining to health of caregivers of children with chronic health conditions and disabilities

2005-2006 LATENCY AGE CHILDREN WITH EPILEPSY AND THEIR PEERS : PERCEPTIONS OF PEER RELATIONSHIPS AND SOCIAL SUPPORT. Lucyna M. Lach, Beverley Antle, Janice Hansen, Catherine Frazee and Karen Yoshida.

$16,000 grant awarded by the Réseau Santé Mentale et Neuroscience, Fonds de Récherche en Santé du Québec
principal applicant - funding received to complete analysis on peer study previously funded by the Bloorview Children's Hospital Foundation
primary responsible for completion of data analysis and dissemination

2004-2006 AN EVALUATION OF THE RELEVANCE, FEASIBILITY AND VALIDITY OF WEB-BASED DATA COLLECTION FOR CHILDREN. David Nicholas, Nancy Young, Catherine Boydell, Ross Hetherington, James Varni, Laurie Snider, Lucyna M. Lach, & Gillian King.
$125,384 grant awarded by the Canadian Institutes for Health Research. Operating Grant – Advancing Theories, Frameworks, Methods and Measurement in Health Services and Policy.
co-applicant – study funded to examine relevance, feasibility and validity of gathered using web-based versus paper and pencil or face to face data gathering techniques;
sharing responsibility for the data gathered from the Montreal site with Laurie Snider

2004-2006 INTERSECTING BARRIERS TO HEALTH FOR IMMIGRANT WOMEN WITH PRECARIOUS STATUS. Jacqueline Oxman-Martinez, Nazilla Khanlou, Swarna Weerasinghe, Vijay Agnew, Lucyna M. Lach, Louise Poulan de Courval, Jill Hanley, Merle Jacobs.
$100,000 grant awarded by the Canadian Institutes for Health Research. Operating Grant – Reducing Health Disparities and Promoting Equity for Vulnerable Populations.
co-investigator – initially invited as a collaborator but status has been officially revised with CIHR to that of a co-applicant;
development, implementation and analysis of interviews conducted with health care providers about services offered to women with precarious immigration status

2003-2006 PRÊT! PAS PRÊT! JE VIEILLIS! COMMENT L'ENTOURAGÉ DE L'ADOLESCENT AYANT UNE INCAPACITÉ MOTRICE LE SOUTIENT DANS SO PARTICIPATION SOCIALE. Sylvie Tétrault, Monique Carriére
$134, 856 grant awarded by the Fonds Québécois de la Recherche sur la Société et la Culture.
collaborator – study funded to examine factors that facilitate and impede transition from adolescence into young adulthood in those with physical disabilities
responsible for Montreal site (English component); supervision of RAs who will be interviewing adolescents, young adults, parents, and health care professionals; supervision of data analysis.

2003-2004 FEASIBILITY STUDY FOR MULTI-SITE RANDOMIZED TRIAL OF INTERVENTION FOR DEPRESSED OLDER PATIENTS IN PRIMARY CARE SETTINGS. Jane McCusker, Martin Cole, Mark Yaffe, Dendukuri Nandini, Maida Sewitch, Martin Dawes, Philippe Cappeliez
$180,812 research grant awarded by the Canadian Institutes For Health Research
collaborator; pilot project funded to examine the feasibility of a randomized trial of problem solving therapy for older patients diagnosed with depression.
I was invited to participate in this project after it was funded. My contribution has included the following: process analysis of the delivery of the intervention; administering focus groups with allied health professionals, primary care physicians, and psychiatrists; analysis of focus group data.

2003-2005 QUALITY OF LIFE IN CHILDREN WITH EPILEPSY: WHAT CONSTELLATION OF FACTORS IS IMPORTANT? Gabriel M. Ronen, David L. Streiner, Charles Cunningham, Michael H. Boyle, Peter L. Rosenbaum, Lucyna M. Lach, and Joan K. Austin.
$80,000 research grant awarded by the Child Neurology Society/Foundation.
co-applicant; pilot project funded to examine the feasibility of launching a longitudinal study of moderators and mediators of quality of life of children between the ages of 8 and 13 diagnosed with epilepsy.
development of the theoretical model; selection of measures to be used in the study.

2000–2003 CHILD AND FAMILY ADAPTATION TO CHILDHOOD CHRONIC HEALTH CONDITIONS: A COMPREHENSIVE CONCEPTUAL FRAMEWORK OF PSYCHOSOCIAL RISK AND RESILIENCE. Judith Globerman, Jan Wallander, Gillian King, Pat McKeever, Jeff Jutai, Beverley Antle, Lucyna M. Lach, Ted McNeill, and David Nicholas
$293,000 research grant awarded by the Social Sciences and Humanities Research Council, Strategic Themes Competition: Society, Culture and the Health of Canadians
co-applicant; development of a theoretical model for the study and understanding of psychosocial risk and resilience factors in the adjustment of children with chronic health conditions and their families
development of the structure for the data collection (both quantitative and qualitative); conceptual analysis of over 500 measures; synthesis of information generated in the meta-analysis and meta-synthesis.

2000–2003 SOCIAL EXPERIENCES IN SCHOOL: PERCEPTIONS OF STUDENTS WITH PHYSICAL DISABILITIES AND CHRONIC HEALTH CONDITIONS. Beverley Antle, Lucyna M. Lach, Janice Hansen, Catherine Frazee, Karen Yoshida
$80,215 research grant awarded by the Bloorview Children's Hospital Foundation
co-principal investigator; study examines perceptions of peer relationships among children with cerebral palsy and epilepsy, and nominated peers
development of methodology; management of data collection; data analysis.

2001-2003 LONGITUDINAL OUTCOME OF PAEDIATRIC EPILEPSY SURGERY. Mary Lou Smith, Lucyna M. Lach, Irene I. Elliott, Sharon Whiting, Lynn McCleary
$117,594 research grant awarded by the Ontario Mental Health Foundation
study examines long term quality of life and neurocognitive outcomes in young adults (18-31) who received epilepsy surgery during childhood or adolescence
co-investigator; involves 2 sites: Hospital For Sick Children in Toronto and Children's Hospital of Eastern Ontario in Ottawa
responsible for qualitative interviews conducted with young adults who have intractable epilepsy but did not undergo epilepsy surgery; data analysis pertaining to social outcomes.

1999–2001 LONGITUDINAL STUDY OF OUTCOME FOR CHILDREN UNDERGOING EPILEPSY SURGERY. Mary Lou Smith, Lucyna M. Lach, Irene Elliott
$100,664 research grant awarded by the Ontario Mental Health Foundation

co-investigator; continuation of a multi-method study examining the biopsychosocial outcome of epilepsy surgery in children, adolescents and their families
shared responsibility for psychosocial (behavioural, emotional and family) component of the study; interviews with caregivers of children with epilepsy; analysis of psychosocial and qualitative data (parent-based).

1997-1999 OUTCOME OF EPILEPSY SURGERY: A MULTI-METHOD MULTIDIMENSIONAL APPROACH. Mary Lou Smith, Lucyna M. Lach, Irene Elliott
$98,000 research grant awarded by the Ontario Mental Health Foundation
co-investigator; a longitudinal, multi-method study examining the biopsychosocial outcome of epilepsy surgery in children, adolescents, their families
shared responsibility for psychosocial (behavioural, emotional and family) component of the study; interviews with caregivers of children with epilepsy; analysis of psychosocial and qualitative data (parent-based).

TEACHING

University Courses Given

Introduction to Practicum, SWRK222, McGill University, Faculty of Arts, School of Social Work, Undergraduate social work course, Winter 2020.

Integrative Seminar, SWRK422, McGill University, Faculty of Arts, School of Social Work, Undergraduate social work course, Winter 2022

Thought and Theory Development in Social Work, SWRK702, McGill University, Faculty of Arts, School of Social Work, PhD level required course, Fall 2020, Fall 2021

Critical Thought and Ethics, SWRK 525, McGill University, Faculty of Arts, School of Social Work, Undergraduate Required course, Fall 2009 to 2019.

Knowledge and Values, SWRK 612, McGill University, Faculty of Arts, School of Social Work, Graduate level required course, Fall 2009

Practice with Individuals and Families, SWRK 320 D1/D2 (changed to SWRK 320 and SWRK 326), McGill University, Faculty of Arts, School of Social Work, Undergraduate Social Work Course, Winter 2007 & Winter 2008

Disabilities and Rehabilitation, SWRK 669, McGill University, Faculty of Arts, School of Social Work, Graduate Social Work Course, Winter, 2005-2009

Family Assessment, SWRK 472, McGill University, Faculty of Arts, School of Social Work, Undergraduate Social Work Course, Fall, 2001-present

Health and Social Work, SWRK-609, McGill University, Faculty of Arts, School of Social Work, Graduate Social Work Course, Fall, 2001-2003

School Social Services, SWRK-465, McGill University, Faculty of Arts, School of Social Work, Undergraduate Social Work Course, Winter, 2002-2004

Social Work in the Health Field, McGill University, Faculty of Arts, School of Social Work, Undergraduate Social Work Course, Winter, 2002-present

Elements and Lab, 4103H, University of Toronto, Faculty of Social Work, Graduate Social Work Course, Fall, 2000.

Social Work Practice With Individuals and Families, SWK 4601S, University of Toronto, Faculty of Social Work, Graduate Social Work Course, Winter, 1999

Graduate Supervision – Post Doctorate

Angela Filipe (2017-2020)
Emily Gardner (2015-2021) – co-supervision with Dr. Anton Miller (UBC/BC Children's Hospital)

Graduate Supervision – PhD Thesis Supervision

Samuel Ragot	2022-present	TBD
Kifah Baniowda	2021-present	Barriers and facilitators to inclusive education for children with neurodisabilties in Palestine.
Jeff McCrossin	2019-present	Parent Training for Children with Neurodisabilities: The Role of Family
Gina Glidden	2013-2019	The Journey of Ladders and Snakes: Help-Seeking Among Mothers and Fathers of Children with Neurodisabilities (ND)
Sara Quirke	2012-2017	Exploring parenting factors as possible predictors and moderators of mothers' cognitive appraisals of the family impact of raising their child with a neurodisability.
Radha MacCulloch	2011-present	Exploring how Transition Programs Understand and Support the Meaningful Transition to Adulthood for Youth with a NDD: Insights from Service Providers,

		Youth, and their Parents
Aline Bogossian	2011-2017	Exploring 'Father Involvement' among Caregiving Fathers of Children and Youth with Neurodisabilities
Anne Ritzema	2010-2015	Predictors of Child Well-Being; Parenting Children with NDD
Sacha Bailey	2009-2017	The experience of hope among parents of children with Neurodisabilities
Judith Sabetti	2009-2013	Employment and Recovery in Mental Illness
Anne Marie Piche	2005-2011	Parental Practices in the Context of Caregiving Disruption: The Case of Post-Institutional Adoption
Janet Kuo	2001-2008	Caregiving Identities of Women with a Brother or Sister with Cerebral Palsy in Taiwan

Graduate Supervision – PhD Thesis Committee Member

John Aspler
(2015-2020) Fetal Alcohol Spectrum Disorder and Cerebral Palsy in the Canadaiin Media: A qualitative analysis of Media Discourse and Stakeholder Perspectives. (Integrated Program in Neuroscience)

Ro'fah Mudzakir
(2003-2011) Education for Children with Disabilities in Indonesia: Moving Toward Inclusion (School of Social Work)

Denise Keiko Thomas
(2007-2012) Determinants of Participation in Leisure Activities in Adolescents with Cerebral Palsy (School of Physical and Occupational Therapy, Faculty of Medicine)

CLINICAL APPOINTMENTS

May 1988 -
Aug. 2001 DIVISION OF NEUROLOGY, Hospital For Sick Children
assessment and treatment of children with neurological disorders and their families
crisis, adjustment and supportive counselling regarding developmental, behavioural and illness-related issues experienced by children diagnosed epilepsy, children undergoing epilepsy surgery, and their families
individual, couple, family and group psycho-educational modalities of treatment
consultation to schools regarding classroom management issues
member of an interdisciplinary team
supervise and teach M.S.W. students
conduct clinical research related to psychosocial outcomes and quality of life in this population

Febr. 1990 -
Dec. 1997 PRIVATE PRACTICE
part-time private practice
counselling individuals, couples and families regarding relationship difficulties, loss and bereavement, parenting, school and career problems, adoption issues, anxiety and depression

Febr. 1994 -
May 1996 KINARK CHILD AND FAMILY SERVICES (Newmarket)
part-time contract position
provided brief therapy intervention to clients on waiting list for family therapy

May 1986 -
May 1988 CYSTIC FIBROSIS SERVICE, Hospital For Sick Children
assessment and treatment of children and families
counselling individuals, couples and families regarding issues related to living with a chronic terminal illness
clinical issues included loss and bereavement, behaviour problems, school problems, eating disorders and parent/child interaction
adolescent support group
member of a multidisciplinary team

January 1985 -
May 1986 MEDICAL OUTPATIENT SERVICE, Hospital For Sick Children (MSW Placement)
assessment and treatment of individuals, families and group at medical or psychosocial risk

January 1985 -
May 1986 NEPHROLOGY SERVICE, Hospital For Sick Children (MSW Placement)
assessment and treatment of children who were undergoing life sustaining dialysis treatment or kidney transplants
established a peer support network for parents of children with nephrotic syndrome
group for adolescents

SUMMARY of AWARDS RECEIVED

Li Ka Shing Fellowship, Faculty of Arts, McGill University. May 2019.

Montreal Children's Hospital Research Institute. Rising Researcher Award. February, 2004.

American Epilepsy Society Young Investigator's Award, American Epilepsy Society Conference, Philadelphia, PA. December, 2001.

Hospital For Sick Children, Research Institute, Research Training Competition Graduate Award (RESTRACOMP)
1999-2000 - $35,000; 2000-2001 - $35,000

University of Toronto Fellowship Award
1996-1997 - $10,000; 1995-1996 - $10,000

Appendix B: Mandate Letter from Sotos LLP

Dear Lucy,

I am writing to supplement and clarify my previous communications to you outlining your mandate. Please provide a report addressing the following questions:

1. What conceptual frameworks exist to inform our understanding of a claims process that inquires about the impact, on First Nations individuals, of denials, delays, or gaps in essential services that took place between 1991 and 2017?

2. What are the challenges associated with asking about something that occurred in the past?

3. Given the retrospective nature of this inquiry, what proxies can be used to estimate impact?

4. What method would you recommend to assess eligibility and impact and that would allow evaluators to determine greater and lesser levels of compensation?

Thank you kindly.

Mohsen Seddigh
Associate
Office: 416.572.7320
Cell: 647.996.8228

Appendix C: Essential Services Framework

Framework of Essential Services

Who can claim compensation for not receiving an essential service from Canada or receiving it after delay?

A claim for compensation can be made if:

1. An essential service was needed by the claimant; and

2. The claimant or someone on behalf of the claimant asked Canada for an essential service that was denied or delayed in being provided. Or, the claimant needed the essential service, but it was not available or accessible to them (there was a gap in services), even if they did not ask for the service.

What is an "essential service"?

A service is considered essential if the claimant's condition or circumstances required it and the delay in receiving it, or not receiving it at all, caused material impact on the child.

Examples of types and categories of essential services are attached as an appendix to this Framework.

If the claimant needed a service that is not on the list of examples, it may still be considered an essential service under the settlement if not receiving the service had a material impact on the child.

What timeframe is covered?

Claimants are covered by this settlement if they needed the essential service as a child at any time from April 1, 1991 to November 2, 2017.

How to make a claim?

1. If the claimant requested a service from Canada that was delayed or denied, they may provide a copy of the letter, email or other document submitted to Canada requesting the service. If they do not have a copy, they may provide a statutory declaration confirming that they requested the service.

2. If the claimant did not request a service from Canada but required an essential service that was not available or accessible, they need to provide confirmation from a professional saying what essential service they needed, why it was essential and when they needed it, either through historical documentation or contemporary confirmation by a professional.

Confirmation can be in two forms depending on the answer to the following question:

Does the claimant have any kind of historical document stating that an essential service was needed?

If the answer is **YES**, please follow **Procedure A.**

If the answer is **NO**, please follow **Procedure B.**

Procedure A (to be completed if claimant has historical documentation confirming that an essential service(s) was/were needed)

1. Complete the Claim Form (when available).
2. Provide copies of the historical documentation confirming that an essential service(s) was/were needed.
3. If the historical documentation lacks specifics on the confirmed need for the identified essential service, a professional may complete the Professional Confirmation of Essential Services Form.
4. Complete the questionnaire (when available).

Procedure B (to be completed if the claimant has NO historical documentation stating that an essential service(s) was needed.

1. Complete the Claim Form (when available).
2. A professional completes the Professional Confirmation of Essential Services Form (when available).
3. Complete the questionnaire (when available).

What is historical documentation?

Historical documentation refers to old documents such as a health record or an assessment conducted by a health, social care professional, educator, or other professional or individual with expertise and knowledge of the need for this essential service and/or support.

Is there help in claiming compensation?

Yes. Once the claim form and other supporting documents are available, they will be released online at www.fnchildcompensation.ca. Support in completing these forms will be available through the Administrator.

Appendix – Examples of Essential Services

1. Some services provided by, or under the guidance and direction of, health, social care, and educational professionals who specialize in:

    a) Recommending services and supports with activities of daily living and safety in the home, school and community (e.g., occupational therapists, *adapted feeding devices*)

    b) Helping individuals with expressive and receptive language skills (e.g., speech and language pathologists, *augmentative and alternative communication*)

    c) Helping individuals with movement of their hands, arms, and legs (e.g., physiotherapists, *mobility devices*)

    d) Giving and interpreting hearing tests and recommending assistive devices related to hearing (e.g., assessment of hearing by audiologists, *hearing devices*)

    e) Testing vision and recommending corrective eyewear (e.g., optometrists, *advising on eyewear*)

    f) Teaching children with learning needs (e.g., special needs education teachers; supported child development consultants)

    g) Promoting infant, early childhood or adolescent development[2] (e.g., infant development consultants, child and youth workers, or early childhood educators).

    h) Conducting psychoeducational assessments, and provision of counselling (e.g., psychologists, social workers)

    i) Addressing delayed or problematic behaviours (e.g., early childhood educators, behavioural specialists, child and youth workers, social workers,)

    j) Recommending a specialized diet or nutritional intake (e.g., nutritionist, dietitian)

2. Equipment, products, processes, methods and technologies that are recommended in a cognitive assessment or individualized education plan.

3. Medical equipment, such as:

[2] Development refers to physical, social, cognitive, and mental health development

a) Equipment, products and technology used by people to assist with daily activities (e.g., environmental aids, including lifts and transfer aids and professional installation thereof)

b) Products and technology for personal indoor and outdoor mobility and transportation (e.g., mobility aids that include standing and positioning aids and wheelchairs)

c) Hospital bed

d) Medical equipment related to diagnosed illnesses (e.g., percussion vests, oxygen, insulin pumps, feeding tubes)

e) Prostheses and orthotics

f) Specialized communication equipment (e.g., equipment, products, and technologies that allow people to send and receive information that would otherwise be done verbally)

4. Medical transportation related to access to essential services, supports or products where the lack of transportation prevented access to the recommended service (e.g., people in remote/isolated, semi-isolated communities)

5. Specialized dietary requirements

6. Treatment for mental health and/or substance misuse, including inpatient treatment

7. Oral health (excluding orthodontics), such as:

    a. Oral surgery services, including general

    b. Restorative services, including cavities and crowns

    c. Endodontic services, including root canals

    d. Dental treatment required to restore damage resulting from unmet dental needs

8. Respite care

9. Surgeries

Appendix D: Professional's Confirmation of Essential Service Form

Professional's Confirmation of Essential Service Form

Guidelines for professionals completing this form

1. The purpose of this form is to assist those who are assisting claimants in obtaining official documentation to support their claim for class action compensation for Canada's historic failure to provide access to essential services to First Nations children at all or in a timely manner (e.g. past breaches of Jordan's Principle). First Nations claimants must demonstrate having experienced a denial, delay, or gap in an essential service. Historical documentation may be available for the denial or delay, whereas evidence of a gap can only be demonstrated by the completion of this Professional's Confirmation of Essential Service Form. Similarly, inadequate historical documentation may be supplemented by this Professional's Confirmation of Essential Service Form.

2. This form and the confirmation provided through it rely on a retrospective account of an essential service that was needed and its' association with how the claimant currently functions in, and experiences, their social world. There is no requirement to make a causal link (although in some cases this may be possible) between the essential service that was needed and not provided and how the claimant currently functions in and experiences their social world.

3. The intention in this form is to allow claimants who lack medical records to make a claim for compensation, and to avoid the claims process itself becoming an obstacle to their access to recompense for past harms.

4. Please complete this form if the claimant's identified need is within your general area of expertise. You do not have to be a specialist or medical doctor to complete this form (see list below).

5. If you are not able to complete this form for any reason, please consider referring the claimant to another professional with relevant expertise who may be able to assist the claimant in this regard.

6. It may not be necessary for you to consult archival records if you are comfortable completing the form based on your personal knowledge of the claimant and their needs while they were a child, or based on your current observations and the information provided by the claimant.

7. Please take into consideration what the 'standard of care or support' was at the time that the child needed the essential service(s). Bear in mind, that the nature of the claims in the Final Settlement Agreement will not have an impact on how present or future

care, needs, or health circumstances of the claimant are evaluated under Jordan's Principle.

1. Claimant's information

A. Tell us about the claimant

First name: _____

Last name: _____

Other Name(s): _____

Mailing address: _____

Date of birth: _____

2. Essential Service(s) that the Claimant Needed as a Child

A. Identify one or more specific essential services that the claimant needed when they were a child (Please be specific; for example, if the claimant needed a hospital bed as a child, specify that it was a hospital bed as opposed to "medical equipment". Similarly, if the claimant would have needed or benefitted from Vincristine in relation to childhood leukemia, please specify "Vincristine" as opposed to "anti-cancer medicines". For more information on what constitutes an "essential service", please see the Framework of Essential Services in Schedule A):

a) _____

b) _____

c) _____

d) _____

B. Explain how the claimant may/would have benefitted from the service(s) as a child and how the receipt of the service(s) 'is associated with'[3] the way in which the claimant currently functions in, and experiences, their social world:

_____
_____
_____
_____
_____

[3] The distinction between 'associated with' and 'has had an impact on' is an important distinction. Drawing a causal link between not having received a service or support and a person's functioning as an adult is not possible, as there are other factors that inform a person's current level of function. An 'association' implies that the event during childhood and a person's current level of function co-exist.

_____
_____

C. At approximately what age or age range would the claimant have benefitted from the essential service(s)?

Age: _____ or

Age Range:

- ☐ 0-3
- ☐ 3-6
- ☐ 6-9
- ☐ 9-12
- ☐ 12-15
- ☐ 15-adulthood

C. Specify the claimant's diagnosis/diagnoses, if applicable:

_____
_____
_____
_____

3. The Claimant's Level of Need

A. In what area would the claimant have benefitted from an essential service(s) as a child? (please check all that apply):

- ☐ Seeing
- ☐ Hearing
- ☐ Mobility
- ☐ Communication
- ☐ Dexterity
- ☐ Pain-related
- ☐ Learning

- ☐ Developmental
- ☐ Mental health-related
- ☐ Other: _____

B. How significant is/was the claimant's difficulty associated with the limitation or impairment for which the claimant needed the essential service(s). (You are *not* required in this form to ascertain that the delay, denial, unavailability or inaccessibility of an essential service *caused* the difficulty experienced by the claimant)?

- ☐ No difficulty
- ☐ Some difficulty
- ☐ A lot of difficulty
- ☐ Function is or was impossible

4. Professional's Information

Name: _____

Last name: _____

Medical license, other certification or registration number (if applicable): _____

Telephone number: _____

Address: _____

A. What is the claimant's relationship to you (for example, patient)? _____

B. How long have you known the claimant? _____

C. Do you have medical or other information on file relating to the above matters that you have certified on this form? Yes / No

D. Select the professional type that applies to you (check all that apply)[4]:

- ☐ Aboriginal Disability Case Manager

[4] Terminologies used to describe professions may represent historical terminology that may be outdated. No disrespect is intended. We have no intention to impose specific terminology (e.g., Indigenous vs. First Nations vs. Aboriginal).

- ☐ Assistive Technologist
- ☐ Audiologist
- ☐ Behavioural Consultant/Analysts
- ☐ Chiropractor
- ☐ Community Health Nurse
- ☐ Community Health Representative
- ☐ Counselling Services
- ☐ Dentist
- ☐ Early Childhood Learning and Care and Intervention (e.g., Early Childhood Interventionist/Educator, Aboriginal Headstart)
- ☐ Educational Professional
- ☐ Elder or Knowledge Keeper designated as such by your community
- ☐ Mental Health Professional (e.g., mental health nurse)
- ☐ Mental Health Therapist
- ☐ Midwife/Doula
- ☐ Neuropsychologist
- ☐ Nurse/ Nurse Practitioner
- ☐ Occupational Therapist
- ☐ Ophthalmologist
- ☐ Optometrist
- ☐ Orthodontist
- ☐ Otolaryngologist
- ☐ Pediatrician
- ☐ Physical Therapist

- ☐ Physician/Doctor
- ☐ Physiotherapist
- ☐ Psychiatrist
- ☐ Psychological Associate
- ☐ Psychologist (Clinical/Social/Educational)
- ☐ Psychotherapist
- ☐ Recreational Therapist
- ☐ Speech-Language Pathologist
- ☐ Social Worker
- ☐ Substance Use Professional (e.g., National Native Alcohol and Drug Abuse Program (NNADAP) worker)
- ☐ Other: _____

Professional's Signature: _____

Date: _____

Appendix E: Jordan's Principle Draft Impact Assessment Questionnaire

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
1. **If you are filling this out on behalf of a child's estate, did the claimant pass away from a condition related to the essential service you have identified?** (Y/N) *For example, if a child endured chronic kidney disease and failed to receive appropriate diagnostic or dialysis treatment, check this box.*						Yes	N	Will automatically place in "significant impact" ($40k+) category.
IMPACTS AT TIME OF DENIAL								

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
2. **Did you have to leave your community to access the essential service that you have identified? (Y/N)**							Y/N	This is a threshold question. The subsequent three questions are only presented if the individual answers Yes.
(a) If yes, was your relocation temporary or permanent to obtain an essential service you have identified?	1-2 Days (temporary)	1 week (temporary)	1 Month (temporary)	1 Month to 1 Year (Temporary -Semi-Permanent)	More than 1 year, but less than 2 years) Semi-Permanent	More than 2 years (Permanent)		
3. **When looking back on the time that you needed the essential service:**								

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
(a) To what extent did the delay or lack of essential service have on your sense of meaning? (e.g., mental ability to learn and understand)	Limited impact I was able to learn and understand without notable impact.	Some impact Some days I was not able to learn and understand without this essential service. On other days this did not impact my ability to learn and understand.	More impact This continually impacted upon my ability to learn and understand.	Most impact I was not able to learn and understand without this essential service.				From Thunderbird Framework: **meaning** (mental behaviour, expressed through intuition, understanding and rationale) Examples: learning and knowing one's culture, spirituality, access to resources to learn about culture, spirit, traditions, ceremony), etc.

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/ N	NOTES
(i) How long did this impact upon your sense of meaning? (e.g., your mental ability to learn and understand)	Limited impact This impacted upon me for less than 1 month.	Some impact This impacted upon me for more than 1 month, but less than [●] months	More impact This impacted upon me for more than [●] months, but less than [●] years	Most impact This impacted upon me from the time I required this essential service throughout my childhood.				

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
(b) To what extent did the delay or lack of essential service impact your sense of purpose? (e.g., your physical ability to participate in educational and recreational activities)	Limited impact I was physically able to participate in educational and recreational activities without notable impact.	Some impact Some days I was not able to physically able to participate in educational and recreational activities without this essential service. On other days this did not impact my physical ability to participate in education and recreational activities.	More impact This continually impacted upon physical ability to participate in educational and recreational activities.	Most impact I was physically not able to participate in educational and recreational activities without this essential service.				From Thunderbird Framework: **Purpose** (physical behaviour expressed through wholeness and way of being) Examples: having access to and participating in spiritual practices such as naming, clan identity, sacred medicines, rights of passage for one's nation (e.g., at puberty, fasting), etc.

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/ N	NOTES
(i) How long did this impact upon your sense of purpose? (e.g., physical ability to participate in education and recreational activities)	Limited impact This impacted upon me for less than 1 month.	Some impact This impacted upon me for more than 1 month, but less than [●] months	More impact This impacted upon me for more than [●] months, but less than [●] years	Most impact This impacted upon me from the time I required this essential service throughout my childhood.				

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
(c) To what extent did the delay or lack of essential service impact your sense of hope? (e.g., ability to participate in cultural activities, connect with culture or spirituality)	Limited impact I was able to participate in cultural activities and connect with culture and spirituality without notable impact.	Some impact Some days I was not able to participate in cultural activities and connect with culture and spirituality without this essential service. On other days this did not impact my ability to participate in cultural activities and connect with culture and spirituality.	More impact This continually impacted upon ability to participate in cultural activities and connect with culture and spirituality.	Most impact I was not able to participate in cultural activities and connect with culture and spirituality without this essential service.				From Thunderbird Framework: **Hope** (spiritual behaviour, expressed through belief and identity) Examples: knowledge of the original language of one's nation, knowing one's spirit name, knowing one's clan, knowing one's nation, knowing names of one's ancestors and generations, etc.

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/ N	NOTES
(i) How long did this impact upon your sense of hope? (e.g., ability to participate in cultural activities, connect with culture or spirituality)	Limited impact This impacted upon me for less than 1 month.	Some impact This impacted upon me for more than 1 month, but less than [●] months	More impact This impacted upon me for more than [●] months, but less than [●] years	Most impact This impacted upon me from the time I required this essential service throughout my childhood.				

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
(d) To what extent did the delay or lack of essential service impact your sense of belonging? (e.g., relationships with your family or community)	Limited impact I was able to create and maintain my relationships with my family and community without notable impact.	Some impact Some days I was not able to create or maintain my relationships with my family and community without this essential service. On other days this did not impact my ability to create and maintain my relationships with my family and community.	More impact This continually impacted upon my ability to create and maintain my relationships with my family and community.	Most impact I was not able to create and maintain my relationships with my family and community without this essential service.				From Thunderbird Framework: **Belonging** (emotional behaviour, expressed through attitude and relationship) Examples: connections and relationships to the land, culture, family, community one comes from, etc.

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
(i) How long did this impact upon your sense of belonging? (e.g., relationships with your family or community)	Limited impact This impacted upon me for less than 1 month.	Some impact This impacted upon me for more than 1 month, but less than [●] months	More impact This impacted upon me for more than [●] months, but less than [●] years	Most impact This impacted upon me from the time I required this essential service throughout my childhood.				
IMPACTS IN CURRENT CIRCUMSTANCES								
4. **In your life now, do you have difficulty with one of the following?** **If so, how does this impact upon your ability to engage with your community currently?**							Y/N	

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
(a) I have trouble seeing.	Does not notably impact my current life.	Impacts my life some days, but on other days it does not.	Continually impacts my life on a daily basis.	Cannot engage in certain aspects of daily life due to my difficulties in this area.			N	
(b) I have trouble hearing.	Does not notably impact my current life.	Impacts my life some days, but on other days it does not.	Continually impacts my life on a daily basis.	Cannot engage in certain aspects of daily life due to my difficulties in this area.			N	
(c) I have trouble moving around or using my hands or fingers.	Does not notably impact my current life.	Impacts my life some days, but on other days it does not.	Continually impacts my life on a daily basis.	Cannot engage in certain aspects of daily life due to my difficulties in this area.			N	

Question		Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
(d)	I have trouble learning or remembering.	Does not notably impact my current life.	Impacts my life some days, but on other days it does not.	Continually impacts my life on a daily basis.	Cannot engage in certain aspects of daily life due to my difficulties in this area.			N	
(e)	I have trouble with my mental health.	Does not notably impact my current life.	Impacts my life some days, but on other days it does not.	Continually impacts my life on a daily basis.	Cannot engage in certain aspects of daily life due to my difficulties in this area.			N	
(f)	I have trouble understanding people and sharing what I am thinking or feeling.	Does not notably impact my current life.	Impacts my life some days, but on other days it does not.	Continually impacts my life on a daily basis.	Cannot engage in certain aspects of daily life due to my difficulties in this area.			N	

Question	Category 1	Category 2	Category 3	Category 4	Category 5	Category 6	Y/N	NOTES
(g) I have a developmental condition, disability or disorder.	Does not notably impact my current life.	Impacts my life some days, but on other days it does not.	Continually impacts my life on a daily basis.	Cannot engage in certain aspects of daily life due to my difficulties in this area.			N	
5. What is the current impact of the delay or lack of essential service on your relationships with your culture, land, family and community?	Does not currently have a notable impact.	Impacts my life some days, but on other days it does not.	Continually impacts my life on a daily basis.	Cannot engage in certain aspects of daily life due to the impact upon my relationships with my culture, land, family and community.			N

CERTIFICATE CONCERNING CODE OF CONDUCT FOR EXPERT WITNESSES

I, Lucyna M. Lach, having been named as an expert witness by the plaintiffs, Xavier Moushoom, Jeremy Meawasige (by his litigation guardian, Jonavon Joseph Meawasige), Jonavon Joseph Meawasige, and Zacheus Joseph Trout, certify that I have read the Code of Conduct for Expert Witnesses set out in the schedule to the Federal Courts Rules and also reproduced in the appendix below, and agree to be bound by it.

Appendix - Code of Conduct for Expert Witnesses

(Rule 52.2)

Code of Conduct for Expert Witnesses

General Duty to the Court

- **1** An expert witness named to provide a report for use as evidence, or to testify in a proceeding, has an overriding duty to assist the Court impartially on matters relevant to his or her area of expertise.
- **2** This duty overrides any duty to a party to the proceeding, including the person retaining the expert witness. An expert is to be independent and objective. An expert is not an advocate for a party.

Experts' Reports

- **3** An expert's report submitted as an affidavit or statement referred to in rule 52.2 of the *Federal Courts Rules* shall include
    - **(a)** a statement of the issues addressed in the report;
    - **(b)** a description of the qualifications of the expert on the issues addressed in the report;
    - **(c)** the expert's current *curriculum vitae* attached to the report as a schedule;
    - **(d)** the facts and assumptions on which the opinions in the report are based; in that regard, a letter of instructions, if any, may be attached to the report as a schedule;
    - **(e)** a summary of the opinions expressed;
    - **(f)** in the case of a report that is provided in response to another expert's report, an indication of the points of agreement and of disagreement with the other expert's opinions;
    - **(g)** the reasons for each opinion expressed;
    - **(h)** any literature or other materials specifically relied on in support of the opinions;
    - **(i)** a summary of the methodology used, including any examinations, tests or other investigations on which the expert has relied, including details of the qualifications of the person who carried them out, and whether a representative of any other party was present;

- **(j)** any caveats or qualifications necessary to render the report complete and accurate, including those relating to any insufficiency of data or research and an indication of any matters that fall outside the expert's field of expertise; and
- **(k)** particulars of any aspect of the expert's relationship with a party to the proceeding or the subject matter of his or her proposed evidence that might affect his or her duty to the Court.

- **4** An expert witness must report without delay to persons in receipt of the report any material changes affecting the expert's qualifications or the opinions expressed or the data contained in the report.

Expert Conferences

- **5** An expert witness who is ordered by the Court to confer with another expert witness
  - **(a)** must exercise independent, impartial and objective judgment on the issues addressed; and
  - **(b)** must endeavour to clarify with the other expert witness the points on which they agree and the points on which their views differ.

- SOR/2010-176, s. 13

1. OVERVIEW

1. This is a motion by the plaintiffs for approval of the proposed final settlement agreement ("**FSA**") in the class proceedings described herein. The Defendant, Her Majesty the Queen in right of Canada ("**Canada**"), represented by the Attorney General of Canada, strongly supports the relief sought on this motion.[1]

2. The FSA provides compensation to class members and some of their family members based on two types of discriminatory treatment by Canada:

a) the chronic underfunding of First Nations child and family services ("**FNCFS**") on reserve and in the Yukon, which incentivized the removal of First Nations children from their families and communities; and

b) failure to comply with Jordan's Principle, a legal requirement that aims to prevent First Nations children from suffering delays, denials or gaps in receiving essential services contrary to their *Charter*-protected equality rights.

3. Class members have suffered a range of harms, including severe and sometimes permanent trauma; cultural alienation; separation from their families and loved ones; and inadequate medical care that led to suffering and even death.

4. The proposed settlement is the result of over two years of extensive and difficult negotiations. It provides $20 billion in payouts to class members pursuant to a claims process that will be designed by the plaintiffs and will avoid any possibility for the defendant to confront class members and challenge their claims. The FSA was drafted to ensure that:

[1] Affidavit of Valerie Gideon Affirmed September 1, 2022 ("**Gideon Affidavit**"), para. 5.

a) compensation and support for child class members is the priority;

b) compensation will be proportionate to the amount of harm suffered by each class member;

c) the claims process will be trauma-informed and culturally sensitive;

d) claims will be based on objective proxies for harm, minimizing the risk of re-traumatization by excusing claimants from having to provide an interview, examination, or other form of *viva voce* or narrative-based evidence;

e) class members will be supported by fully-funded mental health, cultural, administrative, legal and financial supports during the claims process;

f) those class members who are not eligible for direct payments may benefit indirectly from a substantial *cy-près* fund ("**Cy-près Fund**"); and

g) all settlement funds as well as income generated thereon will be distributed to the class, with no reduction for legal or other fees or disbursements, and any remaining funds at the conclusion of the claims period will be used solely for the benefit of the class. No settlement funds will ever revert to the defendant.

5. The FSA is the largest settlement in Canadian history, and one of the largest settlements in world history. It represents a monumental step toward reconciliation and provides life-changing relief to hundreds of thousands of historically marginalized First Nations youths and families. The FSA is also historic in having been First Nations-led throughout its negotiation, design and,

ultimately if approved, its implementation.[2] It is the product of extensive arm's-length negotiations with the defendant, outreach and consultations with First Nations communities and stakeholders, and the extensive use of experts' assistance throughout, all of which laid the foundation for the settlement before this Court.[3]

6. The FSA is fair and reasonable, and should be approved.

2. FACTS

2.1 Background

7. The FSA was negotiated in respect of claims for two categories of discriminatory behaviour by Canada, two different certified class proceedings, and six classes of plaintiffs.

8. In broad strokes, the FSA addresses Canada's (i) discriminatory FNCFS funding; and (ii) discriminatory provision of essential services to First Nations youth. There are six classes of individuals for whom compensation is provided:

a) **Removed Child Class**: The Removed Child Class are First Nations individuals who were removed from their homes between 1991 and 2022 as minors while they or one of their parents were ordinarily resident on reserve or in the Yukon.

b) **Removed Child Family Class**: The Removed Child Family Class is defined as parents, grandparents or siblings of the members of the Removed Child Class in the certification order. However, only the caregiving (biological, step and adoptive) parents or the caregiving (biological and adoptive) grandparents in this class are entitled to direct compensation.

c) **Jordan's Principle Class**: The Jordan's Principle Class is comprised of all First Nations minors living anywhere in Canada who between 2007 and 2017 had a

[2] Gideon Affidavit, paras. 7-8.; Affidavit of Janice Ciavaglia affirmed September 6, 2022 ("**Ciavaglia Affidavit**"), para. 15.
[3] Ciavaglia Affidavit, paras. 7-8.

confirmed need for an essential service and faced a denial, delay or service gap with respect to that needed essential service.

d) **Trout Child Class**: The Trout Child Class is comprised of all First Nations minors living anywhere in Canada who between 1991 and 2007 had a confirmed need for an essential service and faced a denial, delay or service gap with respect to that needed essential service.

e) **Jordan's Principle and Trout Family Class**: The Jordan's Principle and Trout Family Class is defined as parents, grandparents or siblings of the members of the Jordan's Principle Class and Trout Child Class. Only certain caregiving (biological, step and adoptive) parents or caregiving (biological and adoptive) grandparents of the members of the Jordan's Principle Class and Trout Child Class who suffered higher impact within this class are eligible for direct compensation under the FSA.

(a) The Underlying Claim: FNCFS & Removed Children

9. For decades, Canada knowingly underfunded child and family services for First Nations children living on reserve and in the Yukon. The underfunding persisted despite the heightened need for such services on reserve due to the inter-generational trauma inflicted on First Nations peoples by the legacy of the Residential Schools and the Sixties Scoop, and despite numerous calls to action by several official, independent fact-finders. The primary caregivers of the Removed Child Class generally make up the Removed Child Family Class.[4]

10. The essential problem is that Canada inadequately funded supportive services that would allow First Nations children to remain in their homes ("**Prevention Services**"), while fully funding the costs of care for First Nations Children who were removed from their homes and placed into out-of-home care. This practice created a perverse incentive for First Nations child welfare agencies to remove First Nations children living on reserve and in the Yukon. Because of these

[4] FSA, art. 6.04.

funding formulas, policies, and practices, a child on reserve must often be removed from their home to receive public services that are available to children off reserve.[5]

11. Canada has been aware of the deficiencies in the FNCFS Program for many years, but has taken limited and inadequate action to address the problem.[6] Numerous governmental and independent reports have been published on the subject, including the 2000 National Policy Review, the 2005 Wen:De reports, and the First Nations component of the periodic Canadian Incidence Study of Reported Child Abuse and Neglect. The reports detail significant inequities in the FNCFS Program and the harmful impacts therefrom, including the ongoing overrepresentation of First Nations children in care.[7]

12. The removal of a child from their home causes severe and, in some cases, permanent trauma. It is therefore only used as a last resort for children who do not live on a reserve. Because of the underfunding of Prevention Services and the full funding of out-of-home care, however, First Nations children on reserve and in the Yukon have been removed from their homes as a first resort, and not as a last resort. This funding incentive accounts for the staggering number of First Nations children in state care: there are approximately three times as many First Nations children in state care now than there were in Residential Schools at their apex in the 1940s.

13. The incentivized removal of First Nations children from their homes has caused traumatic and enduring consequences to First Nations children, including the Representative Plaintiffs. Many of these children already suffer the effects of trauma inflicted by the Crown on their parents, grandparents and ancestors by the Residential Schools and Sixties Scoop.

[6] Ciavaglia Affidavit, para. 8.
[7] Ciavaglia Affidavit, para. 8

14. The stories of the representative plaintiffs for the Removed Child Class and Removed Child Family Class, outlined below, are both heartbreaking and illustrative of the significant harm suffered by this class.

(b) Removed Child Class

a) Xavier Moushoom

15. Xavier Moushoom was born in Lac Simon in 1987. He is a member of the Anishinaabe Nation.[8]

16. Both of Mr. Moushoom's parents are Residential Schools survivors. From 1987 to 1995, Mr. Moushoom lived with his mother—who suffered from alcohol abuse—and his brother on the Lac Simon Reserve. Mr. Moushoom's father also battled alcohol abuse problems and was absent for most of his childhood. As a child, Mr. Moushoom spoke Algonquin, practiced fishing and trapping, spent time in the forest to recharge, and learned of his ancestral traditions.[9]

17. In 1996, Mr. Moushoom was removed from his home and placed in out-of-home care in Lac Simon. To this day, he does not know the reason for his apprehension. Mr. Moushoom's brother was also apprehended and placed in a different foster home. Mr. Moushoom was thus entirely isolated from his family, to great detrimental effect. Without any explanation of why they were separated, Mr. Moushoom often wondered as a child if his family did not want him anymore.[10]

[8] Déclaration solennelle de Xavier Moushoom ("**Moushoom Declaration**"), para. 2.
[9] Moushom Declaration, paras. 3–10.
[10] Moushoom Declaration, paras. 11–13.

18. In 1997, Mr. Moushoom was moved to a different foster family outside of his community in Val D'Or. From the age of 9 until 18, Mr. Moushoom was moved from one foster family to another. In total, he lived in fourteen different foster homes in Val D'Or.[11]

19. Mr. Moushoom was rarely granted access to his family. A social worker determined whether he was allowed to see his mother, and Mr. Moushoom recalls begging for visits and needing to prove that he deserved to visit her. As a result of this separation, Mr. Moushoom gradually lost his native Algonquin language, his culture, and his ties to the Lac Simon community.[12]

20. At 18, Mr. Moushoom was forced to leave his foster family because the Crown did not fund post-majority support services for First Nations individuals like Mr. Moushoom. He felt he had no sense of self, no sense of direction, and had no idea how to reintegrate himself into his former community.[13]

21. After staying with his foster family for an additional three months without financial support, Mr. Moushoom returned to live with his mother in Lac Simon. In the years that followed, Mr. Moushoom developed substance abuse problems that he would eventually overcome through his own determination and with the help of his community.[14]

22. Mr. Moushoom's two younger brothers were also placed in foster families outside of Lac Simon. One of his brothers passed away last year without returning to the community or their

[11] Moushoom Declaration, paras. 14–16.
[12] Moushoom Declaration, paras. 18-19.
[13] Moushoom Declaration, paras. 20-22.
[14] Moushoom Declaration, paras. 23-24, 31.

family, despite Mr. Moushoom's earnest and ongoing attempts to enable his brother to reunite with them.[15]

b) Ashley Dawn Louise Bach

23. Ashley Dawn Louise Bach was born in 1994 in Vancouver, British Columbia. She is a member of the Mishkeegogamang First Nation.[16]

24. Ms. Bach was removed from her mother at birth, and placed in a non-First Nations foster home in Langley, British Columbia. When she was two years old, Mishkeegogamang Fist Nation communicated to the government that they lacked the resources to provide for Ms. Bach's special needs within their community.[17]

25. She was adopted by her foster family at the age of five. She had no access to her First Nations culture or community, and endured racism.[18] Since turning eighteen in 2012, Ms. Bach has attempted to reconnect with her First Nations community, culture, language, and territory, as well as her biological family.[19] However, several of her biological family members passed away while she was sequestered with her adopted family, including her maternal grandmother and one of her uncles.[20]

26. During the course of these proceedings, Ms. Bach discovered that her biological father and several of her aunts and uncles had attempted to adopt her but were denied.[21] She learned that her maternal grandmother had asked to keep in touch with her, so she could be involved in Ms. Bach's

[15] Moushoom Declaration, paras. 27–29.
[16] Affidavit of Ashley Dawn Louise affirmed September 6, 2022 ("**Bach Affidavit**"), para. 3.
[17] Bach Affidavit, para. 4.
[18] Bach Affidavit, para. 4.
[19] Bach Affidavit, para. 5.
[20] Bach Affidavit, para. 5.
[21] Bach Affidavit, para. 17.

life, but this request was never honoured.[22] She also learned that she had been labelled a disabled child with complex needs, and that her First Nation had tried to bring her home, but was unable to do so due to underfunding—a fact they raised repeatedly with the government.[23]

c) Karen Osachoff

27. Karen Osachoff is a member of Pasqua First Nation in Saskatchewan. She was apprehended from her family in 1982 and adopted by a non-First Nations family in Saskatoon, Saskatchewan.[24]

28. At the age of eleven, Ms. Osachoff began running away from her adoptive home.[25] She spent time on the streets, with other First Nations people; she was re-apprehended by social services multiple times.[26] Neither her adoptive parents, the police, or social services understood the effects of intergenerational trauma that had led to her initial apprehension. Ms Osachoff was labelled a problem child, and was treated with stricter rules and greater control instead of care, companionship, or access to her community.[27]

29. Ms. Osachoff never returned permanently to her adoptive family. From age eleven to eighteen, Ms. Osachoff was moved between multiple foster homes. She lived intermittently on the street.[28] She drank alcohol and took various drugs to cope with her circumstances, and suffered sexual, mental, physical, and emotional abuse.[29] She did not reconnect with her biological family until she was fifteen, at which point two of her biological brothers had already passed away. She

[22] Bach Affidavit, para. 17.

[24] Affidavit of Karen affirmed September 6, 2022 ("**Osachoff Affidavit**"), paras. 3-5.
[25] Osachoff Affidavit, para. 6.
[26] Osachoff Affidavit, para. 6.
[27] Osachoff Affidavit, para. 7.
[28] Osachoff Affidavit, para. 8.
[29] Osachoff Affidavit, para. 12.

did not learn of two of her brothers or her sister Melissa, whose story is detailed below, until recently.[30]

30. Her relationships with her biological family are strained as a result of the long period of disconnection. Some of them view her as "white" because of her upbringing, and do not fully accept her. The only brother with whom she was close, Sheldon, has since died.[31]

31. At eighteen, Ms. Osachoff aged out of the foster system. She suffered in an ongoing period of darkness until she moved to Coast Salish territory in 1999, at the age of 20, and connected positively with a First Nations community for the first time in her life.[32] With their support, Ms. Osachoff passed her General Education Development course, and went on to obtain Bachelor of Arts and Juris Doctor degrees.[33]

d) Melissa Walterson

32. Melissa Walterson is Karen Osachoff's biological sister. She is a member of the Nisichawayasihk Cree Nation in Manitoba.[34] Ms. Walterson was adopted by a non-First Nations family at birth; she and Ms. Osachoff did not know of each other's existence until 2019.[35] Although Ms. Walterson represents the Removed Child Family Class, her experience as a First Nations child growing up in a non-Indigenous household is relevant. Though she grew up in a generally supportive and functional adoptive family, she suffered discrimination and racism her

[30] Osachoff Affidavit, para 9.
[31] Osachoff Affidavit, para 11.
[32] Osachoff Affidavit, paras. 13-14.
[33] Osachoff Affidavit, para. 14.
[34] Affidavit of Melissa affirmed September 6, 2022 ("**Walterson Affidavit**"), paras. 3-4.
[35] Walterson Affidavit, paras. 4, 8.

entire life.[36] At times, she felt she had to reject her First Nations identity and culture to fit in.[37] Ms. Walterson's participation in this action has driven a wedge between her and her adoptive family.[38]

33. Since learning of her sister's existence, Ms. Walterson has kept in regular contact with Ms. Osachoff; when speaking to her, she feels a sense of belonging and a bond that she has missed out on for much of her life.[39] Ms. Walterson will unfortunately never meet a number of her siblings, who passed away before she had a chance to reconnect with them.[40]

(c) The Underlying Claim: Jordan's Principle & Trout

34. Canada has also failed to comply with Jordan's Principle, a legal requirement designed to safeguard First Nations children's substantive equality rights. The FSA provides redress for this breach to the Jordan's Principle Class, Trout Child Class, and associated Family Classes.[41]

35. Jordan's Principle aims to prevent First Nations children from suffering gaps, delays, or denials in receiving essential services and products while governments determine which level (federal, provincial or territorial) or which governmental department will pay for such services or products. It is named after Jordan River Anderson, a severely disabled First Nations child who never had the chance to live in a family home. Although medically approved to move to into a specialized foster home at the age of two, Jordan was forced to remain in the hospital while the federal and provincial governments fought over which government would fund his in-home care.

[36] Walterson Affidavit, para. 9.
[37] Walterson Affidavit, para. 11.
[38] Walterson Affidavit, para. 25.
[39] Walterson Affidavit, paras. 13-14.
[40] Walterson Affidavit, para. 14.
[41] FSA, art. 6.05-6.07.

The dispute was never resolved; after more than two years of waiting, Jordan tragically died in hospital.[42]

36. Canada has admitted that it is legally obliged to comply with Jordan's Principle; it is a human rights and constitutional duty that carries civil consequences. However, Canada essentially ignored this obligation and thereby denied crucial services and products to tens of thousands of First Nations children in breach of Jordan's Principle. The FSA provides compensation for those First Nations individuals, like the representative plaintiffs, who suffered or died while awaiting the essential services that the Crown was legally required to but did not provide, or did not provide in a timely fashion.[43]

37. The Court can undoubtedly appreciate how difficult it is for Jordan's Principle and Trout representative plaintiffs to share their stories, however they have done so in the hopes that their stories help ensure that present and future governments understand the trauma and suffering that arises from discriminatory systems.

a) Jeremy and Jonavon Meawasige

38. Jeremy Meawasige, by his litigation guardian, Jonavon Meawasige ("**Mr. Meawasige**"), is a representative plaintiff for the Jordan's Principle Class. In his own capacity, Mr. Meawasige also represents the Jordan's Principle Family Class. It is a role he took over from his late mother, Maurina Beadle.[44]

---

[42] *First Nations Child and Family Caring Society of Canada et al. v. Attorney General of Canada (for the Minister of Indian and Northern Affairs Canada),* 2016 CHRT 2, para. 352.
[43] *First Nations Child and Family Caring Society of Canada et al. v. Attorney General of Canada (for the Minister of Indian and Northern Affairs Canada),* 2016 CHRT 2, para. 384.
[44] Affidavit of Jonovan Meawasige affirmed September 1, 2022 ("**Meawasige Affidavit**"), para. 10,

39. Jeremy suffers from multiple disabilities, including hydrocephalus, cerebral palsy, spinal curvature, and autism.[45] He requires total personal care, including bathing, dressing, feeding, and diapering.[46] He must sometimes be restrained for his own safety, as he can become self-abusive.[47] Jeremy's mother, Ms. Beadle, provided for Jeremy without government assistance until she suffered a partially-disabling stroke.[48] Her community, via the Pictou Landing Band Council, rallied to provide funding for Jeremy's care. However, the amount of support required consumed the vast majority of their available healthcare funding.[49] Canada's refusal to provide any additional support, even after a consideration of Jordan's Principle, became the subject of litigation before this Court. The Court found that Canada had violated Jordan's Principle and was obliged to pay for Jeremy's care.[50]

b) Noah Buffalo-Jackson, Carolyn Buffalo, and Dick Eugene Jackson aka Richard Jackson

40. Noah Buffalo-Jackson and his parents, Carolyn Buffalo and Richard Jackson, are residents of Maskwacis (also known as Hobbema), Alberta. Ms. Buffalo is a member of Montana Cree Nation.[51] Mr. Jackson is a member of Saddle Lake Cree Nation.[52]

41. Noah suffers from Spastic Quadriparetic Cerebral Palsy Level 5; it is a chronic condition that requires long-term rehabilitative treatment.[53] One of his doctors characterized his condition as

[45] *Pictou Landing Band Council v. Canada (Attorney General),* 2013 FC 342 at para. 6 [*Pictou Landing*].
[46] Meawasige Affidavit, para. 4
[47] Meawasige Affidavit, para. 4.
[48] *Pictou Landing* at paras. 7-8.
[49] *Pictou Landing* at paras. 9, 11.
[50] *Pictou Landing* at paras. 124-127.
[51] Affidavit of Carrolyn Buffalo affirmed September 6, 2022 ("**Buffalo Affidavit**"), para. 2.
[52] Buffalo Affidavit, para. 7.
[53] Buffalo Affidavit, para. 8.

being a four out of five on the scale of "normal" to "catastrophic".[54] Noah requires total personal care, including eating, dressing, hygiene, and exercise. He is wholly dependent on his parents.[55]

42. Ms. Buffalo and Mr. Jackson struggled to obtain adequate support for Noah from the beginning. Noah was born with a cleft palate. When he was two, his parents took him to a feeding clinic, only to find that he was slowly starving as a result of his inability to eat enough food.[56] Initially, neither the First Nations and Inuit Health Branch nor the Province of Alberta ("Alberta") would provide any help; the latter declined due to their residence on reserve.[57] Although Alberta eventually provided funding, for a time Ms. Buffalo and Mr. Jackson were forced to cover the costs for Noah's care themselves.[58]

43. The Buffalo-Jacksons have received little or no support in taking a break from Noah's care. Ms. Buffalo, a lawyer, has watched her peers' practices take off while she struggles to balance her role as both a professional and a caregiver.[59] Unless a family member is willing to help for free, Ms. Buffalo and Mr. Jackson must pay out of pocket whenever they need assistance with Noah's care.[60] There is no daycare suitable for a special needs child on-reserve or in their area.[61] Although Alberta has sometimes provided supplements when Noah was able to get into a licensed daycare, these payments were temporary.[62] Sometimes they have had to pay Noah's regular babysitter to provide 24-hour care; Alberta would not assist with this cost.[63]

---

[54] Buffalo Affidavit, para. 9.
[55] Buffalo Affidavit, paras. 9-10.
[56] Buffalo Affidavit, paras. 11-12.
[57] Buffalo Affidavit, paras. 13-14.
[58] Buffalo Affidavit, para. 14.
[59] Buffalo Affidavit, paras. 32-33.
[60] Buffalo Affidavit, para. 21.
[61] Buffalo Affidavit, para. 23.
[62] Buffalo Affidavit, para, para. 24.
[63] Buffalo Affidavit, para. 23.

44. At one point, Alberta was willing to pay for a nanny to assist with Noah's care. However, the Buffalo-Jacksons' modest house had no room for a live-in nanny, and neither the federal nor provincial government offered any solution.[64]

45. Noah has also had issues with schooling. Because he lives on reserve, he was denied the funding necessary to support him at the school his brother and sister attended in Ponoka, Alberta.[65] Noah lost the opportunity to go to school with his siblings.[66] Ms. Buffalo and Mr. Jackson instead enrolled Noah at their local school, where Ms. Buffalo believes he received a substandard education given a lack of funding and support for his special needs.[67]

46. Ms. Buffalo understands that if Noah were surrendered into care, his foster parents would receive funding to make their home and vehicle handicapped-accessible, and could access funds for a care aide and respite care.[68] Conversely, despite requests for assistance, the Buffalo-Jacksons were denied any funding to replace or modify their own van, which is no longer suitable for Noah's needs and causes him discomfort and possible injury each time he travels in it.[69]

47. Ms. Buffalo and Mr. Jackson have refused to place Noah in care, despite the significant and ongoing sacrifices they are forced to make to properly care for him.[70] The Buffalo-Jacksons will soon be forced to move from their home on reserve in order to live in a house that is accessible for him, leaving behind the land and community where their family has lived for generations.[71]

c) Zacheus Joseph Trout

[64] Buffalo Affidavit, para. 26.
[65] Buffalo Affidavit, paras. 15-16.
[66] Buffalo Affidavit, para. 15.
[67] Buffalo Affidavit, paras. 17-18.
[68] Buffalo Affidavit, para. 28.
[69] Buffalo Affidavit, paras. 30-31.
[70] Buffalo Affidavit, para. 27.
[71] Buffalo Affidavit, para. 29.

48. The Trout Child Class is named after the two late children of representative plaintiff, Zacheus Joseph Trout, of Cross Lake First Nation. Sanaye and Jacob Trout both had Batten disease, a rare genetic neurological disorder that normally begins in early childhood. Batten disease is severe, causing seizures, vision loss, and loss of cognitive function. Left untreated, it is fatal. Treatment for Sanaye and Jacob involved full-time care, including the use of feeding tubes, diapers, formula, and numerous daily injections.[72]

49. Mr. Trout and his wife struggled to obtain adequate care for their children, which was not available on reserve. Each government agency they turned to directed them somewhere else. Their struggle to find help lasted 13 years.[73]

50. It is difficult to describe the effect this deficiency in services had on Mr. Trout and his family. He refers to it as having an "unspeakable mental and emotional toll".[74] Both Mr. Trout and his wife had to quit their jobs to provide round-the-clock care to their children and took turns to sleep.[75] What little they were provided in assistance was grossly inadequate. Mr. Trout was provided with only six syringes per month for Sanaye, when she needed six injections a day.[76] Similarly, the children were provided only two feeding bags per month, when they required feeding four times daily.[77] Mr. Trout was forced to reuse syringes and feeding bags, causing infections.[78] As no one would provide funding for the specialized beds they required, the children suffered from additional sleep problems, seizures, bouts of pneumonia and respiratory issues.79

[72] Affidavit of Zacheus Joseph Trout sworn September 2, 2022 ("**Trout Affidavit**), paras. 4, 9-11..
[73] Trout Affidavit, para. 8.
[74] Trout Affidavit, para. 15.
[75] Trout Affidavit, para. 7.
[76] Trout Affidavit, para. 9.
[77] Trout Affidavit, para. 10.
[78] Trout Affidavit, paras. 9-10.
[79] Trout Affidavit, paras. 11-13.

Mr. Trout and his wife had to hold the children at an incline while they were fed, and sometimes the children fell from their beds in the night.[80]

51. Jacob and Sanaye suffered from a lack of adequate services until the end of their short lives. Both passed away by the age of 10.[81]

2.2 Procedural History

(a) The Class Proceedings

52. Xavier Moushoom commenced a proposed class action[82] on March 4, 2019, seeking compensation for children who suffered discrimination related to the FNCFS program and the discriminatory application of Jordan's Principle ("**Moushoom Class Action**"). Later, Jeremy Meawasige by his Litigation Guardian, Jonavon Joseph Meawasige, and Jonavon Joseph Meawasige were added as plaintiffs. The class period was defined to begin on April 1, 1991.[83]

53. On January 28, 2020, the AFN and some proposed representative plaintiffs filed a proposed class action (Court File No. T-141-20) in the Federal Court about the same subject matter ("**AFN Class Action**"). The proposed representative plaintiffs in the AFN Class Action were later amended to be Ashley Dawn Louise Bach, Karen Osachoff, Melissa Walterson, Noah Buffalo-Jackson by his Litigation Guardian, Carolyn Buffalo, Carolyn Buffalo, and Dick Eugene Jackson also known as Richard Jackson.[84]

[80] Trout Affidavit, para. 13.
[81] Trout Affidavit, para. 14.
[82] Court File No. T-402-19
[83] Affidavit of William Colish affirmed September 2, 2022 ("**Colish Affidavit**"), para. 13.
[84] The AFN is a plaintiff in both the Consolidated Action and the Trout Action, while the Court has appointed the individual plaintiffs as representative plaintiffs in its respective certification orders.

54. In 2020, the two groups of plaintiffs agreed to consolidate the Moushoom Class Action and the AFN Class Action. The claims were formally consolidated on July 7, 2021 by Madam Justice St-Louis (collectively the "**Consolidated Class Action**").[85]

55. For reasons further described below, Madam Justice St-Louis also ordered that a group of class members with claims relating to delays, denials or gaps in essential services be separately prosecuted, granting leave to Zacheus Joseph Trout and the AFN to commence that action.[86]

56. Mr. Trout and the AFN therefore commenced Court File No. T-1120-21 ("**Trout Action**") on July 16, 2021. Mr. Trout sought to represent class members who had faced a delay, denial or gap in the receipt of an essential service for which the class members had a confirmed need between April 1, 1991 and December 11, 2007.[87]

57. Madam Justice Aylen certified the Consolidated Class Action on consent on November 26, 2021.[88] Madam Justice Aylen certified the Trout Action on consent on February 11, 2022.[89]

(b) Canadian Human Rights Tribunal Proceeding

58. The Consolidated Class Action partly overlaps with a proceeding before the Canadian Human Rights Tribunal (the "**Tribunal**"), where the AFN is a co-complainant. In 2007, the AFN and the First Nations Child and Family Caring Society of Canada (the "**Caring Society**") filed a complaint with the Canadian Human Rights Commission against Canada. On October 14, 2008, the Canadian Human Rights Commission referred the complaint to the Tribunal.[90]

[85] Colish Affidavit, para. 15.
[86] Colish Affidavit, para. 16.
[87] Colish Affidavit, para. 17.
[88] Colish Affidavit, para. 18.
[89] Colish Affidavit, para. 19.
[90] Colish Affidavit, para. 21

59. The Tribunal rendered its decision on the merits of the complaint on January 26, 2016: *First Nations Child and Family Caring Society of Canada et al. v. Attorney General of Canada (for the Minister of Indian and Northern Affairs Canada)*.[91] The Tribunal found that Canada had discriminated against First Nations children and families on reserves and in the Yukon by its underfunding of child and family services under the FNCFS program and by Canada's prohibitively restrictive interpretation of Jordan's Principle.[92]

60. The Tribunal later decided in *First Nations Child & Family Caring Society of Canada et al. v. Attorney General of Canada (representing the Minister of Indigenous and Northern Affairs Canada)*,[93] that the First Nations children and their caregiving parents and grandparents should receive human rights compensation (the "**Compensation Decision**"). The Tribunal subsequently clarified and expanded on the Compensation Decision in several related decisions.[94] The Compensation Decision relates to removed children between 2006 and 2022, and Jordan's Principle children between 2007 and 2017.[95]

61. Canada sought judicial review of the Compensation Decision. In September 2021, the Compensation Decision was upheld by the Court.[96] The Court noted that the Tribunal had extensive evidence of Canada's discrimination; the resulting harm experienced by First Nations children and their families (resulting from the removal of First Nations children from their homes, and the delay, denial or unavailability of essential services for which there was a confirmed need);

---

[95] Colish Affidavit, para. 23.
[96] *Attorney General of Canada v. First Nations Child and Family Caring Society et al.*, 2021 FC 969, at para. 85 ["**JR Decision**"].

and Canada's knowledge of that harm. The Federal Court ended its reasons with the following statement urging the parties to focus on good faith discussions to try to achieve a fair and just settlement:

> Negotiations are also seen as a way to realize the goal of reconciliation. It is, in my view, the preferred outcome for both Indigenous people and Canada. Negotiations, as part of the reconciliation process, should be encouraged whether or not the case involves constitutional issues or Aboriginal rights. When there is good will in the negotiation process, that good will must be encouraged and fostered before the passage of time makes an impact on those negotiations.[97]

62. The Tribunal has maintained an ongoing supervisory role with respect to the compensation payments ordered under the Compensation Decision. The AFN, supported by Canada, has brought a motion before the Tribunal for a ruling that the FSA will satisfy the Tribunal's Compensation Decision.[98] The Tribunal is set to hear the motion on September 15 and 16, 2022, and the parties expect the Court will have the benefit of the Tribunal's ruling in determining the present motion.

2.3 Settlement Negotiations

63. The negotiations among the parties were lengthy, extensive and complex, starting in 2019 with the Moushoom Class Action and then unfolding as part of the Consolidated Class Action and the Trout Action for well over a year prior to execution of an agreement in principle ("**AIP**") on December 31, 2021.[99]

64. The parties engaged in an additional six months of intensive negotiations to craft a comprehensive settlement agreement consistent with the objective of designing a trauma-informed,

[97] Ibid at para. 300.
[98] Colish Affidavit, para. 108.
[99] Colish Affidavit, paras. 24-30, 49-50.

culturally safe claims process through which to deliver compensation to survivors of Canada's discrimination.[100]

65. From November 2020 to September 2021, the parties to the Consolidated Class Action, along with the Caring Society, engaged in mediation in accordance with the Federal Court Guidelines for Aboriginal Law Proceedings with the Honourable Leonard Mandamin as mediator. The negotiations covered compensation for certain classes in the Consolidated Class Action and long-term reform aspects of the Tribunal's decisions and orders.[101] The parties were unable to reach an agreement.[102]

66. Beginning in early November 2021, the parties entered into negotiations outside of the Federal Court mediation process. The parties, by agreement, appointed the Honourable Murray Sinclair to act as chair of the negotiations. The objective of these intensive negotiations was to reach a comprehensive settlement for all classes in both the Consolidated Class Action and the Trout Action, and to resolve outstanding issues related to compensation in the Tribunal proceedings.[103] While the compensation discussions were primarily a tripartite negotiation among the AFN, Canada and Moushoom Class Counsel, compensation proposals relating to the various classes of survivors were also presented to the Caring Society and the Interested Parties, the Chiefs of Ontario and Nishnawbe Aski Nation, with significant opportunity for consultation and discussion. Numerous meetings occurred among various parties to the Class Action and the Tribunal Proceedings in furtherance of the objective of reaching a global resolution.[104]

[100]Colish Affidavit, para. 51.
[101] Colish Affidavit, para. 26.
[102] Colish Affidavit, para. 29.
[103] Colish Affidavit, para. 30.
[104] Colish Affidavit, para. 30.

67. On December 31, 2021, the parties concluded the AIP on compensation, which set out the principal terms of settlement and formed the basis of the FSA. A separate agreement in principle was concluded on long-term reform, which is not part of these proceedings or this motion.[105]

68. The AIP established key commitments by the parties which would form the basis of an eventual Final Settlement Agreement,[106] including: (i) establishing a $20 billion settlement amount in consideration of the release of Canada of all claims contemplated by the Class Action and Tribunal Proceedings; (ii) the non-reversion of settlement funds to Canada; (iii) the acknowledgment of the uncertainties surrounding the size of the Class; (iv) the design of the distribution protocol resting with the plaintiffs; (v) the opt-out period; (vi) satisfaction of the Compensation Decision and related Compensation Orders; (vii) treatment of taxes and social benefits and supports; (viii) notice; (ix) legal fees; and (x) the request for a public apology by the Prime Minister.[107]

69. The parties pursued extensive settlement negotiations from January to June of 2022 to agree upon and draft the FSA. Throughout the negotiations and preparation of the FSA, the parties were able to fully develop and voice their positions through vigorous debate. The parties raised and canvassed many issues and sought insight from outside experts as needed. The representative plaintiffs were repeatedly consulted and asked to provide input on the negotiations.

70. To inform negotiations on the claims process, Moushoom class counsel retained an expert, Dr. Lucyna M. Lach of McGill University, approximately a year ago to head a group of experts and provide expert opinion on a methodology for objectively assessing harms suffered by the

[105] Colish Affidavit, para. 49.
[106] Colish Affidavit, para. 49.
[107] FSA, Colish Affidavit, para. 49, Exhibit "K".

Jordan's Principle and Trout Classes. The proposed assessment framework, which is subject to piloting and testing prior to implementation, seeks to rank the impact of the impugned discrimination on claimants based on objective factors, eliminating the need for in-person interviews or examinations as part of the claims process.[108] Further, the AFN recruited a number of First Nations experts who have on-the-ground expertise in the delivery of services to First Nations individuals, as well as in measurement of health and wellness from First Nations' perspectives.[109] The AFN engaged this Circle of Experts to ensure that any methodology adopted and tested for Jordan's Principle is First Nations-led. To that end, the AFN Circle of Experts met a number of times since June 10, 2022.[110] The opinions expressed by this Circle of Experts later informed the approach to the Jordan's Principle method that will be piloted.[111]

71. The AFN engaged in extensive consultation throughout the negotiation process by providing ongoing updates on the status of the negotiations and the substance of the settlement across all of its regions. AFN internal and external legal counsel, along with key AFN team members, presented the draft FSA and received feedback and comment on the compensation amount and structure. The regions generally expressed support for the FSA and the importance of distributing compensation to individuals as soon as possible.[112]

[108]Report Regarding Jordan's Principle and Trout Components of Moushoom et al. v. Canada dated September 6, 2022 ("**Lach Report**"),Affidavit of Dr. Lucyna M. Lach sworn September 6, 2022 ("**Lach Affidavit**), para. 37, Exhibit "**A**"; Ciavaglia Affidavit, para. 37.
[109] Ciavaglia Affidavit, para. 37.
[110] Ibid.
[111] Ciavaglia Affidavit, paras. 39-43.
[112] Ciavaglia Affidavit at para. XX.

72. As a result of this lengthy process, the FSA eventually received approval by all parties to these proceedings.[113] Each of the representative plaintiffs fully supports the FSA, particularly citing:

a) the ability for class members to receive payments promptly, rather than after a lengthy litigation process;

b) the trauma-informed and culturally competent claims process;

c) the principle of proportionality, by which class members who suffered greater harms will receive higher compensation; and

d) the decision to prioritize compensation to child class claimants. [114]

73. On June 30, 2022, the FSA was finalized and executed by all parties, subject to the approval of the Court.

2.4 Class Size Estimates

74. To assess the reasonableness of a settlement, the parties required estimates of each class size. In some instances, class size estimates were difficult to produce given the dearth of direct data available in certain circumstances. However, ultimately the parties were satisfied that the estimates were sufficient to allow for an informed decision on whether the total settlement funds would provide for a fair and reasonable settlement.[115]

75. Since the Compensation Decision, several reports have been authored on the scope of the decision, including reports by the Parliamentary Budget Officer in February 2021 and April 2022,

[113] Gideon Affidavit at para. 9.
[114] Osachoff Affidavit, paras. 33-38; Walterson Affidavit, paras. 33-43; Jackson Affidavit, paras. 14-24; Buffalo Affidavit, paras. 50-57; Bach Affidavit, paras. 31-43; Trout Affidavit, paras. 26-30; Meawasige Affidavit, paras. 26-28.
[115] Colish Affidavit, paras. 7-9.

and a January 2022 report by the University of Toronto and McGill, prepared for Indigenous Services Canada ("**ISC**").[116]

76. During negotiations, Moushoom class counsel commissioned an independent expert opinion on the size of the Removed Child Class by Professor Nico Trocmé in collaboration with actuary, Peter Gorham (the "**Trocmé Gorham Report**").[117] The Trocmé Gorham Report was originally completed in January 2021; estimates were updated in February 2022 to extend the class period to March 31, 2022, the agreed upon end of the class period for the Removed Child Class and the Removed Child Family Class.[118]

77. The Trocmé Gorham Report relied on direct data available from ISC on child removals. The experts used educated assumptions to fill in gaps and corrected inaccuracies as necessary. The final estimate for the Removed Child Class was 116,000 class members, over the class period of April 1, 1991 to March 31, 2022.[119]

78. Estimates for the Jordan's Principle Class and Trout Child Class proved more difficult because:

a) the nature and scope of Canada's Jordan's Principle service program has evolved since its inception, evolving from a way to address jurisdictional disputes to a more holistic, child-first principle grounded in the *Charter* rights of First Nations youths; and

b) there is little or no data on Jordan's Principle for the vast majority of the class period, as the concept of "Jordan's Principle" did not exist until 2005, and was not tracked until 2017; and

[116] Colish Affidavit, para. 32, 26, Exhibits "D" & "G".
[117] Colish Affidavit, para. 33, Exhibit E.
[118] Colish Affidavit, para. 35, Exhibit F.
[119] Colish Affidavit, para. 35.

c) the criteria for inclusion in this class were not fully defined in either the Tribunal proceeding or these class proceedings.[120]

79. On the last point, under the FSA, eligibility criteria for these classes will be determined by the plaintiffs subject to the Court's approval.[121]

80. The parties were able to estimate the Jordan's Principle Class and Trout Child Class size by extrapolating from more recently collected data relating to services requested under Jordan's Principle, gathered prior to the pandemic in early 2020.[122] The estimates were adjusted to account for possible duplication in requests—i.e, a single child with multiple, separate requests—or overlap between group and individual requests.[123] The resulting estimates are 65,000 class members for the Jordan's Principle Class, and 104,000 for the Trout Child Class.[124]

81. There was no direct data available for the Family Classes. However, the 2021 Parliamentary Report estimated that First Nations children live with an average of 1.5 biological parents, or grandparents if parents are absent.[125] This data was used to estimate the Family Class size.

2.5 Settlement Terms and Claims Process

82. The provisions of the FSA are substantive, complex and nuanced. A general overview of the agreement and its key elements of the FSA are summarized below:

[120] Colish Affidavit, para. 46 .
[121] Colish Affidavit, paras. 47 .
[122] Colish Affidavit, paras. 41-42.
[123] Colish Affidavit, para. 42.
[124] Colish Affidavit, paras. 44-45.
[125] Colish Affidavit, para. 36, Exhibit "G".

(a) Settlement Priorities

83. The preamble to the FSA expressly reflects the parties' desire to: (i) ensure that the Claims Process is administered in an expeditious, cost-effective, user-friendly, culturally sensitive, and trauma-informed manner; (ii) safeguard the best interests of the class members who are minors and Persons under a Disability; (iii) minimize the administrative burden on class members; (iv) ensure culturally informed and trauma-informed mental health and cultural support services, as well as navigational assistance are available to class members; and (v) provide for some Class Members, or subsets of Class Members to receive direct compensation, while ensuring that those who not receive direct benefits may indirectly benefit from the FSA.[126]

(b) The Settlement Funds

84. The FSA ultimately reflects the overarching agreement that Canada will pay $20 billion to settle the claims of the Class in accordance with the terms of the FSA, which is to be paid into a Trust Fund by Canada within 30 days from the last day on which a Class Member may appeal or seek leave to appeal the Settlement Approval Order, or the last date where any appeals of the Settlement Approval Order has been determined.[127]

(c) FSA Classes

85. As described above, the settlement reflected in the FSA comprises all six classes included in the definition of the "Class". The simplified definitions of each are as follows:[128]

a) **Removed Child Class:** First Nations individuals who:

   i. while under the age of majority, and

[126] FSA preamble T(ii)-(iii) and U.
[127] FSA art. 1.01 Definitions, "Settlement Funds" and "Implementation Date", FSA art. 4.01(2).
[128] FSA, art. 1.

ii. while they, or at least one of their caregivers were ordinarily resident on reserve or living in the Yukon;

iii. were removed from their home by child welfare authorities or voluntarily placed into care between April 1, 1991 and March 31, 2022; and

iv. whose placement was funded by ISC.

b) **Removed Child Family Class:** all brothers, sisters, mothers, fathers, grandmothers, and grandfathers of a member of the Removed Child Class at the time of removal.

c) **Jordan's Principle Class:** First Nations individuals who, between December 12, 2007 and November 2, 2017, did not receive from Canada an essential service (whether by denial or service gap) relating to a confirmed need, or whose receipt of an essential service relating to a confirmed need was delayed by Canada on grounds including a lack of funding or jurisdiction, or as a result of a service gap or jurisdictional dispute.

d) **Jordan's Principle Family Class:** the brothers, sisters, mothers, fathers, grandmothers or grandfathers of a member of the Jordan's Principle Class at the time of the delay, denial or service gap.

e) **Trout Child Class:** First Nations individuals who, between April 1, 1991 and December 11, 2007, did not receive from Canada an essential service (whether by denial or service gap) relating to a confirmed need, or whose receipt of an essential service relating to a confirmed need was delayed by Canada on grounds such as a lack of funding or jurisdiction, or a result of a service gap or jurisdictional dispute.

f) **Trout Family Class:** the brothers, sisters, mothers, fathers, grandmothers or grandfathers of a member of the Trout Child Class at the time of the delay, denial or service gap.[129]

[129] FSA art. 1.01 Definitions: "Removed Child Class", "Removed Child Family Class", "Jordan's Principle Class", "Jordan's Principle Family Class", "Trout Child Class" and "Trout Family Class".

86. For the Family Classes, biological, adoptive, common law, and stepparents and grandparents are included; foster parents are excluded.[130]

87. The FSA defines the key qualifying term, "First Nations", broadly, with some variations depending on the class: [131]

> "**First Nations**" means:
>
> (a) with respect to the Removed Child Class, Jordan's Principle Class, Trout Child Class, and Stepparents: individuals who are registered pursuant to the *Indian Act*;
>
> (b) with respect to the Removed Child Class, Jordan's Principle Class, and Trout Child Class: individuals who were entitled to be registered under sections 6(1) or 6(2) of the *Indian Act*, as it read as of February 11, 2022 (the latter date of the Certification Orders);
>
> (c) with respect to the Removed Child Class: individuals who met Band membership requirements under sections 10-12 of the *Indian Act* by February 11, 2022 (the latter date of the Certification Orders) such as where their respective First Nation community assumed control of its own membership by establishing membership rules and the individuals were found to meet the requirements under those membership rules and were included on the Band List;
>
> (d) with respect to the Jordan's Principle Class only: individuals who met Band membership requirements under sections 10-12 of the *Indian Act* pursuant to paragraph (c), above, AND who suffered a Delay, Denial, or Service Gap between January 26, 2016 and November 2, 2017;
>
> (e) with respect to the Jordan's Principle Class only: individuals who were recognized as citizens or members of their respective First Nation by February 11, 2022 (the latter date of the Certification Orders) as confirmed by First Nations Council Confirmation,

[130] FSA art.
[131] FSA art. 1.01 Definitions "First Nations". Please see the FSA for the specific nuances of the definition.

whether under final agreement, self-government agreement, treaties or First Nations' customs, traditions and laws, AND who suffered a Delay, Denial, or Service Gap between January 26, 2016 and November 2, 2017.

(d) Compensation Budgets

88. Based on the estimates considered during the negotiation process, the $20 billion in settlement funds was budgeted amongst the Classes. The budgets include the following: $7.25 billion to the Removed Child Class; $5.75 billion to the Removed Child Family Class; $3 billion to the Jordan's Principle Class; $2 billion to the Trout Child Class; and a fixed $2 billion budget to the Jordan's Principle and Trout Family Class.[132]

(e) Entitlement and Quantum of Compensation

89. The FSA sets out the criteria for entitlement to compensation and the principles for determining the amount of compensation each class member may receive.[133] The general mechanism contemplated by the FSA is the payment of a base compensation amount and the possibility of enhanced payment for those individuals who were most impacted by Canada's discriminatory conduct.

90. Within the fixed settlement budget of $20 billion, the parties negotiated a compensation entitlement regime that prioritized child class claimants. Where compromises had to be made, those compromises were resolved in favour of the child classes. The FSA is structured on principles of proportionality and fairness: compensation should be proportionate to the impact on the individual,[134] and it is unacceptable to treat all class members the same or dilute settlement

[132] FSA, art. 6.05(3), 6.04(5), 6.06(9), 6.06(10).
[133] FSA, art. 6.
[134] Gideon Affidavit, para. 9.

funds among an overly broad group. The representative plaintiffs advocated strongly for this approach.[135]

91. For the Removed Child Class, the plaintiffs identified factors with assistance from experts to enhance the payments (listed at article 6.03(3) of the FSA), which include the following:

a) the age at which the Removed Child Class Member was removed for the first time;

b) the total number of years that a Removed Child Class Member spent in care;

c) the age of a Removed Child Class Member at the time they exited the child welfare system;

d) whether a Removed Child Class Member was removed to receive an essential service relating to a confirmed need;

e) whether the Removed Child Class Member was removed from a northern or remote community; and

f) the number of spells in care for a Removed Child Class Member and/or, if it can be determined, the number of out-of-home placements applicable to a Removed Child Class Member who spent more than one year in care.

92. The plaintiffs' experts identified each of these factors as a reasonable objective proxy for the level of harm that the class member suffered.[136] The relative weight to each factor and the amounts of additional compensation assigned will be further developed in consultation with experts.[137]

93. As such, it cannot be determined at this point, and it is not specified in the FSA, how much of an enhancement payment a class member would receive applying one or multiple enhancement

[135] Colish Affidavit, para 63.
[136] Colish Affidavit, para 67.
[137] FSA art. 6.03(4); Colish Affidavit, para. 68.

factors. Of the $7.25 billion budget for the Removed Child Class, based on the class size estimate of the Trocmé Gorham Report, $2.65 bill is expected to be available for enhancement payments. Once the number of class members eligible to receive enhanced payments and the relative weight for each factor are determined, a dollar value will be assigned to each factor and distributed to eligible class members.[138]

94. The information used to apply enhancement factors will be obtained, where possible, from ISC data.[139] This method relieves class members of the burdens of testifying, being subjected to interviews, and obtaining documentation on their own.[140] If there is a gap in the ISC data, it may be supplemented by information provided by the class member.[141] The plaintiffs, in consultation with experts, will determine a method of supplementing the ISC data consistent with the parties' objectives of minimizing the administrative burden and risks of trauma on claimants.

95. For the Removed Child Family Class, caregiving parents or grandparents may receive direct compensation, fixed at the base compensation rate of $40,000 (and up to a maximum of $60,000 where more than one child of that person was removed) with no enhancement amount.[142] Up to two compensation payments may be made per child, with conflicts to be resolved based on a pre-defined priority list.[143] The priority rules relieve child class members from making potentially fraught choices about which family members will be compensated. Caregivers who have

[138] Colish Affidavit, para 69.
[139] FSA art. 6.02.(3).
[140] FSA art. 6.01(1)-(2).
[141] FSA art. 6.02(3).
[142] FSA, art. 6.04(9).
[143] Colish Affidavit, para. 86.

committed sexual or serious physical abuse resulting in the Removed Child Class member's removal are not eligible for compensation in relation to that child.[144]

96. The same method applies to the Jordan's Principle Class and Trout Child Class.[145] Eligibility will be determined based on the class member's confirmed need for an essential service where:

a) a class member's confirmed need was not met because of a denial of a requested essential service;

b) a class member experienced a delay in the receipt of a requested essential service for which they had a confirmed need; or

c) a class member's confirmed need was not met because of a service gap even if the essential service was not requested.[146]

97. Claimants will be required to provide proof that the essential service was recommended by a professional at the relevant time.[147] The definition of "professional" includes community nurses and other professionals available in remote communities who nevertheless have relevant expertise, to reflect the fact that not all First Nations have easy access to family physicians or specialists.[148]

98. As a result of the class size uncertainty, the parties elected to ensure that claimants who suffered greater harms will receive a *minimum* of $40,000, while those who suffered lesser harms will receive *up to* $40,000. Funds will be distributed first to those who suffered greater harms, with the remainder to be distributed pro-rata to the lesser impacted group.[149]

---

[144] FSA, art. 6.04(4).
[145] Colish Affidavit, para. 86.
[146] Ibid.
[147] Colish Affidavit, para. 87 .
[148] FSA, art. 1 "Professional".
[149] Colish Affidavit, paras. 82-83.

99. Compensation for Trout Child Class members will be determined on the same principles as Jordan's Principle Class members, but with a base compensation rate of $20,000—i.e., those who suffered greater harms will receive *at least* $20,000, and those who suffered less will receive *at most* $20,000.[150] The lower amount for Trout Child Class claimants reflects the heightened litigation risk for the Trout Action, which did not have the benefit of the Compensation Decision, and the fact that their claims arose prior to the formal recognition of Jordan's Principle.[151]

100. The determination of a claimant's compensation category (greater or lesser harm) will be based on objective factors, assessed through a three part process: (i) a culturally-sensitive claims form; (ii) a confirmation from a professional that the claimant needed an identified essential service; and (iii) a First Nations centred, expert-designed questionnaire, referred to as the Impact Assessment Questionnaire in the expert report of Dr. Lach filed with this motion.[152]

101. Enhancement factors will also be determined with the input of experts in the field.[153] Such factors may include illness, disability, or impairment.[154]

102. The approved Jordan's Principle and Trout Family Classes will receive a fixed amount of $2 billion in compensation under the FSA.[155] Only certain caregiving parents and grandparents who experienced the greatest amount of hardship will be eligible for direct compensation.[156]

[150] Colish Affidavit, para. 85.
[151] Ciavaglia Affidavit, para. 92.
[152] Lach Affidavit, Exhibit « A », Lach Report.
[153] Ciavaglia Affidavit, para. 94.
[154] Lach Affidavit, Exhibit « A », Lach Report.
[155] Colish Affidavit, para. 89.
[156] Colish Affidavit, para. 90.

103. The FSA contemplates that some members of the various family classes (for example, siblings) may not receive direct compensation but will benefit from the Cy-près Fund described below.[157]

(f) Administrator

104. The Federal Court has appointed Deloitte LLP ("**Deloitte**") as the administrator of the proposed settlement.[158]

105. The duties of the Administrator include: (i) developing and implementing systems, forms, guidelines and procedures for the processing of claims and addressing appeals; (ii) developing procedures for the payment of compensation; (iii) receiving settlement funds from the Trust; (iv) ensuring appropriate staffing; (v) ensuring First Nations participation and a trauma-informed approach; (vi) accounting for its activities; (vii) addressing request of claimants; (viii) and regular reporting.[159]

106. In carrying out its duties, the Administrator is governed by various principles, including ensuring that the Claims Process is cost-effective, user-friendly, culturally sensitive, trauma-informed, and non-traumatizing to Class Members. The Administrator must ensure quality assurance processes are documented, comply with service standards established by the plaintiffs and comply with such other duties or responsibilities as directed by the Court.[160]

(g) Notice to the Class

107. Notice is being published in two phases. If the Court approves the FSA, the parties' intention is that every class member who is eligible to receive compensation in accordance with

[157] FSA art. 6.04(1)-(2)
[158] FSA, art. 3.01
[159] FSA, art. 3.02(1)
[160] FSA art. 3.01(2).

the FSA will know they can submit a claim and receive compensation. The FSA contemplates a fulsome notice plan that will seek to ensure that all potential claimants contemplated within the scope of the FSA will be made aware of the nature of the terms of settlement and be supported throughout the claims process.[161] That phase of notice, however, has not been submitted to the Court for approval yet. It will be the subject of a future motion, if the FSA is approved on this motion.

108. The first phase of notice, which relates to certification and this settlement approval hearing, has already received approval of the Court. The form of notice (including opt-out form) and notice plan received Court approval on June 24 and August 11, 2022, respectively.[162]

109. Implementation of the notice plan began on August 19, 2022 in accordance with the Court's order.[163] Pursuant to the plan:

a) a notice website and Facebook page were made available;

b) class counsel and AFN websites were updated to include the approved notices;

c) class counsel and the AFN sent mass emails to all individuals who had signed up on their respective websites for case updates;

d) notices have been published in all but one of the specified Indigenous news outlets;[164] and

e) the AFN distributed the notices to all First Nations communities across the country.[165]

[161] FSA art. 10.02.
[162] Colish Affidavit, paras. 106-107.
[163] Colish Affidavit, paras. 110-111.
[164] Colish Affidavit, para. 114.
[165] Colish Affidavit, para. 111.

110. A paid Instagram and Facebook campaign was launched, which as of September 1, 2022 had generated over 11,200 website visits.[166]

(h) Opt-out period

111. As of September 1, 2022, only eight opt-outs had been received.[167] Based on the reasons provided, these opt-outs generally appear to be in error, with the class member thinking that they need to opt out to receive compensation. The Administrator or class counsel will follow up with the opt-out claimants to ensure that their desire to be excluded is genuine.[168]

(i) Claims Period

112. For individuals who have obtained the age of majority, the FSA permits claims to be filed up to three years following the notice of approval of the FSA.[169] This lengthy period is intended to maximize the number of eligible class members who will claim compensation.

113. The FSA is also responsive to the fact that many class members are still minors, most notably a percentage of the Removed Child Class and Jordan's Principle Class members. Therefore, the claims period for these individuals is linked to when each attains the age of majority, rather than a fixed date following the approval of the settlement.[170] Under the FSA, the claims period will remain open for individuals to claim for three years following the date on which they attain the age of majority. This permits an individual to make a claim when they are ready. In exceptional circumstances, the FSA does provide flexibility for a claim to be filed and paid prior to an individual reaching the age of majority.[171] Further, the claims deadline may be extended in

[166] Colish Affidavit, para. 119.
[167] Colish Affidavit, para. 120.
[168] Colish Affidavit, para. 121.
[169] FSA, art. 1, "Claims Deadline".
[170] FSA, art. 1, "Claims Deadline".
[171] FSA, art. 6.07.01

instances where an individual was unable to claim due to extenuating personal circumstances in recognition of the need to provide flexibility for this Class.[172]

(j) Cy-Près Fund

114. The FSA establishes a mechanism to benefit those class members who do not receive direct compensation under the FSA by way of the establishment of the Cy-près Fund.[173] The First Nations-led Cy-près Fund will be endowed with $50 million which the plaintiffs intend to be funded by interest on the settlement funds.[174]

115. The Cy-près Fund will be designed with the assistance of experts and has the objective of providing culturally-sensitive and trauma-informed supports to class members, which includes, amongst others:

a) family and community unification, reunification, connection and reconnection for youth in care and formerly in care;

b) reducing the costs associated with travel and accommodations to visit community and family, including for First Nations youth in care and formerly in care, support person(s) or family members; and

c) facilitating access to culture-based, community-based and healing-based programs, services and activities to class members and the children of First Nations parents who experienced a delay, denial or service gap in the receipt of an essential service.[175]

[172] FSA, art. 1 "Claims Deadline" (c).
[173] FSA, art. 7.01(2).
[174] FSA, art. 7.
[175] FSA art. 7.01(5)(a).

(k) No Encroachment on the Settlement Funds

116. To ensure that the entirety of the $20 billion settlement funds are directed toward compensation for class members, Canada has agreed to pay, over and above the settlement funds, the costs of notice to the class, class counsel fees, health and wellness supports, and administration and implementation costs.[176] There will be no encroachment of the settlement funds for any other purpose save and except for the compensation for class members.

(l) Fees Severable

117. All class counsel legal fees will be separately negotiated and paid by Canada, with no fees to come out of the settlement funds.[177] This includes ongoing legal support for claimants throughout the claims process, which class counsel will provide at no cost to claimants.[178]

118. Throughout negotiations, it was critical to the plaintiffs and class counsel that legal fees be negotiated separately from (and subsequent to) the FSA, to avoid the amount of legal fees having any effect on negotiations concerning compensation for the Class. As such, legal fees are still subject to negotiation and, ultimately, the Court's approval. Under the FSA, legal fees are severable. Therefore, the FSA and the compensation provided thereunder will survive irrespective of outcome on legal fees.[179]

(m) Taxability and Social Benefits

119. Canada has further committed to make best efforts to ensure that compensation received will not impact any social benefits or assistance that class members would otherwise receive from Canada or from a province or territory.[180] Additionally, Canada has committed to making best

[176] FSA, art. 3.04; Gideon Affidavit, paras. 13-14; Colish Affidavit, paras. 98-102.
[177] FSA, art. 16.01; Colish Affidavit, paras 123-124.
[178] FSA, art 16.02.
[179] FSA, art. 16.01; Colish Affidavit, paras. 123-124.
[180] FSA, art.9.03(1).

efforts to ensure that compensation paid through the claims process will not be considered income for tax purposes.[181]

(n) Investment of Settlement Funds

120. Given the length of time over which the settlement will be administered, a substantial amount of the $20 billion will be invested in accordance with the guidance of an Investment Committee (comprised of an independent investment professional and individuals with relevant board experience regarding the management of funds) and actuaries.[182] It is intended that throughout the lifetime of the claims process, the settlement funds will have accrued significant gains. The entirety of the interest and income gained upon the principal invested will be directed to class members.[183]

(o) Oversight of Settlement Administration

121. The Administrator will provide ongoing reporting with respect to the implementation of the FSA and on any systemic issues relating to the implementation or the claims process with a review to addressing such issues.[184] A First Nations-led Settlement Implementation Committee ("**SIC**") and, ultimately, the Court will have ongoing oversight with respect to the implementation of the FSA.[185]

122. The SIC will consist of members of the First Nations community, as well as a lawyer appointed by the AFN, and class counsel. The SIC will oversee the claims administration process and address systemic issues that may arise. This oversight role is crucial to the successful

[181] FSA, art. 9.03(2). Also see Gideon Affidavit, paras. 19-20.
[182] FSA, art. 12.04.
[183] FSA, art. 6.10.
[184] FSA, art. 3.02.
[185] FSA, art. 12.

implementation of the parties' shared intention: a claims process that is trauma-informed, expeditious, and culturally appropriate.[186]

123. The SIC's mandate is to implement the FSA in the best interests of the class.[187]

124. The parties intend that the SIC will facilitate an appropriate level of flexibility in the claims process and be able to respond to systemic issues. The SIC is empowered to engage experts in trauma, community relations and health and social services to provide advice on the implementation of the settlement, if required.[188] The SIC will also be responsible for bringing motions or protocols before the Court to adjust the claims process, as needed, in response to issues that may be identified.[189] The SIC will be in place throughout the claims period, which will last approximately 20 years following the approval of the FSA.

(p) Settlement Supports

125. The FSA is explicit in its provision of substantive supports for Class Members participating in the Claims Process, all of which is to be funded by Canada. This includes mental health, cultural supports, trained navigators who will promote communications and provide referrals to health services. These mental health and cultural supports will be funded based on the evolving needs of the Class, which will all be adapted to include innovative, First Nations-led mental health and wellness initiatives.[190] At all times, a phone line will be made available to provide a culturally-

[187] FSA, arts.
[188] FSA, arts. 12.03 (1) (j).
[189] FSA, arts. 12.03 (f) & 12.03 (3).
[190] FSA at s. 8(1) and (4).

safe, youth specific support line that would provide counselling services for youth and young adult class members and to refer same to post-majority care services when appropriate.[191]

126. In an effort to ensure that the full breadth of necessary supports would be included in Canada's funding obligation, in February of 2022 a group comprised of participants from the AFN, AFN class counsel, Moushoom class counsel, and Canada along with relevant experts, was formed to draft a framework for supports available to claimants.[192] These efforts eventually culminated in Schedule "C" to the FSA, being the "Framework for Supports for Claimants Throughout the Claims Process" ("**Supports Framework**").[193]

127. The Support Schedule outlines the holistic wellness supports that will be made available to claimants. These supports are significant in scope, and generally include: (i) service coordination and care teams approach for supports to claimants; (ii) the bolstering of the existing network of health and cultural supports; (iii) the provision of access to mental counselling to all Class Members; and (iv) support enhancement for either the Hope for Wellness Help Line or the establishment of a new dedicated phone line.[194]

128. With respect to the service coordination and care teams approach, this will include coordinated, seamless access to service and supports wherever possible, addressing administrative, financial literacy and health and culture supports depending on Class Members needs, to be provided in a culturally appropriate and trauma informed manner.[195] The FSA provides

[191] FSA at s. 8(3).

[193] FSA Schedule "C".
[194] FSA, Schedule "C", "Components".
[195] FSA, Schedule "C", "Component 1: Service Coordination and Care teams approach for supports to claimants".

specifically for financial literacy and investment options to enable class members to preserve their compensation.[196]

(q) Estates

129. The FSA provides that only the deceased members of the Removed Child, Jordan's Principle and Trout Child classes will be entitled to compensation.[197] However, the FSA does provide for compensation to members of the family classes where a complete claim for compensation was submitted prior to the individual's death.[198]

130. The FSA provides for the submission and treatment of claims both in circumstances where an Estate Executor or Estate Administrator has been appointed and where no such individual is in place.[199] In addition, provision is made for the assistance of ISC in the administration of the estates of eligible deceased class members and payment to personal representatives of class members who are, or become, Persons Under a Disability.[200]

(r) Public Apology

131. The FSA further contemplates Canada proposing to the Office of the Prime Minister that the Prime Minister make a public apology for the discriminatory conduct at the heart of the matter, and for the past and ongoing harm it has caused.[201]

(s) Future Work Required to Implement the FSA

132. The FSA is the culmination of approximately 18 months of collaboration and intensive negotiation among the parties. There are certain aspects of the compensation mechanisms that will

[196] FSA, art. 6.11 and Schedule C – Framework for Supports for Claimants in Compensation Process.
[197] FSA, art. 13.02.
[198] Ibid.

[201] FSA art. 23.

be determined following the Court's approval of the FSA and further refinement to the process throughout the claims process, as overseen by the SIC, all of which are ultimately subject to the Court's approval.

133. Some outstanding items, assuming the Court approves the FSA, include:

a) piloting and finalization of the Jordan's Principle assessment methodology;[202]

b) aggregation and assembly of ISC data regarding the Removed Child Family Class. Canada has committed to providing as much of the data as soon as possible to assist with administration of the claims process;

c) development of a notice plan for settlement approval and notice of claims process;

d) motion dealing with regulating non-class counsel providing legal services to the class and measures to prevent abuse and predation; and

e) design of the claims process and distribution protocol which will be the subject of a further motion for court approval in December 2022.

3. ISSUES

134. The issues to be decided on this motion are:

(a) should this Settlement be approved as fair and reasonable; and

(b) should some of the representative plaintiffs, identified below, receive an honorarium?

[202] See Ciavaglia Affidavit.

4. SUBMISSIONS

4.1 Legal Principles Governing Settlement Approval

135. Under Rule 334.29 of the *Federal Court Rules*,[203] class proceedings may only be settled with the approval of a judge. The test is whether the settlement is fair and reasonable and in the best interests of the class as a whole: *Merlo v Canada*.[204]

136. The standard is not "perfection", and the Court does not have the power to modify or alter the terms of a proposed settlement; rather, it must be considered as a whole, and the Court must accept or reject it on that basis.[205] In *Ford v F Hoffman-La Roche Ltd*,[206] Justice Cumming stated:

> [115] In general terms, a court must be assured that the settlement secures appropriate consideration for the class in return for the surrender of litigation rights against the defendants. However, the court must balance the need to scrutinize the settlement against the recognition that there may be a number of possible outcomes within a "zone or range of reasonableness":
>
> > ... all settlements are the product of compromise and a process of give and take and settlements rarely give all parties exactly what they want. Fairness is not a standard of perfection. Reasonableness allows for a range of possible resolutions. A less than perfect settlement may be in the best interests of those affected by it when compared to the alternative of the risks and costs of litigation. [citation omitted]

137. To reject a settlement, the Court must conclude that the settlement does not fall within this zone or range of reasonable outcomes.[207] As the Court stated in *McLean v Canada*:[208]

> [77] Reasonableness does not dictate a single possible outcome so long as the settlement falls within the zone. Not every provision must meet the test of reasonableness - some will, some will not. This result is inherent in the negotiation and compromises of a settlement. As discussed by Justice Shore

[208] 2019 FC 1075.

> in *Riddle* at paragraph 33, the settlement must be looked at as a whole and the alternatives of no agreement must also be factored into the analysis…

138. The focus is on the interests of the class as a group. Individual class members' interests should not be assessed in isolation.[209] In assessing the fairness and reasonableness of the proposed settlement, the court should consider the following non-exhaustive list of factors:[210]

a) the likelihood of recovery or likelihood of success;

b) the amount and nature of discovery, evidence or investigation;

c) the number of objectors and nature of objections;

d) the presence of arm's length bargaining and the absence of collusion;

e) the information conveying to the court the dynamics of, and the positions taken by, the parties during negotiations;

f) communications with class members during litigation; and

g) the recommendation and experience of counsel.[211]

139. Each factor is discussed below. Taken together, they support the conclusion that the FSA is fair, reasonable, and in the best interests of the Class.

4.2 Likelihood of Recovery or Success

140. Despite the Compensation Decision, these proceedings are fraught with uncertainty. As noted, Canada has filed a protective appeal of the judicial review decision upholding the Compensation Decision. In the absence of a settlement, the judicial review of the Tribunal proceedings alone is likely to make its way to the Supreme Court of Canada. Class members risk

[209] *Tk'emlups* at para. 39.
[210] *McLean* at para. 67.
[211] *T'kemlups* at para. 38; *Tataskweyak* at para. 64.

the loss of the Tribunal's compensation award, which itself covers only a subset of the Classes and is statutorily capped at a lesser amount than those provided to many class members under the FSA.

141. The certainty of a settlement resolving the proceedings, combined with the monumental compensation amount, is preferable to the risks associated with continuing to defend the Compensation Decision at the Federal Court of Appeal or to proceed with litigating the class action through to a trial.

142. While Canada consented to certification of the class proceedings and mandated its Ministers to focus upon the negotiation of a resolution, without an approved comprehensive settlement, the plaintiffs will be forced to continue to litigate. Like many First Nations class proceedings, the plaintiffs face evidentiary hurdles in proving historical or semi-historical wrongs.[212] Many harms were suffered decades ago, while the now-adult class members were children. In the case of more recent discrimination, the plaintiffs are still youths, and face the concomitant difficulties in gathering evidence from minors. More importantly, trying the case on its merits carries a significant risk of re-traumatization, as plaintiffs will be forced to testify in support of their claims.[213] If aggregated damages are not awarded, virtually the entire class would be exposed to that re-traumatization risk, which the FSA expressly avoids.

143. Even if successful on the merits at trial, there is no guarantee that any damages awarded by the Court would exceed $20 billion. Members of the Trout Class and Trout Family Class face more uncertainty given that the Trout Action is based upon Canada's discrimination *prior* to its recognition of Jordan's Principle in 2007. Similarly, members of the Removed Child Class and the

[212] *Tataskweyak* at para. 66; *Tk'emlups* at para. 44.
[213] *McLean* at para. 83; *Tataskweyak* at para. 67.

Removed Child Family Class for the period from 1991 to 2005 are not included in the Tribunal proceedings and therefore have no entitlement to any minimum amount of compensation.

144. If tried on the merits, these classes risk receiving less compensation than what would be available to them under the FSA.

145. The FSA enables the establishment of a claims process that avoids any confrontation by Canada of any claimant. This is an advantage that cannot be underestimated in a case involving children and young adults who have experienced trauma. This is also an advantage that it generally unavailable if a matter is litigated, as courts must allow defendants to challenge claims made by plaintiffs.

4.3 Amount and Nature of Discovery, Evidence or Investigation

146. Although the Tribunal proceedings involved a more limited group of complainants over a shorter time period, the work done in those proceedings enabled negotiations with a wealth of knowledge about the case. This combination of thorough pre-litigation investigation and significant remaining evidentiary hurdles supports settlement.[214]

4.4 Terms and Conditions of Settlement

147. The terms and conditions of the FSA, laid out above, are comprehensive, fair, and meet the plaintiffs' objectives, being to:

a) ensure proportionality of compensation based on objective factors serving as proxies for harm;

b) ensure that where compromise was required, it would favour the children who suffered;

[214] *McLean* at paras. 97-99.

c) ensure a trauma-informed and culturally sensitive process;

d) avoid any need for the interview or examination of class members in order for them to advance a claim;

e) create an accessible claims process;

f) provide comprehensive supports throughout the claims process; and

g) ensure all settlement funds are directed to class members and their families.[215]

148. The scope and amount involved in this settlement cannot be overstated. The $20 billion settlement amount far outstrips any class action settlement known in Canada in any context. It is more than four times the amount of compensation that was delivered under IRSS.[216] The scope of the settlement is also impressive, as life-changing compensation can be delivered to hundreds of thousands of survivors of Canada's discrimination. The individual amounts of compensation will have life-changing impacts for many of our most vulnerable and marginalized First Nations members.

149. Many of the terms most important to class members would be difficult to obtain through litigation, particularly regarding trauma minimization and safeguards to ensure settlement funds go directly to class members.

150. On the first point, the FSA was negotiated to reduce the risk of negative impacts to class members in the claims process. The implementation of previous class action settlements has resulted in First Nations' experiencing many negative impacts on their well-being. A fundamental lesson learned is that in class action proceedings addressing historical wrongs to First Nations, the process must be designed to avoid re-traumatization. In particular, the experiences of survivors in

[215] Colish Affidavit, para. 51.
[216] Colish Affidavit, para. 53.

the Independent Assessment Process under the IRSS has resulted in significant criticism for the re-victimization of IRS survivors in the claims process.[217]

151. As the Court has noted, if compensation is done in a manner that minimizes re-traumatization, it may also help to bring closure to a painful past, the value of which cannot be underestimated.[218] The parties' intentions in this regard are enshrined in the wording of the FSA. Specific safeguards include, *inter alia*:

a) the Administrator must consider its duties in a trauma-informed manner; [219]

b) the claims process must be trauma-informed and non-traumatizing to class members, including a guarantee that none of the child classes will be required to submit to an interview, examination, or other form of *viva voce* evidence taking; [220]

c) enhanced payments will be based on objective factors and data available from ISC wherever possible, to minimize the potential trauma of having to provide supporting documentation in support of a claim; [221]

d) the Administrator must presume claimants are acting honestly and in good faith, and draw all reasonable inferences in favour of class members; [222]

e) provisions regarding the Cy-près Fund, addressed below, explicitly provide that its objective is the provision of culturally sensitive and trauma-informed benefits to members of the Class who would be ineligible for direct compensation;[223] and

---

[217] *Tk'emlúps*, citing *Fontaine v Canada (Attorney General)*, 2018 ONSC 103 at para. 202.

[219] FSA, art. 3.02(1)(e).
[220] FSA, arts. 5.01(3), 6.02(1) & 6.05(2).
[221] FSA, art. 6.02(3).
[222] FSA, arts. 5.01(4)-(5).

f) substantial supports are provided to the class throughout the claims process, funded by Canada, including mental health, cultural supports, administrative and financial literacy supports, and trained navigators who will promote communications and provide referrals to health services and assistance with the claims process.[224]

152. Many of the above unique features of the FSA are not achievable by a litigated judgment.

153. On the second point, the FSA was drafted to ensure all settlement funds are available for the benefit of the classes. Class counsel's fees will be negotiated separately and paid directly by Canada with the Court's approval on a future motion, and not out of the settlement funds. Legal fees will be negotiated independently from the FSA, to ensure that the amount of the fees would not affect the settlement amount—a factor previously cited by this Court in support of settlement approval.[225] Finally, legal fees are severable, meaning the success or failure of negotiations on fees will have no impact on the FSA.

154. Every effort was made to ensure claimants will be able to navigate the claims process without the assistance of outside counsel, to ensure they will receive the full value of their compensation funds. It is essential to ensure that class members are not victimized by predatory individuals seeking a percentage of a claimant's entitlement simply for filling out a straightforward form. Under the FSA, supports and navigators are available to claimants to assist, in a culturally appropriate manner, with filling out and submitting claims form, obtaining supporting documentation and, if required, assistance with the appeals process.[226] Additional aid is available

---

[223] FSA, arts. 7.01(2) & (5).
[224] FSA, arts. 8(1) & (4).
[225] *Tatskweyak* at para. 75; *Tk'emlups* at para. 51.
[226] FSA, art. 3.02 (j).

from class counsel, at no cost to the claimants. These provisions are intended to preclude the need for paid assistance during the claims process, to better protect class members.

155. Although there are elements to inform the design and of the claims process which are currently underway, this should not hinder approval of the FSA. First, the claims process and distribution protocol are subject to the further approval of the Court; therefore, the Court will have the opportunity to consider only this element in detail prior to any implementation of the settlement. Second, following the approval of the FSA, the plaintiffs can, with the benefit of the significant expertise of the Administrator and outside experts, focus their efforts on testing and piloting the claims process prior to seeking court approval.

156. Finally, this staggered approach is consistent with the Court approvals sought to date. Throughout these proceedings, the parties have purposefully approached each element—from certification, to notice plan approval, to notice to the class, to the appointment of an administrator, to settlement approval—in a staggered manner to ensure that all aspects have been fully considered and reasoned before being put to the Court for approval. The approval of the FSA now with subsequent approval of the claims process and distribution protocol to be considered in December similarly allows for the extensive work, consultation and vigorous testing required to take place in the intervening months with the safeguard of the Court's ultimate oversight of the process prior to implementation.

4.5 Future Expense and Likely Duration of Litigation

157. Continued litigation will likely be long, complex, expensive, and may ultimately jeopardize compensation for class members. The prompt payment of compensation is one of the tangible benefits to resolving this matter as expeditiously as possible. The survivors of Canada's discrimination have been forced to wait for resolution of the issue of compensation for too long. The Court's approval of the FSA will ensure that the settlement funds will be made available to the impacted individuals far sooner without continued judicial proceedings, ensuring that those most impacted will not be subjected to the uncertainty of protracted litigation. The Court summed up a comparable situation in evaluating the terms of a settlement agreement in *Tk'emlúps*:

> … while acknowledging that no amount of money can right the wrongs or replace that which has been lost…. what is certain is that continuing with this litigation will require class members to re-live the trauma for many years to come, against the risk and the uncertainty of litigation. Bringing closure to this painful past has real value which cannot be underestimated.[227]

4.6 Recommendation of Neutral Parties

158. The FSA has benefited from an unprecedented level of consultation with First Nations leadership and communities,[228] and a significant amount of third-party review, comment, and criticism. Furthermore, negotiations took place under the supervision of the Honourable Leonard Mandamin, and then intensive settlement discussions were facilitated by the Honourable Murray Sinclair. These eminent First Nations jurists assisted the parties in dealing with numerous challenging and important issues, and enabled the parties to finalize a monumental and historic agreement.

---

[227] *Tk'emlúps* at para. 63.
[228] Ciavaglia Affidavit, para. 14.

4.7 Number and Nature of Objections

159. Nobody has yet contacted the administrator to express an intention to object to the FSA in writing or in person at the settlement approval hearing.[229]

4.8 Arm's Length Bargaining and Absence of Collusion

160. The parties have collaborated where possible, including in the retention of experts to estimate class sizes, and both believe this settlement to be the best outcome of this litigation. That said, this has been an adversarial case. Both the plaintiffs and Canada have advanced their positions in this and prior proceedings and all parties are prepared to proceed to trial if settlement fails. Canada has filed a protective appeal on the judicial review decision of the Compensation Decision to advance its interests should the FSA be rejected.

161. The parties engaged in more than a year and a half of intensive negotiations and mediation. These negotiations started initially with the Moushoom Class Action in 2019. They continued through the Consolidated Class Action from November 2020 to the date the FSA was signed in June 2022. The process has been as transparent and open to external feedback and comment as is practicable in a settlement privileged environment. Negotiations were overseen first by court-appointed mediator and retired Federal Court Judge, the Honourable Mr. Mandamin, and second by the Honourable Mr. Sinclair, chairman of the Indian Residential Schools Truth and Reconciliation Commission. At all stages, the plaintiffs' negotiating positions have been communicated to and informed by instructions from the representative plaintiffs and by feedback received from First Nations stakeholders via the AFN's community consultations across the country.[230]

[229] Colish Affidavit, para. 112.
[230] Colish Affidavit, paras. 6, 28; Ciavaglia Affidavit, paras. 13-14.

162. There is a strong presumption of fairness when a proposed settlement is negotiated at arm's-length by class counsel as was the case here.[231]

4.9 Communications with Class Members

163. Trauma-informed and culturally appropriate communications have played a central role in these class proceedings. Throughout negotiations, class counsel and the AFN have been in close contact with the representative plaintiffs, class members, and First Nations communities more broadly.[232]

164. Counsel for the plaintiff, the AFN, provided ongoing updates to First Nations leadership on negotiations, the structure of the settlement, and the substance of what would be included in the FSA.[233] They provided approximately 50 briefings to the AFN Executive, AFN regional chiefs, or Chiefs' Assemblies.[234] The Cy-près Fund was designed based on recommendations from a report authored by First Nations youth with relevant lived experiences.[235]

165. The finalized FSA was reviewed by each representative plaintiff, the AFN Executive Committee, and finally the Chiefs-in-Assembly at the AFN Annual General Assembly.[236]

166. The plan for notice of certification and settlement approval was approved by the Court on August 11, 2022, and, as described above, an intensive notice campaign began on August 19, 2022.

[235] Ciavaglia Affidavit, para. 16.
[236] Ciavaglia Affidavit, para. 18.

4.10 Recommendation and Experience of Class Counsel

167. Class counsel view this settlement, as reflected in the FSA, as the best possible resolution to complex and lengthy proceedings. In addition to finally providing resolution of all outstanding legal proceedings and ensuring timely delivery of compensation, the approval of the FSA will significantly expand the number of class members who would otherwise not be entitled to compensation and allows those who suffered the greatest harm to be compensated commensurately.[237]

168. At all stages, class counsel have been mindful of the lessons learned from prior Indigenous class action settlements, most notably the IRSS. This is reflected in the numerous provisions designed to avoid re-traumatization, including the simplified claims process, the support and assistance available to claimants, and the presumptions in favour of claimants.[238]

4.11 Appropriateness of *Cy-près* for Certain Class Members

169. Rule 334.28(2) of the *Federal Court Rules* allows the Court to make "any order in respect of the distribution of monetary relief, including an undistributed portion of an award that is due to a class or subclass or its members". In cases where some or all class members would receive only a small portion of a settlement, such that direct distribution is impracticable, courts have approved cy-près distributions to relevant not-for-profit entities instead of direct payments to class members.[239] In *Sun-Rype Products Ltd. v. Archer Daniels Midland Company* made under analogous BC legislation, the Supreme Court of Canada held that "the precedent for cy-près distribution is well established… [a]nd, while its very name, meaning 'as near as possible',

[237] Colish affidavit, paras. 5-8.
[238] *Tataskweyak* at para. 107.
[239] Michael A. Eizenga et al, *Class Actions Law and Practice, 2nd Edition*, LexisNexis Canada (looseleaf), paragraph 9.20.

implies that it is not the ideal mode of distribution, it allows the court to disburse the money to an appropriate substitute for the class members themselves".[240]

170. In approving a cy-près distribution, the Court should consider whether the proposed donation will: (i) indirectly benefit the class; and/or (ii) have the consequence of behaviour modification for the defendant.

171. In this case, the Cy-près Fund meets the above test in indirectly benefitting the class members who may not be eligible for compensation under the FSA (such as siblings and non-caregiving parents) and promotes Canada's behaviour modification with respect to the discrimination at issue in this litigation.

172. Given the overwhelming legal and factual uncertainties in including siblings, parents or grandparents who do not have a caregiving role with the affected child in a viable settlement render the Cy-près Fund a fair and reasonable option that benefits such class members. Furthermore, if direct compensation were provided to such class members, the plaintiffs believe the settlement funds would be unfairly diluted in a manner inconsistent with the principle of proportional compensation, which governed the negotiations and was fully supported by all representative plaintiffs.[241] The parties have instead elected to ensure that those most affected—the children themselves, and their direct caregivers—will be adequately compensated, while making indirect but highly-relevant provision for the remaining family class members through the Cy-près Fund.

[241] Osachoff Affidavit, paras. 36-37; Walterson Affidavit, paras. 36-39; Bach Affidavit, paras. 32, 37; Buffalo Affidavit, paras. 52-54; Meawasige Affidavit, paras. 22, 28; Moushoom Affidavit, para. 52; Trout Affidavit, paras. 26-27.

4.12 Honoraria for Representative Plaintiffs

173. Class counsel submits that honoraria of $15,000 should be awarded to each representative plaintiff to be paid out of class counsel's legal fees, with the exception of two representative plaintiffs who wish to personally decline any honorarium awarded, being Mr. Meawasige and Ms. Osachoff. Mr. Meawasige has requested an honorarium for his brother, Jeremy, as Jeremy's litigation guardian.[242]

174. Although no specific Rule governs the payment of honoraria to a representative plaintiff, the Federal Court has the discretion to award such payments and has done so in numerous previous cases.[243] Honoraria are meant to recognize the meaningful contributions to class members' pursuit of access to justice.[244]

175. Factors weighing in favour of an honorarium include where a representative plaintiff has:

a) forfeited their privacy in a high-profile class litigation;[245]

b) publicly re-lived their trauma in order to advance the claim;[246]

c) engaged with class members and community members to raise awareness and counter misinformation;[247] and

d) endured cross examinations, and was prepared to testify at trial.[248]

---

[242] Meawasige Affidavit, paras. 29-30; Osachoff Affidavit, para. 39.
[243] *Lin v Airbnb, Inc*, 2021 FC 1260 at para. 118.
[244] *Lin* at para. 119.
[245] *McLean v Canada*, 2019 FC 1077 at para. 57; *Merlo v Canada*, 2017 FC 533 at paras. 68-74; *Lin* at para. 119.
[246] *McLean* at para. 59; *Tk'emlups* at para. 48.
[247] *Tk'emlups* at para. 50.
[248] *Condon v Canada*, 2018 FC 522 at para. 116.

176. The representative plaintiffs in this case have been active advocates for the class despite their own trauma. Each has spent significant time and effort in advancing this case for their respective classes by:

a) foregoing their privacy;

b) communicating extensively with class counsel;

c) reviewing documents, preparing affidavits, and instructing counsel;

d) travelling to attend meetings, including mediation and settlement meetings;

e) meeting with experts; and

f) raising awareness with class members, including by speaking directly with class members and the media, and speaking in their capacity as representative plaintiffs at the AFN's Annual General Assembly in support of the settlement.[249]

177. Additional sacrifices and investments were required of the representative plaintiffs given the specific harms at issue. The nature of an Indigenous class action involving systemic discrimination against children is meaningfully different from one involving, for example, product liability or a purely monetary harm. To advance the class members' interests, representative plaintiffs in this action have publicly disclosed and relived traumatic and deeply personal stories. Doing so was painful and retraumatizing. Some representative plaintiffs unfortunately suffered harm to the relationships with their adoptive families in choosing to pursue this action.[250]

[249] Moushoom Affidavit at paras. 37-46; Trout Affidavit at paras. 16-30; Meawasige Affidavit at paras. 14-28; Bach Affidavit at paras. 44-50; Walterson Affidavit, paras. 44-50; Buffalo Affidavit, paras. 59-64; Jackson Affidavit, paras. 25-30.
[250] Bach Affidavit, para. 16; Walterson Affidavit, paras. 25-27.

178. Such efforts and sacrifices in favour of the class has been cited in prior Indigenous class actions as conduct deserving of an honorarium.[251] Furthermore, the same amount requested for these representative plaintiffs was previously granted by the Court in an analogous Indigenous class action.[252]

5. ORDERS SOUGHT

179. The plaintiffs, with the consent of Canada, seek the following orders from this Court:

a) a declaration that the FSA is fair, reasonable and in the best interests of the class;

b) an order approving the FSA pursuant to Rule 334.29(1) of the Federal Courts Rules;

c) a declaration that the FSA is binding on the representative plaintiffs, on all class members, and on the defendant;

d) an order dismissing these proceedings against the defendant, without costs and with prejudice;

e) an order approving a $15,000 honorarium payment to each of the following representative plaintiffs:

(a) Xavier Moushoom;

(b) Jeremy Meawasige (by his litigation guardian, Jonavon Joseph Meawasige);

(c) Zacheus Joseph Trout;

(d) Ashley Dawn Louise Bach;

[251] *McLean 2*, para. 59; *Tk'emlúps 2*, para. 48.
[252] *Tk'emlúps 2*, para. 52.

(e) Melissa Walterson;

(f) Noah Buffalo-Jackson by his Litigation Guardian, Carolyn Buffalo;

(g) Carolyn Buffalo; and

(h) Dick Eugene Jackson also known as Richard Jackson;

f) an order that if the FSA is not approved, the parties are all restored, without prejudice, to their respective positions as such existed prior to the proposed settlement (*i.e.*, both the FSA and the parties' agreement in principle on compensation dated December 31, 2022 are null and void);

g) an order that the approval of the FSA is conditional on and does not become effective until an order is rendered by the Canadian Human Rights Tribunal ("Tribunal") in CHRT File T1340/7008 declaring that the FSA satisfies the compensation orders and framework for compensation made by the Tribunal regarding an overlapping part of the class; and

h) such further and other relief as counsel may request and this Honourable Court may deem just and appropriate.

ALL OF WHICH IS RESPECTFULLY SUBMITTED this 6th day of September, 2022.

APPENDIX A – LEGISLATIONS

334.29 of the *Federal Court Rules* SOR/98-106

Settlements

Approval

334.29 (1) A class proceeding may be settled only with the approval of a judge.

Binding effect

(2) On approval, a settlement binds every class or subclass member who has not opted out of or been excluded from the class proceeding.

Règlement

Approbation

334.29 (1) Le règlement d'un recours collectif ne prend effet que s'il est approuvé par un juge.

Effet du règlement

(2) Il lie alors tous les membres du groupe ou du sous-groupe, selon le cas, à l'exception de ceux exclus du recours collectif.
